Quarterly revenues increased 42 percent to $963,316 as compared to revenues of $677,895 a year ago. Losses decreased 59 percent to $64,740 ($.01 per share) as compared to losses of $157,389 ($0.02 per share) for the quarter ended March 31, 1989. The weighted average number of common shares were 8,400,899 in 1990 and 7,798,899 in 1989.

The company also announced that it was in the process of raising $750,000 in new equity by the issuance of 7.5 million shares of its common stock for cash and conversion of debt. As of June 30, the company has raised $585,000. The company's chairman, Hans P. Beekwilder, purchased 5.3 million of the shares being sold, raising his ownership of the company to approximately 48 percent.

In announcing the results for the first quarter and the stock purchase agreement, David P. Lieberman, president of OASIS, stated that first quarter results reflect decisions made in late 1989 to improve operating performance.

''We are continuing to reduce our fixed overhead costs and should see continued improvement in our operating results due to the renegotiation of

our office lease.

''Sale of new franchises, increased royalties from existing franchisees and the substantial reduction in fixed expenses are what led to our ability to raise additional capital from existing shareholders, which provides OASIS with the working capital to continue our domestic expansion '' said Lieberman.

OASIS common stock is traded in the over-the-counter market.

WASHINGTON (JULY 6) PR NEWSWIRE - Airbus Industrie today released the following statement:

Contrary to some press reports, Airbus Industrie is not involved in the acquisition of a share in Aerolineas Argentinas, nor in the privatization plans of the airline.

Airbus Industrie is an aircraft manufacturer -- not an airline -- and it has absolutely no strategy of acquiring equity in airlines.

Aerolineas Argentinas is neither an operator of Airbus aircraft, nor a customer of the European consortium.

NEW YORK (JULY 6) PR NEWSWIRE - Vice Chancellor Maurice Hartnett of the Delaware Chancery Court today found that the Centaur Partners Group received and timely delivered consents representing a majority of the outstanding shares of National Intergroup, Inc. (NYSE: NII) in Centaur's recent consent solicitation. The vice chancellor's ruling validates the report of the inspector of election chosen by the NII board.

Today's ruling enables Centaur to go forward with its appeal to the Delaware Supreme Court that the consent of only a majority of the outstanding shares is necessary to expand NII's board to 15 members. If Centaur is successful on this appeal, eight directors, or a majority of the board, will be elected at NII's annual meeting scheduled for July 25.

Melvyn Estrin and Abbey Butler, principals of the Centaur Partners Group,

stated: "We are gratified that Vice Chancellor Hartnett has validated the stockholder mandate certified by the independent inspector chosen by the NII board. We once again call on NII to heed this mandate and increase the size of the board instead of its repeated attempts, using corporate funds, to block the expressed will of a majority of the NII shares."

DALTON, GA (JULY 6) PR NEWSWIRE - CrownAmerica, Inc., (NASDAQ: CRNA) a major processor of filament yarn for U.S. and international carpet manufacturers, today reported operating results for the third quarter and first nine months of its 1990 fiscal year.

At the same time, the Company's Board of Directors declared a quarterly cash dividend of $.125 per common share, payable July 26, 1990 to shareholders of record at the close of business July 12, 1990.

David Hamilton, president of the Dalton-based company, said revenues for the quarter ended June 2, 1990 were $15,990,000, as compared to $19,744,000 posted in the same period a year ago. Net income for the most recent quarter was $3,000, as compared to $71,000, or $.07 per share, recorded in the third quarter of fiscal 1989.

Revenues for the nine months ended June 2, 1990 were $51,843,000, as compared to $58,145,000 generated in the same reporting period of the previous year. Net income for the first three quarters of the current year was $842,000, or $.80 per common share, as compared to $1,217,000, or $1.15 per common share, recorded in the corresponding quarter a year earlier.

Results for the first nine months of the previous year included an after tax gain of $319,000, or $.30 per common share, from the sale of the Company's U.K. subsidiary in September 1988, and exchange gains of $147,000, or $.14 per common share. Results for the first nine months of the current fiscal year included exchange gains of $330,000, or $.31 per share.

"Sales were down sharply in both our domestic and international operations in March, the first month of our third quarter," Hamilton said. "Sales did rebound somewhat in April and May, enabling us to post a slight profit for the full quarter. While overall market conditions in our industry continue to remain soft, our sales here and overseas are increasing. We are hopeful that results in the fourth quarter will show further improvement."

CrownAmerica, Inc. is engaged chiefly in the processing of heat-set filament yarn for the carpet industry through its Texture-Tex subsidiaries which operate plants in Dalton and Valdosta, Georgia, and near Heerlen in The Netherlands. The Company also operates a warehousing and leasing subsidiary for light manufacuturing and storage in Dalton, Georgia.

ARLINGTON, VA (JULY 6) PR NEWSWIRE - USAir today reported virtually no change in revenue passenger miles flown in scheduled service during June compared with the same month of 1989.

Available seat miles flown rose 7.1 percent, while passenger boardings were down 7.7 percent from the same month a year earlier. June load factor was 63 percent compared with 67.7 percent for June 1989.

During the first six months of 1990 USAir posted a gain of 4.7 percent in revenue passenger miles flown versus the same period of 1989, a gain of 6.7 percent in available seat miles flown, and a drop of 1.9 percent in passenger boardings. Year-to-date load factor was 59.4 percent compared with 60.6 percent for the same period of 1989.

Statistics for the 1989 periods prior to USAir's merger with Piedmont Airlines on Aug. 5, 1989, have been restated to reflect the combined airline operations of both carriers on a pro forma basis.

DALLAS (JULY 6) PR NEWSWIRE - E-Systems announced today several management changes with Paul Arnone being named to the newly created position of Vice President for Advanced Technology Marketing.

Arnone, a founder and President of Engineering Research Associates (ERA), an E-Systems subsidiary based in Vienna, Va., acquired in August 1989, will report to A. L. Lawson, president and chief operating officer, effective immediately. Concurrently, Dr. Terry Collins was named vice president and general manager and Victor Sellier as vice president and assistant general manager of ERA.

Both Dr. Collins and Sellier have been with the company for more than ten years, serving in a number of technical and management capacities and have made significant contributions to ERA's growth and success in intelligence and surveillance systems. Dr. Collins spent ten years at the Naval Research Laboratories in their Communication Sciences Division and also taught graduate level courses at George Washington University.

In announcing the appointments, Lawson said "Mr. Arnone will primarily focus on the development of new markets for E-Systems technology. This addition to the E-Systems corporate structure is in keeping with its planned objective of expanding existing corporate capabilities to meet the growing competitive challenges ahead."

"Mr. Arnone will coordinate multi-divisional new business opportunities, assist in charting new business directions and participate in the identification and evaluation of corporate acquisitions. E-Systems unique position in the reconnaissance and surveillance defense system market provides a strong base of technology directly applicable to other government and industrial markets," Lawson said.

E-Systems, (NYSE-ESY), is a major worldwide developer and producer of electronic systems and products in the areas of intelligence, reconnaissance, and surveillance systems, command and control, electronic warfare, specialized aircraft maintenance and modification, guidance, navigation and control, communications and data systems.

KING OF PRUSSIA, PA (JULY 6) PR NEWSWIRE - Worlco Inc. (NASDAQ: WORLA), the King of Prussia-based holding company, has reported a significant improvement in its operations for the fiscal year ended March 31, 1990, compared to results for the prior year.

Revenues increased to $40,857,797, resulting in net income of $888,797 compared to $32,202,624 and a loss of $1,084,732 in the prior year. Earnings per share were 12 cents per share on approximately 7 million shares outstanding, compared to a loss of 18 cents per share on approximately 6.3 million shares outstanding for the prior period. Assets increased from $39,090,831 to $46,829,214 and net equity increased from $2,509,375 to $3,351,668.

The company said it feels that the figures presented in its year-end statement reflect the progress it has been confident of achieving in the past year. Primarily these results derive from improvement in the operations of the company's main subsidiary, World Life & Health Insurance

Company of Pennsylvania and the continuation of profitability in its other operations.

DENVER (JULY 6) PR NEWSWIRE - Unique Mobility Inc. announced today that at final count, 18 of 32 university teams competing in the GM Sunrayce U.S.A. were being powered by UNIQ(R) motor and controller systems.

Beginning July 9 in Lake Buena Vista, Fla. and ending on July 19 at the GM Tech Center in Warren, Mich., this premier American solar car race will travel 1,630 miles through eight states. The U.S. Department of Energy and SAE have joined General Motors as sponsors of the event.

As the Unique support team of engineers and technicians left for the starting grid in Florida, Ray A. Geddes, Unique's chairman and chief executive officer said, "This race provides an excellent opportunity for energy efficient technology to be showcased in a competitive environment and we are pleased to be acknowledged as a leader in the field."

Unique and it's venture partner, Alcan Aluminium Ltd., have developed a highly efficient, electronically controlled, power dense permanent magnet motor that develops near two horsepower per pound of motor weight - a virtual breakthrough in efficient traction drives for the electric vehicle of the future.

Geddes added "On behalf of Alcan and Unique, I wish all of our teams good luck and encourage fans along the race route from Florida to Michigan to view these remarkable solar powered vehicles as an example of the ingenuity that young minds can bring to the solution of future transportation problems.

Unique has also provided motors and controllers to teams participating in the Second World Solar Challenge (Darwin to Adelaide, Australia) this November and to the Solectria Corp.'s Lightspeed, winner in the American Tour de Sol, the American Solar Car Championship on May 27.

Unique Mobility, a publicly held Colorado based engineering firm, is currently involved in a variety of electronic and hybrid electric vehicle programs designed to improve vehicle operating efficiency while reducing pollution.

SEATTLE (JULY 6) PR NEWSWIRE - The Boeing Co. (NYSE: BA) forecasts that its Washington state work force will decline by approximately 2,700 during the second half of the year, bringing job reductions for the year to about 5,600.

Boeing announced in January that its work force in the state would be reduced by 5,000 this year. The increase in total job reductions for 1990 results from defense program cuts that were unknown in January, and future changes may occur based on defense budget decisions.

During the first six months of 1990, the Boeing work force in Washington state was reduced by approximately 2,900. Of that number, approximately 2,500 were through attrition and 400 by layoff.

The reduction during the second half of the year will also occur through attrition and layoffs.

Currently the Boeing work force in Washington state totals 103,800, and the Boeing work force worldwide is 161,000.

The Washington state work force at the beginning of the year was just under 106,700, and worldwide it totaled 164,600.

WARREN, NJ (JULY 6) PR NEWSWIRE - The Chubb Group of Insurance Companies announced today that it will expand its ability to serve customers on a global basis by underwriting directors and officers liability in Japan.

Federal Insurance Company, a member of the Chubb Group of Insurance Companies, has received approval from Japan's minister of finance to underwrite directors and officers liability coverage for Japanese multinationals with subsidiaries in countries where executives and board members may be subject to lawsuit.

"This insurance protection is important in today's business world as Japanese companies expand their investments overseas and engage in trade with other nations," said George T. Van Gilder, managing director of Chubb. "We are pleased to have the opportunity to enhance our capacity to serve our international customers wherever they choose to do business."

Directors and officers liability insurance provides financial protection to corporate executives and board members to defend against lawsuits that challenge their legal duties and obligations.

At the end of 1989, the Chubb Group of Insurance Companies underwrote approximately 25 percent of the directors and officers liability coverage in the United States and ranked second in premium volume, according to the Wyatt Company, which conducts an annual survey of directors and officers liability coverage.

Licensed to underwrite directors and officers liability in Japan as of June 11, 1990, Chubb is now accepting inquiries for this coverage.

DALLAS (JULY 6) PR NEWSWIRE - American Airlines Inc. flew 6.9 billion revenue passenger miles in June, a 0.3 percent drop from June 1989 but still the fourth strongest traffic month in the airline's history. American set an all-time, single-day record on June 28 when it flew 282.3 million passenger miles.

For the first six months of the year, American's passenger traffic was up 5.2 percent.

On the cargo side, American continued its robust performance in June, recording a traffic increase of 12.5 percent. Its cargo traffic was up 20 percent for the January to June period.

Michael W. Gunn, American's senior vice president-marketing, said the airline is generally pleased with its June performance, and is especially pleased with international traffic, which grew 14 percent last month.

"Load factors on many European routes exceeded 80 percent," Gunn said, "and Pacific traffic, although somewhat below last year, was still very strong."

Gunn also noted that domestic traffic in June of 1989 was bolstered by a "Kids Fly Free" promotion.

American's available seat miles increased 4.7 percent in June, to 10.18

billion from 9.72 billion. Passenger boardings for the month were down 3.6 percent, to 6,495,400 from 6,737,395. The June system load factor of 67.4 percent was a 3.4 point drop from last year's 70.8 percent.

For the January to June period of 1990, American's revenue passenger miles were 36.91 billion, up 5.2 percent from last year's 35.18 billion. Available seat miles jumped 6.7 percent for the half, to 59.65 billion from 55.91 billion. The system load factor was down 0.8 points to 61.9 percent from 62.7 percent. Passenger boardings were up 3.4 percent to 35,884,789 from 34,717,323.

American's freight ton miles increased 12.5 percent in June, to 64.7 million from 57.5 million. System mail ton miles totalled 21.6 million in June, a 3.4 percent increase from 20.9 million.

Freight ton miles for the first six months climbed 20 percent to 364.8 million from 304 million. Mail ton miles in the period were up 19.8 percent, to 134 million from 111.9 million.

"Cargo traffic continues to benefit from the overall expansion of American's route system and our intensified emphasis on service quality," said William R. Boesch, the airline's vice president-cargo. "Every new flight and every new destination creates another new opportunity for cargo."

DEARBORN, MI (JULY 6) PR NEWSWIRE - CMS Energy Corporation (NYSE: CMS) announced today that Michigan Circuit Court Judge James R. Giddings granted the company's motion to remove restrictions on the use of the $1.5 billion of CMS Energy's debt and equity interests in the Midland Cogeneration Venture (MCV).

Specifically, the court removed all restrictions on the use by CMS Energy Corporation of the principal amount of $1.2 billion of MCV notes and the approximately $300 million of equity in the MCV held by CMS Energy. The court's action relieves Consumers Power Company from the obligation to file a $100 million surety bond previously required by the court.

In addition, the court stated that, consistent with the June 8, 1990 Michigan Court of Appeals decision, Consumers Power Company is required to maintain a $450 million corporate bond to secure the payment of any potential refunds arising out of final court decisions relating to Michigan Public Service Commission Orders.

The Circuit Court's decision today will not become effective until Aug. 3, 1990, during which time the Michigan Court of Appeals may consider requests by parties to review the adequacy of the $450 million bond.

CMS Energy Corporation is a $3 billion (sales) diversified energy company with businesses engaged in the distribution of electricity and natural gas interstate storage and transmission of natural gas, oil and gas exploration and production, independent power generation and utility services. CMS Energy Corporation's principal subsidiary is Consumers Power Company, Michigan's largest utility and the nation's fourth- largest combination utility.

#90187p2307 07/06/1990 ~PR Newswire

NOORDWIJK, Netherlands (JULY 6) PR NEWSWIRE - The U.S. commissioner to the International Whaling Commission (IWC) intervened at a crucial moment yesterday to preserve the global ban on whaling, according to the World Wildlife Fund/The Conservation Foundation (WWF).

Because of the U.S. action, a majority of IWC member nations voted not to consider Iceland's bid to set a catch quota for minke whales.

In addition, a proposal by Japan to start small-type coastal whaling was also rejected by the commission by a vote of 15 to 5, with 8 abstentions.

"The IWC has no intention of overturning the international moratorium on commercial whaling. While some nations refuse to respect this decision,

the majority of nations have committed themselves to conservation of the world's great whales," said Michael Sutton, WWF-U.S. representative at this year's meeting.

Early in the day, Iceland proposed that central stock of North Atlantic minke whales should be reclassified using the existing management procedure, which the majority of the commission has decided is inadequate. The commission voted 6 to 10 against the proposal, endorsing the Scientific Committee's assessment that the present method of managing these whales is unsafe.

Iceland then stunned the commission by proposing a catch quota of 200 minke whales from the central Atlantic stock over a five-year period -- a move which threatened to overturn the moratorium. U.S. Commissioner William Evans intervened immediately, challenging the commission's right to vote on catch quotas while the moratorium was still in place.

A vote was then taken on whether the commission could vote on Iceland's proposal, and the commission decided -- 10 to 8, with 8 abstentions -- that the proposal could not be considered at this time, thus upholding the global whaling ban.

"The U.S. commissioner saved the day -- and the moratorium," Sutton said. "We came very close to losing the whaling ban by clever maneuvering on the part of Iceland." But swift intervention by the U.S. commissioner, backed by strong statements from many other commissioners, sent a clear signal to the whaling countries that their plans to resume whaling would not be tolerated. This message was further reinforced by the commission's defeat of Japan's bid to kill 50 minke whales in "small-type coastal whaling." For the fourth year in a row, the commission rejected Japan's attempt to classify this type of whaling as non-commercial subsistence hunting.

With nearly 1 million members in the United States alone, WWF is the world's largest private conservation organization working worldwide to preserve and protect wildlife and wildlands and to improve the quality of the environment by promoting the wise use of the Earth's resources.

PALM BEACH, FL (JULY 6) PR NEWSWIRE - J. Russell Duncan, chairman of Milastar Corporation (NASDAQ: MILAA), announced today that the company's consolidated income before provision for income taxes for the fiscal year ended April 30, 1990, amounted to $623,000 ($.30 per share) compared to

$4,613,000 ($2.22 per share) reported in the prior fiscal year and consolidated net income for fiscal 1990 was $353,000 ($.17 per share) as compared to net income of $2,888,000 ($1.39 per share) reported in fiscal 1989. The improvement resulted from a $1,230,000 (43 percent) increases in sales as well as cost containment and consolidation programs implemented during fiscal 1990. Net income for fiscal 1989 included the collective effect of a $4,482,000 non-recurring capital gain before taxes from the sale of a stock investment and coincidentally, a dramatic $450,000 increases in interest income.

The stock sale resulted in cash proceeds to the company of $6,246,000, including a gain, after applicable income taxes, amounting to approximately $2,800,000 ($1.34 per share).

Milastar Corporation ("Milastar") is an operating company having a wholly owned modern metal heat treating and processing plant, Flame Metals Processing Corporation ("Flame"), serving the Minneapolis-St. Paul industrial market, and holding a substantial sum of cash and cash equivalents.

Milastar is in a very liquid position. Its holdings of cash and cash equivalents and marketable securities and other investments amount to $5 million. Current assets account for 80 percent of the company's total assets. Consolidated financial ratios further confirm the company's exceptional liquidity; net working capital equals $4.7 million; current ratio equals 4.4:1; debt to equity ratio equals 1.8 percent. The company's equity section was bolstered by the sale, during fiscal 1989, of 726,355 newly issued Series B common shares (each entitled to 1/4 vote) for $1,700,000.

Management projects consolidated operating earnings for the forthcoming fiscal year will be augmented by a combination of sharply lower interest expense and higher Flame operating earnings.

Milastar is unrelentingly seeking to acquire new technology, extend its marketing position and acquire complimentary businesses.

"Operating results for fiscal 1990 were in keeping with our expectations and compare favorably to results for fiscal 1989 if the one-time gain from the disposition of Big Splash restaurants and a one-time income tax benefit are eliminated from fiscal 1989 results," Joel Schwartz, president said.

"It was the eighth consecutive year of increased restaurant sales, attesting to the growth appeal of our dining concept," he added.

"The first Benihana Cafe, a more intimate version of our traditional restaurant, opened in New York during the fourth quarter. We are aggressively seeking additional appropriate locations nationally for more Cafes," Schwartz concluded.

TULSA, OK (JULY 7) PR NEWSWIRE - A jury found for Seismograph Service Corporation on all counts in a retrial of breach of warranty claims by Geophysical Systems Corporation.

The jury, sitting in U.S. District Court for Los Angeles, returned its decision on Friday, June 29.

A previous trial had resulted in a verdict for Geophysical Systems Corporation. The court, however, set aside that verdict, resulting in the retrial.

Ian Cheshire, president of Seismograph Service Corporation, said, "We are pleased that Seismograph Service Corporation has been fully vindicated."

Seismograph Service Corporation is a wholly owned subsidiary of Raytheon Company.

HIGHLAND PARK, MI (JULY 6) PR NEWSWIRE - For the fourth year in a row, Chrysler Corporation (NYSE: C) placed first among the domestic auto manufacturers in the J.D. Power Car Customer Satisfaction Index (CSI) of overall product quality and dealer service.

In Power's corporate comparison, Chrysler headed the list of domestic makers with a score of 119, which was two points ahead of General Motors five points ahead of Ford Motor Co.

Chrysler Corporation Chairman Lee A. Iacocca said: "The 1990 Power survey shows once again that Chrysler's commitment to building quality products and selling and servicing them through a quality dealer network continues to pay off.

"Not only has Chrysler swept the honor for a fourth straight year, but our score has improved each year. That reflects the emphasis we've placed on our Quality Improvement Program and the fact that our dealers and employees take our quality goals seriously. We're already trying our best to make it five in a row."

Dodge Dynasty and the Chrysler New Yorker were the highest scoring domestic makes in the upper middle segment. Chrysler Corporation also had the two highest scoring domestic makes in the lower middle segment.

In fact, Chrysler Corporation had six cars in the top 10 places in the lower middle segment with Dodge Aries second at 142; Plymouth Acclaim, Chrysler LeBaron GTS, and Dodge Spirit bunched closely together at 133, 132 and 131, respectively, and Plymouth Reliant and Dodge Colt/Vista rounding out the top 10.

The Chrysler LeBaron coupe/convertible took second in the middle specialty segment, giving the company the second-place spot in three of seven segments.

The 10th annual Power CSI survey was compiled from responses of buyers of new 1989 model year automobiles registered in February, March and April 1989.

The survey asked new-car owners to report on their first year of car ownership, including their satisfaction with the car, the dealer and the overall experience.

The 1990 Car Customer Satisfaction Index Report is published by the market research firm of J.D. Power and Associates, Agoura Hills, Calif.

AKRON, OH (JULY 6) PR NEWSWIRE - General Tire today announced a price increase ranging from two to four percent on its General-brand tires for the replacement market. The increase, necessitated by the continued escalation of various related costs, takes effect on Aug. 1, 1990.

The General brand replacement tires, which are shipped to independent dealers and company-owned stores across the country, include tires for passenger and off-road vehicles, light and medium trucks, small and large farm and industrial vehicles.

Prices on all passenger tire lines will increase four percent with the exception of high performance lines, which will rise three percent.

Light truck radial tires will increase 3.2 percent with bias constructed being raised to three percent. The S-330 and D-440 medium truck tires will increase four percent.

All other medium truck, off-the-road specialty tires, farm and industrial will increase 3.5 percent.

General Tire is a full-line supplier to the original equipment and

replacement markets. The company operates seven tire manufacturing facilities in North America and is a subsidiary of Continental AG of West Germany, the fourth largest tire manufacturer in the world.

LAKE WORTH, FL (JULY 6) PR NEWSWIRE - Cenvill Development Corp. (AMEX: CVL) today announced that three of its Class B directors, Richard O'Brien, Kathryn Kelleher, and Vincent Filippini, previously appointed and employed by the corporation's majority stockholder, the Federal Deposit Insurance Corporation (the "FDIC"), resigned on June 27, 1990.

The remaining Class B director, Bruce E. Meacham, also an employee of the FDIC, then filled the vacancies on the board by appointing three outside directors - Martin W. Taplin, Jeffrey Schottenstein, and Seth Werner.

Martin W. Taplin has been elected chairman of the corporation's board of directors. Taplin is the president of Martin W. Taplin & Associates, Inc. and will continue to serve in that capacity.

Elected vice chairmen of the corporation's board were Jeffrey Schottenstein and Seth Werner. Schottenstein is the president of Schottenstein Realty Company located in Miami, Fla. and Columbus, Ohio, and has 22 years of experience in working with companies and properties to maximize their potential.

Seth Werner is president of Werner Capital Corporation, a Miami-based real estate investment and management firm. He has served as a consultant to various banking institutions and has extensive experience in the management and sale of development companies.

It is felt that the addition of Messrs. Taplin, Werner, and Schottenstein to the corporation'a board, with their extensive real estate and business experience, will be a significant benefit to the corporation's previously announced plans to find a purchaser through the efforts of Bear, Sterns and Company.

LAFAYETTE, LA (JULY 6) PR NEWSWIRE - The Exploration Company of Louisiana Inc. (XCL)(NASDAQ: XCOL) has announced the execution of an agreement to purchase additional working interests in the Berry R. Cox Field area in

southern Texas for U.S. $40,000,000. This area, still in the early development stage, presently has nine producing wells proven reserves of approximately 200 Bcf. The working interests in the producing well being purchased vary from 28 percent to 49 percent and include proven reserves of approximately 60 Bcf. With the acquisition, XCL will become operator of the field.

The interests being purchased include interests in 2,838 acres. In addition, XCL has recently acquired ownership in an additional 2,300 acres adjacent to the field.

XCL has also announced a rights issue of 600,000 units, each unit comprising one share of preferred stock and 10 warrants, to raise approximately 28.25 million pounds sterling (approximately $50 million), net of expenses, at 50 pounds per unit. The rights issue will enable XCL to meet the cash element of the purchase price for the above acquisition. The balance of the rights issue proceeds will be used to reduce bank indebtedness and to provide additional working capital. The rights issue will be made on the basis of one unit for every 145.28 shares of existing common stock and has been underwritten by Guinness Mahon and Co Limited. The brokers to the issue are Henderson Crosthwaite Institutional Brokers Limited.

XCL is an oil and gas exploration and production company with offices in Lafayette, La. The company's shares are traded on NASDAQ and the International Stock Exchange, London.

#90187p2328 07/06/1990 ~PR Newswire

WASHINGTON (JULY 6) PR NEWSWIRE - The Department of Transportation announced today that it has revoked the temporary operating authority of Discovery Airways of Honolulu because the airline failed to abide by several conditions placed on that authority.

The revocation will become effective Friday, July 13, to allow an orderly shutdown of the inter-island carrier's operations and to avoid inconvenience to the traveling public. If Discovery wants to continue to pursue a permanent license, it can do so through continuation of an evidentiary hearing before an administrative law judge.

Earlier this year, Discovery applied to DOT for approval as a new airline. DOT granted Discovery temporary operating authority for nine months,

effective through Dec. 23, 1990, but ordered an administrative law judge to conduct an evidentiary hearing on whether foreign ownership and control of Discovery exceeded statutory standards and on the carrier's disposition to comply with federal law and regulations. Discovery began operating in April.

The law judge has found indications that Discovery's principals have consistently provided false information and have violated the terms of their temporary operating authority and federal law. After reviewing the case, the department agreed with the judge's findings.

Secretary of Transportation Samuel K. Skinner said Discovery has made little attempt to correct the problems. "In the absence of a strong showing of corrective behavior, we consider such a pattern of non-compliance to be grounds for terminating Discovery's temporary authority."

Skinner added that DOT awarded temporary authority partly because of its desire to promote new entry and competition. He said DOT has given Discovery "numerous opportunities to satisfy our concerns over its foreign control and compliance problems, but it has failed to do so or even to show any credible inclination to do so."

The department found Discovery has failed to abide by several specific conditions to its temporary authority. They involved establishment of a voting trust designed to insulate Discovery from possible foreign control and the role of one of its key officers who is an Italian citizen.

DOT also expanded the scope of the issues before the administrative law judge to include any and all fitness and citizenship issues.

In its order today, DOT directed Discovery to notify passengers holding tickets of the cancellation of flights and to inform them about how to obtain refunds or alternate transportation.

#90187p2337 07/06/1990 ~PR Newswire

CALGARY, ALBERTA (JULY 6) PR NEWSWIRE - Consolidated Carma Corporation (Tortono: CVP) announced earnings of 90 cents and 50 cents per share respectively for its Series 1 and Series 2 Cumulative Participating Non-Voting Class AAA Shares for the first quarter of 1990. For the year 1989 such Series 1 Shares earned 60 cents per share. No earnings were applicable to such Series 2 Shares for 1989 as they were issued on Dec. 29 1989. The preferential cumulative dividend entitlement of the Series 1 and Series 2 Cumulative Participating Non-Voting Class AAA Shares, which

ranks in priority to any entitlement of Carma's Class A Common Shares, has been disregarded in such earnings calculations.

The above earnings per share calculations have been prepared on the basis that earnings shall not be allocated to the Series 1 and Series 2 Cumulative Participating Non-Voting Class AAA Shares during a year until such time as its Class A Common Shares have earned 20 cents and 24 cents respectively in the year. After both these thresholds have been met in a year, Carma's approximately 3.9 million Series 1 and Series 2 Cumulative Participating Non-Voting Class AAA Shares will share on a 10 for 1 basis with Carma's approximately 20.8 million Class A Common Shares in future earnings for such year.

In that Carma previously allocated earnings to its Series 1 and Series 2 Cumulative Participating Non-Voting Class AAA Shares utilizing a pro-rated threshold of 5 cents and 6 cents per quarter, the above earnings per share calculation requires Carma to re-state its earnings per Class A Common Share for the first quarter of 1990 as 29 cents per share rather than the previously announced 19 cents per share. As Carma's earnings for the year now exceed 24 cents per Class A Common Share, the balance of Carma's 1990 earnings will be shared by the Series 1 and Series 2 Cumulative Participating Non- Voting Class AAA Shares and the Class A common Shares in the manner set out above.

No other restatement or amendment of Carma's previously announced financial results is required as a result of the above announcement.

Carma has announced earnings results for its Series 1 and Series 2 Cumulative Participating Class AAA Shares in this manner in order to provide additional information to its shareholders and the investment community and has established the above earnings calculations policy after an extensive internal review and discussions with regulatory authorities.

The above policy will be applied by Carma in respect of earnings per share calculations in the future. Comparative figures will be amended if necessary to comply with this policy in order to provide consistent presentation.

Alan Norris, Senior VP and CFO of Consolidated Carma Corp.,

STUTTGART, WEST GERMANY (JULY 6) PR NEWSWIRE - Daimler-Benz AG, the Stuttgart, West Germany, based high-technology concern, has announced the appointment of Richard H. Imus as head of a redesigned and expanded Daimler-Benz group representative office in Washington. He is expected to

assume his duties in early August.

Imus was born in San Francisco in 1938, and worked as a diplomat for 27 years in the Department of State, most recently as economic minister in the U.S. embassy in Bonn. In the latter role he represented the U.S. government in the fields of trade, industry and finance, as well as scientific and technological collaboration. Earlier, his diplomatic work led to posts in Australia, Israel, Saudi Arabia, Lebanon, Kuwait and New Zealand.

In his new position, Imus represents the full range of interests of the Daimler-Benz group and its corporate units -- Mercedes-Benz, AEG, Deutsche Aerospace and Daimler-Benz Interservices -- in political institutions and establishments within the United States. Other Daimler-Benz AG group representative offices have already been set up in Berlin, Bonn, Brussels and Hong Kong. The group representative offices are responsible for creating an international communication network in the face of growing international links. In this context, Imus will be particularly concerned in his Washington post with assuring that relationships between the Daimler-Benz group and U.S. institutions are characterized by mutual cooperation and understanding.

#90187p2347 07/06/1990 ~PR Newswire

HARRISBURG, PA (JULY 6) PR NEWSWIRE - State Secretary of Banking Sarah W. Hargrove and the U.S. Office of Thrift Supervision today declared the Heritage Savings Association of Lancaster insolvent and turned it over to the federally chartered Resolution Trust Corp. (RTC) for management.

Hargrove said Heritage will remain open for business. Customers will continue to have access to their deposits, which remain insured by the federal government for up to $100,000.

The RTC will make all decisions regarding the day-to-day management of Heritage and will investigate long-term solutions to the institution's problems. Possible solutions could include the sale of Heritage, the transfer of its deposits to another institution, or a payout to depositors Hargrove said.

Heritage has been plagued by problems that began when interest rates rose dramatically during the early 1980s. Many savings and loans were forced to pay much higher interest on deposits than they were earning on mortgages.

In 1982, in an effort to remain profitable, Heritage -- like other savings

institutions -- sold many of its fixed-rate loans at a loss and reinvested the proceeds in adjustable-rate loans that allowed it to increase its income, Hargrove said. The loss was spread over a number years rather than taken all at once.

However, accounting rules changed in 1989 when President Bush signed the Financial Institutions Reform, Recovery and Enforcement Act. Heritage was forced to write off the deferred loss immediately, significantly weakening its financial position, Hargrove said.

State and federal regulators have been working with Heritage over the past year to find an appropriate merger partner to provide needed capital, but neither investors nor buyers could be found.

#90187p2349 07/06/1990 ~PR Newswire

RICHMOND, VA (JULY 6) PR NEWSWIRE - RF&P Corporation (NASDAQ: RFPC) reported today that consolidated net earnings for the second quarter of 1990 were $7.1 million, or $0.40 per share, compared with $6.7 million, or $0.38 per share, earned in the second quarter of 1989.

The Company reported that total operating revenues in the second quarter were $18.7 million, down $0.6 million, or three percent. Rail transportation revenues were down five percent due to a decline in freight traffic volume, partially offset by a higher level of pricing. Real estate revenues increased two percent due to higher gain on sale of land, partially offset by lower net cash flows from the Crystal City real estate projects in Northern Virginia and lower partnership income.

For the first six months of 1990, net earnings were $10.3 million, or $0.59 per share, down thirty-five percent when compared to the $15.8 million, or $0.90 per share, earned during the same period last year.

Total operating revenues were $34.5 million, down $1.4 million, or four percent. The decline was attributable to a reduction in freight traffic, lower net cash flows from the Crystal City projects, and lower partnership income, partially offset by higher gain on sale of real estate.

Total operating expenses declined $1.8 million, or eight percent, primarily due to the recognition of income, that had been previously deferred, as a result of the arbitration settlements in connection with the Norfolk Southern/Conrail diversion at Potomac Yard, and lower operating expenses.

Investment income declined $5.7 million as a result of the $6.8 million gain from the 1989 sale of a portion of the Company's investment in Trailer Train Company stock. Partially offsetting the 1989 stock gain was higher interest income.

Affecting 1990 earnings was the $3.9 million write-off of expenses incurred in connection with the 1989-90 consolidation discussions with CSX Corporation. Such discussions ultimately led to a merger agreement, which was terminated on March 23, 1990.

Directors of RF&P Corporation have declared a quarterly dividend of $.30 per share on all classes of stock payable August 1, 1990 to stockholders of record July 10, 1990. The dividends declared represent an increase of $.05 per share, or twenty percent, when compared to the last quarterly dividend of $.25 per share paid on May 1, 1990.

The dividends declared are in addition to the guaranteed semiannual amounts payable to holders of Six Percent and Seven Percent Guaranteed Stocks on May 1 and November 1 of each year.

LOS ANGELES (JULY 6) PR NEWSWIRE - Carnation Company today announced that it has entered a business arrangement with SmartPets Inc. to undertake the marketing and distribution of Carnation's Perform brand pet foods.

SmartPets, organized in 1987, and located in Danvers, Mass., is a specialty retailer of diversified pet products that it markets nationwide through its Animail mail-order catalogs.

"Direct marketing to pet owners is a fast growing means of distribution of pet products with significant future potential," said James L. Dintaman, Carnation senior vice president. "Combining SmartPets expertise in this segment of direct marketing with Carnation's pet food products and capability will be advantageous for both parties."

The arrangement involves the production by Carnation's Friskies PetCare Division of its Perform brand of canned and dry pet foods and treats for SmartPets as well as an investment by Carnation in SmartPets and participation on its board of directors.

Carnation, a subsidiary of Nestle, S.A., is headquartered in Los Angeles. Since its founding in Kent, Wash. in 1899, Carnation's main business has been the development of good food to meet the nutrition and lifestyle needs of America.

NEW YORK, NY (JULY 6) PR NEWSWIRE - Corroon & Black Corporation (NYSE: CBL) announced today the appointment of David L. Pfisterer to the newly-created position of vice president, tax compliance.

In his new duties, Pfisterer will be responsible for the preparation and filing of all federal, state, and local tax returns and tax-related documents for the Corporation and its more than 100 subsidiary offices in the United States. His appointment was announced by Robert P. Cuthbert, first vice president and chief financial officer of Corroon & Black Corporation.

"The strong growth demonstrated by Corroon & Black during the 1980s, as well as the ever-increasing complexity of the diverse tax laws and regulations the corporation and its subsidiaries are subject to, created a need for someone to coordinate and administer these challenging responsibilities.

"David's strong experience and expertise in taxation, accounting, economics, and related legal issues will prove to be a valuable resource as Corroon & Black implements its aggressive growth plans for the 1990s," Cuthbert said.

Pfisterer has more than six years of tax-related experience, and most recently served as tax manager for Price Waterhouse. Pfisterer is a certified public accountant, and is a member of the New York State Bar Association as well as the American Institute of CPAs and the New York State Society of CPAs.

Corroon & Black Corporation, headquartered in New York City, is one of the world's largest full-service insurance intermediaries, providing insurance brokerage, risk management services, reinsurance brokerage, and employee benefits, compensation, and actuarial consulting to individuals, local governments, professions, business, and industry. It has subsidiaries across the United States and affiliated offices throughout the world.

DETROIT (JULY 6) PR NEWSWIRE - For the fourth straight year, Cadillac Motor Car has been named the top domestic nameplate for customer satisfaction by J.D. Power & Associates. The luxury car division of General Motors was fourth overall among the 37 domestic and import manufacturers evaluated and overtook Honda which fell from third to fifth place.

The annual study measures customer satisfaction with vehicle reliability and the dealership experience after one year of ownership.

"Owner satisfaction with both our De Ville and Fleetwood models is among the highest in the industry," according to John O. Grettenberger, General Motors vice president and Cadillac general manager. "In fact, all our models had Customer Satisfaction Index scores above the industry average -- something no other domestic manufacturer can claim."

While the industry average improvement was four points, Cadillac improved its CSI score by 11 points to 142. The industry average score was 122.

Since the first CSI scores were released by J.D. Power, Cadillac has steadily improved from 16th in 1985 to seventh in 1987, the first year it led the domestic auto manufacturers.

HOUSTON (JULY 6) PR NEWSWIRE - Noble Drilling Corp. (NASDAQ: NDCO) announced that it filed a registration statement today with the Securities and Exchange Commission for the offer and sale of 5,000,000 shares of its common stock. The registration statement also covers a total of 4,000,000 shares of common stock being offered by two selling stockholders. The total registered size of the offering of 10,350,000 shares includes 1,350,000 shares subject to over-allotment options granted to the underwriters by the company and one selling stockholder.

Salomon Brothers Inc. and Smith Barney, Harris Upham & Co. Inc. will serve as the underwriters for the offering. Noble Drilling Corp. is a major drilling contractor providing offshore and onshore contract drilling services worldwide, with operations in the United States, Canada, the United Kingdom, Africa, and the Far East. The company's common stock is traded on the NASDAQ/national market system under the symbol "NDCO".

WOODCLIFF LAKE, NJ (JULY 6) PR NEWSWIRE - Ingersoll-Rand Company (NYSE: IR) announced today that it has retained Merrill Lynch Capital Markets to explore strategic alternatives available to Schlage Electronics, Inc., including the possible sale of the subsidiary.

Schlage Electronics, wholly owned by Ingersoll-Rand, is a leading manufacturer of proximity access control products in the electronic security market. With more than 17 years of operating history, the subsidiary has developed strong product distribution relationships with approximately 300 systems integrators having more than 600 local sales and service offices in 43 countries.

"The subsidiary has established what is believed to be the industry's largest installed base of end-users," said Stuart Knott, president of Schlage Electronics. The unit is headquartered in Santa Clara, Calif.

HAIFA, ISRAEL (JULY 6) PR NEWSWIRE - Elron Electronic Industries Ltd. (NASDAQ: ELRNF) announced that an open house was held today in Santa Clara Calif. to celebrate the grand opening of the headquarters and first Chip Express Service Center of Elron's subsidiary, Chip Express Corporation.

Chip Express, using a patented technology developed by Elron, is a service company that produces low cost and fast turn-around high performance gate array prototypes. Gate Arrays are the leading type of application specific integrated circuit ("ASIC"). Chip Express can turnaround complex gate array prototypes in a day, and small to medium production quantities in a week, with no penalty in performance or cost, and with significant savings in time to market.

Chip Express, a Delaware corporation, was spun-out of Elron, and has been co-financed together with private Japanese investors.

"We are delighted to be announcing the opening of our company, after five years of research and development," noted Zvi Or-Bach, founder and President of Chip Express. "The Quick solution will, for the first time, make gate arrays affordable and accessible to designers and manufacturers."

According to Andy Rappaport, president of Technology Research Group, "turnaround time and cost remain significant constraining factors in the use of ASIC's, especially for devices of high complexity or high speed. Once these barriers are overcome, we expect ASIC adoption to accelerate dramatically."

Uzia Galil, Elron's chairman and CEO, emphasized that "Elron is supporting Chip Express because we believe that it offers breakthrough technology and has the potential to be a major player in a fast-growing, multi-billion dollar market." Galil added that, "we are excited to be witnessing the birth of Chip Express, as the latest successful spinoff from Elron's internal projects-in-incubation."

Elron Electronic Industries Ltd., a diversified high technology company based in Israel, operates through subsidiaries and affiliates, each one focused in well-defined market segments. Elron also develops state-of-the art technologies with nuclei of engineers and scientists with the purpose of creating new entrepreneurial high tech companies.

NEW YORK (JULY 6) PR NEWSWIRE - What's the best way to cool down on a hot summer day? Take a break from the outdoors, go inside and bring that fast-paced action of TV game shows to your living room with "Win, Lose or Draw" and MTV's "Remote Control" for the Nintendo Entertainment System.

Like the TV game show which originated in Burt Reynolds living room, Win, Lose or Draw ($39.95) for Nintendo will challenge kids, families and friends alike as they attempt to guess famous people, titles and phrases from the games 500 puzzles.

Humorous clues are revealed to you as the NES sketches the picture puzzle. If however, you are willing to test your own artistic skills, Hi Tech Expressions has added a unique controller feature which allows you to draw the clues.

If a rock 'n roll and "junk" trivia game is what you're searching for, then MTV's Remote Control ($39.95) is the answer. Test your knowledge in nine categories and outshine your competition to make it to the fast and fierce end-round. Whether it's the "Gourmet Channel" asking you name the three Rice Krispies' characters or "Brady Physics" with a mathematical problem, Remote Control is sure to add sunshine this summer ... even on a rainy day.

Recreating the excitement of a TV studio and letting players feel like

they're part of the action is just what Hi Tech Expressions' Nintendo games are all about!

SUNNYVALE, CA (JULY 6) PR NEWSWIRE - Nanometrics Inc. (NASDAQ: NANO) recently completed its second quarter and based on a preliminary review of operating results anticipates that revenues will be lower and net operating loss will be higher than that experienced in the first quarter of fiscal 1990. The company attributes this to continued slowness in the market for capital equipment for the semiconductor industry. The company's business is dependent on the level of demand by semiconductor manufacturers for capital equipment. The company believes semiconductor industry forecasters are generally predicting an increase in business for semiconductor manufacturers later this year, which the company hopes will translate into an increase in their spending for capital equipment.

Nanometrics' principal products are optical and scanning electron microscope-based measurement and inspection stations utilized in the manufacture of semiconductors.

FAIRFIELD, NJ (JULY 6) PR NEWSWIRE - Selectatech, Inc. today announced the results of the special meeting of shareholders held on June 25:

-- On June 29, Selectatech filed an amendment to the certificate of incorporation increasing the number to 300 million common shares, par value $.001 per share. As of the opening of business on Monday, June 9, the company effected a one-for-30 reverse split of the company's outstanding shares of common stock. The company's par value increased to $.03 per share.

-- The shareholders approved the merger of the company with and into its wholly owned subsidiary, Clinical Homecare Ltd. (CHL), a Delaware corporation, pursuant to which all outstanding shares of common stock of the company will be converted into shares of common stock of CHL on a basis of one share of CHL for each share of the company held immediately prior to said merger. At such time the name of the corporation will change to Clinical Homecare Ltd.

HARTFORD, CT (JULY 6) PR NEWSWIRE - Northeast Savings, F.A. (NYSE: NSB) announced that shareholders voted to approve the formation of a holding company at a special meeting of stockholders, held today in Hartford at the Old State House.

Formation of the holding company, known as Northeast Federal Corp., required both approval of the Office of Thrift Supervision (OTS), which

was granted in April, and approval of the majority of common stockholders of Northeast Savings. Upon the subsequent reorganization and OTS filing, Northeast said it anticipates it will be in compliance with the current capital requirements specified by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA).

Under the holding company, holders of the capital stock of Northeast Savings will become holders of the capital stock of Northeast Federal Corp. The sole function of the holding company will be to hold 100 percent of the stock of Northeast Savings, which will continue its current business as a federally chartered savings and loan association whose deposits are insured by the FDIC.

Chairman George P. Rutland presided over the special stockholders' meeting held today. In his remarks to stockholders, Rutland briefly recapped the substantial progress the company has made in the last two years, culminating in the formation of the holding company and ultimate compliance with the new capital requirements, the company's chief priority in recent months.

Northeast Savings is one of the largest thrifts based in New England, with retail branches in Connecticut, New York and Massachusetts, and mortgage offices in California, southern Connecticut, and Long Island, N.Y.

NEW YORK (JULY 6) PR NEWSWIRE - Telettra, USA, Inc. and BellSouth Services, Incorporated today announced the signing of a purchasing agreement for the supply of DTV-45 Codec, a digital television transmission system exclusively designed and manufactured by Telettra, the Fiat Group's (NYSE: FIA) telecommunications subsidiary.

The agreement, which will run for three years, will allow the BellSouth companies to meet certain future needs for high-quality transmission of a broadcast-quality television signal on DS3 Rate (45 Megabit per second) links. The DTV-45 was selected by BellSouth Services through its study process, which included a lab evaluation.

BellSouth Services is a wholly owned subsidiary of BellSouth Corporation (NYSE: BLS), the Bell holding company headquartered in Atlanta, which provides broad telecommunications around the world. Telettra USA is the North American subsidiary of Italy's Telettra S.p.A., a major global designer and manufacturer of transmission systems.

Considered the most advanced DS3 television digital coding system by many industry experts, the DTV-45 is the only system now on the market that utilizes the powerful Discrete Cosine Transform (DCT) algorithm to compress, without distortions, the TV digital signal down to 45 Megabit per second.

This capability also led Bell Communications Research, Inc. to select the DTV-45 for its nationwide DS3 Digital Television Trial Network, operating since November 1989, which interconnects eight major U.S. cities, including New York, Washington, Boston, Atlanta, Indianapolis, St. Louis, Minneapolis and Los Angeles.

Telettra is a world leader in the area of high-quality digital television transmission systems. In 1989, the company's net consolidated revenues reached $1.28 billion, an increase of 47 percent over the previous year. Operating income of $309 million, or 24 percent of revenues, more than doubled the 1988 results.

Telettra was the first company, anywhere, to implement high-quality digital transmission systems for HDTV at a bit rate lower than 100 Megabit per second. This HDTV system, also based on the DCT algorithm, is currently being used for the first international HDTV trial system implemented by RAI, the Italian Radio and TV Broadcasting Corp., to provide HDTV digital transmission for the "Italia '90" soccer World Cup playoffs now under way.

As part of RAI's HDTV trial system, the key matches are being digitally transmitted in HDTV, via the Olympus satellite, to nine auditorium-theaters, seven in Italy (Roma, Milano, Torino, Napoli, Palermo Venezia, Perugia) and two in Spain (Barcelona and Madrid).

The RAI trial, with its important implications for the television and news-gathering industries, was made possible by Telettra's very advanced technology in compressed digital television transmission.

#90187p2394 07/06/1990 ~PR Newswire

ATLANTA (JULY 6) PR NEWSWIRE - First National Bancorp (NASDAQ: FBAC), Gainesville, Ga., has reported second quarter 1990 earnings of $5,550,000, up 5.96 percent over 1989, and earnings through June 30 of $11,295,000, up 7.96 percent over the same period last year.

Second quarter earnings per share were 62 cents compared to 59 cents in 1989, and for the six months ending June 30, 1990, were $1.26 per share

compared to $1.17, an increase of 7.69 percent.

First National Bancorp Chairman and CEO Ray McRae expressed pleasure over the results. "The results are good especially in view of the continuing softness in the general economy, particularly the real estate sector, throughout north Georgia," he said.

Consolidated assets on June 30 increased to $1.573 billion, up 12.56 percent over June 30, 1989, but only slightly higher than reported on March 31, 1990. "Consolidated assets reflect both the softening economic conditions and an increased competitive environment in Bancorp's service area," said McRae.

The planned sale of mortgage servicing rights by First National Bank of Gainesville's Mortgage Source Division during the quarter resulted in a gain of $443,000, which was offset by added provisions for possible loan losses. That resulted in Bancorp's June 30, 1990, loan loss reserves being $12,021,000. Bancorp's ratio of reserves to total loans (excluding mortgage loans held for sale) as of June 30 was 1.32 percent, up from 1.24 percent on March 31, 1990, and 1.16 percent on June 30, 1989. "The company's current and continuing aggressive additions to loan reserves were both prudent and conservative management practices considering existing economic conditions," McRae said.

The reserve as a percent of non-performing loans is 95.3 percent compared to 114.2 percent as of March 31, 1990.

Bancorp reported return on assets of 1.45 percent for the second quarter and 1.50 percent for the first six months of 1990. The primary capital to assets ratio on June 30 was 9.66 percent, up from 9.58 percent on June 30, 1989. McRae commented that those performance results, plus Bancorp's earning 16.66 percent return on equity for the first six months, places the company well within the upper tier of its banking peer group.

First National Bancorp is a north Georgia-based bank holding company with 11 affiliate banks.

#90187p2398 07/06/1990 ~PR Newswire

WASHINGTON (JULY 6) PR NEWSWIRE - At 3 p.m. EDT today, Dean S. Marriott, senior deputy comptroller for bank supervision, Office of the Comptroller of the Currency (OCC), declared Capital National Bank, New York City, insolvent.

The Federal Deposit Insurance Corporation (FDIC) was appointed as receiver.

Capital National Bank has been a matter of supervisory concern since early 1989. Significant deterioration in the bank's condition has occurred since that time due to the questionable lending practices of certain officers and management officials.

On April 2, 1990, the bank's board of directors issued a press release stating that the bank was likely to incur significant losses as a result of improprieties and irregularities committed by certain former senior bank officers. Losses from these transactions, which remain under investigation, combined with other uncollectible loans resulted in a significant charge against the bank's capital. Efforts to recapitalize the bank proved unsuccessful and resulted in today's insolvency.

Capital National Bank received a national bank charter on July 1, 1975. On May 31, 1990, it had total assets of approximately $129 million.

The FDIC is expected to release additional information later today.

#90187p2404 07/06/1990 ~PR Newswire

FORT WORTH, TX (JULY 6) PR NEWSWIRE - A newly formed alliance between MasterCard International's MAPP (the MasterCard Automated Point- of-Sale Program) and Viata(TM) Corporation, a provider of electronic payment services and electronic marketing, will offer a fully integrated, single-source payment processing service that participating banks can market to their retail merchant customers. MAPP will be offering its QPS (Quick Payment Service) authorization and settlement processing nationwide as of July 1990.

MAPP is designed to support MasterCard member banks which want to avail themselves of MAPP's competitively priced electronic authorization services. MAPP is the fastest growing authorization processor in the bank card industry and this new alliance reflects MAPP's desire to meet the marketing needs of acquiring banks and their merchants. In particular, this is an effort to facilitate member subscribers' entrance into small-ticket businesses such as fast food outlets, convenience stores supermarkets and movie theaters.

Through a single point-of-sale terminal and phone line, retailers can handle transactions for credit cards and electronic checks. Banks utilizing the MAPP/Viata program will also benefit from the system's ability to capture valuable data which may be utilized to develop targeted marketing efforts, such as frequent shopper or valued customer programs. In addition, a complete menu of check services by Viata's subsidiary, Checktronic(R), will be available in the near future.

"Viata anticipates rapid market penetration of the new system," according to David Mills, president of the Fort Worth-based company. "Usage is geared primarily for high-speed multi-lane merchants and is expected to make credit card acceptance more attractive to establishments where the speed of the payment is critical to the sale," he said.

The agreement combines Viata's point-of-sale processor for credit card acceptance with MAPP's authorization network, Banknet(R). Electronic draft capture will be direct from Viata to MAPP for settlement to MasterCard member banks utilizing the MAPP point-of-sale service. The off-lane transactions must be completed within seven seconds or less and all transactions must be cleared within three business days for the members to qualify for the lowest interchange fee for off-line authorized transactions.

Viata Corporation provides transaction-oriented merchant services at the point of sale. Included is the technology, both hardware and software, and the data processing capability to integrate, deliver and manage those services end-to-end through a single system.

MasterCard International's MAPP program is designed to allow merchants the capability to process authorizations only, or to electronically capture draft transactions.

CONTACT: Sharon G. Cline of MAPP, 212-649-5472; Julia Moretti of MasterCard International, 212-649-5564; David Mills of Viata, 817-847-2200; or Mary Ellen Thomas of McKone & Company, 214-550-7433, for Viata

#90187p2413 07/06/1990 ~PR Newswire

TROY, MI (JULY 6) PR NEWSWIRE - Audi of America, Inc. recorded 2,567 retail sales in June, 35.2 percent greater than the 1,899 sales achieved in June a year earlier. The strong performance moved Audi 19.1 percent ahead of last year on a year-to-date basis, 11,093 units to 9,312.

Of possibly greater significance, mid-year results gave Audi its fourth consecutive quarter of sales gains vs. the comparable quarter a year earlier. Richard L. Mugg, executive in charge of Audi of America, termed the yearlong gain "absolute proof that Audi again is a presence in the U.S."

"Our goal now," Mugg said, "is to consolidate this rising trend and make 1990 the first calendar year since 1985 that Audi has shown a year-to-year increase."

To reach that goal, Audi will have to sell more than 21,283 cars in 1990. The company's stated goal is to finish 1990 with 24,000 to 25,000 sales, and to be selling at a calendarized rate of 30,000 or more during the final quarter of 1990.

Audi is the only European high-line car to be showing such consistent improvement, Mugg noted, even while the European segment continues to show naggingly persistent declines. He attributed Audi's gains to dramatically improved product quality, marketing innovations such as the Audi Advantage -- which includes all factory scheduled maintenance at no charge to the customer during the three-year, 50,000-mile warranty period -- and the trend-setting 3-Year Test Drive leasing program.

"To keep this positive drive moving," Mugg said, "requires the best we all have to give -- a factory that delivers a high-quality product that's right for the market ... a marketing organization that's in tune with the real needs of the people ... and active and interested sales and dealer organizations that really care about customer treatment.

"We'll have up months and down months, but this is the year Audi puts it all together."

HOUSTON (JULY 6) PR NEWSWIRE - U.S. Home Corp. announced today that it anticipates a loss for the second quarter ended June 30, 1990 resulting from an approximately $10 million charge relating to litigation settlement costs, additional litigation reserves and additional provision for discontinued operations.

Litigation settlement costs were incurred primarily as a result of the settlement of a substantial and unexpected jury verdict rendered in a Texas state court in a case involving a project built in the 1976-1978 period. Due to the result of this recent case, the company provided additional litigation reserves to reflect estimated costs of settlement of other pending lawsuits.

The company also reported that the owner of a motel purchased from the company in 1985 has been unable to meet its obligations under a loan agreement, a portion of which had been guaranteed by the company. As a result, the company negotiated a reduction in its liability and will record a provision of $1.8 million for discontinued operations relating to such guarantee.

These combined expenses and provisions will result in a loss for the company in the quarter and for the six months ending June 30, 1990.

#90187p2419 07/06/1990 ~PR Newswire

SKOKIE, IL (JULY 6) PR NEWSWIRE - In response to an ongoing softness in the demand for marine products, Brunswick Corp. (NYSE: BC) today announced a continuation of the consolidation of its marine operations initiated last fall.

Reductions in force affecting 8 percent of the work force in the corporation's U. S. Marine and Sea Ray Divisions are anticipated over the next two months as a result of the consolidation.

The cutbacks will result in the permanent closing on Sept. 10, 1990, of four of the U.S. Marine Division's boatbuilding plants located in Live Oak Fla.; Vivian, La.; and Edenton and New Bern, N.C. In addition, the Shelby, N.C., plant producing component parts will also be closed on that date.

Production operations currently in process at those plants will be transferred to the U.S. Marine Division's remaining 15 plants. Concurrently, the company's Sea Ray Division announced, effective today, the layoff of employees at three of its locations: Palm Coast, Fla.; Telleco Lake and Knoxville, Tenn. Production operations continue at all three of these sites, as well as at Sea Ray's other five plants.

"These actions will not have an unfavorable impact on the company's 1990 financial results. Rather, it is anticipated that they will improve efficiencies and cut costs," said Brunswick Corp.'s Chairman, President

and Chief Executive Officer Jack F. Reichert. "We will continue to closely monitor marine industry trends, and take those steps necessary to respond to changing business conditions."

Headquartered in Skokie, Ill., Brunswick Corp. serves worldwide markets in the marine power, pleasure boating, recreation, defense/aerospace and industrial fields. Its stock is traded on the New York, Tokyo, London, Midwest and Pacific Stock Exchanges.

OKLAHOMA CITY (JULY 6) PR NEWSWIRE - E-II Holdings, Inc. announced today that it will close its wholly owned subsidiary, Bargain Time, Inc.

The closing activities will begin immediately and are expected to be completed by October of this year.

This was a very difficult decision to make because indications are that long-term prospects for Bargain Time are positive. Short term results, however, will not meet the criteria for return on investment or capital allocation. In addition, the national negative retail atmosphere, with so many retailers going bankrupt and conducting going-out-of-business sales, has had a marked adverse effect on the attitude of the financial community and has made it virtually impossible to obtain seasonal financing to assure a normal flow of merchandise.

The decision to close Bargain Time was deemed necessary in order to assure the continued success and growth of other operations.

E-II Holdings, Inc. owns and operates McCory Stores, Samsonite Corporation Culligan International Company, McGregor Corporation, and McGregor Licensing.

BOISE, ID (JULY 6) PR NEWSWIRE - Morrison Knudsen Corp. (MK) (NYSE: MRN) today announced receipt of a multimillion-dollar contract to remanufacture 50 locomotives for CSX Transporation.

The remanufacturing, to be performed at MK's industrial complex in Mountaintop, Penn., will be completed by year's end.

These "road slug" locomotives are employed as motive power support for other locomotives operating under particularly heavy workloads, like those pulling trains up grades.

The contract is the second awarded MK this year by Jacksonville, Fla.-based CSX Transportation. Work is under way at MK's Boise industrial complex on remanufacture of 50 freight locomotives.

CSX has freight operations throughout the Southeastern, mid-Atlantic and Midwestern states.

#90187p2433 07/06/1990 ~PR Newswire

CHATSWORTH, CA (JULY 6) PR NEWSWIRE - The Software Toolworks Inc. (NASDAQ: TWRX) today announced that it has adopted a change in accounting policy with respect to accounts receivable scheduled for payment beyond 90 days. Under the new policy, all such accounts receivable are discounted to present value, and revenue is recognized in the present value amount. The discounted portion is deferred for recognition as interest income in subsequent periods. As a result, fiscal 1990 results have been restated, and per-share income for the year decreased by one cent, from 14 cents to 13 cents. This reflects a $624,000 reduction to the company's previously reported revenues of $68,689,000, and a $221,000 reduction in previously reported net income of $2,591,000. The restated results accordingly reflect net income of $2,370,000 on revenues of $68,065,000.

As a result of the accounting policy change, the $624,000 revenue reduction will be deferred and will be recognized as interest income on a quarterly basis as the related receivables approach maturity, and will be thus fully recognized by the time of payment by the customer. The company noted that the discounting has been applied to approximately $9,962,000 of OEM customer receivables with scheduled fiscal 1991 collections of $8,196,000. These are the only receivables impacted by this accounting policy change, and the change does not in any way reflect a concern regarding collectibility. The customer's payment obligation remains unchanged, and cash flow accordingly is not affected in any manner by the new policy.

The company noted that the change has been made in connection with the company's registration statement on Form S-1 filed with the SEC, which was declared effective today. Les Crane, chairman and chief executive officer, said: "We are confident that this one cent per share effect on last year's income, while immaterial in amount, will confirm the company's policy of constructively responding to the evolving accounting principles

applied to the software industry. This accounting policy change has no material effect on our historical results, and we expect no material effect upon anticipated results."

The Software Toolworks is a diversified software publisher, distributor and developer for the Nintendo and personal computer market.

ARLINGTON, VA (JULY 6) PR NEWSWIRE - USAir today issued the following statement in response to CCAIR's bankruptcy announcement:

USAir regrets that CCAIR's financial difficulties have caused CCAIR to have to file for bankruptcy. However, USAir -- and Piedmont before it -- repeatedly advised CCAIR's management that changes are needed in the scale and scope of CCAIR's operation if CCAIR is to be financially successful. USAir would like to believe that the bankruptcy process offers an opportunity for CCAIR and other interested parties to initiate the operating and management changes which we believe are a prerequisite to CCAIR's successful reorganization. In the absence of such changes, however, USAir would have no choice but to seek to invoke the termination provision of the agreement. USAir will be prepared to explain its views in greater detail in its presentation to the bankruptcy court and in discussions with other interested parties.

In its announcement that it had filed for bankruptcy, CCAIR attributed its need to reorganize under bankruptcy protection to "cash flow difficulties" it claimed were brought on by the ticket revenue settlement procedures in its agreement with USAir. It is unfortunate that CCAIR chose to attribute its problems to that agreement. In our opinion, CCAIR's statement reflects a failure by CCAIR's management to comprehend the true causes of that airline's current financial difficulties.

There is nothing unusual about CCAIR's agreement with USAir. The ticket revenue settlement procedures in that agreement are the same as the procedures in CCAIR's earlier agreement with Piedmont as well as in the agreements USAir has with three other independently owned and operated USAir Express carriers.

While the bankruptcy process moves forward, USAir intends to take all steps possible consistent with the bankruptcy laws to ensure that its passengers using the USAir Express service operated by CCAIR are not inconvenienced by CCAIR's efforts to reorganize.

ST. LOUIS (JULY 6) PR NEWSWIRE - It's every small business owner's dream: Having an extra branch across town for not much money. Very little money: how about a branch starting at less than $30 a month. Or five branches all over town for less than $150 a month.

But how's that possible? Through a telecommunications service that can stretch a business' presence all over town -- "TeleBranch(SM)" from Southwestern Bell Telephone (SWBT).

TeleBranch service helps business expand its marketing presence in various communities, whether or not the business is located in those areas. It's done through a local phone number which connects to the business' main location.

The main benefit: Businesses don't have to open an office in a new area, according to Bob Henderson, SWBT's product manager for TeleBranch.

"With TeleBranch service, they can offer customers in that area a phone number with a familiar exchange," he explained. "Businesses also can use the service to minimize customer confusion -- and lost business -- during a move."

Other candidates include businesses which are centralizing but want to keep a local presence or companies which want to stretch peak selling periods in a particular area throughout the year.

For small businesses, especially those in the service industry (lawn services, repair services, plumbing companies, travel agencies, construction contractors and others), it's a way to reach more customers with little expense.

TeleBranch service was previously marketed under the name "Remote Call Forwarding." However, many customers thought Remote Call Forwarding was a different version of Call Forwarding. The service showed great promise: customer growth was about 16 percent a year.

"We knew we had a winner, so we decided to develop a new marketing strategy which included renaming the service," Henderson said. "Customers, through focus groups, chose the new name. It reflects what the service offers customers: a 'tele-branch' for their businesses. And it's that 'tele-branch' that can give a business a competitive edge."

Like other business listings, phone numbers associated with TeleBranch

service are published in the White Pages directories. Customers may also receive regular business listings in their Yellow Pages. All phone numbers associated with TeleBranch service are available through directory assistance, too.

SWBT is promoting TeleBranch service through "The Winning Edge" small business advertising and promotions campaign.

The service is available in all of SWBT's five states. Rates vary in each state but average about $17 a month plus toll for long-distance TeleBranch service or $28 a month for local TeleBranch service.

Southwestern Bell Telephone is a wholly owned subsidiary of Southwestern Bell Corp. and provides network exchange service to nearly 9 million customers in Arkansas, Kansas, Missouri, Oklahoma and Texas.

SAN FRANCISCO (JULY 6) PR NEWSWIRE - Chevron U.S.A. Inc. today announced a decrease in the posted prices it will pay for all grades of crude oil in its Eastern Region (U.S. areas outside of California and Alaska).

The decrease of $1.00 per barrel was effective today at 7:00 a.m. Chevron will now pay:

$15.25 for West Texas Intermediate $13.25 for West Texas Sour $15.25 for South Louisiana Sweet (Onshore) New prices for all grades other than those from California and Alaska are reflected in Chevron's Eastern Region Crude Oil Price Bulletin 90-E32. Bulletins are issued periodically reflecting price increases or decreases as market conditions change.

CONTACT: Sherri Zippay, 415-894-4581, or Mike Libbey, 415-894-4440, both of Chevron U.S.A. Inc.

BRIDGEPORT, CT (JULY 6) UPI - The brassy ragtime tunes of a Dixieland jazz band led a New Orleans-style funeral procession to Phineas Taylor Barnum's grave to celebrate the world-renowned showman's 180th birthday.

Barnum, who brought tiny Gen. Tom Thumb to world fame, would have chuckled at the irony of Thursday's funeral birthday bash, said Kathleen Carlson, executive director of the annual Barnum Festival.

''I think he would have loved it,'' said Carlson, adding Barnum would be particularly fond of this year's more upbeat funeral service.

This marks the 42nd funeral procession to mark the birth of the master showman, which took place in Bethel on July 5, 1810. Barnum died April 7, 1891, in his beloved Bridgeport, where he served as mayor and benefactor.

''It's always been very somber, so we figured, well, let's jazz it up a little bit because he was that type of person,'' said Carlson.

The Clamdiggers Dixieland Band from New Haven led the procession through the Mountain Grove Cemetery, where Tom Thumb, who was born Charles Stratton, also was buried with his midget wife, Lavinia.

Barnum met Stratton in Bridgeport in 1842 when the midget was just 4 years old and contracted him to perform as General Tom Thumb.

The funeral procession is one of a string of month-long events honoring Barnum, who is noted as one of the most important contributors to Bridgeport's history.

PASADENA, TX (JULY 6) UPI - Gilley's, the defunct honky-tonk that served as the backdrop for the film ''Urban Cowboy,'' was destroyed by fire Thursday, officials said.

Firefighters reported the blaze under control by early evening and had it extinguished by 10 p.m., fire dispatcher J.D. Bordelon said. ''The structure is pretty strong,'' he said. ''The frame is standing, but there's not much else left. The roof is sagging.''

Firefighters from Pasadena, Deer Park, and other Houston-area communities were on the scene of the three-alarm fire, said Roseann Boynton, a spokeswoman in the Pasadena police department.

''All of our units are on the scene, and Pasadena firefighters and others are continuing to battle the blaze,'' said Boynton.

She said arson investigators were also at the blaze, which began about 2:45 p.m.

Nine firefighters were treated at the scene for smoke inhalation, and one firefighter was treated for lacerations, said a spokeswoman in the Pasadena fire department. None required hospitalization.

The fire burned fiercely in the all-wood structure, reaching the rodeo arena and recording studio and preventing firefighters from entering the building, which is spread out over 140,000 square feet.

Gilley's was shut down almost two years ago after a lengthy court battle between the owners - country western singer Mickey Gilley and businessman Sherwood Cryer.

In August a judge ruled Gilley could try to satisfy a nearly $20 million judgment against Cryer by claiming 25 properties owned by Cryer in Texas and Tennessee.

State District Judge David West denied a request by Cryer to prohibit Gilley from taking over the holdings, which included Gilley's. Gilley won the judgment in 1988, when a jury found Cryer had siphoned off large amounts of cash from businesses owned by the two men.

Cryer said he drove by Gilley's Thursday afternoon to view the damage. ''I went by to take a look, and it looks pretty bad,'' said Cryer.

''I would have stayed longer, but the police ran me out of there. Even though Gilley's is in my name, Mickey Gilley and his lawyer have control of it,'' said Cryer. ''Heck, they've told me in the past that they would rather Gilley's burn down before I would get ahold of it.''

Gilley could not be reached for comment.

Gilley's, with its mechanical bull and massive dance floor, was the backdrop for the 1980 movie ''Urban Cowboy,'' featuring Debra Winger and John Travolta. Before its demise, Gilley's was billed as the ''largest honkytonk in the world.''

(JULY 6) UPI - San Francisco television newsman Paul Wynne, who broke new ground with his weekly program that documented how he lived with AIDS, died Thursday. 46-year-old Wynne received a host of awards and commendations for his show, which aired each Thursday. Funeral arrangements are pending.

Nicaraguan government officials announced Thursday that the Sandinista army has collected the personal firearms of 25-thousand soldiers, reservists and other Sandinista supporters. The arms make up one-fourth of the weapons believed to have been handed out during the past nine years of civil war against the Contra rebels.

(JULY 6) UPI - Being named to the All-Star team can work wonders on a player's performance.

Just ask Toronto pitcher Dave Steib. Steib, who gave up a total of 12 runs in his last two starts, pitched seven shut out innings and allowed just two hits in the Blue Jays 9-2 trouncing of the California Angels Thursday night.

''It put a little more pressure on me to do well being named to the All-Star team today,'' said Stieb, who boosted his record to 11-3. ''It put pressure on to show I deserve to be there.''

Stieb did just that. He prepared for his seventh All-Star game appearance by striking out four in a row in the second and third innings and the side in the fifth for a personal season-high nine batters.

''His pitches were so good,'' teammate Rance Mulliniks said. ''I kept looking up at the (video) scoreboard and saw some of those guys being punched out and said you couldn't hit those pitches if you were looking for them.

Stieb's performance was marked by torrid fastballs and a dramatic breaking curve.

''You had to be there on the field to appreciate how much those pitches were moving,'' continued Mulliniks. ''Some of them he started so far away from the plate that they quit on them, and then the balls came right back over the plate.''

Glenallen Hill paced Toronto's 11-hit attack with a 3-for-4 night that included a solo homer and an RBI single. Fred McGriff and John Olerud also

hit solo homers for Toronto.

An error by shortstop Dick Schofield helped Toronto open a 2-0 lead in the second. Following a single by McGriff off starter Kirk McKaskill, 6-5, Schofield's error on a grounder by Olerud put runners at first and second with none out. After Greg Myers forced Olerud at second, Hill and Kenny Williams each stroked RBI singles.

The Angels committed another error to add to their four from the previous night and garnered their eighth loss in 11 games.

''We're worried about our defense,'' California manager Doug Rader admitted. ''I've always had a hard time understanding how someone can get into a defensive slump. I don't want to get into specifics, but it will be taken care of. When a club goes flat you lose the joy of the experience.''

McKaskill was rocked for a total of three runs in the fifth and sixth innings including McGriff's 18th homer which made it 3-0 in the fifth. Hill opened the sixth with a single and advanced to third on a single by Mookie Wilson. Wilson went to second on Dave Winfield's throw to third base and both runners scored on Nelson Liriano's bloop double to left-center chasing McKaskill.

''Every facet of my game stinks,'' said McKaskill, who lost for the second start in a row. ''I got to shake myself up a little.''

Elsewhere in the American League, Minnesota topped Boston 7-4, Milwaukee clipped Oakland 4-3, Seattle beat Cleveland 4-1, Kansas City battered Detroit 15-3 and Texas edged Baltimore 3-2.

In the National League it was: St. Louis 4, San Diego 1; Montreal 11, Houston 0; Cincinnati 9, Philadelphia 2; New York 9, Atlanta 8 and Pittsburgh 9, Los Angeles 6.

-- AROUND THE AL --

Twins 7, Red Sox 4

At Minneapolis, Fred Manrique singled in two runs during Minnesota's three-run seventh-inning rally and Kirby Puckett went 3 for 5 to lift Minnesota. Tim Drummond, 1-3, pitched 2 1-3 innings of scoreless relief, giving up three hits and striking out three. Rick Aguilera pitched the final two-thirds of an inning for his 20th save. Rob Murphy, 0-5, took the loss.

Brewers 4, Athletics 3

At Milwaukee, Teddy Higuera and two relievers combined on a three-hitter

to guide Milwaukee. Higuera, 6-2, allowed three runs - one earned - on two hits in seven innings. He struck out nine and walked three. Dan Plesac recorded the final out for his 14th save. Oakland starter Bob Welch, 13-3, allowed four runs on five hits in three innings.

Mariners 4, Indians 1

At Cleveland, Erik Hanson gave up three hits in eight innings and Harold Reynolds drove in three runs, leading Seattle. Hanson, 9-6, struck out nine and walked three while giving up one run. Mike Schooler pitched the ninth for his 22nd save. Cleveland starter Tom Candiotti, 9-4, gave up two runs on seven hits while striking out five and walking two in eight innings.

Royals 15, Tigers 3

At Detroit, George Brett and Bo Jackson each hit homers and drove in four runs leading the Kansas City Royals to a 15-3 victory over the Detroit Tigers.

Jackson's two-run ninth-inning homer gave him 16 for the season. Substitute starter Luis Aquino raised his record to 3-0 with six innings of five-hit ball. Dan Petry dropped to 5-6 and is without a victory since June 5.

Rangers 3, Orioles 2

At Arlington, Texas, Rafael Palmiero's sixth-inning homer put Texas ahead to stay and Mike Jeffcoat pitched 8 1-3 strong innings to lead Texas. Baltimore's Cal Ripken set an American League mark for most consecutive errorless chances by a shortstop. Jeffcoat, 3-3, allowed seven hits and one earned run. Bob Milacki, 4-5, gave up all three Texas runs in 6 2-3 innings.

#90187u0303 07/06/1990 ~United Press International

(JULY 6) UPI - A 14-thousand-acre wildfire reached the eastern Alaska town of Tok late Thursday, forcing the evacuation of all 12-hundred residents. Alaska state troopers say many of the displaced townspeople are camping on an airstrip in the village of Tanacross, 12 miles north of Tok. Coast Guard officials say flames are licking at a Coast Guard communications station.

Some Tok residents refused to leave the threatened town... preferring instead to train hoses on their homes. A local bartender said firefighters were working hard to combat the blaze, but were stymied by shifting winds. The weather also worked against efforts to extinguish the fire, with the

evening temperature 80 degrees. A string of hot, dry days created ideal conditions for nearly 160 wildfires to erupt throughout the state.

NATO leaders are expected Friday to accept a proposal put on the table by President Bush that calls for the Western alliance to reshape its political and military role. In a historic two-day London summit, leaders of the 16 Western member nations agreed in principle to shift their nuclear philosophy to one of ''last resort,'' rather than one of ''flexible response.''

The government says one-third of the nation's two-point-two-Million farms receive federal farm payments. Grain farmers got the bulk of the payments... raking in 59 percent of the total... or five-pointBILLION dollars. In all, 90 percent of all farm payments went to 12 percent of the farms. The figures were released by the Agriculture Department Thursday.

#90187u0305 07/06/1990 ~United Press International

CHAPEL HILL, NC (JULY 6) UPI - A race car driver and a crewman were released Thursday from the burn unit of North Carolina Memorial Hospital following an explosion that injured seven other people and sent flames 40 feet in the air.

The two men, Joe Milliken, 40, of Randelman, N.C., the driver, and Harold Lineberry, 31, of Liberty, a crew member, were injured about 10:20 p.m. Wednesday in a fueling operation during a 300-lap race at Caraway Speedway near Asheboro, N.C.

''We had a car blow up,'' speedway spokeswoman DeeDee Hackett said. ''The flames went 30 to 40 feet in air, damaging another car.''

The explosion occurred after Milliken came into the pit for fresh tires and gas during lap 241 of the race. ''Somewhere on the track he had been hit in the left rear quarter panel knocking the gas tank's filler tube out of place,'' Hackett said.

''When the guy was putting the gas in the car, the gas ran under the car and it caught the hot parts under the car and made it blow up,'' she said.

Milliken was pulled from the flaming car by his brother, Bernie, the car's owner. Bernie Milliken sustained minor burns to his arms and hand, track officials said.

Lineberry and Joe Milliken were airlifted by helicopter to the Chapel Hill hospital and were reported in fair condition overnight. They were released shortly before noon Thursday, hospital officials said.

Joe Milliken suffered burns to his neck, face and wrist. Lineburry was burned on his chest, arms and hands, track officials said.

Seven other crewmembers were treated in Asheboro for minor burns on their hands and arms, Hackett said.

The fire was extinguished by track fire fighters, crew members.

None of the 5,000 spectators was injured, track officials said.

#90187u0306 07/06/1990 ~United Press International

BEIRUT, Lebanon (JULY 6) UPI - Israeli air force jets early Friday bombarded Palestinian positions in the Syrian-controlled southwestern Bekaa Valley and northern Lebanon, wounding five people, police and security sources said.

Two Israeli warplanes dropped six rockets on a base for the Popular Front for the Liberation of Palestine-General Command, headed by Ahmed Jibril near the village of Sultan Yacoub, 6 miles west of Lebanon's border with Syria, police said.

Four other jets maneuvered across clear skies, evading gunfire from the ground and dropping heat-seeking balloons, the police added.

The jets also raided a PFLP-GC naval base in the area of Akkar, near the port city of Tripoli, 42 miles north of Beirut.

PFLP-GC spokesman Abu Walid reached by telephone confirmed the raids and said the group's positions in Sultan Yacoub and naval base in Akkar were directly hit.

Abu Walid said five PFLP-GC fighters, including the commander of the naval base, were wounded in Akkar. Only material damages were reported in Sultan Yacoub.

In Jerusalem, an Israeli army spokesman said the positions targeted by air force jets ''served as bases for organization and departure for attacks on Israel.'' The planes returned safely, the spokesman added.

March 9, Israeli warplanes raided PFLP-GC bases near the Palestinian refugee camp of Nahr Al Bared, north of Tripoli. Two people were killed and 11 wounded.

#90187u0338 07/06/1990 ~United Press International

(JULY 6) UPI - The Georgia Supreme Court Thursday ruled that law enforcement officials can use D-N-A to build a criminal case. The decision came in the case of a man who is accused of raping and fatally stabbing his 12-year-old daughter. Attorneys for James Caldwell wanted the state court to toss out the so-called ''genetic fingerprinting'' as UNreliable. But the court agreed with prosecutors' assertions that the D-N-A was a valid piece of evidence.

Doctors in Portland, Oregon, say Academy Award-winning actor Gene Hackman should be released from the hospital Friday. 60-year-old Hackman received what's known as a balloon catheter earlier this week. Doctors say the procedure allowed Hackman to avert a heart attack because the balloon fractured plaque that had accumulated in the artery to his heart. Doctors said Thursday that Hackman is doing fine.

#90187u0376 07/06/1990 ~United Press International

(JULY 6) UPI - The Atlantic Coast cooled Friday following a week of oppressive heat while temperatures sizzled in the South and storms soaked the Pacific Northwest.

The National Weather Service said cooler weather moved into the mid-Atlantic states overnight after a cold front rolled through the region. Fog covered parts of western Pennsylvania, where Pittsburgh fell to 62 degrees overnight.

Other temperatures in the region ranged from 69 in New York to 70 under cloudy skies in Washington, D.C. The nation's capital reached 100 degrees Thursday and Baltimore hit 104, pushing power companies to their limits.

Skies were mostly clear over New England, with temperatures ranging from a chilly 46 degrees in Burlington, Vt., to 65 in Boston and Providence, R.I. Cool weather was expected for the weekend, with highs in the 60s and 70s.

Hot, dry weather gripped the South again Friday. The only relief came in short, isolated thundershowers in Florida and Alabama. Morning temperatures ranged from 74 in Knoxville, Tenn., to 82 in Charleston, S.C.

Thunderstorms dampened parts of the Texas Gulf Coast on Friday as a high-pressure system hovered over the Southern Plains. The system spread tropical moisture northward through Texas, Oklahoma, Arkansas and New Mexico.

Scattered thunderstorms over Texas and Louisiana brought a brief respite from lingering period of extreme heat. A cluster of thunderstorms hit some outlying areas around Houston with more than 2 inches of rain on Thursday.

A Pacific storm hit the Washington-Oregon coastline late Thursday, bringing scattered showers and thunderstorms across both states and into north-central Idaho. Severe thunderstorms also pounded the north-centeral part of Montana, bringing strong winds, large hail and heavy rain at times.

California had mostly clear skies with light winds and temperatures ranging from the 80s to 90s and higher in the deserts. The central coast ranged in the upper 60s to lower 80s.

Fair skies and light winds dominate western Utah and Nevada with partly cloudy skies and widely scattered thunderstorms in eastern Utah. Little precipitation was expected in the thunderheads.

#90187u0377 07/06/1990 ~United Press International

BOSTON (JULY 6) UPI - Rep. Joseph Kennedy II, D-Mass., plunged into shark-infested waters off the coast of Hawaii to help rescue two people whose fishing boat had capsized, published reports said Friday.

Kennedy and his twin 9-year-old sons were on vacation, fishing off the coast of Kona in Hawaii Sunday afternoon when they heard a distress call over their radio, the congressman and other witnesses said in telephone interviews with the Boston Herald and The Boston Globe.

Rep. Bart Gordon, D-Tenn., Houston Oilers lineman Colin Scotts and former Washington Redskins All-Pro lineman John Wilbur were also aboard Kennedy's chartered fishing vessel when the distress call came in.

A 17-foot Boston whaler, already weighted down by a catch of tuna and a marlin had flipped when the man and woman on board tried to reel in a resisting 483-pound marlin, said Susan Harlan, wife of the captain of Kennedy's chartered boat. The two boaters were clinging to their capsized vessel when Kennedy's boat, the Kealia, approached.

''These people were like moving shark bait,'' Harlan told the Globe. ''It could have been a very serious situation had they not found them.''

Kennedy, Michael Harlan, the son of the Kealia's captain, and Houston Oilers player Colin Scott dove into the water to help the struggling couple.

''I don't know if we got many points for intelligence,'' Kennedy, 37, told the Herald. ''It was tiger shark city.''

''We grabbed the girl and brought her back to the boat we were on,'' the congressman said. The woman's companion was able to swim to the Kealia on his own.

''All our Hyannis Port training came out,'' said Kennedy, referring to the famous clan's compound on Cape Cod.

Kennedy said he put on a mask and dove under the surface to see whether he could right the capsized boat. Once under the boat, he said, he said ''there was, like, a 500-pound blue marlin under the boat, which just about gave me heart failure.''

After determining that the mammoth fish was caught on a line that was attached to a boat, Kennedy and Scott began reeling in the marlin. After about two hours the group managed to pull in the heavy fish and then right the vessel.

The two boaters were not injured. The man's name was not immediately available, and Kennedy only learned after the incident that the woman he had rescued was Mildred Akaka, the niece of Sen. Daniel Akaka, D-Hawaii.

''It all turned out well,'' Kennedy said. ''We saved the boat, we saved them, and we saved their marlin.''

#90187u0392 07/06/1990 ~United Press International

NEW YORK (JULY 6) UPI - Police distributed a sketch of the bearded ''Dart Man'' they believe is responsible for a total of 46 blowgun attacks on unsuspecting women in the midtown Manhattan.

Police say the suspect is a neatly dressed black man in his 30s with a full beard and possibly glasses, weighing between 130 and 150 pounds and standing between 5 feet 6 and 5 feet 8 inches tall.

Occasionally, he carries a black bag, similar to that used to house video cameras, said Joseph DeMartino, deputy chief of the Manhattan South Precinct.

None of the victims - including one who found a dart in her clothing when she returned from shopping about 1 p.m. Thursday - have been seriously injured in the attacks, which began June 26.

A motive for the bizarre attacks is still unknown. But police have been able to put together details of how ''Dart Man'' operates.

At an afternoon news conference Thursday, detectives said they believe the suspect has used a large straw to blow homemade needle-darts into the backs and buttocks of women.

Witnesses have said the man approaches his victims from behind on crowded

sidewalks, blowing the darts from about 10 feet away. All the attacks have occurred in the area bounded by 21st and 54th Streets, between Madison and Seventh Avenues. There have been no attacks reported on weekends or on the Fourth of July holiday.

All except the latest victim, who was black, have been white or Hispanic light-skinned women and all have been well-dressed, he said.

''I have no idea what the motive is,'' DeMartino said.

DeMartino said 18 darts - constructed from needles or straight pins wrapped in paper - have been recovered, but police tests have proved inconclusive.

''We don't have any ballistic evidence to indicate the flight of darts,'' he said.

Darts tested by police, using a straw, flew about 8 feet, he said.

The suspect could face charges of reckless endangerment, assault, or - if a serious injury occurs - felony assault, DeMartino said.

No evidence has been found that any of the darts were tainted or contaminated, he said. ''There's no evidence of contamination or toxicity on the needles,'' he said. ''There's no likelihood of AIDS or anything else.''

DeMartino advised victims of dart attacks to look for someone leaving the area in a hurry and to contact police immediately.

The Guardian Angels, meanwhile, began Thursday a beefed up patrols near Penn Station in an effort to prevent further attacks, the civilian patrol group said.

YELLOWSTONE NATIONAL PARK, MO (JULY 6) UPI - A wildfire in Yellowstone National Park was burning out of control, scarring 75 to 100 acres of timberland on Mount Washburn, park officials said.

Firefighters planned to converge on the blaze Friday, park spokeswoman Marsha Karle said.

Mount Washburn is on the park's eastern edge near Dunraven Pass on the Upper Loop Road. The fire was burning on a slope opposite the road, Karle said.

Yellowstone's current policy is to fight all wildfires, while the park's fire management plan suspended after devastating fires two years ago is being revised.

Eight fires in the summer of 1988 burned nearly 800,000 of Yellowstone's 2.2 million acres. Under Yellowstone's fire-management plan at the time, all natural fires were allowed to burn unless they grew too large.

Two smokejumpers from West Yellowstone parachuted near the fire Thursday on the east slope of Mount Washburn before thick smoke made further jumps too dangerous, Karle said.

Five more firefighters reached the area on foot before dark, she said, but park authorities ruled out sending in more Thursday night because of poor visibility.

All available park firefighters were summoned to a staging area near the fire and will set out for the fire Friday morning, Karle said.

The fire, believed to be lightning-caused, was reported by the Mount Washburn fire lookout at about 4 p.m. MDT Thursday, she said. It spread quickly when strong winds fanned the flames, Karle said.

(JULY 6) UPI - Around the world, around the clock, the latest news from U-P-I...

President Bush is breakfasting with British Prime Minister Thatcher today as the 16-nation NATO alliance wraps up a two-day summit in London. NATO leaders are expected to approve a Bush proposal to re-define NATO's military posture and political rule in an effort to calm what's left of Cold War hostilities.

The nation has lost one of its more vocal activists. Mitch Snyder, the Madison Avenue executive turned unpaid director of the Community for Creative NON-Violence, was found hanged Thursday in Washington, D-C. Police say the activist for the homeless apparently killed himself over a failed love relationship.

NASA and contractor engineers across the nation are studying the design of 17-inch-wide fuel line fittings to try to figure out the cause of fuel leaks. The problem has grounded the shuttles Atlantis and Columbia. Space agency officials say they expect to see ''concrete'' results by next week.

A Christian Science couple convicted of manslaughter face sentencing today in Boston. David and Ginger Twitchell face maximum 20-year prison terms,

but a judge says she woN'T be issuing jail terms. The couple's son died after a five-day illness when he was treated with prayer instead of medical help.

The Environmental Protection Agency is proposing new limits on 24 pollutants in drinking water, including nine possible or probable cancer-causing agents. The regulations are expected to require additional decontamination efforts by 23-hundred water systems serving two-Million people.

#90187u0486 07/06/1990 ~United Press International
(JULY 6) UPI - The Office of Thrift Supervision says the agency will hold a public hearing to determine whether to issue a cease and desist order against Neil Bush. The September hearing will be held in Denver, where the president's son served as director of the failed Silverado Banking, Savings and Loan Association.

Defense attorneys are expected to cross-examine a doctor today in the trial of three youths charged in a brutal beating and rape in Central Park. Jurors viewed a color photo of the victim's bloodied and bruised head as the doctor told them it was ''close to a miracle'' the victim survived last year's attack.

A wildfire in Yellowstone National Park burned out of control last night, scarring as much as 100 acres of timberland on Mount Washburn. Park officials say firefighters will converge on the blaze at first light today. The fire, believed caused by lightning, spread quickly when winds fanned the flames.

Joseph Kennedy swam in shark-infested waters off the coast of Hawaii during his latest vacation. Two Boston newspapers say today that the Massachusetts congressman took the dip Sunday afternoon to help two people after their boat capsized.

#90187u0591 07/06/1990 ~United Press International
(JULY 6) UPI - The town of Tok, Alaska, is a virtual ghost town this morning, with only firefighters sticking around to battle a raging wildfire.

Most of Tok's 12-hundred residents fled the eastern Alaskan community late yesterday as the flames closed in.

The 14-thousand-acre inferno consumed a truck weigh station before jumping a highway and reaching a Coast Guard communication station.

Officials say the town's homes are in danger, with the Tok airport closed and smoke and fire shutting town roads leading out of the town.

Every fire bomber plane in Alaska has been sent to the scene, as well as several from Canada.

The Tok fire is the most dangerous of several that have burned about 175-thousand acres throughout Alaska.

Alaska Governor Steve Cowper has declared a state of emergency, making disaster relief funds available.

The Office of Thrift Supervision says it believes Neil Bush engaged in unsound business practices while director of a failed savings-and-loan.

O-T-S Director Timothy Ryan says the agency will hold a public hearing to determine whether to issue a cease and desist order against the president's son.

Ryan says the O-T-S wants to re-assure the public that regulators are doing everything to insure the integrity of thrift institutions.

The hearing will be held September 25th in Denver, where Bush served as director of the defunct Silverado Banking, Savings and Loan Association.

Bush has denied any wrongdoing during his three years- from 1985 to 1988- as a member of Silverado's board.

The thrift was taken over by goverment regulators four months after Bush stepped down as director. Rescuing the failed thrift is expected to cost taxpayers one-point-six-BILLION dollars.

#90187u0596 07/06/1990 ~United Press International

(JULY 6) UPI - Supporters and critics of homeless advocate Mitch Snyder are mourning the activist's apparent suicide. Snyder, the unpaid director of the Community for Creative Non-violencene, was found hanged yesterday at the homeless shelter he operated in Washington, D-C.

Police say the 46-year-old Snyder apparently took his life because of a shattered love relationship with long-time companion and C-C-N-V associate Carol Fennelly.

Homeless people, many of them weeping, gathered outside the shelter when they learned of Snyder's death. One homeless man, Michael Washington, said Snyder did more to help those in need than anybody else.

In 1984, Snyder went 51 days without eating until President Reagan made a promise to renovate an aging Washington homeless near the Capitol building. Snyder worked and lived in the shelter which now houses 13-hundred people.

The delegates to the Soviet Communist Party Congress are meeting again today in Moscow, one day after Soviet leaders were accused of NOT standing up to the West and being too easy on the Baltic republics.

Also yesterday, the delegates debated changing the party's name to eliminate all reference to communism.

A Central Committee official quoted Soviet President Gorbachev as saying- ''the monopoly of the party has run its course.'' But other delegates expressed concern about ''losing control of society'' during the transfer from single-party rule.

Communist hard-liner Yegor Ligachev said Soviet society is being torn apart by ethnic and social strife.

The Congress is examining every serious problem facing the Soviet Union, with much heated debate about what's needed to improve a nation facing economic despair and internal conflict.

#90187u0605 07/06/1990 ~United Press International

(JULY 6) UPI - The situation in the Liberian capital of Monrovia appears tense following an all-night looting and shooting spree on the part of government troops. Rebels are approaching the city, and fighting has reached the suburbs of Monrovia.

At least 16 people are reported killed in the violence that came hours after the army chief of embattled Liberian President Samuel Doe fled the country. Doe has refused to relinquish control, despite meeting with the U-S ambassador who promised him safe passage out of Liberia.

The rampage by government troops left shops, warehouses and restaurants stripped of all goods.

A serious food shortage has hit Monrovia and forced people to beg for rice. Shipping sources say 250-thousand tons of rice waits in international waters. But the captain refuses to enter port because rebels previously boarded the ship and stole food supplies.

#90187u0708 07/06/1990 ~United Press International
WASHINGTON (JULY 6) UPI - The nation's jobless rate slipped to 5.2 percent in June on a burst of hiring in the health industry and other service sectors of the economy, the Labor Department said Friday.

Private economists expected an increase to 5.4 percent in June following civilian jobless rates of 5.3 percent in May and 5.4 percent in April.

Counting military personnel, the June jobless rate stood at 5.1 percent.

The Labor Department said 40,000 new jobs were created during the month. But if the layoffs of 57,000 temporary workers were not counted, job growth would have totaled 97,000 new positions last month.

''The health services component continued its pattern of strong growth, adding 40,000 jobs,'' the monthly report said. ''There was also a small increase in transportation and public utilities.''

Nonetheless, overall job growth continued to lumber along at a snail's pace and jobs remained scarce in heavy industry despite a recent surge in exports, according to figures compiled by the department's Bureau of Labor Statistics.

The government said that jobs were also hard to find in the construction industry, which has been battered by overbuilt real estate markets in many parts of the nation.

The average workweek edged up to 34.7 hours in June from 34.6 hours in May while the average manufacturing workweek held steady at 41 hours last month, the Labor Department said.

Factory overtime remained at 3.8 hours in June.

All the statistics are adjusted for seasonal factors.

''Employment will be increased only after orders and production pick up and following a lengthening of the workweek,'' according to analysts at

Mitsubishi Bank in New York.

''Viewing employment from this cyclical sequence suggests that employment growth is likely to remain depressed for a while longer,'' the analysts observed.

In its report, the Labor Department also said the teenage jobless rate, apparently reflecting summer hiring, plunged nationwide to 14.1 percent in June from 15.5 percent in May.

The June jobless rate for adult men remained at 4.7 percent, but dipped to 4.5 percent for adult women. Black unemployment held steady at 10.4 percent but the jobless rate for Hispanics declined to 7.1 percent.

The Labor Department also said the number of ''discouraged workers'' - people who have stopped looking for work - increased by 150,000 to 900,000 in the second quarter of the year.

(JULY 6) UPI - The White House says NATO allies have agreed to a proposal by President Bush to invite Soviet President Gorbachev to address the western alliance. The move is seen as a gesture to prove to the Soviet Union the peaceful intentions of the West. President Bush leaves London later today and flies to Houston where he's hosting a seven-nation economic summit next week.

The NATO leaders are preparing to issue a declaration of non-agression toward Eastern Europe, and particularly the Soviet Union, later today as they wrap up their discussions. The leaders have agreed the Western military alliance must take into account the dramatic changes in Eastern Europe in carving out a new role for itself. Presidsent Bush says the summit will ''show that NATO has a new dimension of cooperation with the Soviet Union and new democracies.''

South African police say an explosion ripped through a taxi and bus terminal used almost exclusively by blacks in Johannesburg today. The blast occurred during rush hour, and estimates say from 12 to 16 people

may have been injured. Police say it's NOT clear if the explosion was the work of right-wing activists, but they say all indications point to that conclusion.

Philippine communist guerrillas are taking responsibility for kidnapping an American Peace Corps volunteer and a Japanese aid worker on the island of Negros. The rebels say the victims are involved with the government's counter-insurgency operations. A rebel commander says Timothy Swanson and Fumio Mizuno will be released within the month, but he warns that any action to free them may endanger their lives.

#90187u0760 07/06/1990 ~United Press International

MANILA, PHILIPPINES (JULY 6) UPI - Communist guerrillas acknowledged Friday kidnapping a Peace Corps volunteer and a Japanese aid worker on the central island of Negros and promised to free them in a month, prompting the military to suspend local operations.

The rebels also claimed American Timothy Swanson and Japanese Fumio Mizuno worked for organizations involved in the Philippine government's counterinsurgency operations.

''They are safe,'' said the first statement from the communist New People's Army regarding the two kidnapped men. ''We will turn them over within the month but an offensive by the enemy might endanger their lives.''

Armed Forces chief Renato de Villa later suspended military operations on Negros, saying he wanted to allow civilian negotiators to seek the release of Swanson, 26, of Cheyenne, Wyo. and Mizuno, 36.

Three gunmen kidnapped Swanson June 13 from his house in the mountain village of Patag on the impoverished sugar-producing island of Negros, 300 miles south of Manila, according to his Philippine wife, Merle.

Mizuno was taken May 29 from his Negros silkworm farm in Murcia, where he was a training director of the Tokyo-based Organization for Industrial, Spiritual and Cultural Advancement - a nongovernment rural development agency.

In a statement telephoned to reporters from an unspecified location in Negros, a rebel commander who identified himself as Comrade Efren said Swanson and Mizuno were ''invited'' to a rebel dialogue. The statement did not use the word ''kidnap'' and denied reports ransom had been sought.

''We have initial evidence to suspect that they were working for anti-insurgency operation,'' the statement said. ''They have been very cooperative .... From what they gave us, we have confirmed our suspicion.

''Even if they are guilty, we will spare them this time,'' the statement said. ''But we will not be so kind the next time. Not all aid workers are target. Only those helping the (President Corazon) Aquino government in its total war policy.''

The rebel statement said it determined Swanson and Mizuno were unaware of the perceived involvement of their organizations in the campaign against the NPA.But it said at least one unnamed Peace Corps volunteer in Negros had been informing the military and landlords on the activity of the NPA, which has been battling the Philippine government for 21 years.

Both the U.S. and Japanese governments deny their aid workers were involved in the anti-insurgency campaign of Aquino's government.

A subsequent statement by the rebel general command in Manila denied allegations by U.S. officials that the 19,000-strong guerrilla force had targeted Peace Corps volunteers for kidnapping and assassination. It did not mention Swanson or Mizuno.

The statement accused the United States of making an ''excuse for the direct U.S. political and military intervention with the final aim of having the U.S. bases and occupation troops retained in the Philippines.''

The kidnapping of Swanson was disclosed over the weekend by U.S. officials who said they discovered the abduction while trying to enforce Washington's June 27 directive to withdraw the 261 Peace Corps volunteers in Manila, citing rebel threats.

At least 10 U.S. nationals have been killed in politically motivated incidents in the Philippines over the past three years, including two U.S.

airmen in May. The NPA has vowed to kill more Americans until Washington dismantles its military bases in the Philippines.

Japanese diplomats said after the abduction of Mizuno they planned to withdraw some of the 67-member overseas development workers from areas in the country threatened by rebels.

#90187u0774 07/06/1990 ~United Press International

(JULY 6) UPI - Stock prices on the Tokyo Stock Exchange closed higher slightly Friday in thin trading.

The blue chip Nikkei Average of 225 selected issues, which lost 94.25 points Thursday, gained 93.45 points to close at 32,445.12.

TOPIX, the Tokyo Stock Price Index of all listed major shares, gained 2.16 points to 2,364.20.

An estimated 450 million shares changed hands, down from 472.82 million shares Thursday.

Elsewhere in Asia, share prices closed higher slightly on the Hong Kong Stock Exchange after a slow start following Wall Street's latest decline.

The Hang Seng Index closed the week at 3,357.61, up 1.17 points from Thursday. Turnover was 1.818 billion units.

Share prices closed mixed in light trading on the Singapore Stock Exchange.

The Straits Times Industrial Index rose 2.50 to 1,535.98. The All Singapore Index lost 0.55 to end at 434.47.

Turnover was a modest 48.36 million units.

Share prices closed lower slightly on the Sydney Stock Exchange, ending a three-day, 57-point rally.

The All Ordinaries Index closed down 3.2 points at 1,554.5.

Turnover was an above average 96.6 million shares.

#90187u0811 07/06/1990 ~United Press International
VALHALLA, NY (JULY 6) UPI - Juanita Ayala grieved for two days in her hospital bed after mistakenly being told that her newborn son had died.

Then word came that the baby wasn't dead and two hospitals were trying Friday to figure out how the tragic mixup came about.

On June 28, Ayala, 27, a native of Puerto Rico, gave birth to 7-pound, 11-ounce Luis Miguel, who choked while he was being delivered at Horton Memorial Hospital in Middletown during a difficult Caesarean delivery.

The infant was rushed to Westchester County Medical Center in Valhalla 50 miles away.

''They placed him in an incubator and rushed him away,'' Ayala said. ''All I had to remember him by was a photo taken of him in the incubator.''

Ayala said last Friday she was notified that little Luis was in critical condition.

Then, on Sunday, ''a Hispanic nurse and a doctor came .. and told me that my baby was dead,'' she said. ''I was so devastated I could not stop crying.''

Ayala, who has three boys, said her 9-month-old daughter died of congenital heart disease.

Still hospitalized, Ayala asked her sister to make funeral arrangements. Tuesday, the baby's obituary appeared in the Middletown Herald-Record.

A Westchester County Medical Center spokesman said a nurse saw the obituary and, knowing the baby was still alive, notified doctors.

Ayala said a representative at the medical center called and asked her why she had not called to ask about her child.

''I got hysterical,'' she said. ''I said a doctor told me he was dead. And the caller suggested I better get the name of that doctor because it wasn't true.''

Tuesday, Ayala was released from Horton and rushed to Westchester County

Medical Center to be united with her son, who was still in critical condition.

''He's still attached to the machines,'' she said. ''I pray to God he'll be all right.''

Barry Bowman, a spokesman for the medical center said, ''It appears that the mixup happened at Horton. No one at Westchester ever notified anyone at Horton that the child had died.''

Horton spokesman Candice Groudine said an investigation was under way.

''We are taking this situation very seriously,'' she said.

#90187u0831 07/06/1990 ~United Press International

LONDON (JULY 6) UPI - A small bomb exploded Friday in a trash can a half-mile from where President Bush ate breakfast with Prime Minister Margaret Thatcher, prompting a terrorist scare but causing no injuries, police said.

A Scotland Yard spokesman said bomb experts confirmed that ''some sort of small explosive device'' was placed in the litter bin and exploded just after 7 a.m.

''There were no warnings or claims of responsibility and we don't know how long it had been there,'' the spokesman said.

No one was hurt and there was little damage in the blast outside a bank on the Strand, one of London's most famous streets. Scotland Yard's Anti-Terrorist Squad continued to sift through debris for further evidence.

Police said they believe the explosion was not related to two fake bombs discovered in two central London rail and subway stations early Friday.

City police said a small package wrapped in brown paper with wires running through it was found in Blackfriars Bridge Station.

''The device was X-rayed and found to be a dummy bomb,'' a police

spokesman said.

At the Bank subway station several hours later, police said they discovered a similarly wrapped plastic food container with wires protruding that had been placed inside a large potato chip packet. X-rays showed it was also a phony bomb, the spokeswoman said.

Police sealed off a quarter-mile area around the site of the Strand blast, causing severe traffic snarls in central London. They also evacuated nearby buildings while the Anti-Terrorist Squad searched for clues.

The Strand is about a mile and a half from the Lancaster Gate center for the current NATO summit but only about a half-mile from the official residence of the prime minister at 10 Downing Street.

Bush and Thatcher ate there less than an hour after the early morning blast. The two leaders then went to the final summit session at the Lancaster House conference site under tight security.

The last bombing in London was two weeks ago when the Irish Republican Army planted 10-15 pounds of Semtex explosives inside the entrance of a club frequented by members of Thatcher's ruling Conservative Party.

The explosion wounded seven people, including a Conservative peer.

#90187u0837 07/06/1990 ~United Press International

(JULY 6) UPI - A one-time presidential contender is throwing his hat into a different ring. Jesse Jackson is seeking one of two symbolic seats in the U-S Senate. The new positions were created to champion statehood for the District of Columbia.

Lebanese police say Israeli air force jets bombed Palestinian positions in Syrian-controlled Lebanon today, wounding five people. In Jerusalem, an Israeli army spokesman acknowledged the raids, adding that the planes returned safely.

Albania says it is willing to grant passports to the more than one-thousand refugees sheltered in foreign embassies in its capital. Yesterday, U-N leaders called on the hard-line communist goverment to respect human rights.

Poland's prime minister says he is replacing five ministers in his 23-member coalition Cabinet. Today's shakeup in Warsaw includes ousting former communists who controlled the sensitive Interior and Defense ministries.

Sandinista union leaders say they're expanding a nationwide strike that will continue until the government agrees to talk. A union spokesman predicts Nicaraguans will- quoting here- ''get tired of the inconveniences.''

A hearing will be held today to consider whether two controversial figures can attend Mayor Marion Barry's trial in Washington. Nation of Islam leader Louis Farrakhan and Imani Temple founder George Stallings were barred as potentially ''disruptive'' forces.

-30- 1589

#90187u0841 07/06/1990 ~United Press International

LONDON (JULY 6) UPI - President Bush urged Mikhail Gorbachev on Friday to welcome promised changes in NATO military doctrine as ''a very positive step'' toward allaying Soviet concerns about a unified Germany and repudiating hardliners in the Kremlin.

''Here's an alliance that you should view, Mr. Gorbachev, as defensive and not threatening,'' Bush said at the close of a historic two-day summit of NATO leaders. ''And please convince your military and others in the Soviet Union of this fact.''

With Gorbachev under fire just this week from conservatives enraged by his reformist policies, Bush recommended the Soviet leader ''get on the offense'' at home and sell the evolution in NATO thinking as the result of his own openings to the West.

Bush hailed the outcome of the summit as ''a historic turning point'' after the 16 leaders of the transatlantic alliance committed to substantive, stylistic and semantic changes in its military posture and political role to remain a viable force in the new Europe.

In a 23-point joint declaration, the NATO leaders offered political integration and military restraint to the remnants of the Warsaw Pact with pledges of non-aggression, reduced reliance on nuclear weapons a drawback of forward-deployed forces, expedited arms reductions and limits on the armed forces of a soon-to-be-unified Europe.

In a largely symbolic gesture, they agreed to send NATO Secretary General Manfred Woerner to Moscow next week to invite Gorbachev and other East European leaders to address the alliance and ''establish regular diplomatic liaison'' in the transformation of Europe.

In Moscow, Gorbachev said, ''I would always be ready to go'' to address the NATO ministers.

Soviet Foreign Ministry spokesman Gennadi Gerasimov also announced that

NATO Secretary-General Manfred Woerner will visit Moscow July 14 to discuss the changing situation in Europe.

''We welcome the beginning of the coming together of the two blocs,'' Gorbachev told reporters during a break in the 28th Communist Party Congress. ''It's a difficult process. Everyone knows how difficult it is to move away from stereotypes.''

In many respects, the NATO communique was the product of diplomatic creativity born of political reality. Most of the moves, including the overhaul of a nuclear strategy rendered obsolete by the emergence of democracy in Eastern Europe, had been telegraphed well in advance. In truth, the options were limited and well known.

Bush, however, cast their significance in personal terms for Gorbachev, recognizing the ''historic fear'' the Soviets harbor toward the West because of the loss of more than 20 million people in World War II.

In a further bow to political sensitivities Bush declined to declare the summit a celebration of Western victory in the Cold War. ''I don't think we're dealing in terms of victory or defeat,'' he said. ''We're dealing in terms of: How do we stabilize and guarantee the peace and security of Europe?''

Bush said Gorbachev could use the summit declaration ''to convince others'' that the Soviets need not fear the West at a time when they find themselves weakened economically and in military retreat. He also asserted Gorbachev should now ''feel more confident'' in proceeding with negotiations on arms control and German unification.

''I'd get on the offense and then let the rest of us help him with some of his hardliners,'' Bush said. ''And there's plenty of work to do, but I would think that he'd view this as a very positive step forward and one that vindicates some of the moves that he's made over the past year or two.''

While theorizing NATO's message of peaceful intent may help Gorbachev silence critics of his foreign policy, Bush withheld support of a different kind in again rejecting European calls for a multibillion-dollar effort to rescue the Soviet economy.

Expecting further discussion of the issue at next week's seven-nation Economic Summit in Houston of the top industrialized democracies, Bush said he has ''some big problems'' with direct aid on the order of the $15 billion suggested in recent weeks by West German Chancellor Helmut Kohl.

Though West Germany has gone ahead with a program of $3 billion in credit, much of which will go to West German firms owed money by Moscow, Bush said

he fears no ''breach of alliance cohesion'' if, as expected, the Economic Summit ends next week with the Western powers divided over aid to the Soviet Union.

Bush flew directly to Houston to round out his week of back-to-back summits. Though the Soviet aid issue is to be discused, U.S. officials forecast no more progress toward a consensus than was reported ate last month at a meeting of the 12-nation European Community, whose leaders - four of whom will be in Houston - agreed only to study the options and reconsider the matter this fall.

WASHINGTON (JULY 6) UPI - The judge at the trial of Mayor Marion Barry reversed himself Friday and announced he would allow controversial black religious leaders Louis Farrakhan and George Stallings into the courtroom.

U.S. District Judge Thomas Penfield Jackson said Farrakhan, leader of the Nation of Islam, and Stallings, who split from the Roman Catholic Churcch last year and started the Imani Temple, can be present as spectators at the trial on drug and perjury charges.

Jackson met Stallings and an attorney for Farrakhan at a five-minute hearing Friday after the U.S. Court of Appeals refused to hear a request from the American Civil Liberties Union that Jackson be forced to open his court.

Jackson had barred the men last week, saying he feared they could disrupt the proceedings or intimidate the jury.

Farrakhan, Stallings and others had said Jackson's move typified the federal government's efforts to persecute Barry because he is black.

''The motion is granted,'' Jackson said Friday. ''The only condition being that they obey the proprieties required by the decorum of the court.''

Jackson said he would not rearrange courtroom seating to keep Stallings and Farrakhan from the front row of the spectator section.

Stallings said he was ''elated,'' and planned to be in court Friday. Farrakhan was traveling in Memphis, Tenn., said a spokesman.

''Already the first verdict in the trial of Marion Barry has been rendered '' Stallings said. ''We were going up against rulers of darkness.''

Farrakhan has called Barry's drug arrest an example of ''racially motivated moves'' by the government to ''weaken black elected officials.''

Stallings has said the Justice Department - not Barry - is on trial.

Lewis Myers, attorney for Farrakhan, said he was insulted by the original exclusion of his client.

''Minister Farrakhan has no ulterior motive,'' said Myers.

Asked if the exclusion was racially motivated, Myers said: ''I do not believe that Jerry Falwell or Billy Graham would have been excluded from these proceedings. Whites who are similarily situated would not have been treated like that.''

John Aldoc, a spokesman for Jackson, said the judge ''is trying to run a fair and orderly trial'' under ''difficult'' circumstances.

#90187u0846 07/06/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (JULY 6) UPI - An explosion ripped through a taxi and bus terminal used almost exclusively by black commuters during peak rush hour early Friday, wounding at least 27 people, police and hospitals said.

The injured lay screaming and moaning in the area around the terminal, which was strewn with blood, broken glass and metal fragments from shattered vehicles.

It was apparently the fifth in a spate of suspected right-wing bombings that began last week but had not claimed casualties until Friday.

Striking a site used mainly by blacks ''points fairly strongly to a suggestion this is a right-wing act, but we obviously can't say for sure now,'' a police spokesman said.

Other targets have been property of a liberal city councilor and a councilor of the ruling National Party, a left-wing Afrikaans newspaper, and a black union office.

''Where is my man? Where is my man?'' one woman shouted, blood running down her face and her dress torn off a shoulder. Her husband was badly injured by the blast, which went off around 8:20 a.m., police said.

Ambulances, trauma-unit buses, a helicopter and dozens of police converged on the terminal within minutes and ferried the wounded to nearby hospitals.

A police spokesman put the wounded figure at ''a lot more than 20'' and officials at the Johannesburg and Hillbrow hospitals said 27 people were being treated for various injuries and two were admitted for serious

wounds. No deaths were reported.

The bomb was placed in a concrete garbage bin outside the bus stop, which serves Johannesburg's satellite black township of Soweto, according to witnesses.

''A big fountain of fire blew up out of the bin,'' said Jospeh Moroke, a worker at the terminal. He said people scattered through the terminal, in downtown Bree Street, and brought nearby traffic to a halt.

''The bang knocked people over... . They were lying in the gutters and under cars and it looked like they were all black people,'' said Emily Amabatha, another witness. ''Then everyone was running.''

The blast follows a string of bombings or attempted attacks over the past week blamed by authorities on white extremists outraged at Pretoria's program of racial reform, but the attacks had until Friday only damaged property.

''If this is the work of the extremists, it bodes very badly for South Africa,'' an official of the anti-apartheid African National Congress said in a preliminary reaction.

Chris Hani, chief of staff of the ANC's military wing, added, ''My own response is to tell the government it should not be intimidated by right-wing violence .... It is important to act quickly against this.''

He said such bombings ''will not help in persuading us to end the armed struggle'' waged against the white minority regime for nearly 30 years.

Right-wing bomb targets since last Friday have included the homes and businesses of a liberal city councillor and a councillor of the ruling National Party, the premises of a left-wing Afrikaans newspaper, and an attempted bombing of a union office Thursday, but the device was defused.

A shadowy white-supremacist group, the White Wolves, has claimed responsibility for the explosions at the councillors' property, demanding President Frederik de Klerk call an election to test white support for his apartheid reforms to avert further terrorism.

Ministry of Law and Order spokesman Brig. Leon Mellet pointed out other individuals or organizations could be responsible, including a fugitive on the run following a weapons theft who on June 19 declared war on the government by videotape.

The police ''are doing everything we can to apprehend those responsible,'' a statement said Friday.

Police detained a member of the Afrikaner Resistance Movement for the May 23 bombing of a museum house in Pretoria, another for the June 9 bombing of a union office, put a $18,800 reward on the head of the man who declared war on the government, and temporarily detained 11 rightwingers on a June 23 newspaper report of a plot to assassinate De Klerk and black leader Nelson Mandela.

De Klerk's moves to dismantle 42 years of white minority rule and privilege have outraged the right-wing parliamentary opposition as well as extremists, and leader of the Conservative Party Andries Treurnicht has warned, ''This so-called reform could well provoke people to take drastic measures.''

WASHINGTON (JULY 6) UPI - The Pentagon, in a cost-cutting move, is establishing a consolidated accounting and finance organization for the Defense Department under the direction of the department's controller.

The new combined organization will encompass the Army Finance and Accounting Center, Indianapolis; the Navy Accounting and Finance Center, Crystal City, Va.; the Navy Finance Center, Cleveland; the Marine Corps Finance Center, Kansas City, Mo.; the Air Force Accounting and Finance Center, Denver; the Defense Logistics Agency Finance Center, Columbus, Ohio; and the Washington Headquarters Services Finance and Accounting Operations, Pentagon.

A team of senior personnel will be stablished next Wednesday to develop detailed organizational plans for the control and direction of Defense Department accounting and finance policies and operations, it was announced Thursday.

#90187u0896 07/06/1990 ~United Press International

JERUSALEM (JULY 6) UPI - Secretary of State James Baker has sent a letter to new Foreign Minister David Levy, inviting the Israeli official to meet with him soon, Foreign Ministry officials said Friday.

A meeting of the two senior officials would be the first high-level contact in more than four months between the two countries, whose relations have been increasingly strained over the lack of progress in the

peace process.

Israeli newspapers reported Baker suggested in the letter he was willing to meet Levy, who became foreign minister last month, on July 17 in Paris during German unification talks.

''I understand you are the type of person who solves problems,'' Baker wrote according to the Hebrew daily Yediot Ahronot. ''We must meet very soon.''

A Foreign Ministry official denied a date for meeting was mentioned and described the letter as a ''goodwill'' message with ''an invitaion to meet soon, but no specific date.''

The time of a meeting also would depend on the health of the foreign minister, who is still recovering from a heart attack he suffered three weeks ago, officials said.

The Baker letter, described as ''very warm and friendly,'' was delivered Thursday to Levy by the U.S. Ambassador to Israel William Brown, officials said.

Yediot Ahronot also reported that Israel recently sent messages to Washington saying it would agree to negotiations with Palestinians from the Israeli-occupied West Bank and Gaza Strip without checking their allegiances. The messages indicated a willingness to talk to supporters of the Palestine Liberation Organization, but not PLO members.

The Baker letter is the latest message in a series of letters between the two countries since Prime Minister Yitzhak Shamir formed a right-wing coalition government June 11, when Levy moved from the housing ministry to the foreign ministry. Former Foreign Minister Moshe Arens now is the defense minister.

During the four months of government crisis that preceeded the new government, communication between the two close allies came to virtual halt.

Shortly after the new government was installed, President Bush wrote Shamir asking for Israel's position on the peace process. Shamir wrote back, expressing willingness to procede on the basis of Israel's 1989 peace initiative. The Israel plan calls for elections in the territories that would lead to limited Palestinian autonomy.

In the letter, Shamir reportedly said he still opposed the participation of East Jerusalem Arabs and Palestinian deportees.

The Hebrew daily Ma'ariv reported Friday Shamir told visiting Sen. Joseph

Lieberman, D-Conn., that the United States should not limit itself to telephone calls or message to communicate with Israel and should resume a direct dialogue.

#90187u0904 07/06/1990 ~United Press International

LONDON (JULY 6) UPI - The following is the text of President Bush's opening remarks Friday at a news conference at the North Atlantic Treaty Organization summit meeting:

I'm pleased to announce that my colleagues and I have begun a major transformation of the North Atlantic Alliance, and we view it as a historic turning point.

NATO has set a new path for peace. It's kept the peace for 40 years and today charted a new course for stability and cooperation in Europe.

We're, as you know, issuing a document - the London Declaration - and it makes specific proposals and established directions for the future in four key areas.

First, the London Declaration transforms our relationship with old adversaries. To those governments who've confronted us in the Cold War, our alliance extends the hand of friendship. We reaffirm that we shall never be the first to use force against other states in Europe.

And we propose a joint declaration between members of the alliance and member states of the Warsaw Pact, which other CSCE (Conference on Security and Cooperation in Europe) states could join in, in making a solemn commitment to non-aggression.

We say to President Gorbachev, ''Come to NATO!'' We say to all the member states of the Warsaw Pacts, ''Come to NATO'' and establish regular diplomatic liaison with the Alliance.

And second, the London Declaration transforms the character of NATO's conventional defenses. We can start, and must start, by finishing the current CFE (conventional forces in Europe) talks this year.

Once CFE is signed, we would begin follow-on negotiations to adopt additional measures, including measures to limit manpower in Europe. With this goal in mind, a commitment will be given when the CFE treaty is signed concerning the manpower levels of the armed forces of a united Germany.

We will also seek in the '90s to achieve further far-reaching measures to limit the offensive capability of conventional armed forces. We'll change

our strategy for conventional defense. We agreed to move away from NATO's current strategy of forward defense to a reduced forward presence. We agreed, in addition, to make the principle of collective defense even more evident by organizing NATO troops into multi-national corps.

And third, the London Declaration transforms NATO's nuclear strategy. For 23 years we've had a nuclear strategy called ''flexible response,'' developed to meet a danger of sudden, overwhelming conventional attack.

As that danger recedes, we've agreed to modify flexible response. Nuclear deterrence has given us an unprecedented period of peace, and it will remain fundamental to our strategy. But by reducing its reliance on nuclear weapons, NATO in the new Europe will adopt a new strategy making its nuclear forces truly weapons of last resort.

This new strategy will require different forces. We've decided that once negotations begin on short-range nuclear forces, we are prepared to eliminate all NATO nuclear artillery shells from Europe in return for reciprocal action by the Soviet Union. We agreed that this review should report its conclusions as soon as possible.

And fourth, the London Declaration transforms the Alliance's vision for the CSCE, and the structure for building a Europe whole and free. We know the CSCE process, bringing together North America and all of Europe, can provide a structure for Europe's continued political development. And that means new standards for free elections, the rule of law, economic liberty and environmental cooperation. And we agreed today on six initiatives to give life to CSCE's principles and realize its potential.

As you can see, the London Declaration will bring fundamental change to every aspect of the Alliance's work. This is indeed a day of renewal for the Atlantic community.

For more than 40 years we've looked for this day - a day when we have already moved beyond containment, with unity on this continent overcoming division. And now that day is here, and all peoples from the Atlantic to the Urals, from the Baltic to the Adriatic can share in its promise.

#90187u0914 07/06/1990 ~United Press International

PITTSBURGH (JULY 6) UPI - About 5,500 members of the United Steelworkers have given union leaders the OK to strike Wheeling-Pittsburgh Steel Corp. over its bankruptcy reorganization plan, a newspaper reported Friday.

Andrew ''Lefty'' Palm, chairman of the union's Wheeling-Pitt bargaining committee, said Thursday that 13 USW locals in Pennsylvania, West Virginia and Ohio have voted overwhelmingly to strike if necessary, the Pittsburgh

Post-Gazette reported.

Union leaders at Pittsburgh headquarters say they are frustrated by what they consider inadequate contract proposals and reorganization plan of the steelmaker, operating under Chapter 11 federal bankruptcy protection since April 1985.

Wheeling-Pitt attorney Bruce McCullough said a strike would be ''illegal and stupid.'' Company spokesman Ray Johnson declined to comment.

Wheeling-Pitt, once based in Pittsburgh, now has its headquarters in Wheeling, W.Va. It operates plants in Pennsylvania, Ohio and West Virginia.

The union voting began in late June and ended Tuesday night with approval by workers at the company's Steubenville, Ohio, plant.

The vote gives the union leadership authority to call a strike over three aspects of the steelmaker's plan to reorganize its debts and leave the protection of bankruptcy court.

Union officials also say they will urge members to vote against the reorganization plan once a summary is printed and distributed to some 50,000 parties. Palm said union opposition could vote down the plan.

''Our people are very upset, very angry and very impatient,'' he said.

The strike issues in the resolution approved by the USW, which represents all but about 1,600 of Wheeling-Pitt's employees, include what the union calls ''exorbitant'' professional fees of about $50 million paid to investment bankers and lawyers in the bankruptcy case. That money is equal to about $5 an hour for each Wheeling-Pitt employee for one year.

The union resolution also complains about ''unconscionably low'' wages proposed by the reorganization plan and an employee investment program along with the plan's requirement that a new contract be acceptable not only to management but to creditors and investors.

-30- 2427

#90187u0921 07/06/1990 ~United Press International

SEOUL, SOUTH KOREA (JULY 6) UPI - North Korea said Friday it will open part of its border with South Korea next month and the Seoul government reported progress in arranging a meeting between the prime ministers of the two nations.

North Korea's Committee for Peaceful Reunification of the Fatherland, headed by Ho Dam, a former foreign minister, announced that the northern half of the border truce village of Panmunjom will be open on Aug. 15 ''to

effectively guarantee'' inter-Korea contacts and travel, said Pyongyang radio broadcasts monitored in South Korea Friday.

South Korean officials said the North Korean offer to open the Panmunjon border apparently was aimed at getting radical organizations in the South to try to participate in a mass North Korean mass rally to mark the 45th anniversary of Korean liberation on August 15.

The truce village of Panmunjom, called the Joint Security Area, is a roughly circular area 800 meters in diameter, bisected by the Military Demarcation Line that runs along the 38th parallel line which is the South-North Korea border.

''Opening the northern portion of Panmunjom means nothing. It is not opening their border,'' said a government official. ''Such a proposal could adversely affect the progress being made for a South-North Korea prime ministers meeting.''

But a government announcement in Seoul said officials from each side met for 3 1/2 hours behind closed doors at Panmunjom during the day and reached basic agreement on the procedures for the proposed meeting between the North and South Korean prime ministers.

The announcement said there were no clashes of views at the meeting and that another meeting will be held next Thursday to finalize the accord, it said.

''Both sides agreed to disclose details of the agreed text when it is signed and exchanged at a meeting on July 26,'' the announcement said. ''It now seems almost certain that a historic South-North prime ministers meeting will take place.''

Both sides have agreed the North-South summit could be held in Seoul within a month of the date an accord is signed, making it likely that Prime Minister Kang Young-hoon for the South and his North Korean counterpart, Yon Hyong-muk, will meet before the end of August.

A second meeting of the prime ministers would be held in the North Korean capital of Pyongyang, and subsequent meetings will take place alternately in the two capitals.

Each side will have a 50-member press corps and a group of 33 support personnel accompanying the official delegation for the meetings, it has been agreed.

The Friday session at Panmunjom discussing the draft of the basic accord was not open to news media. Reporters were not invited to the truce village.

The Noewae Press, a semiofficial organization in Seoul monitoring communist news outlets, said the North Korean committee also set forth three principles for promotion of contacts between the two sides.

The three principles included that contacts should be dedicated to the cause of reunification, that political parties, organizations, and people of various social strata should be allowed to take part, and that restrictions based on legal and social conditions should be removed, Naewoe said.

-30- 3480

#90187u0931 07/06/1990 ~United Press International

TOKYO (JULY 6) UPI - President Bush and Japanese Prime Minister Toshiki Kaifu will hold a pre-economic summit meeting in Houston on Saturday to coordinate their positions on aid to the Soviet Union and China.

The leaders of the seven major industrialized nations meet in Houston for three days starting Monday but Bush and Kaifu scheduled an early session to go over summit strategy.

''We regard this meeting as very important,'' said Taizo Watanabe, a Foreign Ministry spokesman. ''We are sharing so much in common vis-a-vis the summit.''

There is no agenda for the scheduled two-hour Bush-Kaifu meeting but they are expected to focus on what could become two key issues at the economic summit - aid to the Soviet Union and China.

Japan and the United States are in agreement on opposing extensive financial aid to the Soviet Union. As for China, Kaifu hopes to persuade Bush that it is time to resume formal contacts and extend economic assistance to Beijing.

The leaders of NATO, including most of the participants going to the economic summit, met in London Thursday and Friday and agreed to a suggestion by Bush to invite Soviet President Mikhail Gorbachev to address a future NATO summit.

Bush, who will brief Kaifu on the results of the NATO summit, has been willing to give non-economic assistance to Gorbachev but not financial aid.

British Prime Minister Margaret Thatcher also opposes any economic aid package for Moscow and the three argue that Gorbachev must reform his economy and resolve regional issues before they can send aid.

West Germany, France and Italy favor aid to the Soviets now.

On China, Japan strongly favors resuming Western aid to Beijing, which was suspended after the government's bloody crackdown on pro-democracy demonstrators in June 1989.

Foreign Minister Taro Nakayama told Japanese reporters in Vienna Thursday that Japan would lift its freeze on a $5.4 billion loan to China after the Houston summit.

Kaifu said Friday before leaving for Houston that even if Japan is the only one of the seven summit nations to resume economic aid to China, he would prefer to do with the approval of the other participants.

''In the event that we resume loans to China on our own, we would like to gain the understanding of the Western nations,'' Kaifu was quoted in a report by the Kyodo news service.

''I think we can win their understanding and consent,'' Kaifu reportedly said.

Political observers said Kaifu hopes to first win Bush's support for Chinese aid and then approach the other summit leaders.

''In resuming yen loans to China, Kaifu wants to obtain Bush's consent before anybody else's,'' said Minoru Hirano, a political columist for the Yomiuri newspaper.

Japanese officials argue that aid to China is necessary to avoid further isolation of the Chinese and encourage Beijing to adopt democractic reforms.

Following the summit, Kaifu will visit Atlanta on Wednesday and Thursday and Colorado Springs, Colo., on July 13 and 14, before returning to Tokyo via Anchorage, Alaska, on July 15.

#90187u0937 07/06/1990 ~United Press International

LONDON (JULY 6) UPI - President Bush, declaring ''ground rules are out there'' for Middle East peace talks, said Friday he hopes Israel will move forward to get the stalled process moving again.

At the same time, Bush emphasized the United States has suspended, not ended, its dialogue with the Palestine Liberation Organization and that he hopes PLO chief Yasser Arafat reiterates his denunciation of terrorism and takes action against Palestinian commandos whose abortive raid on Israel sabotaged the U.S.-PLO contacts.

In a six-page letter to Bush on June 28, Israeli Prime Minister Yitzhak Shamir said Israel is ''prepared to continue to act in coordination with the secretary of state to promote a dialogue with a Palestinian delegation'' but he refused to accept the participation of either Arabs from Israeli-occupied East Jerusalem or political activists deported by Israel from its occupied territory in the talks.

Bush, responding to questions at a news conference at the end of the NATO summit meeting, said Shamir's letter ''leaves me feeling we need further clarification'' from the Israeli government.

''Look,'' Bush said, ''we want to see the peace talks go forward.''

The president said there is ''a United States policy and we're going to

stay with the policy. ... But we will do everything we can to encourage a discussion that will end up in peace.

''There has got to be talks; Palestinians have to attend these talks,'' he said.

Bush said he and Secretary of State James Baker had been on the telephone to Jordan's King Hussein and other Arab leaders and would continue those discussions.

''The ground rules are out there,'' he said.

Baker has suggested that the Palestinian delegation to talks with Israel include some people from East Jerusalem and deportees to insure that Palestinians in East Jerusalem and those living abroad have some representation.

Baker has expressed annoyance with Israel over the stalled Middle East peace efforts and in congressional testimony in early June even read out the White House phone number, saying Israel should call the White House when it was ready to act seriously.

Bush also said that he would like to see the dialogue with the PLO resumed saying, ''I happen to think the dialogue has been useful.''

On May 30, Palestinian commandos in a speedboat launched an abortive attack on Israel. Although the group was from a faction not under Arafat's control, it prompted the United States to reconsider its small-scale but on-going diplomatic contacts with the PLO.

On June 20, Bush announced a suspension of the 18-month-old talks and said he wanted Arafat and the PLO not only to specifically denounce the raid and reiterate its opposition to terrorism, but also to punish those responsible for the raid.

Bush repeated those conditions Friday.

#90187u0949 07/06/1990 ~United Press International

(JULY 6) UPI - President Bush told reporters in London this morning that NATO leaders have agreed to ''transform relationships with old adversaries'' into new friendships. The president said the Western military alliance has a solemn commitment to peace, highlighted by a declaration of non-aggression against the Soviet Union.

Bush said NATO leaders invite Soviet President Gorbachev and other Eastern leaders to establish regular diplomatic ties with NATO. The president

added that alliance leaders agreed NATO will NEVER be the first to use force against Europe.

In a statement issued by NATO leaders concluding their two-day summit, they outlined a new course of action. The alliance moved away from its ''flexible response'' policy regarding nuclear weapons and agreed to use nuclear weapons only as a last resort. The statement also indicates NATO would limit troop levels in a unified Germany to re-assure the Soviet Union the West in NOT a threat.

At least 14 people died this morning in an explosion and fire at an Atlantic Richfield chemical plant east of Houston. Sheriff's officials say the blast occurred near a wastewater treatment storage tank and may have been sparked by workers trying to start a generator. Rescuers are searching for more victims.

South African police say at least 27 people were injured this morning when an explosion ripped through a crowded bus and taxi terminal in Johannesburg. The attack appears to be the latest in a rash of suspected right-wing attacks carried out by activists angry about racial reforms.

#90187u0966 07/06/1990 ~United Press International

BELGRADE, YUGOSLAVIA (JULY 6) UPI - Serbian police occupied the offices of Albanian-language media in Kosovo Friday for the second day after the Serbian republic's communist leadership seized control of the rebellious province.

The action Friday prompted a strike by hundreds of workers but officials said the situation was otherwise normal.

Thursday, the government of Serbia - the largest of Yugoslavia's six republics - dissolved all of Kosovo's governmental machinery and assumed control of the overwhelmlingly ethnic Albanian province.

The move was justified under a law aimed at protecting the ''territorial integrity'' of Serbia and came four days after 114 ethnic Albanian lawmakers declared Kosovo an independent republic.

About 1.7 million ethnic Albanians and 200,000 Serbs live in Kosovo. The majority charges it has been deprived of political and human rights by the republic's communist government, while the Serbs say ethnic Albanians want to secede from Yugoslavia and merge with neighboring Marxist Albania.

The province has witnessed periodic anti-Serbian unrest for the past decade and efforts to resolve the situation have long been deadlocked. More than 30 ethnic Albanians have been killed by security forces this year and about 300 people, including Serbian police, have been injured.

Kosovo is cherished by Yugoslavia's 8.5 million Serbs as the birthplace of their culture, history and orthodox religion.

''It is calm in Kosovo and there are no incidents,'' Serbian Interior Minister Radmilo Bogdanovic told state-run Belgrade radio.

But he indicated that Serbian authorities were having trouble reactivating government-owned broadcast and print media in the Kosovo capital of Pristina, 200 miles south of Belgrade, the managements of which were replaced in Thursday's takeover.

''We still have to consolidate the situation in the Pristina radio and television and in the Rilindja newspaper,'' Bogdonovic said.

The radio reported that about 300 ethnic Albanian journalists and other broadcast and newspaper employees walked off their jobs after punching in for work.

''We shall return to work only after the police have left the building,'' a leader of the radio and television workers told reporters in Kosovo, according to the radio.

Special Serbian para-military police units took over the headquarters of Pristina radio and television on Thursday afternoon, and all Albanian-language broadcasts were suspended for more than four hours. Broadcasts resumed only with music and Serbian-language news bulletins.

Jusuf Buxhiovi, the secretary of the Kosovo Democratic Alliance, the largest of the province's anti-communist ethnic Albanian groups, said he, the organization''s president, author Ibrahim Rugova, and two other members were taken to a Pristina police station for interrogation Thursday evening.

''We spent some three hours at the police for informative talks. The police behaved very correctly,'' Buxhiovi told reporters outside the Kosovo Writers Union, which was sealed off by police Thursday.

''The Serbian decision is illegal and anti-constitutional,'' Buxhiovi said. ''The situation in Kosovo now is worse than a state of emergency. This situation is untenable for Yugoslavia and for Europe.''

Buxhiovi said his group planned to maintain daily contacts with reporters if ''we are not arrested.''

#90187u0971 07/06/1990 ~United Press International

AMRITSAR, INDIA (JULY 6) UPI - Sikh militants attacked an elite National Security Guard Blackcat commando unit early Friday, sparking a gun battle that killed four rebels and two commandos, police said.

The encounter occurred just two days after two civilians were killed by stray bullets from fighting between commandos and militants in the nearby village of Manake.

The area is known as a stronghold for Sikh separatists who are waging a bloody campaign for a theocratic Sikh state. About 800 of India's 4,000 Blackcat commandos, a specially trained unit of the National Security Guard, have been deployed to northern Punjab state to stem the violence.

Police said Friday's attack occurred about 2 a.m. as the commandos were waiting to ambush militants who, according to intelligence reports, were

going to stage a meeting in a farmhouse near the village of Varnala, about 20 miles south of Amritsar.

But about eight militants, apparently on their way to the meeting, spotted the commandos in the moonlight and opened fire, killing two commandos and wounding five others, police said.

Four militants were killed when the commandos returned fire, police said.

At least four other militants escaped into a nearby sugar cane field. Security forces searched the area for the next three hours, but failed to make any arrests, police said.

More than 7,000 people have died since 1983 in separatist-related violence in Punjab. Sikh militants allege that members of their faith, who make up 2 percent of India's 820 million people, are discriminated against by the government of Hindu-dominated India.

#90187u0977 07/06/1990 ~United Press International

LONDON (JULY 6) UPI - Prime Minister Margaret Thatcher Friday hailed Mikhail Gorbachev for changes that have allowed a less warlike direction for NATO, but said Western defense will still rest on both short and long range nuclear weapons.

Officials from member nations said Britain took solitary stances on various issues during the two-day NATO summit, urging the 16 members to show caution over the disintegration of the Warsaw Pact.

"A wise man guards against the future as if it was the present," Thatcher said during the opening session. "We must match the moment but not at the expense of our future security."

The British leader told a 30-minute final press conference the leaders had successfully struck the balance of mixing defense needs with vision in responding to the outbreak of democracy in the East. "I think it is the most welcome and exciting event this century," she said of the changes. "It is too important, too deep, to really be called victory."

Thatcher said Gorbachev had yet to respond to an invitation to address NATO at an as yet undecided date. The Soviet leader must also indicate the level of leaders he wanted to meet, but President George Bush said he would attend if asked. "Without President Gorbachev, none of this would have happened," Thatcher said of the NATO changes.

"But the basis from which we have been able to greet the changes in the Soviet Union has been a basis of sure defense," the prime minister said.

"There are many people (in the East Bloc) who always hoped that we would keep up that defense for freedom and peace because they also desired these conditions," she said.

Thatcher said NATO was underpinned by U.S. troops on German soil and by American nuclear weapons across the alliance. The final declaration said the alliance would try to reduce its reliance on nuclear weapons but that the devices would still fulfill an essential role of ensuring no opponent may try a first strike.

She said the nuclear deterrent would remain rooted in both short and long-range weapons. NATO's short-range arsenal of nuclear artillery shells and Lance missiles could now only reach as far as the new democracies in Eastern Europe and the NATO declaration showed willingness to eliminate the outmoded weapon category if the Soviet Union reciprocates.

Thatcher said she would proceed with an air-launched short range missile being made by an Anglo-French consortium to replace the Lance. She and Foreign Secretary Douglas Hurd said they spent a lot of time discussing the wording of a clause on plans to adopt a new NATO strategy making nuclear forces truly weapons of last resort.

British officials had said they were concerned about the phrase "last resort" because it clashes with the declared strategy of being able to launch a first strike and could make conventional war more likely.

Belgian Prime Minister Wilfried Martens, in a thinly veiled comment on Britain, said one voice called for a wide range of sensitive military matters - including reduction of NATO forces on German soil - to be deferred to defense ministers. There were different opinions in the meetings, he said.

Britain in other forums, such as the 12-nation European Community, has been at odds with West Germany and France on the best approach to cope with instability in the Soviet Union. Thatcher opposes unbridled aid to Moscow until it shows signs it is more committed to a market economy.

#90187u0993 07/06/1990 ~United Press International

INDIANAPOLIS (JULY 6) UPI - A former official with a federal banking agency says people with adjustable-rate mortages may have been overcharged.

Based on a report by John Geddes, a former employee of the Federal Savings and Loan Insurance Corp., Sen. Richard Lugar, R-Ind., said Thursday he would request an investigation into the loan activity. He said he would ask Sen. Donald Riegle, D-Mich., to hold hearings by the Senate Banking Committee.

Geddes, 33, a computer specialist, estimated that overcharges could reach $15 billion. He said if the overcharges continued unchecked, the total could reach $65 billion by 1996. "These borrowers are being overcharged, and they have no idea that they are," Geddes said.

Geddes, who has worked seven years in mortgage banking and finance, conducted an audit in 1988 that showed most of one bank's adjustable rate morgages were incorrectly calculated.

He has been studying the problem independently during more than a year. He determined that in many cases data systems may be inadequate to handle the variety of loans; borrowers and lending company employees misunderstand how the loans work and errors often occur when lenders make their adjustments.

Geddes said he worked 360 hours to prepare a report he sent to Lugar in October. "We know that some homeowners with adjustable mortgages are being overcharged," Lugar said. "It's important that we have a congressional investigation and hearings to see if this is just the tip of the iceberg."

Lugar said the FDIC also has directed its regional offices to review ARMs and reimburse loan customers who have been overcharged. Geddes said many problems hinge on the way a company rounds its interest rates when making adjustments.

-30- 1954

#90187u0999 07/06/1990 ~United Press International

LONDON (JULY 6) UPI - NATO leaders, seeking to reassure Moscow that the West is not a threat, agreed Friday to use nuclear weapons only as a last resort and invited Soviet President Mikhail Gorbachev to address a ''transformed'' Atlantic alliance.

With a joint statement titled ''The London Declaration on a Transformed North Atlantic Alliance,'' the 16 NATO heads of state ended a two-day summit intended to adapt the 41-year-old North Atlantic Treaty Organization to changing European realities.

President Bush hailed the outcome of the summit as ''a historic turning point.'' He said Gorbachev could use the summit declaration ''to convince others'' that the Soviets need not fear the West at a time when they find themselves weakened economically and in military retreat.

In addition to radically revamping NATO military doctrine on the use of nuclear weapons, the leaders offered to negotiate troop levels of a united Germany - a critical concession to win Soviet acceptance of a unified Germany in NATO.

The statement also endorsed a greatly enhanced role for the 35-nation Conference on Security and Cooperation in Europe, or CSCE, and agreed to remove 1,400 nuclear artillery shells from Europe providing the Soviets take ''reciprocal action'' once talks begin on short-range nuclear forces.

''We have no aggressive intentions and we commit ourselves to the peaceful resolution of all disputes,'' said the summit's final declaration.

NATO joined with nations of the Warsaw Pact in a statement ''in which we solemnly state that we are no longer adversaries.''

Gorbachev and other Eastern European leaders were asked to address NATO in Brussels and the alliance also invited those countries ''to come to NATO, not just to visit, but to establish regular diplomatic liaison.''

''They won't be members of NATO and they will not participate in the counsels of NATO,'' national security adviser Brent Scowcroft said in an interview with the Cable News Network. ''But they will be there to observe to discuss, to exchange views.

In Moscow, Gorbachev said he has not yet received a formal invitation to attend a future NATO meeting, but said, ''I would always be ready to go.''

NATO Secretary-General Manfred Woerner will deliver the summit's message to Gorbachev in Moscow on July 14.

"We welcome the beginning of the coming together of the two blocs,'' Gorbachev told reporters during a break in the 28th Communist Party congress. ''It's a difficult process. Everyone knows how difficult it is to move away from stereotypes.''

Bush said the London Declaration sends a clear message to the Soviets: "Here's an alliance that you should view, Mr. Gorbachev, as defensive and not threatening and please convince your military and others in the Soviet Union of this fact.''

Nuclear arms will be ''truly weapons of last resort,'' Bush said, urging Gorbachev to step up his reform campaign.

''I'd get on the offense and then let the rest of us help him with some of his hard-liners,'' Bush said. ''I would think that he'd view this as a very positive step forward and one that vindicates some of the moves that he's made over the past year or two.''

British Prime Minister Margaret Thatcher termed the document ''a landmark in the history of NATO and of Europe,'' which should persuade Warsaw Pact countries ''they have nothing to fear from NATO or a unified Germany within NATO.''

''NATO now has a new international vocation, a political vocation,'' said Canadian Prime Minister Brian Mulroney.

A crucial part of the communique concerns German troop levels, which would number about 700,000 after unification.

Once an initial CFE treaty is signed, the NATO communique says, follow-up talks should begin to add ''additional measures, including measures to limit manpower in Europe. With this goal in mind, a commitment will be given at the time of signature of the CFE treaty concerning the manpower levels of a unified Germany.''

West Germany had previously resisted any negotiations that single out - or ''singularize'' - its forces in the context of the conventional forces in Europe (CFE) talks, which currently involve only U.S. and Soviet troop levels.

Woerner insisted that ''Germany is not singularized'' in the declaration, because ''such a commitment will be given within the framework of a general limitation of manpower.''

#90187u1015 07/06/1990 ~United Press International

SRINAGAR, INDIA (JULY 6) UPI - India's home minister said Friday that broad new powers granted to security forces would help curb the Moslem separatist movement in the troubled Kashmir Valley but the militants vowed to strike back ''with more force and vigor.''

The comments from Home Minister Mufti Mohammad Sayeed and Moslem militants fighting for independence from India came a day after the New Delhi-appointed governor of Jammu and Kashmir state issued an order declaring the entire Kashmir Valley a ''disturbed area.''

The declaration allows security forces to shoot to kill lawbreakers and prohibits public gatherings of more than five people. Authorities also are allowed to destroy houses where militants have been hiding or have staged attacks on security forces.

''Such declarations by the Indian government can never help in curbing the rebellion of the Kashmiri people that has been launched against the forcible Indian occupation of the state,'' said a spokesman for Al-Omar, a leading militant organization. ''Our organization will strike with more force and vigor all military installations and patrols and bunkers all over Srinagar city.''

But the minister said authorities would end the popular uprising against

Indian rule in the Kashmir Valley, home to most of the region's 4 million Moslems. Kashmiris believe separation from India is necessary because of years of alleged discrimination by Hindu-dominated New Delhi administrations.

''Militancy in Kashmir shall have to be eradicated but we should also see to it that innocent people are not harmed,'' Sayeed said Friday during a news conference at his home in Sringar.

Sayeed said that Thursday's ''disturbed area'' declaration would help authorities ''check infiltration'' of Kashmiri militants from Pakistan.

New Delhi has repeatedly accused Islamabad of arming and training militants leading the violent separatist movement in Kashmir. Pakistan has denied the accusations but has acknowledged providing moral support to the movement.

A state court official, however, said government policy in Kashmir has failed.

''The promulgation of this (disturbed area) notification is a clear example of the Indian government's total failure to bring back normalcy to strife-torn Kashmir,'' said Sued Tassaduq Hussain, a senior advocate in the Jammu and Kashmir High Court.

''The declaration shall now provide the army and the paramilitary forces with brutal powers to be used against innocent civilians which they have already been doing and were wanting a legal cover,'' he said.

Reaction to the new powers came as Moslem militants kidnapped the son of Srinagar's district magistrate and demanded that two of their colleagues be freed from prison.

Early Friday, security forces and militants fought each other for about two hours in at least 12 locations, witnesses said.

#90187u1020 07/06/1990 ~United Press International

BOSTON (JULY 6) UPI - David and Ginger Twitchell, the Christian Science couple convicted of manslaughter for failing to get medical help for their son before he died, were sentenced to 10 years probation Friday subject to medical checkups for their other children.

Suffolk Superior Court Judge Sandra Hamlin also ordered the Twitchells to seek medical attention if any of their current or future children develop a serious illness.

The Twitchells were convicted Wednesday of precipitating the April 1986 death of their 2 1/2-year-old son, Robyn, through wanton neglect. Instead of summoning a doctor, the couple tried to cure the boy through prayer. The boy died of a bowel obstruction after a five-day illness.

Hamlin ordered the Twitchells to seek periodic medical checkups by a licensed pediatrician for their three surviving and future children.

She put the Twitchells under maximum probationary supervision for at least one year, subject to review.

''We have always tried to obey the law and we will try to obey the judge's instructions,'' David Twitchell said. ''Even monthly examinations probably would not have helped Robyn's problem. We never rule out medical care' we just feel prayer is best - that prayer is the proper first step.''

The Twitchells each faced a maximum 20-year prison term but Hamlin told a hearing Thursday she was inclined to accept the district attorney's recommendation of probation.

Defense attorneys Steven Lyons and Rikki Klieman said Hamlin's advice to jurors made the guilty verdict inescapable. They said the judge should have polled the panel after the verdict was announced.

Klieman filed a notice of appeal.

Klieman accused Hamlin, in her instructions to the jury, of ignoring a 1971 Massachusetts law that she said exempts parents who practice faith healing from child neglect laws as long as it is administered under a recognized religion.

Prosecutors contend the law does not protect faith healers in instances when a child is seriously ill and Hamlin defended her instructions.

''The jury in this case was instructed that the law permits a parent to use spiritual healing for a child, but spiritual healing is not a defense when a child is at risk of serious bodily injury or death,'' the judge said.

Klieman, however, was not appeased.

''I don't understand how they had any room at all to maneuver except to return a verdict of guilty,'' Klieman said, adding that given the instructions she was surprised the panel deliberated ''longer than a minute and a half.''

Several legal experts concurred, saying Hamlin's initial charge to jurors before deliberations began and three subsequent clarifications seemed

unusual.

''The judge's charge to the jury may not have been very accurate,'' Harvard Law School professor Arthur Miller said. ''I'm sure that will be a major part of the appeal.''

Four other convictions of Christian Science parents for similar offenses - in Florida, California and Arizona - are also being appealed.

#90187u1022 07/06/1990 ~United Press International

WASHINGTON (JULY 6) UPI - Defense Secretary Dick Cheney will cut short his European trip to NATO countries and return Tuesday night to Washington to take part in White House-congressional budget negotiations, the Pentagon announced Friday.

Cheney left Monday night to visit Norway, Greece, Turkey, Portugal and Spain. He was scheduled to return to Washington next Saturday, but he canceled the planned stops in Portugal and Spain to return early.

''The secretary has contacted the Spanish and Portuguese ministers of defense to express his regrets that he is not able to visit their countries at this time,'' a Pentagon statement said. ''He also expressed his hope that he would be able to reschedule the visits for this fall.''

Cheney, who was holding talks with fellow NATO defense ministers and visiting U.S. troops along the alliance's southern flank, was returning early ''to participate in deliberations regarding the 1991 budget,'' the statement said.

#90187u1035 07/06/1990 ~United Press International

VIENNA (JULY 6) UPI - Albania said Friday it is willing to grant passports to refugees sheltered in foreign embassies in the capital of Tirana and the number of asylum-seekers soared to about 2,000, triggering a shortage of food and medicine.

The hard-line communist government also rejected as a ''concoction'' the Western news reports that a number of Albanians had died in clashes with security forces earlier in the week.

In Bonn, a Foreign Ministry spokesman said there were more than 1,000 refugees in the West German Embassy alone - up from 86 on Thursday morning.

About 230 refugees jammed the French mission and more than 300 were being sheltered in the Italian embassy, government officials said. Diplomats in

Rome described the logistical situation in the crowded embassies as ''critical'' with food, medicine and hygienic facilities in short supply.

Diplomatic sources and Western news reports estimated the total number of refugees sheltered in 18 foreign embassies at around 2,000. The French, German, Italian and Polish governments made arrangements to fly food, medicine and personnel into Tirana, but it was not clear if the aircraft would be permitted to land.

Not all the refugees wanted to leave Albania but were merely seeking protection from the security forces, diplomats in Bonn and Belgrade said.

''It is a difficult situation because so far no solution can be seen,'' said a diplomatic source in the Yugoslav capital. ''They are in our embassy because they are afraid of the police. They do not want to leave Albania.''

The French Foreign Ministry summoned Albania's ambassador to Paris, Xenophon Nushi, ''to try to find a humanitarian solution'' to the refugee problem, which was being exacerbated by high temperatures in the Albanian capital, ministry spokesman Daniel Bernard said.

He said a number of injured people as well as women and children were inside the French Embassy compound, although some of them were only seeking protection and did not wish to leave Albania.

In Geneva, West Germany's Ambassador to the United Nations, Hans Otto Brautigam, called on U.N. Secretary-General Javier Perez de Cuellar to intervene in helping to obtain exit visas for the refugees.

A U.N. spokesman said Perez de Cuellar, who went to Albania in May in the first visit there by a U.N. chief, had committed himself Thursday to ''doing all he can'' to resolve the crisis.

Albania's Foreign Affairs Ministry, in a statement carried by the official Albanian Telegraphic Agency, said the government's promise to supply passports to anyone who wants one also applies to the asylum-seekers.

''The Albanian authorities ... are ready to grant passports, even to those citizens who are still in the foreign embassies and who shall ask for such a thing,'' the statement said.

It called foreign media reports of deaths during Monday's clashes between police and demonstrators an ''out and out concoction'' in a ''sensational and ill-wishing campaign.''

The Austrian news agency, citing diplomatic sources in Tirana, has reported at least two people died as a result of clashes Monday between

police and Albanians trying to enter the West German Embassy. The Bonn government, in a statement Thursday, said it had no knowledge of the deaths.

West Germany has confirmed at least two Albanians were wounded trying to scale a wall to enter the embassy compound. The government condemned the shootings and requested free passage out of the country for the refugees.

The East German news agency ADN meanwhile said Albania's communist party Central Committee held an emergency meeting Thursday and was expected to issue a statement on the refugee question.

The disturbances in the tiny Balkan country were seen as an embarrassment to the government of communist leader Ramiz Alia, who presides over the last avowedly Stalinist - and most isolated - nation in Europe. Despite introducing political reforms this spring, Alia insists he is not retreating from his orthodox brand of communism.

Last year, thousands of East Germans poured into West German embassies in Berlin, Prague, Warsaw and other European capitals in a move that contributed to the eventual collapse of East Germany's hard-line communist government.

#90187u1039 07/06/1990 ~United Press International

(JULY 6) UPI - President Bush says North Atlantic Treaty Organization ministers began ''a new path for peace'' at a two-day summit that ended today in London. Bush told a news conference the alliance reaffirms that- in his words- ''we shall NEVER be the first'' to use force against those in Europe. The meeting was highlighted by an invitation to Soviet President Gorbachev to speak to NATO.

Officials in Texas are searching for additional victims as well as clues in an explosion and fire today that killed at least 14 people at a chemical plant east of Houston. Harris County Sheriff's spokesman Rick Johnson says rescuers are searching the rubble for more bodies. Authorities say the explosion may have been triggered by workers trying to start a generator.

The Labor Department says the nation's jobless rate slipped to five-point-two percent last month in a better-than-anticipated report. Private economists expected an increase to five-point-four percent in June... but the figure fell on a burst of hiring in the health industry and other service sectors of the economy. Counting military personnel, the June jobless rate stood at five-point-one percent.

Albania says it will grant passports to all refugees shelterd in foreign

embassies in the capital of Tirana. Just how many passports that would involve is NOT clear, but the total reportedly has soared to more than 13-hundred and continues to climb. One report by the Austrian news agency A-P-A says as many as 15-hundred Albanians are being sheltered in 10 diplomatic posts.

#90187u1047 07/06/1990 ~United Press International

(JULY 6) UPI - Russian republic President Boris Yeltsin wants the 28th Communist Party Congress to enact radical changes. Yeltsin was greeted by tepid applause today when he urged the gathering of mainly conservative delegates to change the party's name and reform the organization to allow more democracy. Delegates listened attentively to Yeltsin, but reacted coolly when he finished.

Personal problems apparently got to a man who spent most of his time trying to ease the trouble of others. Homeless advocate Mitch Snyder is dead at 46, apparently taking his own life in Washington, D-C, yesterday. One person who lives on the streets of the nation's capital reacted by calling Snyder's death ''the ultimate sacrifice.'' But Michael Washington added- ''that wasN'T necessary.''

Testimony resumes this morning in New York in the trial of three teen-agers accused in the rape and beating of a Central Park jogger. Lawyers for the defendants are expected to cross-examine a doctor who testified it was a near-miracle that the victim survived last year's attack. Yesterday, jurors in the case were visibly disturbed by grisly photos of the victim taken just after the attack.

Police in New York still doN'T have any motive for a series of bizarre blowgun attacks in midtown Manhattan. But they do have an idea of what the assailant looks like. Authorities are distributing a sketch of the so-called ''Dart Man'' they believe to be behind 46 attacks on unsuspecting women. None of the victims have been seriously injured in the attacks that began last month.

#90187u1078 07/06/1990 ~United Press International

FRANKFORT, KY (JULY 6) UPI - About one-third of the Kentucky State Police and many other KSP employees will be subjected to random drug testing to be implemented Jan. 1.

Michael Troop, acting KSP commissioner and secretary of the state Justice Cabinet, said Friday the program could spread to other state agencies.

''We know the people of Kentucky have high expectations of what we do,'' Troop told a news conference. ''We need to have unimpeachable integrity and judgement.''

Many of the state police's 1,600 employees will be required to take the random urine tests but officials said they also expect a high volunteer compliance rate among the other employees.

Employees to be tested will be selected at random by computer and the test will be administered by the person's post commander. Persons selected will be notified and tested the same day.

Mandatory testing will apply to all employees hired since 1984 - which includes 260 of the current 901 troopers - plus all new employees, any employees who are being considered for promotion or transfer to a sensitive job and any employee suspected of drug use.

Employees hired before 1984 - when the department implemented a drug testing program for new employees - that do not fall into a category for mandatory testing will be able to take the test on a voluntary basis.

''Drug testing is not being enacted to respond to a drug problem within the agency, but rather an approach to meet the extraordinary expectations set for us by the general public,'' Troop said. ''To bring ourselves up before examination is also a way to deliver a strong anti-drug message.''

GENEVA (JULY 6) UPI - U.N. Secretary-General Javier Perez de Cuellar failed Friday to arrange a hoped-for direct meeting between representatives of Morocco and the Polisario independence movement in the Western Sahara.

Perez de Cuellar held separate talks with both sides and contacts are continuing but ''there will not be any joint meeting,'' a U.N. spokeswoman said.

Moroccan government delegates said Rabat only accepts indirect contacts via U.N. mediators.

Formerly the Spanish Sahara, the Western Sahara is rich in phosphate but only sparsely populated, mainly by nomads. It was partially occupied by Morocco in 1975 and completely occupied in 1979 when Mauritania withdrew from the southern part of the territory.

King Hassan of Morocco agreed in 1981 to a referendum in the area under international supervision but the U.N. so far has been unable to get the two sides to agree on modalities.

There was a cease-fire in 1981 as well although fighting continues between Morocaan and Polisario forces.

#90187u1091 07/06/1990 ~United Press International

EAST BERLIN (JULY 6) UPI - East and West German officials opened talks Friday on a treaty aimed at achieving full German unification in December and East Germany called for a pact that would be be supported, not just ''endured.''

The delegations to the negotiations in East Berlin are to settle issues relating to constitutional changes, property rights and the controversial question of electoral procedure for Dec. 2 all-German elections.

East German Prime Minister Lothar de Maiziere welcomed the delegations by hailing the start of the negotiations as ''a historic day on the way to German unity.''

Government spokesman Matthias Gehler further quoted de Maiziere as saying the unification treaty ''has to be supported, not endured by the people of both Germanys.''

He also said the East German government was determined that ''Berlin will be included in the treaty as the old and new capital of Germany.'' Bonn is the capital of West Germany.

East German delegation leader Guenther Krause said after the first session of talks that both sides had agreed negotiations should be completed by early September and that the last round should start on Aug. 27 to finalize the draft of a Unification Treaty ''in a hard week of treaty negotiations.''

West German delegation leader, Interior Minister Wolfgang Schaueble said the two sides had made ''good progress'' Friday.

Another outstanding issue between the two government coalitions is whether reunification should take place immediately before or after the all-German elections.

If the two states merge just after elections, this would mean that votes would be counted separately in East and West Germany, a procedure which might help smaller East German parties gain parliamentary representation.

Both governments agreed Wednesday to hold all-German elections Dec. 2 and complete unification this year. The two nations have already moved toward unification, with the collapse of the Berlin Wall and the recent merging of their currency.

In moving toward total unification, they have indicated they are prepared to drastically cut the number of troops in a united German army, a move which might ease Soviet fears of a united Germany with a strong military force.

The current armed forces of both Germanys total about 600,000 troops.

NATO leaders meeting in London Friday adopted a document that showed willingness to limit troop levels of a united Germany.

The Soviet Union opposes united Germany's membership in the North Atlantic Treaty Organization, the Western military alliance to which West Germany belongs.

The Soviet Union, with Britain, France and the United States, retains post-war rights over Germany. The four victorious World War II powers are involved with the two German states in negotiations on the external aspects of German unity.

Government officials in both Germanys have expressed confidence that the issue of Germany's military affiliation will be resolved by fall and that full unification will be achieved by the end of the year.

The officials have repeatedly rejected a Soviet plan under which Germany can unite now, but would only gain full sovereignty in several years.

Officials at the Friday's talks in Berlin said they hoped to have a final document - dubbed the Unification Treaty - ready for ratification by the two German parliaments in September.

The delegations to the East Berlin talks are headed by West German Interior Minister Wolfgang Schaeuble and East German junior minister Guenther Krause.

WIMBLEDON, England (JULY 6) UPI - Stefan Edberg, playing to perfection the serve-and-volley game Ivan Lendl has failed to master, Friday ended the top seed's Wimbledon quest with a convincing 6-1, 7-6 (7-2), 6-3 semifinal victory.

The Swede, the 1988 Wimbledon champion, never lost his serve and in 15 service games dropped just 20 points in reaching his third straight Wimbledon final. At the net, he was flawless, punching sharply angled volleys Lendl could not duplicate.

''It was as good as it could be today,'' said Edberg, the No. 3 seed.

Lendl, who spent three months training for this grass-court major, his most troublesome surface, sought to become just the fifth man to win all four Grand Slam singles titles. But the Czechoslovakian did not win enough points with his serve, and his volleys too often set up Edberg for passing shots.

For the 11th time, Lendl left The All England Club without a Wimbledon crown.

''I couldn't get into the match, Stefan did not give me a chance,'' Lendl said. ''He did not give me anything and I did not create enough.''

In Sunday's final, Edberg will face the winner of Friday's other semifinal between defending champion Boris Becker and unseeded 18-year-old Goran Ivanisevic.

On Saturday, Martina Navratilova, pursuing a record ninth Wimbledon crown, plays Zina Garrison in the women's final.

Lendl, the sentimental favorite of the Wimbledon crowds, skipped the French Open in May to prepare this assault upon his personal Everest. Despite Friday's result, he said his strategy was correct.

''I think I made a very good decision,'' he said. ''I made progress in my game on grass.''

He said he is leaning toward another intensive preparation for the 1991 Wimbledon.

''I probably will do it again ... if I decide, with Tony (Roche, his coach), that's what I want to do, I'll start again in April,'' he said.

Edberg understood Lendl's yearning for a Wimbledon crown.

''He's tried everything he could do,'' he said. ''He must be feeling a little bit sad, but I had to do my job.''

Lendl entered Wimbledon as a co-favorite, with Becker, but in his six matches never showed a winner's self-assurance.

Edberg lost to Lendl at last month's Queens Club grass-court tournament, said.

''He played really well at Queens, maybe he peaked too soon,'' he said.

In Friday's 23-minute first set, Edberg broke Lendl in the fourth game at deuce for a 3-1 lead and added another break in the sixth game, at 15. Both players held serve through the first 12 games but Edberg took Lendl's second and third service points with forehand passing shots, for a 4-1 lead, and ended the set with a pair of cross-court passing shots on service returns.

''I really went for it in the tie-breaker, playing safe wasn't going to do it,'' said Edberg.

In the third set, Lendl managed only four points off Edberg's serve. The sixth game proved decisive, as Edberg broke Lendl's serve at 15, then served out the 1-hour, 48-minute match, winning eight of his last nine service points.

With Lendl's loss, the men's top seed has failed to win the Wimbledon singles title for six straight years, since John McEnroe's 1984 triumph.

#90187u1125 07/06/1990 ~United Press International

COLOMBO, SRI LANKA (JULY 6) UPI - The nation's defense minister vowed Friday that Tamil rebels would ''get it with compound interest'' for going to war against the government and military sources said 54 guerrillas were killed in a 24-hour wave of attacks on Tamil strongholds.

Defense Minister Ranjan Wijeratne told lawmakers during a debate in Parliament the government is determined to end the cycle of war with the Liberation Tigers of Tamil Eelam.

''There will not be any gun culture again in this country. We will hit them wherever we see them,'' Wijeratne said. ''The (rebels) will get it with compound interest for practicing deceit with the government.''

His comments came during debate on a proposal to allow the central government to dissolve provincial councils in the north and east of the country, where most of the minority Tamil community lives.

The measure to dissolve the provincial councils is seen as a first step toward holding new elections in the region once hostilities end.

The elections are needed because the council seats were held by members of the India-backed Eelam People's Revolutionary Liberation Front, who fled the country when Indian peacekeeping troops withdrew in March.

The dissolution of the provincial councils was also a key demand of the Liberation Tigers rebels during their negotiations with the government. But authorities deny they are offering the rebels a conciliatory gesture by trying to have the councils dissolved.

The current war between rebels and government troops erupted June 12 when Tiger guerrillas simultaneously attacked four army camps in the east, killing 66 soldiers. More than 1,000 people have been killed since then.

The Tiger rebels demand an independent Tamil homeland in the north and east of the country. They say the minority Tamils, who are mostly Hindu, are discriminated against by the majority Sinhalese population, which is predominantly Buddhist.

Military sources said fighting in the northeast killed at least 54 rebels and two soldiers in the past 24 hours. The soldiers were killed by mines while pursuing Tiger rebels near Amparai, 130 miles east of the capital.

Members of the army's elite Rapid Deployment Force launched a search and destroy operation against rebel hideouts in the jungles of the area but some of the soldiers walked down paths that were heavily mined by the Tigers, the sources said.

Two soldiers, including an officer, were killed and nine were wounded, they said. The other soldiers later fought a gun battle with the Tigers, killing 16 rebels, the sources said.

A navy gunboat pounded rebel bunkers near the northern port of Karainagar, killing another 16 Tigers, defense officials said. Another 22 rebels were killed in fighting on the northern Jaffna peninsula during the past 24 hours, they said.

Rebels also renewed their attack on a 300-year-old Dutch fort near downtown Jaffna, the largest city on the peninsula and the northern provincial capital. About 200 soldiers and policemen have been defending the star-shaped fort, which is surrounded by a moat, since the start of hostilities.

''The rebels fired with mortars and rocket propelled grenades into the fort,'' one official said. ''It continued to rain (down on the fort) throughout the night but troops inside were able to repulse the attacks.''

Wijeratne announced Thursdaythat security forces in the north and west of the country were ordered to move toward Jaffna to ''liberate the north'' from the rebels.

He also acknowledged the rebels were in control of the north.

#90187u1148 07/06/1990 ~United Press International

NEW YORK (JULY 6) UPI - The system of trial by jury, a bulwark of American justice, has required an increasing number of jurors in recent years with as many as 45 percent of adult Americans being called for jury duty, a survey reported Friday.

The survey, conducted for the Defense Research Institute by Research & Forecasts Inc. of New York, found that 17 percent of adult Americans called to jury duty actually have served through a trial.

A disproportionate number of those who have served on trial juries are male with a higher than average income, the survey said.

Based on a representative national sampling of 1,005 Americans age l8 and older, the survey noted that the 45 percent of adults called for jury duty was up 10 percentage points over 1984, when a similar poll was conducted.

Asked for causes of this dramatic increase - a rise of 38 percent in actual numbers called - Archie Robinson, president of DRI, an association of defense trial lawyers, said he thought it reflected the increased number of lawsuits in the country and better implementation of the jury recruitment process.

Although Americans are guaranteed trial by a jury of their peers, jurors most often are drawn from households with higher than average incomes, the survey said.

Although only 27 percent of Americans have annual household incomes exceeding $40,000, the survey found that 53 percent of the people called for jury duty come from that bracket and only 43 percent from households

with incomes under $40,000.

This was explained by researchers as the result of a more settled way of life by people in higher income brackets. These people also are older, have had more time to be called and are more likely to be listed on voter registration rolls, a major source for prospective juror names.

By the time people are 55 or older, 70 percent of them will have been called for jury duty vs. 49 percent of those 39 to 54 and only 30 percent of those 18 to 34, the survey said.

While women outnumber men by 4 percent in the general population, more of those called to jury duty were men, 49 percent, than women, 43 percent.

Fifty-four percent of those who served through a trial reported they were motivated by sense of ''duty'' and ''responsibility'' as citizens.

The survey said the most popular response concerning compensation for time served on jury duty was that most agreed ''the juror's employer should pay the juror's full salary during the time of service.''

But 78 percent said compensation was not an undue concern because ''It is the duty of all American citizens to serve on a jury whether or not they get paid their regular salary or not,'' the survey said.

#90187u1154 07/06/1990 ~United Press International

DETROIT (JULY 6) UPI - Volkswagen United States announced Friday its first price increase on existing models in about two years as certain 1991 models begin filtering into showrooms.

The price increases, which affect the Golf, GTI, Jetta, Passat and Vanagon models, average about 2 percent. But they follow price cuts announced last October on these models that ranged between 6.7 percent and 16.6 percent, in attempts to stimulate U.S. sales of the West German carmaker.

The base price of Volkswagen's Passat GL sedan, introduced last March, was raised by $220, to $14,990. Its best selling model, the Jetta GL, was raised by $200 to $10,195.

Prices on VW's Brazilian-built Fox subcompact, Corrado sports coupe, and Cabriolet convertible will be announced later this year as 1991 versions become available, company spokeswoman Donna Boland said.

But she said the Fox wagon will be discontinued at the end of the 1990-model year, while the Jetta Diesel continues.

VW's current model line ranges from $7,225 for the 1990 Fox, to $26,085 for the 1991 Camper GL Synchro van.

VW sold 72,105 cars in the United States during the first half of 1990, down slightly from 73,091 units sold in the comparable 1989 period.

But the company is confident that more model choices in its Passat line, as well as its recent ''fahrvergnugen'' advertising campaign, should improve sales rates during the second half of the year.

''The ad campaign is creating awareness for us in a market where we were fairly invisible in recent years,'' Boland said.

#90187u1168 07/06/1990 ~United Press International

TYLER, TX (JULY 6) UPI - A World War II veteran whose historic American flag was stolen from his yard on the Fourth of July says he'd rather have seen the flag burned.

C.H. Hickman had hung the flag from a tree in front of his home as a display of his Independence Day patriotism.

''I am 77 years old and I am shook up pretty bad,'' said Hickman, a former major who was commander of the 755th Tank Battalion stationed in Italy.

Hickman lovingly preserved the 50-year-old battalion flag and faithfully took it to the group's reunion every other year in Houston.

''There was more sentimental value in that flag than in anything else,'' Hickman said sadly. ''I think I would rather see it burned than stolen.''

But now, he doesn't know what he'll tell the surviving members of the battalion's next reunion.

''I would hate to report to all those old men that I had lost the battalion flag,'' he said.

All Hickman wants is his flag back, and he's even offered a reward. Anyone with information can call him at 214-561-1289.

#90187u1171 07/06/1990 ~United Press International

RICHMOND HILL, GA (JULY 6) UPI - Herman Exley received a rude awakening from a couple of unusual guests that showed up at his motel demanding accommodations.

Exley, manager of the Richmond Hill EconoLodge, woke up Thursday morning to a pounding sound and saw a pregnant cow butting her head against the window in an attempt to get into his motel apartment. With her was a 7-week-old calf.

The window wouldn't budge so the cow decided on a more orthodox route and tried to check in the regular way.

''She came right up here, looked in, and tried to come in the door to the front office,'' said desk clerk Rosa Watson.

The calf opted for a stealthier approach. He waited outside a room until the guest inside opened the door, then poked his head in and checked out the accommodations. Apparently, the bovine youngster didn't like what he saw.

''A guest was leaving his room to check out. When he opened his door, there was this cow. He stuck his head in, looked around awhile, then left '' Watson said.

Mark Zerbe, a maintenance man, cornered the cow and tied a rope to her halter, then led her around to the back of the motel with the calf trailing behind her.

Meanwhile, the wandering bovines' owner heard a report of cows on the loose on her police scanner but didn't realize the wayward animals were hers.

Clarice Yarborough said cows belonging to another Richmond Hill resident have a tendency to stray and she assumed they were the wayward bovines until motel employees called and asked her to come and get her animals.

Authorities said the pregnant cow and the calf, which are not related, escaped from a pasture on the Yarboroughs' farm about 5 miles from the motel. Two other cows also broke out but apparently didn't like to travel. They were found in a wooded area near the pasture.

#90187u1172 07/06/1990 ~United Press International

KALAMAZOO, MI (JULY 6) UPI - East meets West in the skies over Kalamazoo this weekend as top fighter pilots from this country and the Soviet Union show their stuff in the annual High On Kalamazoo airshow.

Organizers predict record crowds for the event, largely because of the first public display in the United States of the MiG-29/FULCRUM, the Soviet Union's top fighter jet.

Sharing top billing will be the U.S. Navy's Blue Angels precision demonstration squadron of F/A-18 Hornets.

The Soviet contingent is making its first stop on a three-city U.S. tour that includes stops in Chicago and Dayton, Ohio.

The MiG-29/FULCRUM was first shown the public outside the Soviet bloc nations last year during a Paris air show.

Airshow manager Linda Davis said ticket sales for both Saturday and Sunday performances have been brisk, speculating attendance could top 70,000 for the

#90187u1179 07/06/1990 ~United Press International

KINGSTON, N.Y. (JULY 6) UPI - A landlord tired of undesirable tenants said Friday he has received hundreds of phone calls since advertising for tenants with standards, including knowing that ''roaches are not household pets.''

Landlord Jim Kennedy, 45, of New Paltz, said he placed the classified ad in the Kingston Freeman after booting a perceived dealer from one of his apartments.

Kennedy said he was tired of renting to the ''dregs of society.''

The advertisement requires that tenants:

-''have a job or at least give the appearance that you could get one.''

-''have some type of schooling or at least know there are other adverbs besides the one which starts with 'F' and ends with 'ing.'''

-''realize roaches are not household pets and you will keep the apartment clean so that you will not attract any.''

-''actually pay the rent on time, with a good check.''

-''realize drugs are not fun and you must have a doctor's prescription to use them.''

- ''must actually be married to your partner or at least know the correct spelling of their last name.''

Kennedy said he got the idea for the ad ''from the people who were coming to look at the property.

''I own a lot of houses and have had this problem for a long time - you put $200,000 into a building and it's not taken care of,'' Kennedy said.

''I will rent to anybody - black, green or whatever - as long as they take care of the product and pay the rent on time,'' Kennedy said.

Don Zirkle, a spokesman for the state Divison of Human Rights in New York City, said there is nothing illegal with Kennedy's first five criteria, but bristled at the sixth.

Zirkle said the office has won a number of legal battles for unmarried couples.

Kennedy said he has received 200 calls since placing the ad and ''195 were positive.

He said he rented the apartment ''to a lovely couple.''

#90187u1207 07/06/1990 ~United Press International

LONDON (JULY 6) UPI - The deadly AIDS virus may have existed earlier than scientists believed, according to a report Friday that specialists have confirmed a British sailor died of the disease in 1959.

The oldest accepted evidence of AIDS is generally held to be a blood serum sample taken in Zaire in 1959. Scientists believe the virus has infected humans for at least two decades, although aquired immune deficiency syndrome was not identified as a disease until the early 1980s.

Three researchers at the University of Manchester Medical School, writing

in the British medical journal The Lancet, said their findings came after they re-examined the patient records and tissue samples of a Royal Navy seaman.

New tests revealed that the sailor died of full-blown AIDS in 1959, the virologists said.

''Taking into account the incubation time of several years between infection and development of the full-blown disease, the seaman would have contracted the virus in the early 1950s,'' one of the researchers, Dr. Andrew Bailey, told The Times.

Bailey and fellow researchers Gerald Corbitt and George Williams said the case raised questions about the origins of the disease.

The first documented report of the fatal disease that became known as AIDS appeared in The New England Journal of Medicine in 1981.

''It also demolishes the idea held by some people that the AIDS virus could have been a man-made, genetically engineered organism released accidently or deliberately from the laboratory,'' Bailey said.

The sailor, aged 25, died in a hospital in Manchester, 197 miles northwest of London. Williams reported in The Lancet at the time that the man's death was unique to his experience of pneumonia accompanied by overwhelming complications and secondary infections.

Bailey told The Times little was known about the sailor but he thought the man may have traveled to Africa.

Williams reminded colleagues of the case when AIDS became officially recognized in the early 1980's.

The researchers had stored some of the sailor's tissue samples, including kidney, bone marrow, spleen and pharyngeal mucosa, in paraffin blocks. Upon re-examination and testing, the four samples all tested positive for AIDS. Brain and liver tissues were negative.

The researchers said they were able to re-examine the sailor's tissues by using a new analytical process called polymerase chain reaction, which allows them to reproduce millions of identical copies of a single piece of DNA in about 30 minutes. The DNA amplification technique is used in genetics and molecular biology.

Bailey said his group may have been able to confirm the presence of AIDS earlier if a stored sample of his blood had been available.

-30- 2940
#90187u1222 07/06/1990 ~United Press International
PORTLAND, OR (JULY 6) UPI - Actor Gene Hackman will rest for another day or two at a hospital where doctors prevented a heart attack by using a tiny balloon to unblock an artery supplying blood to his heart, officials said Friday.

Hackman, 60, remained in good condition at St. Vincent Hospital and Medical Center.

''He's not ill,'' said hospital spokeswoman Sharon Duncan. ''They're not keeping him the extra days because they're observing him. It's just rest-oriented.''

Hackman had been vacationing on the Oregon coast when he was stricken Tuesday with chest pains. Cardiologist Dr. Herbert Semler said the actor drove to Portland and admitted himself to the hospital.

''We got him just in the nick of time,'' Semler said Thursday. ''Fortunately for him, it was in a very excellent area that we could easily reach with a balloon catheter and dialate it.''

The doctor said the pains indicated the actor was within hours of having a heart attack. ''The artery could have completely shut off,'' he said.

Doctors performed a relatively new but routine procedure called balloon angioplasty in which they insert a catheter into an artery in the groin and guide it into the heart. A balloon is then inflated, fracturing plaque that has built up in the artery, causing an obstruction.

Semler said he planned to prescribe a special diet and exercise program for the actor, who recently returned from Europe after filming the motion picture ''Dinosaur.''

Hackman won the best actor Academy Award in 1971 for his role as New York narcotics officer Popeye Doyle in ''The French Connection.'' He also appeared in ''Bonnie and Clyde,'' ''The Poseidon Adventure,'' ''The Conversation,'' ''Superman I'' and ''Superman II,'' and more recently in ''Hoosiers'' and ''Mississippi Burning.''

-30- 2014
#90187u1257 07/06/1990 ~United Press International
LONDON (JULY 6) UPI - Stock prices closed higher on the London International stock exchange Friday, lifted by Wall Street's strong performance.

The blue-chip Financial Times 100-stock index gained 8.6 points to close

at its intra-day high of 2,340.

The narrower top 30 industrial average rose 6.8 points to 1,865.00.

Volume was a strong 739.8 million shares, and up sharply from a modest 386.8 million shares changing hands Thursday.

The gain in trading volume was mostly tied to two issues.

Hong Kong tycoon Li Ka Shing sold 51 million Cable & Wireless shares. The sale of Li's 4.8 percent share in the telecommunications company drove C&W stock down 37 cents to $9.38. Globe Investments gained 5 cents to $3.61.

In the food sector, Berisford International, hit by property losses in New York, tumbled another 30 cents to $1.14, amid takeover rumors.

In the absence of major economic developments in Britain, the London International exchange got a boost from the strong performance on Wall Street. The Dow Jones industrial average, which sank 32.42 Thursday, was up 16.33 to 2895.54 at noon EDT.

Shares in British companies with important foreign currency revenues recovered some following declines suffered from the recent strength of the pound.

Insurance stocks were affected by a Morgan Stanley downgrading of the sector's profits for 1990 and 1991. General Accident lost 16 cents to $9.77.

Elsewhere, in Frankfurt, stock prices ended higher on the Frankfurt Stock Exchange in the first week of trading following the German monetary reunion.

The closely watched German Stock Index jumped 18.62 points to end at 1,932.80, its highest closing since May 6.

Active trading in the last 15 minutes of the day helped the DAX index push through the 1,900 level, dealers said.

#90187u1262 07/06/1990 ~United Press International

(JULY 6) UPI - The 16 NATO leaders made a historic statement called ''The London Declaration on a Transformed North Atlantic,'' agreeing to use nuclear arms only as a last resort. President Bush says the London Declaration sends a clear message to the Soviet Union to view NATO as ''defensive and NOT threatenting.'' Bush says it tranforms NATO's nuclear strategy from flexible response to making nuclear arms the weapon of last

resort. British Prime Minister Thatcher termed the document a landmark in the history of NATO and Europe.

At a news conference wrapping up the NATO summit, President Bush said the Soviet Union has nothing to fear from the Western alliance. The president's closing remarks appeared to be an effort to convince Soviet President Gorbachev NOT to worry about NATO as Moscow grapples with its own internal problems. Bush says it should be clear that NATO is changing and Soviet military leaders ''should look at it NOT as a threat to their borders or to their people.''

Texas authorities say two people are missing in the aftermath of an explosion and fire that ripped an Atlantic Richfield chemical plant near Houston. The blast late last night and the following fire killed 14 people. It took more than four hours for firefighters to bring the flames under control at the ARCO Chemical Company plant, which manufactures stuffing for furniture.

Some private economists were surprised by the June unemployment rate figures showing a drop to five-point-two percent. Many analysts expected an increase to five-point-four percent. The Labor Department says 40-thousand new jobs were created during June. But if the layoffs of 57-thousand temporary workers were NOT counted, job growth would have hit 97-thousand new positions. Still, jobs in heavy industry remained scare, despite a recent surge in exports.

DETROIT (JULY 6) UPI - The combination of the July 4 holiday, vacations and model changeovers means automakers will build only 106,010 cars and light trucks this week, Ward's Automotive Reports said Friday.

Separately, Chrysler Corp. announced that its U.S. assembly plants in Toledo, Ohio, and Belvidere, Ill., would be idled later this month due to slow sales following vacation shutdowns or changeovers to 1991 models.

Ward's estimated output of 70,022 cars and 35,988 trucks to be built this week is less than half last week's output, when 143,691 cars and 86,359 trucks were built at U.S. assembly plants.

But the estimated production is up from the year-ago week, when the holiday, vacations and changeovers shortened output to 40,925 cars and 29,248 trucks.

All Ford Motor Co. vehicle assembly plants are closed during the first two weeks of July, while General Motors Corp. plans to idles its Willow Run plant in Ypsilanti, Mich., the next two weeks to add wagon, taxi and

police car production.

GM also will idle its Camaro/Firebird plant in Van Nuys, Calif., for two weeks starting July 9 because of slow sales of those sports coupes, already being built as 1991 models.

Among foreign-based companies with U.S. plants, Toyota Motor Manufacturing U.S.A. closed its Georgetown, Ky., plant from July 2 to July 5 but will resume output next week.

Honda of America Manufacturing Inc.'s Marysville, Ohio, plant was also closed this week for vacation, while Mazda Motor Manufacturing (USA)'s Flat Rock, Mich., plant and Diamond-Star Motors Corp.'s plant in Normal, Ill., were closed for changeover to 1991 models.

Those three plants will resume operations Monday.

Several Chrysler Corp. plants are idled this week and next for changeover to 1991 models. They include the Toledo Jeep plant, Dodge City truck complex in Warren and compact car plant in Sterling Heights, Mich., compact car plant in Newark, Del., and its coupe/convertible plant in Fenton, Mo.

Chrysler's Toledo plant will remain shuttered the weeks of July 16 and July 23 due to slow sales. Its large car plant in Belvidere, Ill., will be idled the week of July 23 also because of slow sales, extending a two-week shutdown for model changeover.

#90187u1268 07/06/1990 ~United Press International

BATON ROUGE, LA (JULY 6) UPI - Gov. Buddy Roemer Friday vetoed a ban on virtually all abortions, setting up the possibility of an almost immediate veto override battle in the state Legislature.

During an impromptu news conference before leaving for lunch, Roemer said he had vetoed the bill earlier in the day.

The governor, who has characterized himself as an opponent of legalized abortion, had nevertheless repeatedly said he would veto the measure because it did not contain exceptions allowing abortions in the case of rape and incest.

The veto sets in motion a battle to override the governor's action in the Legislature, which is scheduled to adjourn on July 9.

The Senate can act on the override the moment it officially receives the actual veto message from the governor. House rules require the lower

chamber to wait a day after receiving a veto message, but, through a procedural vote, representatives could agree to consider the override almost immediately.

By law, the Legislature could delay a veto override vote past Monday night's adjournment and return for a veto session. In modern time, however no Louisiana governor has ever had his veto overridden and no veto session has ever been called.

Roemer's veto came a week after final legislative passage of the bill, which would make it a felony to perform an abortion, punishable by up to 10 years in prison and a fine of up to $100,000. The measure would allow an abortion only if the mother's life was threatened by the pregnancy.

Seventy-four representatives voted to approve the bill, and only 70 are necessary for a two-thirds vote to override in the House. The Senate passed the bill with 24 ''yes'' votes, two votes short of two-thirds.

A survey by United Press International conducted Wednesday and Thursday showed 16 senators leaning toward an override, 15 opposed and eight undecided.

Roemer's veto came a day after several white members of the House told United Press International that anti-abortion lawmakers had tried to cut a deal to ensure an override by agreeing to vote for a key education bill.

But two black lawmakers said the same anti-abortion representatives approached them offering to kill the education bill if they would vote for the override.

The measure would have consolidated the state's four boards of higher education into a single ''superboard,'' a plan generally supported by whites but opposed by some black lawmakers who fear it would hurt predominantly black universities in Louisiana.

After reports of the conflicting promises surfaced, the House late Thursday failed to pass the superboard bill, and several anti-abortion lawmakers hurriedly exited the chamber and were seen explaining the action to lobbyists from the anti-abortion movement.

#90187u1285 07/06/1990 ~United Press International

OSLO (JULY 6) UPI - Norway's state-owned Statoil oil company Friday shut down production on four of its seven platforms in the North Sea because of wildcat strikes that so far have cost Norway about $95 million.

Statoil chief Harald Norvik Friday used loudspeakers aboard the offshore

platforms to announce his company's intention to fight the strikers, but the workers apparently paid little attention to his speech.

Statoil announced the company was curtailing all production on its Staford A and B and Gullfaks A and B platforms. But some crude oil was still being produced by Statoil platforms in the Veslefrikk oil field, the company said.

Private U.S. operator Phillips Petroleum Corp., however, said it was resuming full production in the Ekofisk field, where Phillips said striking workers were returning to work.

The wildcat strikes on the Norwegian platforms entered their fifth day Friday after the country's center-right government Monday issued emergency legislation to end a union strike that started midnight Saturday over a bitter pay dispute.

The OFS oil workers' union acepted the government action, but was unable to make its 4,000 members go back to work. On six previous occasions in the last ten years, the government has used legislation to force the union to abandon a strike.

Some American oil traders had thought the new conservative government might be philosophically less inclined to intervene in the strike the way previous governments had done. As a result, last week they were saying there was a 50-50 chance of a strike occurring.

The strike is currently the main factor moving world crude prices. Thursday when it appeared workers were returning to the platforms, the price of North Sea Brent crude fell 82 cents a barrel. Its price was holding firm Friday.

The strike has so far cost Norway about 630 million kroner, or $95 million in lost taxation and interest revenue. The government has referred the conflict to a compulsory wages board, saying a continuation of the strike could cause grave damage to Norway's economy.

#90187u1301 07/06/1990 ~United Press International

BRUSSELS, BELGIUM (JULY 6) UPI - The rapid transformation of Eastern European countries may "create a false atmosphere of euphoria," European Commission President Jacques Delors said Friday.

Speaking before the European Parliament in Brussels, Delors underlined the need for structural reform in Eastern and Central Europe but stressed that the process will take years to complete.

"Short-term reform plans such as undertaken by the International Monetary Fund received too much attention in the Eastern European countries involved," he said. "A rapid transition can easily create a false atmoshpere of euphoria."

He said among the most important structural reforms that should be implemented included a legal framework for introducing market economy principles, the necessary competition spirit and a total overhaul of the labor market.

"At the same time it is imperative that one finds urgently a solution for their debt problem," Delors said of Eastern Europe. Meanwhile, the now virtually defunct Comecon trade block which tied the former Soviet satellites firmly around Moscow should not be discarded right away, he said.

"One cannot change everything overnight," Delors said. "The abandoning of agreements between the Soviet Union and East European countries would be considered by the latter as an act of hostility."

#90187u1305 07/06/1990 ~United Press International

CHICAGO (JULY 6) UPI - Duane Sutter, a member of the Chicago Blackhawks since September 1988, announced Friday he is retiring as a player and will become a scout with the NHL team.

Sutter, 30, came to Chicago in a trade with New York for a second-round draft choice. He had spent eight seasons with the Islanders, where he was a member of four Stanley Cup Championship Islander teams. Sutter broke into the league with the Islanders in the 1979-80 season.

''His knee has undergone two reconstructive surgeries. It just got to the point where it couldn't go anymore. Physically the knee injury caused him to retire,'' said Jim De Maria, a team spokesman.

The Canadian from Viking, Alberta, will be a scout for the Blackhawks in western Canada.

Blackhawks General Manager and Coach Mike Keenan said Sutter had ''exceptional attributes as a player.''

The former Islander ''brought those winning mental attributes with him when he came to Chicago and he assumed the role of a team leader. I am sure he will bring those same attributes to his new role as a scout. He will be a valuable asset to our organization in terms of seeking the right types of players that are needed in sustaining a winning hockey club,'' said Keenan.

Sutter scored 139 goals, had 203 assists, tallied 342 points and racked up 1,333 penalty minutes in 731 regular-games with New York and Chicago. He produced 18 goals, 32 assists, 50 points and 440 penalty minutes in 184 games since coming to Chicago on Sept. 4, 1988. He spent three seasons with the Blackhawks, who advanced to the Final Four the last two years.

Sutter is one of six brothers who have played in the NHL: Brian is the head coach of the St. Louis Blues; Darryl is the associate coach of the Blackhawks; Brent plays with the Islanders; Ron, with the Philadelphia Flyers and Rich, with the Blues.

#90187u1317 07/06/1990 ~United Press International

LANSING, MI (JULY 6) UPI - An anti-abortion group Friday turned in more than 333,000 petition signatures to the Board of State Canvassers in favor of a law requiring minors to get parental consent for abortions.

Citizens for Parents' Rights, an offshoot of Right to Life of Michigan, began collecting the petitions in February to circumvent Gov. James J. Blanchard, who vetoed identical legislation earlier this year.

The group needs 191,726 valid signatures to put the veto-proof bill before the Legislature. If the petitions are certified, lawmakers must accept or reject the proposal without amendment. If approved, the measure cannot be vetoed and automatically becomes law. If rejected, it would go before voters on the 1992 ballot.

''I think Blanchard is out of touch on this issue,'' said Barbara Listing, president of Right to Life of Michigan. ''He's vetoed the Medicaid-funded abortion and it was passed by the voters and he's vetoed a parental consent bill that I think the people want. Look at the number of signatures.''

Two years ago, Michigan voters banned the use of Medicaid funds to pay for abortions for poor women. Blanchard had vetoed a similar bill, prompting a successful petition drive by Right to Life.

Listing said she has been promised by leaders in the House and Senate that the measure would be taken up shortly after lawmakers return from summer recess Sept. 11.

Parental consent legislation has been Right to Life of Michigan's top priority since the Supreme Court ruled last year that states could limit abortion laws.

''We think parents have the right to take part in their daughter's

abortion decision,'' Listing said.

Abortion rights advocates, however, maintain the parental consent bill is an attempt to legislate communication between parents and children and to begin curtailing the rights of all women to have an abortion.

''We may not be able to stop this agenda item but we see this as a continuation of what is happening in response to the Webster decision of last year,'' said Margy Long of Planned Parenthood of Michigan, conceding that a parental consent law is likely to be approved.

But Long said the anti-abortion majority in the Legislature could be out after the November elections.

''They're pushing for it in September because they know they're going to be losing seats in the election, which will bring it closer to a pro-choice Legislature,'' she said.

Attorney Zolton Ferency, president of criminal justice at Michigan State University and candidate for the state Senate, said parental consent legislation is unconstitutional because it discriminates against young, unmarried women.

He said he plans to ask the Board of State Canvassers not to pass the measure along to the Legislature and to sue, if necessary, to stop action on the petition.

#90187u1322 07/06/1990 ~United Press International

HOUSTON (JULY 6) UPI - Enhanced recovery technologies promise to boost oil and natural gas production from known domestic reserves, helping curb the nation's reliance on spiraling imports, industry spokesmen said Friday.

"I personally am concerned that we are building to a very tough period in energy," Kenneth Lay, Enron Corp. chairman and chief executive officer, said in referring to growing energy demands and declining U.S. oil and gas production. His comments came during a conference sponsored by the Society of Petroleum Engineers and the University of Houston.

The United States cannot significantly trim its national trade deficit without drastically cutting crude oil imports, which accounted for more than $50 billion in 1989, Lay added.

Frank Kovarik, director of the UH Institute for Improved Oil Recovery and conference organizer, said improved oil and gas technology hold great economic potential.

Experts estimate less than one-third of the oil in the United States can be extracted using existing production methods, leaving about 340 billion barrels of oil trapped in known reservoirs.

Only about 145 billion barrels of oil have been produced in the United States since oil was first discovered, Kovarik said. But UH researchers estimate emerging technology could enable the United States to extract an additional 70 billion barrels of that remaining oil.

"Clearly, we've got to do a lot better job of recovering our known oil and gas resources in this country," Lay said. He predicted the nation would continue its reliance on imported oil until another energy crisis such as the one experienced during the 1970s.

A Department of Energy spokesman stressed the importance for government, the public, researchers and the energy industry to cooperate in implementing an effective national energy policy.

"The President does indeed recognize energy is the backbone of any modern economy," said Mike McElwrath, DOE principal deputy assistant secretary for fossil energy.

A series of public hearings on a proposed national energy strategy generated more than 750 recommendations, McElwrath said, adding the department is in the process of narrowing down those recommendations into a workable plan.

DOE has a December deadline to deliver a set of energy policy options to President Bush. McElwrath said the pending energy policy must include a number of tradeoffs between speical interest groups.

"Fossil fuels, in particular now, are being singled out as a social ill," McElwrath said. "As long as the American people perceive energy development as environmentally degrading... energy production is going to lose every time in a one-on-one, head-to-head confrontation with the environment."

He said energy policy should not be "a stepchild of environmental policy." "There is no irreconcilable conflict between energy needs and environmental goals," McElwrath said.

#90187u1372 07/06/1990 ~United Press International

WASHINGTON (JULY 6) UPI - The United States is negotiating with Singapore over using the island nation as the location for a modest U.S. naval force but the deal would not set up a permanent base like those in the Philippines, Pentagon officials said Friday.

The negotiations involve basing four to six F-16 fighters and a few Navy ships in Singapore for a few months at a time.

''How close they are to reaching an agreement I don't know,'' said a Pentagon spokesman, Lt. Cmdr. Edward Lundquist, in response to reports that a deal is about to be signed.

He said the Singapore negotiators will visit Washington next Wednesday and Thurssday, but he doubts any agreement will be signed in the United States.

Secretary of State James Baker is scheduled to visit Singapore in August, and there were reports he might sign an agreement then.

The Singapore agreement is being watched closely because of the uncertain negotiations on renewal of leases for the two major U.S. bases in the Philippines - Clark Air Base and Subic Bay Naval Station.

U.S. officials have served notice there are limits to how much Washington will pay to renew the leases, which expire in September 1991, and President Bush has said other locations in Southeast Asia would be sought if U.S. troops are forced to leave the Philippines.

Lundquist stressed that the agreement with Singapore would involve only the positioning of U.S. ships and aircraft and would not be a permanent U.S. base.

#90187u1382 07/06/1990 ~United Press International

NAIROBI, KENYA (JULY 6) UPI - The United States said Friday it was distressed at a government crackdown on advocates of multi-party democracy following a week of arrests and official warnings against a planned demonstration.

President Daniel arap Moi replied that he was disappointed with the reactions of foreign governments to the arrests and said he could not

allow the security of the state to be threatened.

Two prominent ex-politicians, Kenneth Matiba and Charles Rubia, were arrested Wednesday on charges of endangering public security after a two-month campaign for an end to Kenya's one-party state, enshrined in law since 1982. Their arrest was followed Thursday by the detention of at least eight others, including noted lawyers and the son of former vice-president Oginga Odinga.

Two more lawyers - human rights advocate Gibson Kamau Kuria and Paul Muite - went into hiding Friday, fearing for their safety, and 200 of their colleagues issued a statement condemning the government for arresting lawyers who were merely representing others already arrested.

One of those detained Thursday, John Khaminwa, was attempting to determine the whereabouts of Matiba, his wife said in a statement Friday.

''We are obviously distressed to see this action by the Kenyan government '' the U.S. State Department said in a prepared release.

''In recent weeks we have underlined to the Kenyans both in Nairobi and in Washington the importance of allowing full freedom of expression and made clear our hope that Matiba and Rubia and others who may speak out against the government will not be persecuted.''

The release was intended for use at a Thursday press conference in Washington, but not read because no journalist asked about Kenya, the spokesman explained.

''I am disappointed by the concern expressed by some governments on the arrest of a few people whose actions and utterances threatened peace,'' Moi told Kenyans in the coastal city of Mombasa, meanwhile.

''If the actions are not checked big harm may befall the country,'' he said. ''Even though I am a very tolerant person the actions of some misguided people who are even ready to kill to realize their ambitions had pushed me against the wall.''

''The situation compelled the government to take appropriate measures,'' Moi continued.

''The same method will be used to pick up all people especially those who went to Libya to learn how to destabilize this country and who are now trying to come back to carry out their evil missions,'' he said, in apparent reference to reports of Kenyan dissidents receiving training at the hands of Col. Muammar Ghaddafi.

The reports link the alleged training to a banned opposition group, known

as ''Mwakenya'' that was the focus of a government crackdown in 1986.

Kenya this year was the scene of political tension not seen since an attempted coup in 1982. The unsolved murder of foreign minister Robert Ouko in February sparked riots across the country as students and others accused the government of killing him. The riots in turn sparked a government ban on demonstrations and a series of brief detentions of potential opponents.

This in turn provoked increasingly vocal calls for a change in the political system, which has revolved around the Kenya African National Union party, KANU, since independence in 1963.

The latest of these calls, which came Friday from former political detainee Paddy Onyango, described Moi's government as ''a fascist and totalitarian regime, reminiscent of Romania's Ceausescu's last days.''

The government has charged that calls for multi-party democracy conceal a resurgence of tribal nationalism by Kenya's largest tribe, the Kikuyu. Both Matiba and Rubia are Kikuyu leaders.

A pro-pluralist rally planned for Saturday, originally requested by the two detained men, promised to provoke confrontation between government security forces and supporters of multi-party democracy, western diplomats said.

''I don't think they can get away without some incidents,'' said one diplomat, who asked not to be named.

Despite a government ban on the meeting and the arrest of its protagonists hundreds of Nairobi residents and others planned to show up for the rally in defiance, according to local journalists and observers.

The Japanese embassy in Nairobi advised Japanese residents of the city to stay off the streets for the duration of Saturday.

#90187u1386 07/06/1990 ~United Press International

KATMANDU, NEPAL (JULY 6) UPI - A leading member of the ruling Nepali Congress Party criticized the government Friday for releasing a number of drug traffickers, including 17 foreigners, from prison on health grounds.

Party Secretary-General G. P. Koirala said 71 drug offenders were freed by Nepal's first multi-party government in 29 years and the administration now faced public indignation for its actions.

In a press release, Koirala said the foreigners included Britons, West

Germans, Canadians, Danes and an Indian. All were senternced under the former one-party Panchayat government.

The interim government, conposed of representatives of the NCP and seven communist parties, adopted a policy of releasing prisoners who had completed three-fourths of their terms on health grounds and on the recommendation of a medical board.

''This decision of the government is weak, unscientific and controversial '' Koirala said. ''The convicted are manipulating this liberal policy and getting out of jail.''

He called for the revocation of the government decision to release prisoners on health grounds.

Koirala did not accuse the government of conniving with drug traffickers but his statement came as a blow to the interim government of Prime Minister K.P. Bhattarai and Home Minister Y.P. Upadhaya, who are NCP representatives in the government.

''The government has been in power for less that three months,'' he said. ''It is too early to evaluate government performance in such a short time period.

''But the government has come under severe criticism and its decisions have been questioned by the people. It is my duty to react in the absence of a parliament.''

Nepal's interim government is the most powerful in 144 years, enjoying both executive and legislative powers.

#90187u1399 07/06/1990 ~United Press International

LOS ANGELES (JULY 6) UPI - The proposed Civil Rights Act of 1990 and a resurgence of racism in America will be the dominant issues at the upcoming NAACP annual convention, the organization's executive director said Friday.

Benjamin Hooks, who has run the nation's oldest civil rights organization since 1977, charged the U.S. Supreme Court has "turned back the clock on civil rights" through a series of rulings that have eroded gains made by blacks.

"We are here to put impetus on the Civil Rights Restoration Act," Hooks said at a breakfast meeting with reporters prior to Sunday's start of the NAACP's five-day gathering at the Los Angeles Convention Center.

The act, which the Senate is scheduled to begin debating later this year,

will give President Bush a chance to show his level of commitment to improving employment opportunities for blacks, Hooks said.

He said the NAACP was initially optimistic that Bush would be an improvement over President Ronald Reagan, who angered black leaders by refusing to meet with them during his eight-year tenure.

But Bush's hesitancy to support the civil rights bill has led black leaders to suspect his "kind and gentle" demeanor, which has won him unprecedented support from blacks at the polls, may be misleading, Hooks said.

"I'm afraid it's like whip cream. It looks good. It taste good. But it's not enough to climb mountains on," said Hooks. "The time has come where he has to be gentle by his actions and we have to start with the civil rights bill."

Hooks said the resurgence of racism in America, particularly a series of hate crimes on college campuses, will also be discussed during the convention. Former Ku Klux Klan leader David Duke's surprising showing in the current Senate race in Louisiana, Hooks said, is also indicative of the growing anti-black sentiment in the nation.

Another topic of the convention will be the ills confronting the black community, including violence, drugs, and teenage pregnancy. Hooks said that at the current pace, 70 percent of today's black male second-graders will be "dead, in prison or lost to mind-altering drugs" by the year 2000.

A product of the Depression, Hooks said he is "at a loss" to explain the despair that has gripped many in the black community when there is more reason for hope than his generation had.

"I think it was Richard Wright who wrote in 'Native Son,' live fast and die young ... make a pretty corpse," Hooks said, referring to a pervasive mind-set among young blacks. "I never thought I'd ever see this in my lifetime."

Scheduled convention speakers include talk show host Oprah Winfrey, Spellman College President Johnnetta Cole, Southern Christian Leadership Conference President Joseph Lowery, and Virginia Gov. Douglas Wilder.

#90187u1417 07/06/1990 ~United Press International

(JULY 6) UPI - NATO leaders issued a statement mapping a new course for the alliance in the light of recent changes in Europe. President Bush hailed the outcome of the two-day London summit as ''a historic turning point.'' Among other things, the leaders offered to negotiate troop levels

of a united Germany, a critical concession to win Soviet acceptance of a new Germany in NATO.

NATO's revamped strategy won praise from Soviet leader Gorbachev . At a break in the 28th Communist Party Congress in Moscow, Gorbachev told reporters that Moscow welcomes the coming together of the two blocs. Gorbachev added that he has NOT received a formal invitation from President Bush for him and other Warsaw Pact leaders to attend a future NATO meeting.

Police in London say a small bomb exploded today in a garbage can a half-mile from where President Bush ate breakfast with Prime Minister Thatcher. NO one was hurt and there was little damage in the blast. Police also found two fake bombs in two central London rail stations yesterday.

Investigators are trying to determine the cause of an explosion at a chemical plant near Houston that killed 14 workers. Two people are missing and one was injured following last night's blast at an Atlantic Richfield plant in Channelview, Texas. The plant produces a chemical that is used to make stuffing for furniture.

Hospital officials say an explosion in a taxi and bus terminal in South Africa today wounded at least 27 people. The blast occurred in a Johannesburg terminal used almost exclusively by blacks. Victims lay screaming and moaning in pain after the blast. It apparently was the fifth right-wing bombing since last week.

#90187u1418 07/06/1990 ~United Press International

NEW YORK (JULY 6) UPI - Crown Petroleum Corp. estimated Friday that its Pasadena, Texas refinery's 100,000-barrel-a-day crude oil processing unit may be out of production for as much as two weeks as a result of Tuesday's fire.

"My guess is that it will take two weeks to get the crude processing unit back in service," said William Snyder, spokesman for the Baltimore-based company. "Repairs will require some fabrication and ordering of equipment," he said.

The refinery's daily gasoline output of 65,000-70,000 barrels will be reduced during repairs, but Snyder said it would be Monday before the size of the cutback will be determined. Gas is made both from stock supplied by the crude processing unit and from feedstock purchased from outside suppliers, he said.

(JULY 6) UPI - President Bush said in London today that he hopes Israel will make a move to resume peace talks. Bush emphasized that the United States has suspended... NOT ended... its dialogue with the Palestine Liberation Organization. He said there must be peace talks, and they must include the Palestinians.

Officials in Albania agreed to grant passports to all refugees in foreign embassies in the city of Tirana, as the number of those seeking asylum reached two-thousand. Albania's hard-line communist government also rejected as a ''concoction'' Western news reports that a number of Albanians died in clashes with security forces earlier this week.

SAN FRANCISCO (JULY 6) UPI - Police swept through the city's largest homeless camp early Friday, clearing out the remaining residents living on the plaza in front of City Hall and arresting three people but reporting few problems.

In an early morning action, police cleared about 80 homeless campers from the Civic Center Plaza on orders from Mayor Art Agnos, whose office balcony overlooks the plaza.

About 25 officers moved into the park at 5:30 a.m. and roused sleepers from park benches, lawns and the sidewalk. A garbage truck drove onto the plaza and gathered up clothing, blankets, tarps and trash left behind as the homeless left to find shelters or new campsites.

Three people were arrested for either refusing to leave or interfering with police. Two others from the activist group Food Not Bombs were cited for distributing food in violation of the health code, said police Capt. Dennis Martel.

''It couldn't have gone any better from my perspective,'' Martel said. ''We approached the homeless and let them keep their dignity intact.''

Volunteers directed the homeless to shelters and provided a van to help move their belongings. Several campers left in a group, pushing shopping carts up Polk Street on the way to a new city shelter.

During the two and a half years since Agnos took office, the Civic Center homeless camp has grown into a symbol of the city's homeless problem. It was the largest gathering place for homeless in the city and the only park where the city's ordinance banning overnight sleeping was not enforced.

City residents and merchants complained bitterly about the shabby camp. But until last week Agnos refused to order the residents - who sometimes grew to more than 300 - out because of a shortage of city shelter space.

The mayor finally ordered a sweep of the plaza after two new city shelters opened Monday.

By mid-morning, the camp - which has averaged about 150 people for the last year - had disappeared. A few homeless protesters remained, gathered around a small wreath in memory of homeless advocate Mitch Snyder, who was found dead in an apparent suicide Thursday in Washington.

Several homeless said they had no intention of going to city shelters, which close their doors from 7 p.m. to 7 a.m.

''Shelter? It's like a jail,'' said Oscar Amesquita, a Guatemalan refugee who said he had found a new campsite under a nearby freeway ramp. ''They say at 10 (p.m.) no lights, no TV, no nothing.''

Robert Tobin, director of the non-profit Hospitality House shelter, said the mayor's decision would only disperse the city's homeless problem.

''If you take a hammer and pound a rock, the mass doesn't get smaller, it just splinters,'' he said. ''Instead of 100 people on the mayor's doorstep you're going have a lot of homeless on individual people's doorsteps.''

A group of homeless said they planned to camp out on the mayor's doorstep Friday night to protest his homeless policies.

#90187u1447 07/06/1990 ~United Press International

ATLANTA (JULY 6) UPI - Accidents, murders and suicides claim the lives of more children than do all diseases combined and many of the violent deaths are preventable, a government report said Friday.

Deaths from injury - either deliberate or accidental - accounted for 64 percent of all fatalities among people aged 1 through 19 in 1986, the latest year for which data was available, the U.S. Centers for Disease Control said in its weekly report.

The top killer of young Americans in 1986 was motor vehicle accidents, which accounted for 10,535 of the total 22,411 injury-related fatalities among children, the CDC report said.

Homicide was the second leading cause of death-by-injury among youth, killing 2,877 people 19 and under in 1986, the CDC report said.

The murder rate for black children was five times higher than for whites, with both black and white males accounting for 68 percent of the total. Nearly two-thirds of the deaths were among youths aged 15 to 19. Twenty-three percent of the deaths were among children 5 and under.

Suicide was the third leading cause of childhood fatalities, taking the lives of 2,151 youths in 1986. Among 10 to 19-year-olds, 80 percent of the suicide victims were male.

Drowning, while the leading cause of death for children 4 and under in California, Florida and Arizona, was the fourth leading cause nationwide of injury-related death among the 19 and under group.

Fire-related injuries were the fifth leading cause of childhood death from injury, with 53 percent of deaths ocurring among those 4 and under and 73 percent among children 9 and under. Overall, 80 percent of the deaths were from house fires, 9 percent from electrical burns and 2 percent from scalding.

''People consider these events as accidents and the word itself makes people think they are all unpredictable, pre-ordained or something when, in fact, a lot of them can be prevented,'' said Dr. Juan Rodriguez, who

wrote the CDC report. ''The techniques that we as public health professionals use to prevent other diseases can be used to prevent injury events.''

Rodriguez prepared the report for the Department of Health and Human Services, which reported the findings to Congress last year and also published them in the June 1990 issue of the American Journal of Diseases of Children.

The CDC estimated up to 30 percent of the traffic accidents that killed youngsters were drinking-related and could have been prevented if alcohol had not been consumed. The Centers also recommended such prevention measures as air bags, automatic seat belts and education programs for youth to reduce alcohol and drug abuse.

As for murder, the CDC said the number of youngsters meeting that violent end could be reduced by ''teaching conflict resolution skills and by reduction of access to lethal weapons such as firearms.''

To help prevent suicide among young people, the CDC recommended that high-risk youths be identified and that they be prevented from obtaining prescription drugs and fire arms and gaining access to high places.

Ninety percent of drownings among children occurred in residential swimming pools. Between 40 percent and 50 percent of drownings in the group aged 15 to 19 involved drinking. Drowning was most common in the 4 and under age group.

As a result, the government recommends enclosing all swimming pools with fencing and installing self-latching gates.

The CDC also called for wider use of smoke detectors and anti-scalding devices in shower heads and faucets to prevent deaths from fire and burns.

Poisonings and falls also caused deaths among youngsters, but no figures were available in those categories.

#90187u1450 07/06/1990 ~United Press International

CHICAGO (JULY 6) UPI - Grain and soybean futures tumbled to session lows late Friday in active trading.

Closing prices were lower to sharply lower on the Chicago Board of Trade.

Widespread selling developed about midday, triggering sell-stops on the way down. Most of the weakness in corn and soybeans was based on predictions of favorable growing weather during the coming week.

Follow-through selling also pressured corn and beans in the wake of sharp losses on Thursday.

Soybeans held their own during the morning, partly on the strength of soybean oil and meal, but turned lower when corn prices began to slide. Professionals were featured sellers of soybeans during the final hour.

Wheat futures made contract lows again Friday and were sharply lower at the close. The losses were attributed to harvest pressure and the lack of buying interest. Country movement was very light.

At the close, corn was off 3 1/2 to 9, soybeans down 9 to 10 3/4, wheat off 5 1/2 to 10 and oats down 4 1/2 to 5 1/4.

#90187u1454 07/06/1990 ~United Press International

SOFIA, BULGARIA (JULY 6) UPI - President Peter Mladenov, the communist reformer who oversaw Bulgaria's transition to a multi-party democracy, resigned Friday amid controversy over inflammatory remarks at a protest rally seven months ago.

The official BTA news agency announced the resignation in a one-sentence dispatch but gave no explanation.

Mladenov, 53, had served as president since April 3.

''I do not want to become the cause for an escalation of tensions in the country. That is why I request the Grand National Assembly to accept my resignation,'' Mladenov said in a statement read on national television.

The surprise move came hours after Bulgaria's largest opposition party, the Union of Democratic Forces, joined a chorus of call for Mladenov's resignation, citing his remark at a stormy Dec. 14 protest that authorities should ''let the tanks come.''

The remark, captured on videotape at the time but forgotten, was resurrected by the democratic opposition in the final days of the campaign for parliamentary elections June 10 and 17.

After several weeks of silence, Mladenov told the nation in a televised speech Wednesday that his words had been taken out of context. He said he opposed violence and never intended that tanks be deployed against anti-goverment demonstators.

The resignation of the president was one of the chief demands of hundreds of students staging a 25-day sit-in strike at Sofia University and outside

the presidential building.

The students had set an 8 p.m. deadline Friday for Mladenov to step down, warning they would call a general strike next week if he failed to do so.

UDF leaders called on the president to resign before the newly elected Grand National Assembly holds its inaugural session Tuesday.

On Thursday, the Bulgarian Agrarian Union, which was formerly allied with the Communist Party, made a similar appeal. Even the newspaper of the ruling Bulgarian Socialist Party - the former Communist Party - had suggested it would be best for Mladenov to quit.

''I am deeply convinced the Bulgarian people ... would not believe the word,but the deed,'' Mladenov said in his speech Wednesday, in which he sought to put the controversy to rest.

The controversial remark was made Dec. 14 after Mladenov tried unsuccessfully to persuade a noisy mob of anti-government demonstrators to disperse. Thousands of protesters surrounded the Parliament building that evening, demanding the ruling Communist Party give up its guaranteed monopoly on power.

When his speech to the protesters was disprupted by jeers and heckling, Mladenov muttered, ''Let the tanks come.''

The words - seemingly addressed to no one in particular - have also been translated as ''It is better for the tanks to come.''

Political observers said many Bulgarians were angered not so much by the words themselves as by Mladenov's initial refusal to acknowledge that he made the remark, despite the clear evidence of the videotape, which was examined by specialists and determined to be authentic.

Mladenov, who was Bulgarian foreign minister and a member of the Communist Party Politburo under authoritarian leader Todor Zhivkov, was a key player in the Nov. 10 overthrow of Zhivkov and succeeded his former boss as party leader and president of the State Council.

He and other liberal Communists implemented sweeping reforms, abolishing the party's guranteed monopoly on power, ending the official persecution of the ethnic Turkish minority, legalizing opposition and calling democratic elections.

Mladenov was unanimously elected to the new post of Bulgarian president under an agreement worked out during round-table talks between leaders of the Communist Party and democratic opposition.

WASHINGTON (JULY 6) UPI - NASA officials, awaiting results of an investigation into the mirror flaws plaguing the Hubble Space Telescope, refused Friday to comment on reports the space agency passed up chances to test the mirrors on the ground.

Sources quoted in Aviation Week and Space Technology's July 9 issue said the Air Force offered NASA use of its spy satellite mirror test facilities to check the $1.5 billion space telescope's mirrors 10 years ago.

But NASA turned down the offer because the Air Force wanted all NASA and private industry personnel associated with the tests to obtain top-secret military clearance, the sources said.

''Current management does not confirm or deny such reports,'' said Paula Cleggett-Haleim, a spokeswoman at NASA headquarters.

When the Hubble troubles were first revealed last week, The New York Times also reported NASA had decided against using military equipment for pre-launch tests of the mirrors, which are vital to Hubble's ability to take pictures of visible light.

Top Hubble managers, most of whom were not with the agency when the mirrors were ground a decade ago, think the findings of a special review board will figure out exactly what went wrong with the vital mirrors and determine why on-ground tests were not conducted, Cleggett-Haleim said.

The six-member investigative panel, which has impounded records and equipment from the mirrors' maker, now known as Hughes Danbury Optical Systems Inc. of Danbury, Conn., met for the first time Thursday and Friday in Washington.

The Air Force facilities rejected by NASA were used in the 1970s and early 1980s to test the optical systems of Lockheed/Kodak KH-9 strategic reconnaissance satellites, the Aviation Week article said.

In another published report, Robert O'Dell, the original chief program scientist for Hubble, said spending limits restricted costly ground testing that might have revealed the erroneous shape of the mirror system before launch.

''All along in the program we were money limited,'' O'Dell said in Thursday's editions of The Houston Chronicle. ''We were continuously forced to do it in the cheapest possible way that we thought we could do it.

''There were lots and lots of stuff we knew and the contractor knew that we'd like to do, but when it was reduced to the push and shove, you didn't include that,'' said O'Dell, now an astronomy professor at Rice University.

O'Dell assumed leadership of Hubble in 1972 and held that post at Marshall Space Flight Center in Huntsville, Ala., for a decade. The center was responsible for Hubble's overall development.

Many critics from lawmakers to scientists have questioned why the mirrors were not tested in tandem on the ground before launch, an exercise Marshall engineers estimate would have cost about $200 million.

''We were spending about $100 million a year at the time (on Hubble),'' O'Dell said. ''Therefore, paying an insurance premium that you didn't really think was necessary and which exceeds your annual budget seemed irresponsible.

''Like all insurance policies, after things go awry, then the premium on that insurance policy looks pretty cheap.''

Hubble's problem, called spherical aberration, apparently occurred during construction of its two light-focusing mirrors. Engineers say new cameras scheduled to be installed in the telescope by a space shuttle in 1992 or 1993 can be modified to compensate for the flaw.

Although the discovery of the mirror flaws prompted initial reactions of despair, Ed Weiler, the current project scientist, said astronomers think they can wring some pictures out of Hubble even before a shuttle repair mission is sent up in several years.

Those hopes hinge on the likelihood that ground-based computer processing might be able to reconstruct clear images from the blurry pictures produced by the telescope in its current state.

''Scientists are fairly optimistic and feel roughly 50 percent of the science originally proposed for the first one or two years can be done,'' Weiler has said, suggesting that computer processing techniques may be able to reconstruct clear images from some of the blurry pictures taken by Hubble in its current state.

NASA has also emphasized that the big observatory, which has a projected life span of 15 years, can still produce ''world-class science'' by tracking non-visible energy like ultraviolet light.

#90187u1492 07/06/1990 ~United Press International

BEIR AL ABED, LEBANON (JULY 6) UPI - Iran's allies in Lebanon called Friday for formation of a higher Islamic authority to investigate the recent deaths of hundreds of pilgrims to the Moslem holy city of Mecca in Saudi Arabia.

They also sought to establish a non-Saudi security force to maintain law and order at Islamic holy shrines.

Sheikh Mohammed Hussein Fadlallah, spiritual leader of the Iranian-funded Hezbollah group, rejected official Saudi Arabian statements that the death of 1,426 pilgrims at the annual Haj religious rites was accidental.

The Moslem pilgrims died in a pedestrian tunnel 8 miles from Mecca in what Saudi officials said was a stampede that began when seven pilgrims fell off a bridge at one end of the tunnel.

Saudi King Fahd said the pilgrims died ''because their time had come, according to the will of Allah, and if they had not died in Mecca that day they would have died elsewhere in the world at exactly the same time.''

''The allegation that what happened was fate is not convincing,'' said Fadlallah, addressing thousands of Hezbollah followers at the group's mosque in the densely populated neighborhood of Beir Al Abed in southern Beirut.

''Fateful accidents are linked to God's laws in the universe, such as the (recent killer) earthquake in Iran, but as to the death of a large number of people inside that tunnel, there must be a clear explanation of what happened,'' Fadlallah said.

Iran's top ally in Lebanon charged that the Saudis have failed to shoulder the responsibility of securing the lives of the pilgrims to Mecca.

''We call for establishing an investigation committee from the Islamic countries to study what happened,'' the bearded sheikh said.

The pilgrimage to Mecca is an obligation every Moslem must fulfill at least once, if physically and financially able. Pilgrims must pass through the pedestrian tunnel to reach Mount Arafat where the Prophet Mohammed, the founder of Islam, delivered his last sermon 14 centuries ago.

While Iran has accused Saudi authorities of being incompetent at organizing the haj services, its Shiite fundamentalist allies in Lebanon have launched a ferocious anti-Saudi campaign.

The campaign began before the tunnel incident.

Last Friday, thousands of Hezbollah's members demonstrated in southern Beirut, chanting, ''Down with the Saudi rulers'' and ''Down with America.''

The anti-American rally was also in memory of hundreds of Iranian pilgrims who were killed in a bloody confrontation with Saudi police at the holy shrines in 1987.

Another pro-Iranian cleric, Sheikh Naaim Kassem, the official spokesman of Hezbollah, demanded that Saudi Arabia should face a higher Islamic court regarding the tunnel disaster.

''Saudi Arabia should be tried by an international Islamic court and must be relieved of the sponsorship of the pilgrimage,'' Sheikh Kassem told United Press International in an interview at his heavily guarded residence in Al Abed.

''We suggest forming a non-Saudi police force to maintain law and order at the shrines,'' Kassem said. ''The Saudi police confronted the pilgrims in 1987 because they were chanting 'Death to America' and 'Death to Israel.' Gunfire was directed at them because of these solgans.''

Iran, which formed the Lebanon-based Hezbollah in 1982, has maintained a hard-line anti-Western stance since the overthrow of Shah Reza Pahlavi in 1979 by the late spiritual leader Ayatollah Ruhollah Khomeini.

There have been reports indicating Iranian President Ali Akbar Hashemi Rafsanjani and a number of officials now favor a pragmatic, open policy with the West to rebuild their war-devastated country with Western technology.

On whether the plight of 16 foreign captives believed held in Lebanon, some by Hezbollah, was linked to the issue of improving relations with the West, Kassem said: ''I don't think that the two issues are related.''

He said the captives' plight was more related to the captors' demand for the release of 300 detainees held by Israel and 16 Shiites imprisoned in Kuwait.

Kassem rejected reports that Iran and the captors have recently fallen out over the hostage plight because of differences on how to use the release of the captives.

Hezbollah and other Iranian-inspired groups are widely believed to be holding the captives, including six Americans, at secret hideouts in either southern Beirut or in eastern Lebanon.

MIAMI (JULY 6) UPI - Police Chief Perry Anderson defended his department Friday against charges that police officers used excessive force to subdue and arrest a crowd of Haitians demonstrating outside a Hispanic-owned business.

Officers armed with plastic shields and night sticks arrested 58 people Thursday while forcibly breaking up a crowd that gathered at the Rapid Transit Factory Outlet store for the third time in a week.

Four demonstrators injured in the melee were taken to the hospital, said Miami Police spokesman Angelo Bitsis.

''We gave the order several times for the crowd to disperse,'' Anderson said. ''We felt that after giving a lawful order ... that the crowd would leave, but instead they maintained their position and stayed in place, so

at that particular point they were violating the law.''

But Haitian leaders denounced what they said was excessive use of force.

''We in the Haitian community do not support any form of violence. We therefore will not sit by and accept the continuing violence against members of our community, whether it's by non-Haitian shopkeepers or by police,'' said Rev. Gerard Jean-Juste.

The controversy between members of Miami's large Haitian community and the owner of the Rapid Transit Factory Outlet began June 29 following a scuffle inside the store involving a Haitian customer.

A crowd of angry Haitians demonstrated that day for about six hours outside the store before leaving. The following day, a crowd of about 1,000 Haitians trapped the owner inside to protest the alleged beating of their countryman.

A small number of demonstrators gathered again Thursday after owner Jose Luis Reyes reopened the store.

Anderson said police moved in because earlier efforts to negotiate a solution were unsuccessful.

WASHINGTON (JULY 6) UPI - The United States, the longtime leader in grain sales to the Kremlin, widened its share of the Soviet market to 62 percent in 1989, partly due to increased demand for corn, a report said Friday.

The report by the U.S. agricultural attache in Moscow said the European Community replaced Canada as the No. 2 grain supplier. Meanwhile, Thailand emerged as the No. 1 rice merchandiser, replacing North Korea, which reduced its agricultural trade with the Soviets to low levels.

The Soviet Union bought a record 21.7 million metric tons of U.S. corn and wheat during fiscal 1989. It has purchased 20.3 million tons, the second-highest total on record, during the current fiscal year.

''The United States supplied 62 percent of Soviet grain imports in 1989, compared with about half in 1988,'' the attache's report said, basing its figures on calendar year sales.

U.S. pre-eminence was aided by a Soviet emphasis last year on feed grains, such as corn. The United States is the dominant corn supplier for the Kremlin. Soviet purchases during 1989 totalled 38.1 million tons, including 23.9 million tons of feed grains and 14.2 million tons of wheat.

The Foreign Agricultural Service has forecast a shift toward wheat purchases this year by the Soviets, the result of stronger feed grain prices. FAS analysts have forecast Soviet imports during the trade year that opened July 1 would include 16 million tons of wheat, 19 million tons of feed grains and 1 million tons of miscellaneous grains.

According to the attache report, the European Community sold 6.8 million tons of grain to the Soviets in 1989, up 400,000 tons from 1988, while Canada sold 2.59 million tons, down sharply from the 5 million tons sold in 1988.

Thailand supplied two-thirds of Soviet rice imports with its sales of 406,000 tons. North Korea, which sold 199,000 tons in 1988, sold 1,000 tons in 1989, the attache report said, drawing on published Soviet data.

Cuba accounted for the lion's share of Soviet grain exports, receiving 1.21 million tons of the 1.28 million tons that were shipped. North Korea acquired little Soviet grain, compared with 360,000 tons in 1988.

#90187u1558 07/06/1990 ~United Press International

(JULY 6) UPI - President Bush is urging the Kremlin to view changes in NATO doctrine as ''a very positive step'' toward allaying Soviet fears about a unified Germany. In a 23-point joint declaration, NATO leaders ended a London summit today, offering political integration and military restraint to the remnants of the Warsaw Pact. But Bush rejected European calls for a multi-BILLION-dollar effort to bail out the Soviet economy.

National security adviser Brent Scowcroft took a skeptical view of the idea of economic aid for the Soviet Union. Scowcroft told T-V interviewers that Soviet leader Gorbachev's desire for Western aid was ''partly a ploy.'' As Scowcroft put it- ''It's a clever thing to do, to co-opt the West into helping him with his problems.''

The Houston area today suffered its third major factory blast in a month. An explosion at the ARCO Chemical Company in Channelview, Texas, killed 14 workers. Two more workers are missing, and one is injured. An ARCO plant manager was overcome with emotion while briefing reporters and had to be led away. Witnesses say last night's blast sent a ball of fire 200 feet into the air. Explosions at two other area facilities injured seven people last month.

Two Christian Scientists were sentenced to 10 years probation on a manslaughter conviction for failing to get medical help for their son before he died. A Boston judge ordered David and Ginger Twitchell to seek medical help for any of their current or future children if they get sick. The couple was convicted on Wednesday of precipitating the 1986 death of their two-year-old son through wanton neglect. The couple tried to heal the boy through prayer, and he died of a bowel obstruction after a five-day illness.

The Labor Department says continued growth of jobs in the health industry lowered the nation's unemployment rate for June to five-point-two percent. Many economists are upbeat about today's news. One says the figures show ''the best of all possible worlds ...'' NO boom, NO bust. But a Bureau of Labor Statistics commissioner sees the numbers as a sign of ''continued weakness.''

#90187u1562 07/06/1990 ~United Press International

WASHINGTON (JULY 6) UPI - Reckitt & Colman PLC may acquire the Boyle-Midway Division of American Home Products Corp., the manufacturer of Woolite cleaning products, but R&C must divest its own rug-cleaning products business under a consent agreement announced Friday by the Federal Trade Commission.

London-based R&C does business in the United States through its wholly owned subsidiary Reckitt & Colman Inc., of Wayne, N.J. It will pay AHP $1.25 billion for Boyle-Midway Inc., Boyle-Midway Household Products Inc. and Boyle-Midway Subsidiary Corp., all located in New York City, and Boyle-Midway Puerto Rico Inc., of San Juan, Puerto Rico.

R&C makes Spray 'n Vac, Apply 'n Vac and Spray 'n Brush rug cleaning products, while AHP's Boyle-Midway Division produces Woolite products, including rug and upholstery cleaning products.

According to the FTC, a complaint accompanying the consent agreement charged that the purchase would give R&C "a dominant position in the business of manufacturing, marketing and selling rug cleaning products."

The acquisition would "eliminate competition between the two companies, result in a highly concentrated market and greatly increase the likelihood of collusion in the market," the complaint said.

R&C must divest its rug cleaning products business to a FTC-approved buyer within eight months after the order becomes final. If the company does not divest its assets in that time, it must divest the Woolite rug cleaning assets within six months after that, the commission said.

In addition, for ten years R&C must get FTC approval before acquiring any interest in any company that manufactures or sells rug cleaning products in the United States.

#90187u1568 07/06/1990 ~United Press International

(JULY 6) UPI - Tests this weekend may determine the fate of NASA's coming shuttle launches. Engineers in a lab in Downey, California, will try to pinpoint leaks in the fuel line to the shuttle Columbia. At the same time, NASA and contractors across the nation are reviewing the fuel line's design, manufacturing, assembly and flight records. The deputy director of the shuttle program predicts concrete results in one week.

Soviet Russian Republic chief Boris Yeltsin urged the 28th Communist Party Congress in Moscow today to change its name and become more democratic. Yeltsin's speech won only tepid applause from the mostly conservative delegates. He says that only by reform can the Communist Party hope to keep power in a multi-party system. He suggested the party change its name to the Social Democratic Party and remove party cells from the army, the K-G-B and other enterprises.

South Korea's government reports progress in arranging a meeting between the leaders of the two Koreas. Officials in Seoul say officials from each side met for three hours in the truce village at Panmunjom and reached basic agreement for a proposed meeting between the prime ministers of North and South Korea. Officials say another meeting will be held next week to finalize the accord.

Sources say Israeli jets today bombed Palestinian positions in Lebanon, wounding five people. Police say the air force attacked bases of the Popular Front for the Liberation of Palestine-General Command in the Syrian-controlled Bekaa Valley and near Tripoli. The Israeli army says the targets were bases for attacks on Israel.

#90187u1575 07/06/1990 ~United Press International

PHILADELPHIA (JULY 6) UPI - Animal studies indicate that doctors can limit

heart damage if they immediately give a natural chemical to patients who have suffered heart attacks, researchers said Friday.

A team from Jefferson Medical College and Genentech Inc. of South San Francisco, Calif., found it could cut damage to the heart muscle by 50 percent in rats by injecting a protein that occurs naturally in the body, called transforming growth factor-beta, immediately before or after an artificially induced heart attack.

Heart attack victims can be saved if obstructions in the blood vessels, which trigger the attack, are removed and oxygen-rich blood rushes back into the heart, a process known as reperfusion. But the body counteracts to reperfusion by releasing toxins, which further damage the lining of the blood vessels that nourish the heart.

''The often life-saving procedure of reperfusion is not without side effects,'' said Allan Lefer of Jefferson Medical College, who headed the research team. ''If the detrimental effects of this therapy can be avoided there will be a better chance for the heart's recovery following an attack.''

Research results showed injections of the growth factor protected the lining of the rats' cardiac blood vessels, Lefer said.

Combining the growth factor and reperfusion may offer a new way to significantly limit the damage to the heart after an attack, Lefer said. But he emphasized more studies are needed to establish the effectiveness of the growth factor in humans.

Further clouding the applicability to humans of the research findings was the researchers' discovery of another type of toxin released in rats following the heart attacks. The toxin, called tumor necrosis factor, has never been detected in human heart attack victims, Lefer said.

Some 1.5 million Americans suffer heart attacks each year, and about one-third of those patients die.

#90187u1592 07/06/1990 ~United Press International

WASHINGTON (JULY 6) UPI - The homeless of the nation's capital remembered Mitch Snyder Friday as their ''father,'' and Jesse Jackson compared the man who starved himself for the poor and apparently killed himself over a woman to Jesus Christ and Martin Luther King.

''He chose to live with the poor. He chose to argue for the homeless. He chose to embarrass, harass and challenge our leadership,'' Jackson told a crowd of hundreds, most of them residents of Snyder's homeless shelter, at

a memorial service. ''He became the heart of the national conscience for building affordable housing for homeless people. He made his footprint in the sands of time.''

Snyder, 46, was found hanged Thursday in his third-floor room at the 1,300-bed Community for Creative Non-Violence shelter, a once-vacant federal building he forced President Reagan to turn over to the homeless with a 51-day hunger strike in 1984.

An autopsy showed Snyder died from asphyxiation due to hanging, apparently from an electrical cord, said Dr. Georges Benjamin, District of Columbia public health commissioner.

Police said Snyder may have been dead up to two days when his body was found. ''It could have been as much as more than 24 hours,'' Benjamin said Friday.

An outdoor funeral service was planned for noon Tuesday outside the shelter, with Jackson presiding.

A horse-drawn carriage was then to carry Snyder's body on a procession to the District Building, which houses the City Council and where ''Mitch was waging his last battle on behalf of the homeless,'' the CCNV said in a statement.

Snyder's death followed by days a major defeat in the City Council, which voted to weaken the city's landmark 1984 voter-mandated Initiative 17, which guaranteed emergency shelter for anyone in need.

A suicide note indicated Snyder took his life over a shattered love relationship with long-time companion and fellow activist Carol Fennelly, police said.

Snyder, the nation's best known ally of the homeless, was to be cremated, Jackson said.

''Every step of the way, I'm going to be with Mitch. I don't care if he's in heaven,'' said Keith Pennix, 26, a resident of the CCNV shelter, the city's largest. ''I'm going to be with him, because I love Mitch. He was a good father.''

Critics accused Snyder of engaging self-promotion through his high-profile antics. He was arrested for praying on the president's front lawn, set cockroaches loose in the White House dining room and played tape-recorded laughter at City Council meetings when officials insisted they were doing enough to help the homeless.

''Somebody said: 'You know, Mitch was a little eccentric. He was a little

off.' He was. You all know Mitch was half-crazy,'' Jackson said to laughs, tears and applause at the memorial service.

''People who fight for justice tend to be a little abnormal, because they're a little upset. They're carried away. They cannot contain themselves,'' Jackson said. ''If fighting for somebody else besides yourself makes you abnormal, he was abnormal. He was maladjusted: He would not adjust to homelessness and hunger and abandonment.''

''There is tremendous power in unselfish suffering,'' Jackson said. ''Mitch did not have to live amongst the homeless. He chose to do so. He had the skills to have a home of his own. He chose to suffer.''

''Oftentimes, candles that are bright and energetic burn out quickly, but oh, while they glow, we get the energy and the light from them,'' Jackson said. ''Mitch at 46; both Dr. King and Malcolm (X) at 39; Jesus the Christ at 33. ... Often these brilliant young, prophetic, eccentric, daring warriors come quickly and go quickly but they penetrate deeply.''

Looking towards Fennelly at the memorial service, held in a church near the CCNV shelter, Jackson said it was Snyder's decision to die.

''No one must bear the burden of his choice nor the consequences of his choice,'' Jackson said.

Snyder grew up poor in New York City and dropped out of high school after one month. He held jobs ranging from selling washing machines to working as a consultant on Madison Avenue, but at the age of 26 in 1969 walked away from a wife and two boys, saying he needed deeper meaning in his life.

Snyder, known by his trademark army surplus jacket, lived in the CCNV shelter and worked without pay. He was portrayed by Martin Sheen in the 1985 television movie, ''Samaritan: The Mitch Snyder Story.''

#90187u1593 07/06/1990 ~United Press International

NEW YORK (JULY 6) UPI - The clothes of one of three youths accused of raping and beating a woman jogger were caked with mud the night of the attack in Central Park, a detective testified Friday.

Jose Rosario said he first went to Metropolitan Hospital where doctors struggled to save the life of the woman hours after the April 19, 1989, attack, and later went to the home of Antron McCray, 16, one of the three youths on trial in state Supreme Court in Manhattan.

McCray, who had earlier gone voluntarily to the Central Park Precinct station but was released, obliged Rosario the next day and donned the

filthy clothes he had been wearing the previous night, Rosario testified.

''He was wearing clothing that was very dirty. It was caked with dried mud '' said the 10-year police veteran.

Rosario said he went to the McCray's West 111th Street home to bring the youth and his parents back for further questioning about a maurauding mob of about 30 youths that beat and gang raped the 29-year-old jogger, leaving her with her head bashed near a remote Central Park roadway.

During the two-hour rampage through the park, the mob also attacked a homeless man eating his dinner near a roadway and two male joggers running a lap around the reservoir. A couple on a tandem bicycle and another male jogger managed to outrun the gang and escape.

On trial with McCray are Raymond Santana, 15, and Yusef Salaam, 16. All three are charged with 13 criminal counts, including attempted murder, rape and sodomy.

If convicted, each faces a maximum sentence of five to 10 years imprisonment. All three were juveniles at the time of the attack. Other youths face similar charges and are awaiting trial.

McCray's lawyer, Michael Joseph, pounced on Rosario's testimony about his earlier observations of the victim at Metropolitan Hospital's emergency room where she was treated.

''My impression was that she was a jogger, that she had been attacked by more than one person, that she was viciously beaten and raped, and her injuries appeared to have been caused by a blunt instrument. There were bruises on her knuckles as if she had been fighting,'' Rosario said, although admitting he only saw the woman for a few minutes while doctors worked on her.

''You observed all this?'' Justice Thomas Gallagin asked incredulously.

''Yes sir,'' Rosario answered.

The name of the victim has not been published by the media because of the nature of the crime.

#90187u1648 07/06/1990 ~United Press International

EL MONTE, CA (JULY 6) UPI - Southern Pacific Transportation Co. has agreed to pay a $425,000 fine for 188 violations of pollution regulations by its smoke-belching locomotives, air quality officials said Friday.

The civil penalty imposed by the South Coast Air Quality Management District represents the agency's second-largest settlement reached with a polluter. In February, the AQMD imposed a $1 million penalty against Lockheed Corp. for violations in its use of coatings and solvents at its Southern California facilities.

The Southern Pacific violations, dating to 1981, were the result of emissions by smoke-belching locomotives climbing steep inclines between San Timoteo Canyon in San Bernardino County and the city of Banning in Riverside County, AQMD spokeswoman Sylvia Haskell said.

Andy Anderson, a spokesman for San Francisco-based Southern Pacific, said the rail giant has been cutting use of older locomotives in Southern California in recent years because of air-quality compliance problems.

"We have reassigned a lot of our locomotives away from the region because the emission regulations are tougher than elsewhere," Anderson said. "We think we have ameliorated a lot of the emission problems in recent years," he added.

The fine will be used to pay for research on low-polluting locomotive technology, Haskell said. The research will include work to develop cleaner diesel engines, improve emission controls on such engines and develop alternative fuels for train engines.

As part of the settlement, Haskell said, Southern Pacific has agreed to train its personnel to perform routine checks for excessive smoke and remove and repair trains that exceed the levels allowed.

#90187u1649 07/06/1990 ~United Press International

SAN DIEGO, CA (JULY 6) UPI - The refurbished Exxon Valdez, responsible for the largest oil spill in U.S. history, has been renamed the Exxon Mediterranean and will begin operating again next month, but it will navigate only in foreign waters, officials announced Friday.

The 987-foot tanker has been completely restored after a nine-month, $30 million repair job that replaced most of the ship's hull, said Gus Elmer, president of Exxon Corp.'s shipping subsidiary. The hull was ripped open when the tanker ran aground in Alaskan waters in March 1989.

The tanker's notoriety, Elmer said, had nothing to do with Exxon's decision to use the ship overseas rather than in domestic waters. "Due to declining Alaskan crude oil transportation requirements, the vessel will enter foreign service, most likely loading crude in the Mediterranean or the Middle East," he explained.

"Consistent with (Exxon's) normal practice of naming vessels for the primary area of operation, the ship will be renamed the Exxon Mediterranean," he added.

Elmer also said that, because of the ship's size, "it can only enter two West Coast ports, Los Angeles and San Francisco, and then only when light loaded." The tanker's capacity "can be more fully utilized in foreign service," he said, adding that as the Prudhoe Bay field in Alaska continues to decline Exxon will evaluate "the optimum use of other tankers now assigned to the West Coast fleet."

The Exxon Mediterranean, which will be U.S.-flagged and have a U.S. crew, is scheduled to be taken out of dry dock at the National Steel and Shipbuilding Co. around July 20 and will undergo a series of tests off the coast of San Diego to establish its seaworthiness, Elmer said.

"There will be ten to 12 or possibly 14 days of sea trials," he said. "The ship has been out of service for a long time. We'll be checking everything - navigation, engine room, computers."

The ship, built by National Steel in 1988, disgorged 11 million gallons of crude oil into Prince William Sound while headed out to sea, creating the worst environmental disaster in U.S. history.

The resulting furor over the accident, blamed on negligence by the ship's captain, intensified when Alaskan officials criticized Exxon for a superficial cleanup of the despoiled Alaskan coastline.

Elmer insisted that the name change had nothing to do with the stigma of the Valdez, noting, "The citizens of Valdez voted 4-1 to keep the name 'Valdez' on the tanker." "We have changed name fairly frequently on our vessels. ... We obviously don't subscribe to the bad luck theory," he said.

The new captain will be Mike Stalzer, of Conroe, Texas, who has worked for Exxon since 1981. Elmer said the new crew will include "one or two" of the crew members who served on the Valdez, but he would not specify which positions they will fill.

Asked about proposals to make double hulls mandatory on all tankers, Elmer said that Exxon is awaiting the results of a study by the National Academy of Sciences on the advantages of such construction and that "we hope that study will be concluded by the end of the year."

He declined to either endorse or oppose the concept of double hulls, saying the decision ultimately will be made by Congress. "When the time comes for us to build ships - and that time will come - we will be in a position to respond to the regulations. ... We'll build the safest ships possible," he said.

Criticizing proposals to reconfigure tankers with double hulls, Elmer said that "retrofitting really is not a viable alternative." "You're talking about replacing 80 percent of the structure of the ship and having the vessel out of service for a long, long period of time. You just have to at that point think about the economic viability of your asset."

With the renaming of the ship and its return to service, Elmer expressed hope the incident would be put behind Exxon. He also said many lessons had been learned from the disaster.

"We've certainly learned a lot about the professionalism of our employees " he said, as well as the need for an on-scene commander orchestrating quick action at the site of every spill. "We've all learned from this - the Coast Guard, the industry and, certainly, Exxon. I think we're a stronger company," he said.

Elmer took over as president of Exxon Shipping Co. April 1. Frank Iarossi, the former president who directed operations during the accident and cleanup, left for a job with the American Bureau of Shipping, an industry group.

#90187u1661 07/06/1990 ~United Press International

CAPE CANAVERAL, FL (JULY 6) UPI - Slightly misaligned fuel tanks did not cause the hydrogen leaks that grounded NASA's shuttle fleet, officials said Friday, focusing attention on a series of weekend tests in California expected to help pinpoint the problem.

But if those tests and others at the Kennedy Space Center next week fail to locate or duplicate the leak for further analysis, ''in all honesty I'm not sure where we go from there,'' shuttle chief William Lenoir said. ''That's a tough one. Maybe we all go on vacation.''

Along with tests in California over the weekend, technicians at the Kennedy Space Center are gearing up for another fueling test for the shuttle Atlantis next Friday in an effort to track down a leak in the ship's 17-inch-wide fuel line "disconnect" fitting like one that grounded the shuttle Columbia in May.

At the same time, NASA and contractor engineers across the nation are reviewing manufacturing records, flight histories, assembly procedures and the design of the critical 17-inch disconnect fittings to find out what caused crippling hydrogen fuel leaks that have grounded the shuttle fleet.

The 17-inch disconnect ''umbilical,'' located where propellant lines from the external tank enter the belly of the orbiter, allows the tank to be safely jettisoned after reaching space. It is made up of valves, seals and plumbing mounted inside the shuttle, along with matching hardware on the external tank.

While NASA engineers do not yet know what is causing the leaks, they have been able to eliminate one possibility: the effect of slightly misaligned fuel tanks.

The external tanks used by both Columbia and Atlantis came from the factory with mounting hardware that caused the shuttle to be slightly ''cocked'' to one side after attachment. The effect was for the nose of the ship to be an inch or so from vertical as viewed from above the back of the ship.

''We have more or less exonerated what we have come to call the crooked tank issue,'' said Lenoir, associate administrator for space flight. ''We have analyzed that and re-analyzed that ... and, try as we might, we cannot make that come even close to anything that would make us suspicious.''

Columbia's planned launch May 30 on a 10-day astronomy flight was called off just six hours before liftoff, when hydrogen gas was detected leaking into the ship's engine compartment. Atlantis's mid-July launch on a military mission was put on hold after a similar leak showed up during last week's fueling test.

In both cases, the leaks were traced to the ships' massive 17-inch disconnect fittings. But the precise location of the leakage inside the disconnect assemblies remains unknown.

Weekend tests in Downey, Calif., may pinpoint the source of the leak once and for all.

Engineers with shuttle-builder Rockwell International began a series of tests Friday with Columbia's disconnect hardware in a bid to duplicate the leakage under carefully controlled laboratory conditions.

With the disconnect hardware hooked back up in a simulated launch configuration, engineers pumped room-temperature gases through the system Friday, setting the stage for tests Saturday and Sunday involving frigid liquid hydrogen rocket fuel.

''It's apt to be Sunday before we have really done the most rigorous testing with liquid hydrogen,'' Lenoir said. ''We should be able to pinpoint that leak and talk about the magnitude of the leak.''

The leak only shows up when the shuttle plumbing is exposed to the minus 420-degree temperature of volatile liquid hydrogen and engineers hope they can duplicate the leak under laboratory conditions.

But Lenoir cautioned the leak could still elude detection for two reasons: the test rig cannot pump hydrogen through the umbilical at the same rates as at the launch pad; and in the process of disassembling and reassembling the hardware, ''we may have inadvertantly fixed the problem.''

Regardless of what turns out to be wrong, it appears unlikely Atlantis can be ready for takeoff before mid-August and equally unlikely Columbia can get off the ground before the shuttle Discovery's high-priority Oct. 5 launch to ferry the Ulysses solar probe into space.

Back at the Kennedy Space Center, engineers are gearing up to pump hydrogen back aboard Atlantis's external tank next week to further isolate the location of the leak that grounded the ship's July flight.

Special ''baggies'' will be put in place around the disconnect fitting to trap any hydrogen that escapes, making it easier for engineers to pinpoint the source and magnitude of any such leakage.

Regardless of the exact location of the leak, the fact that it involves the disconnect fitting means Atlantis, like Columbia before it, likely will have to be hauled off the launch pad and returned to the Vehicle Assembly Building so the ship can be removed from the tank to give engineers access to the suspect hardware.

#90187u1693 07/06/1990 ~United Press International

ANCHORAGE, AK (JULY 6) UPI - People evacuated from the eastern Alaska town of Tok returned home Friday after firefighters successfully diverted an advancing wildfire away from houses in the smoke-filled community, fire officials said.

''We fought from structure to structure as that fire moved into the edge of town,'' said Pete Buist at the federal Bureau of Land Management fire

headquarters in Fairbanks.

''That fire was so hot it created its own lightning storm,'' he said.

An all-out effort to save the community of 1,200 paid off when firefighters bulldozed a line around the threatened edge of town and steered flames on a new course around the perimeter of town, Buist said.

''A lot of people are wondering why Tok didn't burn, us included,'' Buist said. ''A 'dozer line did what it was supposed to do - divert the fire. It was a function of 'dozer work, hand work and, not the least, a little help from the wind.''

Flames torched a handful of abandoned buildings, lapped at a Coast Guard communications station and destroyed a makeshift fire communications set-up at a command post but spared occupied dwellings, said Sue Mitchell from fire headquarters.

The 34,000-acre Tok fire tripled in size from Thursday, making it the biggest of the 184 fires burning throughout Alaska, said Pat Flowers of the BLM Alaska Fire Service.

Fires were burning 253,495 acres of state, federal and native lands, and Flowers said, ''The fires are growing steadily.''

Tok remained in danger even as residents returned home, Buist said. Officials warned that new evacuations might become necessary.

Late Thursday flames sent hundreds of Tok residents 12 miles north on the Alaska Highway to the village of Tanacross where the school was opened as a shelter. Other Tok residents went 5 miles farther to the Moon Lake recreation area.

Some Tok residents stayed to protect their homes and 15 locals gathered in the Tok Lodge bar where bartender Chris Rauch said they watched the flames 1 mile away.

Early Friday morning, with cooler temperatures reducing fire danger during the four hours when the summer sun dips below the horizon, the highway link to Canada was reopened and Buist said ''a solid mass'' of vehicles filled the road to and from the border.

Hundreds of cars were backed up on each side of Tok when fire and smoke closed the Alaska-Canada Highway Thursday. And in a place where it stays light all night, cars had to drive with headlights on during the smoke-darkened day. Alaska State Troopers predicted new intermittent closures.

The Coast Guard resumed operations Friday at its Loran (long-range aid to navigation) station which was shut down Thursday when flames hurdled a road and advanced on the facility. Crews had cleared brush away and the concrete building survived the flames, said Coast Guard spokeswoman Pamela Foss.

Power was restored to four 700-foot towers that transmit signals to help pilots and mariners navigate, but crews patroled the antenna field to watch for flare-ups and prepare for a new evacuation, Foss said.

Lightning started the Tok fire Sunday. Wednesday the wind-blown blaze jumped over the Tok River. Thursday, it crossed the Alaska Highway. And Friday it continued to devour spruce forests and threaten homes as every available fire retardant bomber in the state plus three from Canada worked the blaze.

Nearly all the fires in the state were sparked by lightning strikes - as many as 4,000 in a single day. More than 900 firefighters battled the blazes with half the crews in Tok. Alaska Gov. Steve Cowper declared an emergency Thursday and called up National Guard troops to help. But half the 184 blazes were unmanned, Flowers said, because they posed little threat.

A banner headline Friday in The Anchorage Times screamed ''Alaska on fire!''

Above-normal temperatures have hit 90 degrees in Fairbanks and along the Arctic Circle during the past week and have been in the upper 80s throughout the fire-ravaged interior of Alaska, turning forests into kindling for lightning.

National Weather Service meteorologist Dan Hancock predicted temperatures would dip to 80 degrees Saturday and slowly fall as a low pressure system brings moist air and showers that may extinguish the continuing lightning and help dampen the fires.

MOSCOW (JULY 6) UPI - American singers won the two top prizes in the vocal divison of the prestigious Tchaikovsky music competition Friday, while Soviet musicians dominated the piano competition.

Results of the ninth Tchaikovsky competition, held every four years in Moscow, reflected the international nature of the contest, with a Japanese taking top violin honors and a West German winning the gold medal in cello.

Deborah Voight, 29, originally from Anaheim, Calif., but now living in New York, won the gold medal in the women's vocal competition while Hans Choi, a South Korean immigrant to the United States, won the men's division.

Voigt said she had been concerned about her chances because of past European, and specifically Soviet, domination of the contest. The last American woman to win the vocal divison was in 1966, she said.

''I knew I had a good chance vocally, and I seemed to be the audience favorite, but you're never sure what the judges will do,'' she said.

The competition, considered one of the most prestigious in the world, required each of about 65 singers in the first rounds to perform 10 pieces ranging from Mozart to Tchaikovsky.

Voight sang selections from Verdi and Tchaikovsky in the final round, when the judges picked her over silver medalist Marina Shaguch of the Soviet Union and Emila Oprea of Romania and Maria Khokhlogorskaya of the Soviet Union, who tied for third.

Voight won a prize equivalent to about $8,000, though she said she was not motivated by the money - particularly since Soviet rubles are not convertible to any other currency - but would benefit from the publicity.

''Hopefully, when a company is looking for someone now, they will think: 'How about the woman who won the Tchaikovsky contest,''' said Voight, who is ''freelancing'' as a singer based in New York and plans to sing with the Metropolitan Opera next season.

Voight said that, after her college training at California State University, Fullerton, she spent two years as an apprentice with the San Francisco Opera, where she ''did understudy work, small roles, and toured the country in a Greyhound bus.''

The official Soviet news agency Tass said Choi ''swept the board'' in the men's vocal competition. Boris Statsenko of the Soviet Union was runnerup, while Soviet Oleg Kulko and Wojciech Drabowicz of Poland shared third prize.

Soviet pianists swept their portion of the competition, with Boris Berezovsky of Moscow taking the gold medal, Vladimir Mishchuk from Leningrad winning the silver in his first international competition and Anton Mordasov from Novosibirsk, at 18 the youngest contestant in piano, taking third place.

Kevin Kenner of the United States and Johan Schmidt of Belgium also won bronze medals in the piano competition.

In the violin division, 18-year-old Akiko Suwanai won top honors, ''amazing everyone with her brilliant handling of the violin,'' Tass said. Yevgeny Bushkov of the Soviet Union won second prize and American Alyssa Park, a student at the Cincinnati Conservatory who will turn 17 at the end of July, got the bronze medal.

Tass said Park displayed ''extraordinary talent'' in her first international competition. She was also awarded a special prize for artistic merit by the Moscow Union of Concert Performers.

First prize in the cello division went to Gustav Rivinius of West Germany, second place was a tie between Francoise Groben of France and Alexander Knyazev of the Soviet Union, and third place was also a tie between Bion Tsang of the United States and Timothy Hugh of Great Britain.

The prizes, announced early Friday after the conclusion of the final rounds, will be awarded at the contest's closing ceremony Saturday.

LIBREVILLE, GABON (JULY 6) UPI - Opposition leaders and relatives solemnly carried the body of Gabonese Progress Party leader Joseph Redjambe through his home village of Oumba Friday as police stood discreetly by, officials said.

Redjambe's mysterious death in May 22 in a hotel in the capital Libreville set off riots that shook the West African nation, seriously threatening the government of President Omar Bongo and halting oil production for three days.

A cortege of 66 relatives, friends and party militants carried the body through the village in southern Ogooue Maritime province as some 200 police maintained a discreet presence. Police said there were no incidents.

Redjambe will be buried at Oumba Saturday.

The government released only partial results of an autopsy carried out on Redjambe, a wealthy businessman. Authorities confirmed that injection marks were found on Redjambe's abdomen but the results of toxocological tests on the body have not yet been disclosed.

Opposition leaders charge that Redjambe was poisoned, possibly by a mysterious woman from the Ivory Coast whom he had gone to meet at the hotel.

Gabonese Progress Party President Pierre-Louis Agondjo-Okawe called on Redjambe's followers to maintain ''absolute calm'' during the funeral and to ensure ''extreme vigilance in the face of any attempt to disturb the funeral by elements hostile towards the multi-party democracy that is being born.''

General elections in which opposition political parties will be allowed to participate for the first time since Gabon gained independence from France in 1960 are scheduled this autumn.

The body of the the politician will be displayed at his relatives' home overnight, surrounded by wreaths from mourners. Army troops patroled the presidential palace and other strategic points in the Gabonese capital of Libreville Friday in case disorder flared again.

Redjambe's burial repeatedly was postponed because of fears of renewed rioting.

#90187u1732 07/06/1990 ~United Press International

NEW YORK (JULY 6) UPI - American Telephone & Telegraph Co. is to announce

up to 3,000 layoffs in its network services division next week, the Communications Workers of America said Friday.

"On Tuesday, July 10th, AT&T will announce a major layoff in its Network Services Division nationwide," the union said. "Numbers can reach as high as 3,000."

AT&T confirmed that an announcement regarding its workforce in the network service division will be made next week. "We cannot deny the CWA statement " an AT&T spokesman said. "But we do not have the figures now. We'll make a statement and disclose the figures next week."

The CWA, one of the two main unions representing AT&T workers together with the International Brotherhood of Electrical Workers, said about 300 workers would be laid off in the greater New York area. "In the New York-New Jersey area, the numbers is thought to be approximately 300 people," the Washington-based union said.

In April, AT&T reached an agreement with the CWA and the IBEW about a plan to offer retirement incentives to 16,000 non-management workers, including 6,000 employees in its network services division.

At that time AT&T, while expressing hope that a large enough number of workers would take advantage of the incentives, said it would resort to layoffs if it had to.

The telecommunications giant last week warned of lower-than-expected second-quarter profits, due to sluggish business systems sales in the United States. But the CWA charged that the layoffs were not warranted at a company which made $2.7 billion in profits in 1989.

"This is an outrageous act by a company that made $2.7 billion in profit last year with Chief Executive Officer Robert Allen making over $1 million in salary alone," said Laura Unger, President of CWA Local 1150, representing about 2,400 AT&T workers in the New York-New Jersey area.

"AT&T has not laid off such a large number of workers in New York since 1983," Unger said. "Most of the people to be laid off in New York work for the financial district and service private circuits which bring huge income to AT&T."

She said AT&T should have notified the CWA about the number of people to be laid off by Friday, because the company must inform the union of its intention 60 days in advance. "They changed their mind and said they'll make the announcement next week," she added.

AT&T had offered a retirement package adding three years to the workers' seniority in order to make a larger number of people eligible for

retirement. "This just did not work out because a lot of people had been hired in the 70s," Unger said. "A lot of these people are in their 40s. If AT&T had offered to add seven years to seniority, that might have been different."

AT&T last year offered a similarly-structured but more generous incentive retirement package to about 8,500 management employees, many of whom took the offer.

The company said it needed to trim its workforce, which currently stands at about 165,000 worldwide, because it had to cut costs to face its mounting competition, while new technology required less workers.

Overall, AT&T said its workforce must be reduced by about 13,000 people before the end of the year and that the non-management workers package could apply to up to 16,000 people. "The plan did not work. In the New York area, less than a dozen people took it," Unger said.

The CWA plans to launch a protest action at the New York Stock Exchange Wednesday morning and said it will later demonstrate at AT&T's science gallery in downtown Manhattan.

#90187u1750 07/06/1990 ~United Press International

WASHINGTON (JULY 6) UPI - The federal government, shying away from mandatory inspection of seafood, announced plans Friday for expanded voluntary fish and shellfish inspection in a move opposed by both consumer and industry groups.

The voluntary inspection program, which runs counter to tougher inspection proposals in Congress, is to be operated jointly by the Food and Drug Administration and the National Oceanic and Atmospheric Administration, said FDA spokesman Emil Corwin. Money for the plan would come from fees charged to fish and shellfish companies per inspection, with approved seafood gaining a federal seal of approval.

Corwin said ''consumer confidence'' in the safety of seafood should be bolstered by the enhanced inspection plan.

Unlike meat and poultry, seafood is not subject to broad federal inspection, instead being handled by a piecemeal inspection effort. The FDA examines about 1 percent of domestically harvested and 3 percent of imported seafood, while the Commerce Department's current voluntary inspection plan handles about 11 percent of seafood consumed in the United States.

But consumer groups say the plan fails to acknowledge the public health risk posed by the wide availability of uninspected seafood. Americans eat nearly 4 billion pounds of fish per year, and government health officials estimate 64,000 illnesses and 22 deaths annually are linked to contaminated fish and shellfish.

Industry representatives favor mandatory inspection so that responsible companies that volunteer for the burden of inspection do not have to compete with irresponsible companies that operate outside of government scrutiny.

Elizabeth Hedlund, a spokeswoman for Public Voice for Food and Health Policy, said a voluntary inspection program represents ''a missed opportunity to close the gap in our food safety system'' because it fails to subject seafood to the same level of inspection accorded meat and poultry.

''Fish are exposed to both microbiological contaminants and chemical contaminants,'' Hedlund said. ''They swim very often in polluted waters that are filled with pesticide runoff and industrial waste. And fish need a very tight monitoring system and fish need to be scrutinized very carefully by the federal government.''

Lee Weddig, vice president of the National Fisheries Institute, which represents some 1,000 seafood companies, said, ''We don't believe that a voluntary program is the answer to whatever problems may exist. Whatever is done must be done on a mandatory basis.''

George Hoskin, the FDA's senior fisheries expert, said it would be impossible to create mandatory inspection programs for seafood that match

those for meat and poultry because ''the entire supply system is so radically different.''

The FDA says the new program would use industry controls and government inspection at key points during seafood production - from the point at which fish or shellfish are netted to the point they land in a grocer's display case for sale - to detect health risks like spoilage and bacterial growth. Under the plan, producers would would monitor many of their own systems, subject to verification by NOAA's National Marine Fisheries Service and the FDA.

Both the House and Senate are considering measures relating to seafood inspection, and the Senate Agriculture Committee has already approved a mandatory seafood inspection bill.

VIENNA (JULY 6) UPI - Police armed with truncheons attacked a large crowd of demonstrators who massed in the Albanian capital Friday to demand democratic reforms, the Austrian new agency APA reported from Tirana.

The officers beat several protesters and scattered hundreds of others in the most serious disturbance since police opened fire Monday on scores of refugees trying to enter foreign embassies, the news agency said.

Despite the clashes, as many as 10,000 Albanians remained on the streets, watched by ''extremely nervous'' police officers who attacked individual protesters at the ''slightest provocation,'' according to a reporter for the Austrian news agency who witnessed the violence.

Independent confirmation was extremely difficult because of restrictions of travel and communications in communist Albania, one of the world's most isolated and rigidly controlled states.

The latest disturbances came as foreign diplomats struggled to feed and accomodate an estimated 2,000 Albanians seeking asylum inside foreign embassies in Tirana.

The number of refugees clambering over the walls and fences of foreign embassies climbed dramatically late Thursday and Friday with word that police were no longer trying to stop the attempts.

The refugees refused to leave despite a pledge by the Albanian government Friday to issue passports and exit visas to anyone who applied for them. Diplomats said the refugees were skeptical of the offer and afraid to leave the safety of the embassies.

A West German government spokesman in Bonn said there were more than 1,000 refugees in the West German Embassy alone - up from 86 on Thursday morning.

About 230 refugees jammed the French mission and more than 300 were being sheltered in the Italian Embassy, government officials said. Diplomats in Rome described the logistical situation in the crowded embassies as ''critical,'' with food, medicine and hygienic facilities in short supply.

Diplomatic sources and Western news reports estimated the number of refugees sheltered in 18 foreign embassies at around 2,000. The French, German, Italian and Polish governments made arrangements to fly food, medicine and personnel into Tirana, but it was not clear if the aircraft would be permitted to land.

The Austrian news agency put the number of Albanians being sheltered in the embassies at 3,000 - including 2,000 in the West German mission alone.

Last year, thousands of East Germans poured into West German embassies in Berlin, Prague, Warsaw and other European capitals in a move that contributed to the eventual collapse of East Germany's hard-line communist government.

Diplomats in Bonn and Belgrade said of the latest crisis that not all the refugees wanted to leave Albania but were merely seeking protection from the security forces.

''It is a difficult situation, because so far no solution can be seen,'' said a diplomatic source in the Yugoslav capital.

''They are in our embassy because they are afraid of the police,'' the source said. ''They do not want to leave Albania.''

The Yugoslav news agency, citing accounts from travelers coming out of Albania, said there were reports of disturbances in other cities, chiefly Shkoder and Kavaje. No details were given.

The French Foreign Ministry summoned Albania's ambassador to France, Xenophon Nushi, ''to try to find a humanitarian solution'' to the refugee problem, which was being exacerbated by high temperatures in Tirana, ministry spokesman Daniel Bernard said.

He said a large number of injured people as well as women and children were inside the French mission.

In Geneva, West Germany's Ambassador to the United Nations, Hans Otto Brautigam, called on U.N. Secretary-General Javier Perez de Cuellar to intervene in helping to obtain exit visas for the refugees. A U.N. spokesman said the Perez de Cuellar had committed himself Thursday to

''doing all he can'' to resolve the crisis.

Albania's Foreign Affairs Ministry, in a statement carried by the official Albanian Telegraphic Agency, said the government's promise to supply passports to anyone who wants one also applied to the hundreds holed up in the embassies.

''The Albanian authorities ... are ready to grant passports, even to those citizens who are still in the foreign embassies and who shall ask for such a thing,'' the statement said.

#90187u1800 07/06/1990 ~United Press International

NEW YORK (JULY 6) UPI - The dollar generally strengthened in New York trading Friday on the release of U.S. jobs data that convinced most players short-term interest rates would not be coming down, as had been expected earlier.

The Labor Department said 97,000 jobs were added to the nation's payrolls in June. That was less than the market was expecting - but, at the same time, May's employment figures were heavily revised upwards.

Currency traders said the net effect was to reverse market sentiment that the Federal Reserve would ease credit. New expectations of steady U.S. short-term interest rates supported the dollar.

"The Fed is not going to be able to ease with that kind of a number," said Dean Witter trader Chuck Farrell. He said the dollar rose initially, then fell off somewhat as players reexamined the employment data.

In late New York trading, the dollar was quoted at 1.6525 German marks, up a bit from 1.6505 Thursday. But the U.S. currency fetched 151.60 Japanese yen, up 1.10 yen from Thursday's 150.50 - the dollar's largest move on the day.

Yet Creditanstalt Bankverein currency manager Lawrence Ryan said the players were "very mixed on how to read" the ambiguous data. "That was what everybody was waiting for, and it was all in all a non-event," he said.

In recent days, the yen had strengthened on assumptions of a more accomodative U.S. credit policy and on a rumored Bank of Japan discount rate hike, so the employment figures dealt Japan's unit a hard blow. Farrell said it was unlikely that many participants would continue to buy yen on hopes for higher Japanese interest rates alone.

It was not expected that the world economic summit opening Monday in Houston would yield any significant monetary policy shifts. Officials representing the Group of Seven industrialized countries are "by and large very happy" with exchange rates, Ryan said.

Other dollar rates: 1.3990 Swiss francs, unchanged; 5.5475 French francs, up from 5.5390; and 1,212 Italian lire, up from 1,210.75. The pound rose to $1.7860 from $1.7810 Thursday.

The dollar closed mostly higher in quiet European trading after the release of relatively favorable U.S. employment data, but participants sold dollars to bring the unit off its highs after a closer examiniation of the figures.

"The (American) economy is not slowing down as much as people feared, but it is still slowing down," said foreign-exchange manager Warren Pinner of Kleinwort Benson in London.

Markets still expected the Fed to eventually ease interest rates to stimulate the economy, undermining the dollar, Pinner said.

In Frankfurt, the dollar closed higher at 1.6535 deutsche marks aginst 1.65. The U.S. unit also gained in Zurich, at 1.3995 Swiss francs against 1.3980.

In London, the pound rose on comments Thursday from British Chancellor of the Exchequer John Major that credit growth was buoying interest rates and on his pledge to keep rates high until inflation, now at 9.7 percent, slowed. Sterling closed higher at $1.7865 compared with $1.7825.

The dollar gained in Paris, Brussels and Milan, closing at, respectively, 5.5475 francs against 5.5365, 33.94 Belgian francs against 33.9050 and 1,212.65 lire against 1,210.20.

In Tokyo, the dollar ended down slightly at 150.95 yen, compared with 151 yen Thursday, as players stayed on the sidelines ahead of the release of the U.S. jobs data.

In Zurich, gold climbed to $361.50 an ounce compared with $360 Thursday. It also rose in London, to $361.25 an ounce against $360.

Republic National Bank in New York closed cash gold at $360 an ounce, down from $360.50 Thursday. The New York Commodity Exchange settled gold at $361.10 an ounce, down from $361.40.

Silver was down in Zurich at $4.85 an ounce against $4.90 and finished lower in London, too, at $4.89 an ounce against $4.90.

Republic closed cash silver at $4.88 an ounce, unchanged. Comex silver settled at $4.866 an ounce, off from $4.869.

#90187u1804 07/06/1990 ~United Press International

CARACAS, VENEZUELA (JULY 6) UPI - Venezuela will allow transnational companies to invest in its oil industry in high risk areas where high technology is needed to explore for oil and exploit it, authorities said Friday.

Andres Sosa Pietri, president of Venezuela's state-owned oil company, Petroleos de Venezuela, said foreign participation in oil exploitation would be limited in order to protect the industry, which was nationalized in 1976.

Sosa Pietri said certain areas of joint investment were being studied, and would come under Article 5 of the nationalization, which allows for private and foreign investment in areas where oil is difficult to extract and requires high technology.

Sosa Pietri said the National Petroleum Project - which foresees an increase in production from the current 2.7 million barrels per day to 3.1 million bpd in 1993 and 3.6 million bpd in 1995 - will remain under government ownership.

"The company is not in agreement in carrying out joint ventures in traditional areas of exploitation or in the government's new petroleum expansion plans," Sosa Pietri said.

The national oil company, through its affiliate Lagoven, has tentatively accepted $3 billion in investments from Shell, Exxon, and Mitsubishi to exploit liquid natural gas deposits under a project dubbed "Cristobal Colon."

Sosa Pietri said details of a feasibility study and certification of reserves and other engineering matters are being analyzed for the project, to be carried out in the Paria peninsula, 350 miles (550 km) east of Caracas.

The company president said the project will be presented to the National Congress for approval, probably in the first quarter of 1991. "The opening to foreign and domestic private capital will be for petrochemical development or other areas of industrialization of hydrocarbons destined for export," he said.

#90187u1809 07/06/1990 ~United Press International
PORTLAND, OR (JULY 6) UPI -About 22 percent of the lumber mills in 12 western states are starting to experience log shortages that are forcing cutbacks in their operations, the Western Wood Products Association said in a report.

The other 78 percent are operating at levels comparable to their 1989 production schedules, but many of them face a dwindling log supply, said WWPA President H.A. Roberts in a report released this week.

Roberts said the association sent questionnaires to 410 mills which each produce at least 10 million board feet of timber annually. All responded.

Roberts said ''22 percent reported production cutbacks have occurred in their operations ranging from shift reductions to shortened work weeks or to complete shutdowns.''

''By far the most common reason given for cutbacks was short log supplies, with 79 percent stating that new log availability is a serious problem,'' he said.

Roberts said the cutbacks are related to reductions in timber cutting on public lands either due to new forest management plans implemented by the U.S. Forest Service or withdrawals aimed at protecting the northern spotted owl.

The survey showed that mills expect production for the remainder of 1990 to be slower than the first half of the year and overall output for the year about 10 percent below 1989.

''Stored log supplies that permitted normal production at some mills during early 1990 are now dwindling,'' he said. ''Owl-related timber land withdrawals are expected to make the problem critical for many mills.''

Roberts said most of the mills were ''very unsure about 1991'' with responses ranging from minor declines in production to outright shutdowns.

''Estimates of 15,000 to 28,000 jobs going by the wayside are not unrealistic if federal forests are not fully managed for timber growing,'' Roberts said.

Roberts noted that 10.5 million acres of forest land in California, Oregon and Washington have been set aside in parks and wilderness areas and plans to protect the spotted owl may ban logging on another 3.1 million acres.

The U.S. Fish and Wildlife Service listed the spotted owl as a threatened species and federal agencies have given themselves until Sept. 1 to

develop protection plans.

Roberts predicted the actions would drive up the cost of wood construction products, making it more expensive to build and repair houses.

''Housing non-affordability, already of grave concern in America, easily can be pushed to absolutely unacceptable limits,'' he said.

Roberts noted that the 12-state region represented by his association produces 62 percent of the annual U.S. softwood output and 44 percent of all softwood consumed by U.S. domestic markets.

(JULY 6) UPI - The judge in the trial of Washington Mayor Marion Barry today decided to allow controversial black religious leaders Louis Farrakhan and George Stallings into the courtroom. U-S District Judge Thomas Jackson had originally barred Nation of Islam leader Farrakhan and Imani Temple founder Stallings... saying they could disrupt or intimidate the hearings. Both religious leaders said their ban typified government persecution of blacks such as Barry.

A Christian Science couple convicted of manslaughter for failing to get medical help before their son died were sentenced today to 10 years probation. A judge in Boston also ordered David and Ginger Twitchell to seek regular checkups and special medical attention if any of their children develop a serious illness. David Twitchell says they have NEVER ruled out medical care, but feel prayer is the best first step for illness.

WASHINGTON (JULY 6) UPI - The Federal Reserve Board's policy making panel, at its May 15 meeting, voted for another round of high interest rates to hold inflation in check, according to a meeting summary released Friday.

Details of Federal Open Market Committee meetings are kept secret for six weeks so not to influence financial markets. But the 10-1 May vote was hardly a surprise, as interest rates have hardly budged since then.

"In the implementation of policy for the immediate future, the committee seeks to maintain the existing degree of pressure on reserve positions," the FOMC summary said.

The FOMC, which is headed by Fed Chairman Alan Greenspan and which meets eight times a year, held its latest meeting this week. Although the details will be kept under wraps until August, the Wall Street Journal reported Friday the panel again voted against easing credit conditions.

The Fed has said it is determined to eliminate inflation - which has been running around four percent to 4.5 percent - in five years, and interest rates are its primary weapon against greater prices.

In the only dissenting vote at the session, W. Lee Hoskins, president of the Federal Reserve Bank of Cleveland, called for even higher interest rates "to help assure that progress would be made toward a reduced rate of inflation."

The summary also said that the domestic economy appeared to be increasing moderately and that total non-farm payroll employment increased slowly in March and April.

"Industrial production declined in April, reflecting what appears to be a temporary cutback in the manufacture of motor vehicles," the summary said. "Consumer spending has been sluggish on balance.

"Outlays for goods have been weak, while expenditures for services have remained strong," the summary said. "Business spending for equipment has been rising, but construction activity ... appears to have weakened."

(JULY 6) UPI - Police in Australia say the father of pop music star Bobby Brown faces rape charges in Brisbane in an alleged attack on a teen-age girl in a hotel room. Police say 60-year-old Herbert Brown met two 16-year-old girls at a night club and invited them to his hotel room, where one of the girls allegedly was raped. The elder Brown had accompanied his son on an Australian concert tour.

A woman says she grieved for two days in her hospital bed after mistakenly being told her newborn son had died. Two hospitals involved are trying to determine what happened. Officials say Juanita Ayala gave birth in

Middletown, New York, to a son, who choked while he was being delivered by Caesarian section. He was rushed to a hospital 20 miles away in Valhalla. Ayala says she was told last Friday that her son died. But hospital officials say the child is alive... in critical condition.

BOSTON (JULY 6) UPI - Writer Mark Richard will receive the 1990 Ernest Hemingway Foundation Award for best new fiction, the foundation said Friday.

Norman Mailer will present the $7,500 prize, one of the largest American literary awards, to Richard on Saturday for his short story collection ''The Ice at the Bottom of the World.''

The ceremony will open the Fourth International Hemingway Conference for scholars and Hemingway fans at the John F. Kennedy Library. The presidential library houses the world's largest assemblage of Hemingway manuscripts and materials. It is the principal center for Hemingway research.

The award is administered by PEN, the world association of writers. It is reserved for a first published book of fiction by an American writer.

Richard, who lives in New York City and Virginia, has had his stories published in Harper's magazine, Esquire, Antaeus, Grand Street and other literary reviews. He is working on a novel.

Judges for the 15th annual award were past recipients Joan Chase, Josephine Humphreys and Susanna Moore.

They cited ''The Ice at the Bottom of the World'' for stories filled with ''the quintessentially American balancing act of despair and high spirits.''

''Language shifts from the unerring buzz of colloquial cadences into thrilling slipstreams of poetry, surprising yet utterly appropriate,'' the judges said. ''Profound irreverence, which makes the reader laugh out loud is accompanied by sympathy and affection.''

The Hemingway award was started in 1976 by late PEN member Mary Hemingway, who wished to honor the memory of her husband and draw attention to first books of fiction. Since her death, it has been endowed by The Hemingway Foundation.

The four-day conference will include presentation of papers on gender issues in Hemingway's fiction; a discussion of ''Death in the Afternoon''

with American bullfighter Barnaby Conrad; a paper on Nick Adams, the narrator of ''In Our Time;'' readings by science fiction writer Joe Haldeman from his new novel, ''The Hemingway Hoax;'' home movies of Hemingway in Cuba; and a Brian Edgar film adaptation of Hemingway's story ''Indian Camp.''

#90187u1851 07/06/1990 ~United Press International

WASHINGTON (JULY 6) UPI - A street-level drug dealer testified Friday Mayor Marion Barry bought crack cocaine directly from her 25 times over a three-month period in 1988, often traveling by limousine to her home to get the drugs.

Lydia Pearson testified that Barry would telephone her to set up the drug buys. She testified that Barry normally would buy three $30 bags of crack while his bodyguards, District of Columbia police officers, remained at his government limousine.

Barry bought the drugs ''about 25 times'' between July and September 1988, said Pearson.

Also Friday, FBI forensic toxicology expert Thomas Lynch testified the cocaine level in Barry's urine Jan. 18, the night he was arrested in an FBI sting operation, was a ''tremendous amount'' and that the urine also showed traces of recent marijuana use.

Barry was shown smoking crack on an FBI videotape the night of his arrest at the Vista International Hotel. He is on trial on 14 perjury and cocaine charges, and faces up to 26 years in prison and fines of up to $1.85 million if convicted.

Barry's lawyers claim he was entrapped by the FBI.

Pearson testified she supplied crack to Barry through former model Rasheeda Moore prior to the summer of 1988, when Moore broke off a two-year sexual relationship with Barry.

Moore, who lured Barry to the Vista in the FBI sting, had testified she

and Barry used cocaine more than 100 times over a three-year span.

Another woman, Maria McCarthy, also bought crack for Barry, Pearson testified.

Assistant U.S. Attorney Richard Roberts entered into evidence telephone records showing calls placed to Pearson from Barry, he said.

Lynch testified Barry's blood alcohol level 90 minutes after the sting operation was .005, 20 times below the level considered legally drunk.

''It was virtually nothing,'' said Lynch.

Barry's attorney, R. Kenneth Mundy, has claimed the government primed Barry with cognac before convincing him to smoke the crack.

In cross-examination, Mundy showed portions of the sting videotape in which Barry or Moore are shown pouring from a cognac bottle three times into Barry's glass.

Lynch said Barry drank about 4.5 ounces of cognac during the 83 minutes he was under surveillance.

Mundy suggested Barry's blood alcohol level then should have been much higher, but Lynch said it was consistent with him having consumed that much cognac.

Barry, who spent seven weeks in substance abuse treatment centers after his arrest, has claimed he was treated for alcoholism and addiction to prescription drugs, not cocaine abuse.

Mundy suggested the cocaine could have been in Barry's blood and urine through ''passive ingestion,'' or breathing smoke generated by someone else smoking crack.

''The levels we are discussing here certainly remove that as a possibilty '' said Lynch.

Barry had 41,000 nanograms of cocaine per one microgram of urine - ''a tremendous amount'' - in his urine, said Lynch.

Cocaine can normally stay in a person's system up to three days, said Lynch.

Also Friday, U.S. District Judge Thomas Penfield Jackson reversed himself and said he would allow two controversial black religious leaders into the courtroom.

Nation of Islam leader Louis Farrakhan was in Memphis, Tenn., but Bishop George Stallings - a Washington priest who broke from the Roman Catholic Church to form his Imani Temple congregation - took immediate advantage of the ruling, entering the courtroom, where he hugged Barry.

Jackson had barred Farrakhan and Stallings from the trial last week because he feared they could potentially disrupt the proceedings. They claimed the move was racially motivated, and the American Civil Liberties Union filed suit, saying it violated Barry's right to a public trial.

Outside the courthouse Friday, Barry supporters were joined by Rev. Al Sharpton, who has been involved in several racially explosive cases in New York. Sharpton said he came to Washington to join ''agitation,'' but did not intend to enter the courtroom.

#90187u1892 07/06/1990 ~United Press International

WASHINGTON (JULY 6) UPI - Commercial fishing driftnets that have come under attack for catching U.S. salmon appear responsible for a substantial number of deaths among dolphins, sharks, sea birds and tuna, federal officials reported Friday.

A National Oceanic and Atmospheric Administration report said at least 59,060 albacore tuna, 59,100 blue sharks, 9,173 sea birds, and 914 dolphins were captured along with squid and other fish in open-sea driftnets in the North Pacific during a six-month period.

The statistics were compiled by a U.S.-backed pilot program made up of nine observers from the United States, five from Canada and 32 from Japan who served aboard high seas driftnet vessels from June to December 1989.

William Fox, NOAA's assistant administrator for fisheries, said the findings were preliminary and further studies are needed to assess the extent of the problem.

But Fox said, ''I also believe that if the trend shown in last year's pilot program continues, the United Nations must insist on an immediate moratorium of this practice.''

Driftnets up to 30 miles long have been used increasingly by fishing operations from Japan, Korea and Taiwan over the past decade, NOAA said. The United States negotiated an accord with the three countries in 1989 to monitor fishing in hopes of preventing the incidental catching of salmon that breed in U.S. rivers and streams.

The study, which covered 4 percent of the Japanese commercial squid driftnet fishery, will be expanded this year to include vessels from the Republic of Korea or Taiwan. The 1990 program will also have three times as many observers as in 1989.

-30- 1863
#90187u1894 07/06/1990 ~United Press International
TAMPA, FL (JULY 6) UPI - Sheriff's deputies raided the offices Friday of two multimillion-dollar diet pill companies, arresting two people on charges of making false claims about weight-loss products.

Sheriff's officials were looking for three other suspects who were not found during the morning raids on the Tampa-area companies, Overeaters Inc. and Health Care Products Inc.

Both companies advertise in national publications and distribute their products in such store chains as Eckerd Drugs, Wal-Mart Discount Stores and General Nutrition Centers, said officials with the Hillsborough County Sheriff's Department.

Health Care distributed Cal-Ban 3000, while Overeaters Inc., or OEI, sold Bodi-Trim and Dietol-7. Sheriff's Capt. Gary Terry said the ingredients in each product were virtually identical.

Sheriff Walter Heinrich identified the two suspects in custody as Ronald Anderson, 30, and Barbara Williams Larkin, 49. Both were described as principal players in Health Care Products Inc.

The two in custoday and the three others still at large face one count of organizing a scheme to defraud, and may face additional charges of racketeering, said State Attorney Bill James. If convicted on the fraud charge, each defendant could face up to five years in prison.

'''Eat all you want and still lose weight with no exercise or calorie restrictions,' was the bait put out to people with weight problems in order to take their money,'' Heinrich said. ''This is money taken from people through fraud, which I consider no less a crime than burglary.''

Heinrich said the aggressive advertising campaigns waged by both companies are ''netting them an estimated $30 million plus a year in profits. This is big business.''

Researchers have found that the weight-loss products distributed by the two companies don't live up to the claims.

''In fact, many users have reported harmful side affects such as rashes and intestinal discomfort,'' Heinrich said.

#90187u1900 07/06/1990 ~United Press International
NEW YORK (JULY 6) UPI - The Federal Reserve Board said Thursday that the

basic U.S. money supply, narrowly defined under the name of M1, rose $1.3 billion in the latest reporting week. The broader aggregates M2 and M3 respectively rose and fell in the period. M2 increased by $1.0 billion and M3 decreased by $4.1 billion.

M1, which is made up of cash, checking accounts and NOW accounts - money that is available for immediate spending - rose to a seasonally adjusted average of $808.8 billion in the week ended June 25 from a revised $807.5 billion the week before. Over the latest 13 weeks, M1 averaged $806.8 billion, a 3.4 percent rate of increase from the previous 13 weeks, the Fed reported.

The broader measure of money, M2, averaged an estimated $3,270.5 billion in the latest week, up from a revised $3,269.5 billion. M2 includes M1, plus passbook savings, small time deposits, including money market deposit accounts, consumer money market mutual funds and certain other short-term assets.

M3, which includes M2 plus large time deposits, repurchase agreements longer than one day at banks and thrifts, and institutional money market funds, averaged $4,053.9 billion in the latest week, down from a revised $4,058.0 billion, the Fed said.

SEATTLE (JULY 6) UPI - More than 45,000 participants in the 1990 Alcoholics Anonymous-Al-Anon International Convention strained hotels, clogged the downtown monorail and held an impromptu meeting on the lawn of the registration site Friday in the first full day of events.

The four-day gathering is the ninth for Alcoholics Anonymous and celebrates the 55th anniversary of its founding. However, it is just the second international convention for its sister group, Al-Anon, which observers estimated accounted for about 10,000 of the total number in attendance.

''We've got people in the hinterlands,'' said convention spokesman Ed McDougal. ''We've got them in the dorm at the university. We're using every spare bed for miles around.''

The A.A.-Al-Anon gathering is the largest convention ever held in Seattle and participants are expected to fill the Kingdome three times. Events are being held several downtown hotels, the Seattle Center and the Washington State Convention and Trade Center.

The Seattle-King County Convention and Visitors Bureau estimates a shot to the local economy of about $45 million or about $1,000 per person from July 5-8.

A.A. is a ''fellowship of men and women who share their experience,

strength and hope with each other ... to recover from alcholism.'' The 40-year-old Al-Anon describes itself as a ''fellowship of men, women and children whose lives have been affected by the compulsive drinking of a family member or friend.''

The gala opening meeting, Friday in the Kingdome, featured a parade of nations. Some 71 countries were represented, including the Soviet Union. The largest international contingents were from Canada, Australia, Great Britain, Germany and Italy.

Among the conventioneers are 18 members younger than 15 years old and 2,000 older than 65. The majority are between 40 and 55, and the largest percentage have been sober four to 10 years.

The total registration, which began Thursday, was expected to be pushed even higher over the weekend with local members signing up, McDougal said.

Five years ago in Montreal, the last international meeting drew 47,000 people, several thousand of whom showed up without pre-registering, according to Montreal's Convention and Tourism Bureau.

About 250 workshops and seminars with about 900 speakers and coordinators were scheduled for Friday and Saturday. But even these were already jammed Friday, leaving many conventioneers grousing about being closed out of activities.

To deal with their frustration, some members spontaneously held an A.A. meeting on the grass at the Seattle Center, the convention registration site and workshop facility.

''Hi, I'm Bob. I've been sober for 16 years,'' said Bob H - both A.A. and Al-Anon stress anonymity; thus members keep their last names confidential - to a group of about 25 people gathered under a tree.

''It is kind of a shock to come here and not be able to get into meetings '' he told his sympathetic listeners. ''The old alcoholic comes out. I really had to remember my problem is three-fold - allergy, mental obsession and spiritual.

''The spiritual part had to remember the 'attitude of gratitude.' Fellowship is what the convention is all about. I'm grateful God allowed me to be here.''

McDougal, who Friday morning gave up trying to get on the monorail from downtown to the center and grabbed a cab instead, sympathized with his fellow A.A. members.

''Every facility is being used,'' McDougal said. ''Everything is

hard-pressed. ... What I learned in A.A. saves me a lot of aggravation.''

#90187u1946 07/06/1990 ~United Press International

NEW YORK (JULY 6) UPI - The stock market closed sharply higher Friday in the lightest trading of the year after recovering from early selling linked to the government's job data for June.

The Dow Jones industrial average, which sank 32.42 Thursday, added 25.74 to close at 2904.95.

Among broad market gauges, the New York Stock Exchange composite index rose 1.33 to 195.78 and Standard & Poor's 500-stock index rose 2.74 to 358.42. The price of an average share rose 23 cents.

Advances led declines 851-541 among the 1,946 issues crossing the NYSE tape. Big Board volume totaled 111,730,000 shares, compared with 128,320,000 shares traded Thursday. The previous lightest trading day was Mar. 12, when only 114,790,000 million shares changed hands.

Prices opened mixed after the Labor Department issued its employment figures for last month, which sent mixed signals about the economy. The nation's jobless rate slipped to 5.2 percent in June on a burst of hiring in the health industry and other service sectors of the economy. Private economists expected an increase to 5.4 percent.

But only 40,000 new jobs were created during the month and if the layoffs of 57,000 temporary census workers were not counted, job growth would have only totaled 97,000 new positions last month. Economists had expected

83,000 new jobs and 132,000 if the effect of census worker reduction was excluded.

Bonds tumbled on the news. In late trading the 30-year bond was down 1 6/32 to 102 18/32. Stocks initially had a lukewarm response to the report, which analysts said did not show enough clear-cut economic weakness to add to any pressure on the Federal Reserve to lower interest rates.

But as the day wore on, bargain hunting after the sharp decline Thursday boosted prices, as did the feeling that the unexpected economic strength shown in the data might mean strong corporate earnings, which will be issued over the next few weeks.

Analysts were generally unimpressed by the market's showing Friday, however. "Volume was extraordinarily light and breadth (the ratio of advances to declines) was poor," said Hugh Johnson, chief economist at First Albany Corp. in Albany, N.Y. "This is not particularly inspiring. The market was not as good as the 25-point rise in the Dow."

Other analysts also dismissed the market's performance Friday, citing the record-low volume for 1990. "With bonds as weak as they were, stocks should be down, but on the lowest volume of the year, you can do anything you want," said Edward Nicoski, chief technical analyst at Piper, Jaffray & Hopwood.

On the trading floor, Panhandle Eastern was the most active issue, tumbling 1 7/8 to 19 1/2. The stock hit a 52-week low Tuesday and continued its fall on concerns about its dividend policy. The company reportedly said late Thursday its board is expected to review the company's payout policy at its meeting July 25.

Philip Morris followed, up 1 3/4 to 49 1/4. AT&T was third, unchanged at 38 1/8.

Comstock Partners Strategy Fund was next, off 1/8 to 9 1/4. A block of one million shares of the closed-end bond fund traded just after the opening, accounting for most of the volume in the issue. The fund also declared a dividend, payable July 31 to holders of record July 20.

Among the other blue chips, IBM gained 5/8 to 118, Coca-Cola was up 1/2 to 44 3/4, American Express added 1/2 to 31 7/8 and Boeing added 1 1/4 to 60 1/2 after saying it expects to cut its work force in the state of Washington by 5,600 positions this year. It had estimated a reduction of 5,000 jobs reflecting cuts in defense programs.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 134,045,870 shares, compared with 153,227,900 shares traded in the previous session.

Prices closed narrowly mixed in light trading on the American Stock Exchange. The Amex Market Value index rose 0.38 to close at 358.87. The price of an average share added two cents. Declines led advances 257-255 among the 774 issues traded. Composite volume totaled 9,250,660 shares, compared with 10,035,700 traded Thursday. Amdahl led the Amex issues, up 1/2 to 17 3/8.

The National Association of Securities Dealers composite index rose 1.35 to close at 460.54.

(JULY 6) UPI - Bulgarian President Peter Mladenov resigned today amid controversy over his inflammatory remarks at a demonstration seven months ago. Bulgaria's largest opposition party had joined a chorus of demands for Mladenov's resignation. At a December protest... Mladenov said authorities should- quote- ''let the tanks come.'' The remark was captured on videotape but forgotten until elections last month.

Soviet President Gorbachev today welcomed news that NATO will become more of a political body and less of a military machine. Gorbachev told reporters that he's happy the two European blocs are coming closer together. NATO Secretary-General Manfred Woerner reportedly will fully brief Gorbachev on the new NATO strategy next week.

Scotland Yard says a small explosive device went off today in a garbage can a half-mile from where President Bush met British Prime Minister Thatcher for breakfast in London. NO one was hurt, and there was little damage. Police yesterday found two dummy bombs in two London rail stations.

Workers at a Texas chemical plant have begun to remove the bodies of 15 people who died in a powerful explosion last night. The blast at ARCO Chemical Company in Channelview launched a huge fireball 200 feet into the air. Officials say wreckage had to cool before workers could retrieve the bodies.

A military leader for the African National Congress says a bombing of blacks in South Africa today ''will NOT help'' in getting the group to end its armed struggle against white-minority rule. Hospitals say the explosion in a Johannesburg bus and taxi terminal injured at least 27 people.

(JULY 6) UPI - East and West German delegates are meeting in East Berlin today to iron out wrinkles in the road toward official re-unification. An outstanding issue is whether the countries should merge before or after all-German elections on December 2nd. Constitutional changes and property rights also are on the agenda.

Polish Prime Minister Tadeusz Mazowiecki today ousted five members of his coalition Cabinet... including ex-communists running the Interior and Defense ministries. Mazowiecki has been under pressure to make changes in his Cabinet from both the Peasants Party in his coalition and Solidarity leader Lech Walesa.

Three researchers in Britain say AIDS has been around a lot longer than scientists believed. They re-examined tissue from a sailor who died in 1959 and say it tested positive for the deadly virus. They say given the incubation period of the disease, the seaman would have contracted it in the early '50's.

In Paris, curators at the Louvre Museum today disclosed another daring theft from the museum discovered in three days. Officials say someone has stolen a dozen necklaces, bracelets and earrings dating to the second and third centuries A-D from a locked display window. On Wednesday, a thief cut a Renoir painting out of a frame without triggering any alarms.

A World War Two veteran whose historic American flag was stolen from his yard on the Fourth of July says he'd rather have seen the flag burned. 77-year-old C-H Hickman had hung the 50-year-old battalion flag in front of his home in Tyler, Texas. Hickman says he doesN'T know what to tell his battalion at its reunion. He's offering a reward for the return of the

flag.

WASHINGTON (JULY 6) UPI - Memorex Telex N.V., a Dutch multinational with major operations in the United States, said in a Securities and Exchange Commission filing that it would likely fail to meet certain financial ratios required under the company's senior bank debt as of June 30.

Greg Wood, the company's vice president of corporate financial relations and treasury, said Friday that Memorex management is currently reviewing financial results for April and May and will be meeting with its lenders to discuss the results and outline a plan of action.

He declined comment, however, on whether the company had actually failed to meet the financial covenants as of the June 30 deadline.

According to the SEC filing released Friday, the shortfall was due to operating results through May 31 that ''were substantially below plan.''

Wood said that the company does not reveal sales projections but that the poor performance was due to a fall in revenues and profit margins combined with higher costs.

''We are not happy with the results and we are assessing the situation, but we have a bank group that is very supportive, and we feel they will be supportive at this time,'' Wood said.

He downplayed the significance of the missed loan covenants since Memorex,

a manufacturer of computer peripherals, often has a lower financial performance in the first two quarters of its fiscal year, followed by a rebound in the latter two. The company's fiscal 1991 began in April.

Memorex Telex N.V. is the Danish holding company for a conglomerate that has $1.98 billion in annual revenues and operations in 27 countries. Santa Clara, Calif.-based Memorex Telex Corp., the company's U.S. operating subsidiary, is the largest revenue producer, contributing some 46 percent of annual revenues.

The company said in the SEC filing that it ''will need the forbearance of its lenders until the operating levels projected ... are acheived and alternative sources of financing are realized.''

The covenants are for a loan of $317 million provided by an international lending syndicate headed by Morgan Guaranty Trust Co. of New York. The syndicate includes about 35 different institutions from Europe and North America, including several insurance companies.

In addition to missing its financial covenants, Memorex may have trouble living up to a recent amendment to the senior debt documents, under which it committed to reducing its senior bank debt facilities by $200 million between March 1990 and March 1991.

While Memorex by June had reduced that figure to $140 million, the company said that it would need to draw on a variety of ''non-operating'' sources of funds to pay off the balance, including undrawn permitted credit facilities, asset sales and other equity transactions.

#90187u2109 07/06/1990 ~United Press International

WASHINGTON (JULY 6) UPI - The Office of Thrift Supervision, the agency overseeing the savings and loan bailout, filed suit in federal court Friday to block attempts to convert thrifts to commercial banks without proper approval.

The suit, filed in U.S. District Court in Salt Lake City, sought an injunction to prohibit the commissioner of the Utah Department of Financial Institutions from authorizing the conversion of savings and loans to banks.

The court action also seeks to prevent the commissioner from taking ''any action that conflicts with, hampers or impedes the OTS director's regulatory actions or any receiver appointed by the director.''

The court action grew from an attempt to convert Home Savings Bank of Salt Lake City, which was placed in receivership by the OTS on Thursday.

OTS alleged that Utah Commissioner George Sutton encouraged and approved the conversion of Home Savings to a commercial bank, which would make the institution exempt from OTS authority.

The agency said that Home Savings never applied to OTS director Timothy Ryan to transfer its assets or account liabilities.

OTS said the conversion attempt occurred as OTS moved to place Home Savings in receivership ''because it was in an unsafe and unsound condition and that repeated losses had substantially depleted its capital.''

#90187u2128 07/06/1990 ~United Press International

BUENOS AIRES, ARGENTINA (JULY 6) UPI - Argentine President Carlos Menem and Brazilian President Fernando Collor de Mello signed a series of agreements Friday aimed at creating a common market by 1995.

Both presidents signed a statement ''to establish a common market between the Republic of Argentina and the Federal Republic of Brazil, which must be formed by January 1, 1995.''

The document said ''the backbone'' of forming the common market would be the gradual elimination of all tariffs between South America's two largest countries by Dec. 31, 1995.

Government sources in neighboring Chile and Uruguay said their countries are to be included in the market once it is formed between Brazil and Argentina.

The two presidents also signed 25 specific business agreements, including automobile, nuclear and agricultural trade pacts, which were expansions on accords signed in 1986 by their predecessors, Jose Sarney of Brazil and Raul Alfonsin of Argentina.

Argentine Foreign Minister Domingo Cavallo said the immediate benefit from the documents signed Friday would be a $550 million increase in annual business between the two countries.

In 1898 Argentina$ and Brazil exchanged $1.84 billion in trading for goods and services.

Cavallo said the two presidents would consider establishing agreements to take into account ''those sectors considered especially sensitive or highly dynamic and technologically advanced.''

Collor de Mello, in an address before the Argentine Congress, said the proposal would not conflict with plans by President Bush to create a free zone in the Americas by 1992, the year the European Economic Community is to open a common market.

''There is no conflict between the two projects. On the contrary, they complement each other in a historic synthesis,'' Collor de Mello said.

''Brazil and Argentina have a special responsbility to .. force ourselves to take the first steps toward real economic integration,'' Collor said.

''The two countries will incorporate a common economic space. Our cooperation has never been this intense,'' he said.

Both Collor de Mello, 40, and Menem, 60, have instituted liberal economic austerity measures since January designed to attack hyperinflation and large fiscal deficits, including plans to privatize indebted government businesses and free foreign currency exchange.

''We have developed a frank communication between ourselves and absolute confidence,'' said Collor, who pointed out that they have decided to create ''more ambitious'' projects and to accelerate bilateral economic ties.

When Collor arrived Thursday for the 26-hour visit, Menem said he hoped the common market between the countries would be achieved by 1992.

''This anticipates a free market from Alaska to Tierra del Fuego,'' Menem said, echoing Bush.

Among the agreements signed Friday were projects to trade 10,000 cars in 1991 without tariffs and fruit and dairy products without import or export charges.

Other accords included agreements to cooperate in nuclear and space programs, environmental protection and anti-drug efforts.

#90187u2150 07/06/1990 ~United Press International

SALEM, OR (JULY 6) UPI - Oregon moved closer Friday to becoming the first state to hold a voters referendum on a virtual ban on abortions since the U.S. Supreme Court's Webster decision last year.

A conservative political group presented the state Elections Division a petition of 119,460 signatures calling for a referendum on a measure that would prohibit abortion except in cases of rape, incest or a threat to the life of the mother.

If at least 84,770 of the signatures - representing 10 percent of Oregon's voters - are deemed valid, the proposal will go to referendum Nov. 6.

The Supreme Court's Webster decision on July 3, 1989, gave states more power to pass restrictive abortion laws.

Since then, Pennsylvania has enacted a law banning most abortions after 24 weeks and lawmakers approved abortion bans in Idaho and Louisiana, but governors in both states vetoed the measures.

No state has held a referendum on an abortion ban, although several states face possible November votes on minor restrictions, such as parental notice laws.

Activists on both sides said Oregon is the only state heading toward a referendum on a virtual ban on abortions.

Oregon is also likely to be the first state where voters face two anti-abortion measures at the same time. In addition to the prohibition, another initiative would require doctors to notify at least one parent 48 hours before performing an abortion on a girl under 18.

Jeanette Turk of Oregonians for Choice, a coalition formed to fight both ballot measures, said she expected both to be defeated.

''Oregon has a long pro-choice tradition,'' Turk said.

The existance of two separate measures has split anti-abortion forces in Oregon, with the Oregon Citizens Alliance backing the ban and Right to Life sponsoring the parental notification measure.

#90187u2154 07/06/1990 ~United Press International

(JULY 6) UPI - NATO leaders end their two-day London summit... 17 people die in a chemical plant explosion in Texas... Louisiana's governor vetoes a restrictive abortion bill... And street people mourn the death of homeless advocate Mitch Snyder... U-P-I has these top stories and more, next.

NATO continues to transform itself from a military hawk to a political dove.

The 16 leaders of the Atlantic alliance ended two days of talks in London today by issuing a historic invitation... they asked Soviet President Gorbachev to sit in on an alliance meeting.

The leaders also issued a joint statement titled ''The London Declaration on a Transformed North Atlantic Alliance,'' which further outlines their plan to adapt the organization to the changes in Europe.

In the doctrine, leaders pledged to use nuclear weapons only as a last resort and offered to negotiate troop levels of a united Germany... a critical concession to win Soviet acceptance of German membership in NATO.

The statement also endorsed a greater role for the 35-nation Conference on Security and Co-operation in Europe... and announced an intention to remove 14-hundred nuclear artillery shells from Europe if the Soviets do likewise.

President Bush hailed the new NATO as a ''historic turning point.''

Soviet President Gorbachev told reporters in Moscow that he's happy about the changes and although he has NOT received a formal invitation to attend a future NATO meeting, he says he is ''ready to go.''

#90187u2210 07/06/1990 ~United Press International

(JULY 6) UPI - The Louisiana legislature may launch into a frantic effort this afternoon to over-ride a veto on a bill that could become the most restrictive state abortion law.

Governor Buddy Roemer shot down the measure this morning, making good on a long-standing threat to veto the bill, which passed the legislature last week.

Although Roemer has said he opposes legalized abortion, he maintained he would veto the measure that bans most abortions because it did NOT contain exceptions in the cases of rape and incest.

His move sets in motion a legislative battle to over-ride the bill today... as the assembly is scheduled to adjourn on Monday.

Administration officials say the veto message would be sent to both chambers as quickly as possibly, probably some time this afternoon.

A poll of lawmakers suggests that the over-ride... which requires two-thirds majority approval... may be possible.

New national employment figures gave many economists a pleasant surprise today... but few are jumping for joy.

The Labor Department today reported that the jobless rate dropped one-tenth of a percent in June, to five-point-two percent. That contrasts

with the small jobless INCREASE many economists had expected.

The chief economist for First Albany Bank in New York said the figures show there's NO recession, and the economy is hovering between boom and bust.

But Mitsubishi Bank in New York says employment will remain depressed for a while until orders and production pick up... and following a lengthening of the work week.

Most of the new jobs came from health services. The biggest chunk of jobs lost was through layoffs of temporary census workers.

The teen-age jobless rate... following summer hiring... plunged nation-wide from 15-point-five percent to 14-point-one percent in June.

-30- 2006

#90187u2236 07/06/1990 ~United Press International

(JULY 6) UPI - Fire officials say they still don't know what caused a powerful explosion and fire at a Texas chemical plant last night. It killed 17 workers and injured two others.

Officials say workers at ARCO Chemical Company in Channelview have retrieved 17 bodies from portions of the wreckage that have cooled down from the fire, which was brought under control this morning.

The blast launched a fireball 200 feet into the air and broke windows and knocked loose ceiling tiles in buildings several miles from the plant near Houston. Some nearby residents reported a second, smaller explosion.

The president of ARCO Chemical Americas, J-G Johnson Junior, says that in his 32 years with the company, he canNOT remember an accident of this dimension.

Five of the dead were ARCO employees, 11 worked for a maintenance contractor and one was a truck driver.

The homeless are mourning today the man who for so long championed their cause.

At a Washington, D-C, memorial service, civil rights activist Jesse Jackson told a crowd of hundreds of people... many of them homeless... that Mitch Snyder was like Jesus Christ because he chose to live among and help the poor.

Jackson said Snyder's reputation as an eccentric was well-earned because- in his words- ''people who fight for justice tend to be a little

abnormal. They're carried away.''

Snyder was found hanged yesterday in his third-floor room at the Washington shelter he ran for the homeless, a probable suicide. He founded the shelter in 1984 after a 51-day hunger strike that focused nation-wide attention on the plight of the homeless.

Police say Snyder may have been dead for up to two days when his body was found. A note near his body indicated that Snyder took his life over a failed romantic relationship.

An outdoor funeral service is planned for noon Tuesday outside the shelter with Jackson presiding.

#90187u2245 07/06/1990 ~United Press International

(JULY 6) UPI - A Christian Science couple convicted of manslaughter for failing to get medical help for their son before he died were sentenced in Boston today to 10 years of strict probation.

David and Ginger Twitchell were convicted on Wednesday of involuntary manslaughter for relying solely on prayer to cure their two-year-old son. He died of a bowel obstruction after a five-day illness in 1986.

Suffolk County Superior Court Judge Sandra Hamlin also ordered the Twitchells to seek regular checkups for their other children and immediate medical attention if any of them develop a serious illness.

The judge put the Twitchells under maximum probationary supervision for at least one year, subject to review.

Prosecutors did NOT seek imprisonment in the case. A defense attorney said the Twitchells have already suffered enough by losing their son.

#90187u2257 07/06/1990 ~United Press International

HOUSTON (JULY 6) UPI - Responding to growing public concern about the environment, regulators are stepping up their enforcement of pollution standards in the energy and petrochemical industries, corporate attorneys and consultants said Friday.

''I think companies now are expected to know what the law is and to find out how to comply with it,'' said Carol Dinkins, a partner in a Houston law firm, during a conference on energy, petrochemicals and the environment sponsored by several groups of economists and analysts.

''The government very much expects voluntary compliance. The programs are set up - the Water Act in particular - so that you have a very clear tracking and self-reporting kind of system,'' about corporate management of wastewater, Dinkins said.

''What we see now is the growth of a very strong federal and state criminal enforcement program, and if a company is found to be negligent in its compliance with the Water Act for example, they can be criminally prosecuted under the law,'' she said.

A number of businessmen have been sentenced to jail terms for violating water pollution standards, Dinkins noted, and she predicted that the public can expect more of those convictions.

''The kinds of cases where the government is prosecuting are cases where they look for the highest level of management on the theory that that's going to provide the best kind of deterrents for other companies and their management around the country,'' Dinkins said.

The number of attorneys specializing in environmental law has grown ''from a handful of lawyers in the early '70s to many more than there are practicing labor law right now,'' she said.

George Pilko, co-founder of Pilko & Associates Inc., said more major corporations are beginning to make fundamental changes in the way their senior executives approach environmental issues.

Pilko specializes in assisting industrial and financial institutions in minimizing environmental liabilites and managing environmental risks.

''These changes will likely require three to five years to fully implement '' Pilko said.

One key environmental trend impacting the oil companies is a shift in public opinion polls, which now show most Americans favor protecting the environment regardless of the cost.

Other trends facing industry are increasing stringent air and water pollution regulations and a focus on enforcing those regulations, Pilko said.

''I think it's only a matter of time before a senior executive of one of the major oil companies gets indicted for environmental problems,'' he said.

His firm estimates the cost of soil and groundwater cleanup programs in the United States will cost $150 billion during the next 10 years.

Although a growing number of oil companies are being more proactive in their environmental policies, he said most U.S. energy firms still continue operating in a reactive mood.

''Most oil companies continue to struggle with maintaining compliance with changing environmental regulations,'' Pilko said. ''They are operating in stage one of what we call a reactive mode.

''An increasing number have made the transition to stage two, where they are doing a pretty good job of planning for upcoming regulatory changes. But what continues to amaze me is the very, very few firms here in the United States that are operating in stage three, or a proactive mode, where they are not only remaining in compliance with changing regulations but they are also managing their environmental risks,'' he said.

#90187u2365 07/06/1990 ~United Press International

MANAGUA, NICARAGUA (JULY 7) UPI - A nationwide strike by Sandinista workers grew louder and more physical Friday as pipe-wielding peasants and chanting students joined workers demanding a voice in the country's economic policies.

The five-day-old strike gathered momentum and union leaders estimated more than 85,000 people stayed away from work, although the government insisted the figure was only a fraction of that.

Crowds of protesters gathered at a number of locations and others burned tires and blocked Managua streets in scenes reminiscent of a five-day strike by government employees in May that virtually paralyzed communications and transportation.

Union leaders and government representatives met Friday afternoon at the Central Bank to discuss the strike. The government has rejected collective bargaining and was unwilling to include its economic policies - namely the reprivatization of state-owned industries structured during ten years of Sandinista rule - in any settlement talks.

Outside the bank complex, about 1,000 people joined striking employees in chanting Sandinista slogans and anti-government remarks. A crowd of about 200 also gathered outside the Labor Ministry.

Many of the protesters were university students and peasants trucked in from the countryside to support the Sandinista strikers. Police in riot gear squared off with protesters, who carried steel pipes and homemade baseball bats. There were no immediate reports of injuries, but there was a lot of pushing and shoving.

As Central Bank President Francisco "Panchito" Mayorga arrived for the negotiations, the crowd swarmed his car, pounding on it with fists and makeshift clubs. A sign on the Central Bank fence read, "Panchito, stop killing your people with hunger."

"We have to defend ourselves against the UNO perpetrators," said a man with a three-foot-long metal bar in his hand. UNO is the Spanish acronym for President Violeta Chamorro's coalition party, the National Opposition Union.

Banks, government grocery stores, some hospital services, telephone and postal service, and the customs office at the international airport were among sectors affected by the strike Friday, as well as the government-run farms where the strike began on Monday.

The Sandinista-led National Workers Front, which represents about 400,000 employees of government ministries and state-run industries, is also demanding wage increases, more job security and benefits and a $200 a week minimum wage.

Private industry leaders, fearful that the government is conceding too much to the Sandinistas, called for a ballot initiative to allow the people to choose the country's economic future.

"There is not a single person, a single political party, a single agricultural or business sector that supports the government's current policy of permissiveness and complacency," said Gilberto Cuadra, president of the Superior Council of Private Enterprise.

Cuadra called the Sandinistas "a dangerous force that threatens to destroy the future of the country" by sabotaging investment and foreign aid in an attempt to regain political power lost in February's elections.

#90187u2393 07/06/1990 ~United Press International

MINNEAPOLIS (JULY 8) UPI - MEI Diversified Inc. said Friday it reached an agreement in principle to acquire three companies that operate professional beauty salons and related businesses for about $58 million in cash and the assumption of debt.

Pending completion of a definitive agreement, MEI will own 80 percent of the outstanding stock of Glemby Co. and subsidiaries, based in New York, and Essanelle Salon Co. and Maxim's, both located in Minneapolis.

The remaining 20 percent of the acquiring company will be owned by Regis Corp. and affiliates of Minneapolis, current owners of Essanelle and Maxim's.

The privately owned Regis owns and operates hairstyling and hair care salons throughout the United States and Canada, mainly in shopping malls and department stores.

''The combined companies will have sales of approximately $400 million annually and will operate over 2,000 salons in the United States and Canada,'' said Donald Benson, MEI's president.

The initial financing will come from MEI cash reserves. Refinancing with lending institutions is expected to be arranged in the future, Benson said.

MEI recently sold its candy and snack food division for $58 million cash and presently is a processor and nationwide distributor of nuts and related snack foods.

#90187u2422 07/06/1990 ~United Press International

WASHINGTON (JULY 6) UPI - The National Institutes of Health conducted fatal brain experiments Friday on three monkeys that were the focus of a battle between animal rights acitivists and medical researchers, officials said.

''They are euthanizing the three monkeys today,'' said Bob Schrieber, a spokesman for NIH. ''It's painless.''

The medical experiments on the so-called ''Silver Spring'' monkeys were conducted after animal rights advocates failed twice this week to win court orders barring the procedure.

The Physicians Committee for Responsible Medicine, a leading opponent of the animal tests, charged the Health and Human Services Department with fraud and misconduct for conducting the experiments despite promising not to do so. Health and Human Services oversees the NIH.

''All attempts by the international humane community and over 300 members of Congress to have the primates moved to a sanctuary for rehabilitation have been rejected by animal experimenters,'' said Alex Pacheco, chairman of People for the Ethical Treatment of Animals. ''Their fear of setting a precedent has cost the innocents all hope of happiness.''

NIH officials said the monkeys suffered from injuries sustained in previous tests that were so severe that they should be destroyed. Both sides have said that some of the monkeys were subjected to nerve-severing experiments.

Friday's fatal tests on the three monkeys were conducted at an NIH-funded

laboratory in Covington, La., affiliated with Tulane University, said Shrieber.

According to a statement from William Raub, NIH acting director, scientists planned experiments near the brain surface ''while the monkey is under deep anesthesia just before death.'' The research also included spinal cord studies, said Raub.

''By doing this research, valuable information will be gained which may be useful in treating and rehabilitating persons who have been injured or who have had a stroke,'' said Raub.

The monkeys were at the center of a struggle that began in 1981 when 17 monkeys were seized in a police raid at a Silver Spring, Md., laboratory funded by NIH.

The monkeys were taken to NIH facilities and the Maryland laboratory was later cited for animal abuse and closed.

Since, six monkeys have died and four are at a zoo in San Diego. The remaining seven were transferred in 1986 to the Louisiana facility. Three of those were killed Friday and four are still alive.

#90187u2470 07/06/1990 ~United Press International

(JULY 6) UPI - NATO leaders ended their two-day London summit today by issuing a historic invitation for Soviet President Gorbachev to sit in on a future session. Gorbachev says he welcomes the new closeness in East-West relations.

The president of the European Commission today cautioned the European Parliament about having what he called a ''false'' sense of euphoria about the changes in Eastern Europe. Jacques Delors says eastern economic reform will take years.

Workers at a Texas chemical plant today pulled the bodies of 17 victims from the rubble of a plant site that was devastated by an explosion last night. Officials say many of those who died worked for a maintenance contractor.

Police in San Francisco swept through the city's largest homeless camp today... clearing about 80 people from the square outside of city hall. Mayor Art Agnos... whose office overlooks the plaza... ordered the eviction.

An F-B-I agent testified today it took investigators more than an hour to find the crack pipe that Washington, D-C, Mayor Marion Barry used before

his arrest in January. The agent said the pipe was hidden in an eyeglass case.

Police in Knoxville, Tennessee, say a St. Louis Catholic priest who may have been lost in an inner city neighborhood was shot to death in his rented car today. Father Mario Robert Ross was head of campus ministry at St. Louis University.

A survey shows the number of Americans who have served on a jury has increased 10 percent since 1984, to almost half the adult population. The association of defense trial lawyers which commissioned the survey attributed the increase to more lawsuits and better jury recruitment.

A pregnant cow tried to get in the front door of a hotel today in Richmond Hill, Georgia, while her calf stuck his head in one room to check it out. The wandering bovines had gotten loose from a pasture five miles away. Another pair of cows had also escaped... but apparently didn't care for travelling.

-30- 2166

#90187u2489 07/06/1990 ~United Press International

CHANNELVIEW, TX (JULY 6) UPI - An Occupational Safety and Health Administration official said Friday that employees' work orders will play a vital part in the investigation of an explosion and fire that ripped through an Atlantic Richfield chemical plant, killing 17 people.

''We will be looking at work orders of employees to determine exactly what was being done at the time of the accident,'' said Gerard Scannell, assistant secretary of labor for OSHA.

Scannell also announced during the afternoon news conference that officials plan to begin a study of petrochemical accidents.

''We're not sure if these type of petrochemical accidents are on the rise, but we aim to find out,'' said Scannell.

''A study will begin soon, conducted by the John Gray Institute of Lamar University in Beaumont. At the end of the study, we hope to have a major petrochemical conference to announce the results of that study,'' Scannel said.

A spark from a compressor may have caused the powerful explosion and fire that tore through an Atlantic Richfield chemical plant, causing a huge fireball.

All 17 people killed in the blast had been accounted for by Friday afternoon, although some of the bodies had not been removed from the

wreckage. Two people also were injured in the blast at 11:30 p.m. Thursday at the sprawling complex just east of Houston.

A truck driver who happened to be in the plant at the time of the blast was reported injured.

''We came out and it blowed,'' said Kathryn Cox, a maintenance worker at the complex. ''We started running. It liked to knocked us off that porch. We looked back and it was just fire going up in the air.''

A worker at a nearby plant said a huge fireball formed after the blast.

''I didn't feel any kind of jolt,'' said Mark Durocher. ''It was a big ball of fire. It went a good 200 feet into the air.''

The president of ARCO, J.G. Johnson Jr., said Friday he was ''saddened'' by the explosion.

''We are deeply grieved by last night's tragic accident. There is an overwhelming sadness among all of us who have lost friends and co-workers.''

Workers began removing bodies from the wreckage before noon Friday, but were kept from some areas still hot from the fire. The body of a vacuum truck driver remained in the cab of his vehicle nearly 12 hours after the blast.

Five of the dead were ARCO employees, 11 worked for Austin Industrial Inc. a contractor that performs routine maintenance at the plant, and one was a truck driver for WPI Trucking.

The blast broke windows and knocked loose ceiling tiles in buildings several miles from the plant.

''It shook the house. It shook the pictures off the wall,'' said Ann Spence, who lives about a mile from the ARCO complex. ''I have a decorative wall arrangement over our bed, and it brought things crashing down on our heads.''

The fire that followed the explosion was battled by firefighters from ARCO and the Channel Industry Mutual Aid group until it was brought under control about 4 a.m. Friday.

Plant manager Earl McCaleb called the blast a ''terrible tragedy.'' He was overcome with emotion while briefing reporters about the fatalities and had to be led away.

Families of the victims were secluded in a section of the complex and were

receiving counseling, said ARCO spokesman Jerry Davis.

The blast occurred near a wastewater tank in a utilities unit that treats water taken into the plant so it can be transformed into steam to run various catalytic units at the facility.

Authorities said the explosion may have been triggered when workers tried to start a nearby generator, perhaps creating a fatal spark.

''We are currently investigating the cause of the explosion,'' McCaleb said. ''However, our foremost concern at this time is for the families of our employees and contractors who were killed in the explosion. We are in the process of notifying family members and offering our assistance to them.''

Fire marshals and plant safety employees also were on the scene trying to determine the cause of the explosion.

The plant produces the chemical propane oxide, which is used to make furniture stuffing. The facility was built in 1977 and is undergoing a $500 million expansion but the blast did not occur in the expansion area.

An ARCO spokesman Friday also said the plant is the world's largest producer of the methyl-tertiary-butyl-ether additive used to raise octane and make premium gasoline.

#90187u2604 07/06/1990 ~United Press International

(JULY 6) UPI - Mostly conservative delegates in the Soviet Communist Party Congress did NOT respond warmly to Russian republic President Boris Yeltsin's suggestion today that they revamp the party. In a dramatic address, Yeltsin said the communist party should radically reform and change its name to the Democratic Socialist Party or risk angering the nation and a possible violent uprising.

The Hezbollah Party in Lebanon is calling for the formation of a higher Islamic authority to investigate the recent deaths of hundreds of pilgrims in the holy city of Mecca. The Lebanese group today rejected official Saudi Arabian statements that 14-hundred-26 pilgrims died in an apparent stampede en route to a holy shrine. A spiritual leader said the Saudi account is ''NOT convincing.''

A government report today said violent deaths claim the lives of more children than all diseases combined. Accidents, murders, and suicides accounted for almost two-thirds of all fatalities among people aged one through 19. The U-S Centers for Disease Control issued those figures from 1986, the latest year for which data is available. The most likely way for

an American youngster to die was in a motor vehicle accident.

Officials say the hard work of firefighters is the only thing that kept the eastern Alaska town of Tok standing after a wildfire raged at its doorstep. Hundreds of people fled the town last night. A federal official in Anchorage says firefighters bulldozed a line to steer flames around the edge of Tok. The fire is the biggest in the state and still threatens the town.

Officials have ruled out slightly misaligned fuel tanks as the cause of leaks that have grounded NASA's shuttle fleet. The mounting of external tanks on both the Columbia and Atlantis caused the shuttles to lean slightly to one side... but NASA officials say that would NOT cause leaks. Officials hope weekend tests will turn up the problem.

(JULY 7) UPI - Sports Digest:

BASEBALL

"Spahn and Sain and two days of rain" - perfect reasons to visit the National Baseball Hall of Fame and Museum. An exhibit, titled "Salute to the Boston Braves, 1876-1952," features the last home plate from Braves Field, Bob Elliot's 1947 MVP Award and Braves' uniforms and caps from four decades.

Also included are blown-up photographs spanning the years from Harry and George Wright to Warren Spahn and Johnny Sain, who provided the one-two pitching punch that carried the team into the 1948 World Series and prompted fans to pray for rain between games the two pitchers started.

BASKETBALL

The Minnesota Timberwolves announced that the club will not exercise the option year of 1990-91 on forward Scott Roth's contract. Roth, a two-year NBA veteran, becomes an unrestricted free agent. The Timberwolves also announced they have made a qualifying offer to forward Donald Royal for the 1990-91 season. Royal now becomes a restricted free agent and the Timberwolves have the right of first refusal on any offers made to Royal by any of the other 26 NBA teams.

FOOTBALL

Buffalo Bills owner Ralph Wilson says Erie County's decision to postpone a stadium study until next year is fine with him, as long as his team plays in a domed stadium after its Rich Stadium lease expires. The NFL extends

its season by a week this year, and Wilson told The Buffalo News he is concerned it could get longer in the future.

HOCKEY

The Philadelphia Flyers announced that left wing Murray Craven and goaltender Pete Peeters have both undergone surgery this week. Craven underwent an arthroscopic operation for a shoulder problem, while Peeters had surgery for chronic tendinitis in his right elbow.

The St. Louis Blues have signed free agent defenseman Scott Stevens of the Washington Capitals to an offer sheet worth $3 million over three years, Blues officials said. The Capitals have until next Thursday to either match the offer or lose Stevens.

LITTLE LEAGUE

The worldwide head of Little League baseball said he recently organized the first games between China, Taiwan, and Hong Kong teams on the Chinese mainland to promote the sport and better international relations. The friendly matches, held in the city of Canton, were the first for Little League baseball.

OLYMPIC

Jesse Owens, Ray Ewry, Hazel Wightman, Eddie Eagan, and Helene Madison, five of the United States' greatest Olympians from the first half of this century, are receiving renewed recognition. The U.S. Postal Service is issuing commemorative stamps featuring the athletes. The stamps mark the first time that individual Olympians have been so honored.

SHOW JUMPING

Katie Monahan Prudent rode Make My Day to a razor-edge victory in the Grand Prix event at the 14th annual I Love New York Horse Show in Lake Placid, N.Y. Prudent, of Middleburg, Va., bested a 35-horse field by narrowly winning the 14-jump, 509-yard course without penalty in 34.549 seconds over George Lindemann, of Greenwich, Ct., who came in .07 seconds slower.

TRACK

Margaret Groos, a two-time winner of the Pittsburgh Marathon, said she will no longer compete in the event while J. Larry Kuzmanko remains its president. Groos did not compete in this year's event, and she said she will not return to Pittsburgh because of "a very condescending and very unprofessional" memo she recevied from Kuzmanko in February. In the memo Kuzmanko jokingly suggested that a condition of her entry in this year's

marathon would be "to allow herself to be filmed cleaning J. Larry Kuzmanko's apartment."

#90187u2860 07/06/1990 ~United Press International

SAN SALVADOR, EL SALVADOR (JULY 6) UPI - Authorities arrested a lieutenant colonel Friday in connection with covering up evidence in the murder last November of six Jesuit priests, a military source said. "The colonel (Carlos Camilo Hernandez) is under arrest in the National Guard headquarters," a spokesman for the Armed Forces Press Committee said.

A warrant for the "immediate" detention of Hernandez, 37, was issued June 26 by the judge hearing the case, but a top military commander said the Defense Ministry did not receive an official arrest request until Thursday.

Hernandez is being investigated for allegedly concealing evidence in connection with the Nov. 16 killing of the Jesuit priests, their housekeeper and her teenage daughter. No charges were filed against him.

Murder charges have been filed against Col. Alfredo Benavides, three lieutenants, and five soldiers. Benavides was director of the armed forces military academy in San Salvador during a massive rebel offensive last November. Prosecuters have charged that the mission to kill the priests was launched from the military school, under Benavides' orders.

The arrest order was issued after Hernandez, who was second-in-command at the school when the Jesuits were killed, contradicted himself in testimony about the disappearance of logbooks from the military school's archives in January, about the time Benavides was arrested.

During an investigation into the whereabouts of the books, two other officers, including a lieutenant charged in the murders, testified Hernandez gave an order to burn the books, an accusation Hernandez has denied. A court official told United Press International that prosecutors hoped to pressure Hernandez into providing new evidence once under arrest.

#90187u2906 07/06/1990 ~United Press International

(JULY 6) UPI - A Food and Drug Administration spokesman says consumers should be more confident in the quality of seafood now that the agency plans to expand voluntary fish and shellfish inspections. The voluntary program falls short of congressional calls for tough, mandatory seafood inspections. Consumer groups say the measure fails to acknowledge the public health risk of uninspected seafood.

NASA officials are NOT commenting on a report that they were offered a chance to test the mirrors of the Hubble Space Telescope at Air Force facilities, but turned the offer down. NASA is said to be awaiting the results of a special review board assigned to find out what went wrong with the telescope before offering any comment.

A possible breakthrough in treatments for heart attacks. Researchers in South San Francisco, California, say studies suggest doctors can cut damage to the heart by as much as 50 percent by injecting a natural chemical immediately after a patient suffers a heart attack. The team... of Jefferson Medical College and Genentech... says the protein counteracts the body's release of damaging toxins.

Exxon has completed a nine-month, 30-Million-dollar rehabilitation of the Valdez oil tanker, finishing the process by renaming the ship the Exxon Mediterranean. The Exxon Valdez was responsible for the worst oil spill in U-S history last year off coast of the Alaskan. The ship is set to return to duty next month, but will operate only in foreign waters.

#90187u3086 07/06/1990 ~United Press International

(JULY 6) UPI - It was another tough day in court for Washington, D-C, Mayor Marion Barry. Prosecution witness Lydia Pearson testified that Barry

bought crack cocaine from her about 25 times during the summer of 1988. She said Barry would call to arrange a deal and then come to her home in his limousine. U-S attorneys backed up the testimony with phone records showing calls placed by Barry to Pearson. She also said she delivered drugs to Barry at government offices, and that he got her a job with the city's Department of Public Housing.

Fire officials say winds helped divert a huge, 34-thousand-acre wildfire and save the Alaskan town of Tok. Some of the 12-hundred residents evacuated last night began returning to their homes today after firefighters managed to steer flames away from the community. Officials caution, however, that the town is NOT in the clear yet and residents have been ordered to stand by to evacuate again.

A pair of San Francisco Lutheran congregations say they will stand by their decisions to ordain homosexual ministers. The pastor at one of the churchs, Reverend James DeLange, says he intends to uphold his congregation's desire to have gay religious leaders... even if it winds up costing the church its membership in the Evangelical Lutheran Church of America. A panel of Lutheran leaders are in the Bay Area this weekend to decide if the issue merits censure.

President Bush is concentrating on international affairs. After wrapping up the NATO summit in London today, he travels to Houston tomorrow for talks with Japanese Prime Minister Kaifu. The two will attend the meeting of the seven major industrialized nations in Houston beginning Monday. Bush and Kaifu are arriving early to exchange views on aid to the Soviet Union and China.

-30- 1964

#90187u3099 07/06/1990 ~United Press International

(JULY 6) UPI - A California woman today received the maximum prison term... 27 years behind bars... for shooting and killing a man she accused of supplying drugs to her 17-year-old daughter. Belita Fox testified at her Lancaster trial that she was drunk when she went to Kevin Furman's home with a gun that she did NOT know was loaded. Prosecutors say Furman was shot in his bed last August.

Seattle is jammed with conventioneers this weekend, but NO one is expecting conventional shenanigans. 45-thousand people are in the city for the Alcoholics Anonymous-Al-Anon International Convention. The convention is the largest in the city's history, and the group has booked the Seattle Kingdome for three events, pouring an estimated 45-Million dollars into the local economy- all without a bar tab.

The State Department has expressed concern to the government of Kenya over its recent crackdown on free speech. Two former politicians in Kenya were

arrested earlier this week after pressing publicly for democratic reforms, and other arrests followed. The Kenyan government answered the U-S missive today by claiming the arrests were necessary for the security of the state.

The wife of Liberian rebel leader Charles Taylor says her husband is a ''die-hard capitalist'' who deserves U-S help in ousting President Samuel Doe. Tupee Taylor says her husband has NOT specifically said whether he wants to be the country's next leader, adding that the decision is up to Liberian people. Her comments come as rebels close in on Doe's Atlantic beach fortress.

-30- 1721

#90187u3246 07/06/1990 ~United Press International

(JULY 6) UPI - NATO summit ends in London... Albania's communist leader promises democratic reforms... Louisiana governor vetos nation's most restrictive abortion law... And Liberian rebels close in on President Doe. The top world and national news, next from U-P-I:

Bsh Prime Minister Thatcher, the leader of the hard-line forces in the NATO alliance, gave a glowing review today to the two-day summit just completed in London.

She said at a closing news conference that the alliance had found the perfect balance between caution and optimism in responding to the dramatic changes in eastern Europe.

NATO today pledged to use nuclear weapons only as a last resort- but implicit in that pledge was nuclear weapons remaining stationed in Europe, which pleased Thatcher.

The statements coming out of the two-day session were clearly meant to reassure the East Bloc's military worries and bolster the reform agenda of Soviet President Gorbachev.

President Bush addressed Gorbachev in particular at the news conference. He called NATO's new stance ''defensive and NOT threatening'' and called on Gorbachev to convince hard-liners in the Kremlin of NATO's peaceful aims.

NATO made its new stance most explicit by inviting Gorbachev to address a future meeting of the alliance. Thatcher said Gorbachev made NO immediate response to the invitation.

#90187u3282 07/06/1990 ~United Press International

(JULY 6) UPI - Renegade Russian Communist leader Boris Yeltsin issued

what amounts to fighting words today to the mostly conservative delegates assembled for 28th Soviet Communist Party Congress.

In a dramatic speech, Yeltsin told party members to revamp the organization or risk a possibly violent uprising that could result in the seizure of the party's vast property holdings and prosecution of its top bosses.

Yeltsin... elected two months ago to head the Russian Republic... delivered his address one day after hard-liners accused reformist Soviet leaders of capitulating to the West and pampering the Baltic nationalists.

He said the rise of conservatives may cause a mass desertion of disenchanted party members, an exodus he warned could turn into a popular revolt.

Yeltsin says the party can regain public trust only if it pursues radical reforms in the framework of a multi-party system.

He also suggested the organization change its name to the Democratic Socalist Party and ban party cells from the K-G-B and the workplace.

His words were met with tepid applause... and many military officers refused to applaud at all.

In west Africa, rebel forces are closing in on the heavily fortified mansion of Liberian President Samuel Doe.

Guerrillas seized control of the port in the capital city of Monrovia today, and rebel ships fought a sea battle off the coast, near the Israeli-built mansion where Doe has taken refuge with the remaining members of his presidential guard.

Government troops NOT inside the mansion were reported to be disorganized and demoralized. The rebel National Patriotic Front chided the loyalists with a message of... ''DoN'T die for Doe.''

The United States- which gave more aid to Doe than to any other black African leader during the '80's- has offered to evacuate the president if he so chooses. But today, a heavily armed Marine guard escorted a water tanker into the mansion.

Rebels have cut off water and electricity to the capital. Citizens who have NOT fled the city are said to be in dire need of food and water.

#90187u3290 07/06/1990 ~United Press International

(JULY 6) UPI - A special NASA review board is trying to determine just what caused the mirror foul-up on the Hubble Space Telescope. And NASA officials are refusing to comment on the affair until the board presents its findings.

But pressure increased on NASA today as a published report said the space agency had declined Air Force offers to test the telescope's mirrors.

The mirrors on board the one-point-five-BILLION-dollar Hubble are NOT correct, making the telescope near-sighted. The problem supposedly could have been detected through simple testing before launch.

Today's report amplifies stories printed last week saying the telescope's problems were at least in part due to divisions between NASA and the military. NASA had reportedly decided against using military equipment to test the mirrors.

Today's report specified that the Air Force offered to lend its equipment to NASA to test the mirrors early on in the planning stages, 10 years ago. But NASA declined the offer- supposedly because the Air Force wanted all personnel taking part in the tests to obtain top-secret military clearance.

The special review board met for the second time today, concentrating on information from NASA's Marshall Space Flight Center in Alabama and on the maker of the mirrors, Connecticut's Hughes Danbury Optical Systems Incorporated.

But NO conclusions have been announced, and the board has NO set deadline to make its report.

-30- 1612

#90187u3303 07/06/1990 ~United Press International

(JULY 6) UPI - A drug dealer who worked the streets of Washington, D-C, testified today that Mayor Marion Barry bought crack cocaine from her 25 times during a three-month period in 1988... twice at city government offices.

Lydia Pearson told a Washington jury that Barry would telephone her to set up the drug buys.

She said the mayor frequently purchased 30-dollar bags of crack from her himself while his bodyguards remained in the limousine.

Her testimony backed up earlier statements from an F-B-I forensics expert.

Thomas Lynch testified today that Barry had a ''tremendous amount'' of cocaine in his urine January 18th, the night he was arrested in the F-B-I

sting operation.

He said the urine sample also showed traces of marijuana use.

Barry's attorney... R. Kenneth Mundy... has maintained the government's leading witness... model Rasheeda Moore coaxed Barry to sample crack by plying him with cognac.

But Lynch testified Barry's blood alcohol content was well below the level considered legally drunk.

The ship responsible for causing the largest oil spill in U-S history is ready to sail again.

The refurbished Exxon Valdez has been re-christened the Exxon Mediterranean and will begin operating again next month in foreign waters.

A top Exxon official in San Diego, California, says the 987-foot tanker has been completely restored after a nine-month, 30-Million-dollar repair job that replaced one-third of the ship's hull. The hull ripped open when the ship ran aground in Alaskan waters last year, spilling 11-Million gallons of crude oil.

President of Exxon Shipping, Gus Elmer, says the ship was reassigned to the Mediterranean partly because the company is re-evaluating its West Coast fleet amid continued declines in Alaskan oil fields.

He says engineers will ''check everything'' before giving the ship approval to sail.

Elmer also expressed optimism that with the ship's return to service the Valdez disaster would be put behind Exxon.

-30- 2182

#90187u3387 07/06/1990 ~United Press International

(JULY 6) UPI - NATO began the process of reflecting the sweeping changes in Europe today by issuing the so-called ''London Declaration of a Transformed North Atlantic Alliance.'' The document calls for use of nuclear weapons as a ''last resort'' and offers to negotiate troop levels of a unified Germany.

Pro-abortion forces are hailing Louisiana Governor Buddy Roemer's veto today of what would have been America's most restrictiveanti-abortion legislation. The Louisiana House is expected to try to over-ride the veto tomorrow.

Government attorneys appear to have scored a direct hit against Washington

D-C, Mayor Marion Barry. At Barry's drug and perjury trial today, a drug dealer admitted that she sold Barry cocaine 25 times in the summer of 1988.

Albania's hardline communist government responded to massive street protests today by promising democratic reforms. Hundreds of Albanians have sought refuge in foreign embassies since Monday, while thousands have rallied for reform.

Bulgaria's official news agency announced that President Peter Mladenov stepped down today, three months after he assumed power. His resignation came about because of inflammatory remarks he made at a protest rally seven months ago.

-30- 1396

#90187u3415 07/06/1990 ~United Press International

(JULY 6) UPI - NASA officials refuse to confirm or deny a report that the space agency refused an Air Force offer 10 years ago to use a military facility to test the Hubble Space telescope's two main mirrors. A special review board is looking into why the one-point-five-BILLION-dollar eye in the sky is near-sighted.

The ship responsible for the world's largest oil spill in Alaska last year... the Exxon Valdez... is slated to go back to sea next month. However, the repaired tanker will begin duty with a new name... the Exxon Mediterranean... and will sail only foreign waters.

Russian Republic President Boris Yeltsin warned his comrades at the 28th Communist Party Congress that they had better take note of the calls for reform in the Soviet Union. Otherwise, he says the Communist Party will face the scorn of the Soviet people.

The Environmental Protection Agency and the city of El Paso, Texas, have reached agreement on a fine the city will pay for its failure to pre-treat industrial waste. Although the E-P-A originally wanted two-point-three-Million dollars, it agreed to accept 395-thousand dollars for the city's malfeasance.

Officials in Dallas have canceled tomorrow's performance by the rap group 2 Live Crew. The city's fire department pulled the plug on the scheduled rap show... saying operators at the concert hall failed to acquire the correct type of permit to operate as a public club.

-30- 1592

#90187u3522 07/06/1990 ~United Press International

(JULY 6) UPI - A major battle over abortion is being fought in Louisiana. Earlier today, Governor Buddy Roemer vetoed legislation that would have

banned nearly all abortions in the state because the law did NOT contain exceptions for cases of rape or incest. However, the Louisiana House this evening over-rode the veto. The issue now moves to the state's upper house. NO Louisiana governor in modern times has suffered a veto over-ride.

Researchers today offered new hope for heart attack victims. A joint effort by Philadelphia's Jefferson Medical College and South San Francisco's Genetech company indicates injections of naturally occurring chemicals in heart attack suffering lab rats can cut in half the damage sustained by the heart muscle. The research team says the chemical... which is injected immediately after the attack... neutralizes the release of damaging toxins which follows an attack.

The Indian government today O-K'd regulations expanding the powers given to security forces in strife-torn Kashmir state. Under the new rules, central government forces will be able to employ deadly force to help curb a rising Moslem separatist movement.

The nationwide strike is worsening in Nicaragua. Peasants and students joined workers in Sandinista demonstrations in the capital of Managua today, decrying the economic policies of the new UNO government. The government has rejected collective bargaining and will NOT discuss its policies in settlement talks. Union leaders say 85-thousand people stayed off the job today.

-30- 1716

#90187u3539 07/06/1990 ~United Press International

(JULY 6) UPI - Bulgaria's President Peter Mladenov resigned today following a controversy over a seven-month-old videotape in which he told a protest rally that the government should- quote- ''let the tanks come.'' The resignation came at the urging of students staging a 25-day-old sit-in at Sofia University. The students threatened to encourage a general strike next week if Mladenov did NOT step down today.

N-Double-A-C-P Executive Director Benjamin Hooks plans a major push for the Civil Rights Restoration Act at the group's annual convention in Los Angeles next week. Hooks says the act is designed to combat recent Supreme Court rulings trimming civil rights. He adds that the battle for passage will also test the commitment of President Bush to racial equality.

Key players of two Florida-based diet pill companies are facing charges of fraud for making false claims about weight-loss products. Sheriff's deputies in Tampa arrested three people following a raid earlier today on Health Care Products Incorporated and are still looking for two executives from Overeaters, Incorporated. Sheriff Walter Heinrich says fraudulent ad campaigns waged by both companies have netted them an estimated at least 30-Million dollars in profits this year.

Hungary has begrudgingly approved a new Ford spare parts plant. The government had pushed for Ford to build an auto assembly line to turn out 100-thousand cars a year for Hungary. But when Ford declined saying the nation had to start on a smaller scale, the deal was accepted. Ford will put at least 60-Million dollars into the plant, employing 200 Hungarians. But Hungary's car shortage will continue.

-30- 1840

#90188d8140 07/07/1990 ~French/German News Agency

BARI (JULY 7) - Roberto Baggio and Salvatore Schillaci restored some of World Cup host Italy's dented pride here Saturday with a 2-1 win over England in the match for third place in the tournament.

All the goals came in the last 20 minutes of a fast, entertaining match. Baggio's followed a beginner's mistake by veteran England keeper Peter Shilton, and Schillaci's came from a doubtful penalty.

The goal made Schillaci top tournament scorer so far with six goals. England's goal by David Platt was a classic head-in off a cross from the left.

#90188p2469 07/07/1990 ~PR Newswire

NEW YORK (JULY 9) PR NEWSWIRE - Capital InterAmerica Bancorp Inc., through its subsidiary, New York Capital Bank, N.A., has agreed to assume all of the deposits and acquire certain assets of Capital National Bank, Bronx, N.Y., from the Federal Deposit Insurance Corporation in an insured deposit transfer.

In making the announcement, Victor J. Vargas, chairman and chief executive officer of Capital InterAmerica, reported that the deposits of Capital National Bank, as of Feb. 28, 1990, totaled approximately $140 million. Vargas, who is also president of Consoreio Financiero Cordillera and of Banco Barinas, C.A., two major Venezuelan financial institutions, also announced the appointment of Frank Mason as president and chief executive officer of New York Capital Bank. Mason was previously an officer of Chase Manhattan Bank with extensive Latin American experience. Capital National is headquartered in the Bronx and maintains branches in Brooklyn, Queens and Manhattan.

Vargas said that Capital National customers are being informed about the purchase and that all Capital National offices will open on Monday, July 9 as New York Capital Bank offices. "We will have representatives at each office to assure that our customers receive convenient, competitive and high quality service and to answer questions."

With this transaction, New York Capital Bank will assume all insured customer deposits in all Capital National offices. Assets to be purchased include cash, short-term investments and safe deposit business. Capital InterAmerica is a newly formed bank holding company organized by Vargas and a group of Venezuelan investors.

#90188u0164 07/07/1990 ~United Press International
(JULY 7) UPI - Louisiana lawmakers are hunkering down for what may be a brutal battle over abortion. Friday afternoon, Governor Buddy Roemer vetoed legislation that would prohibit nearly all abortions in the state. But legislators in the state House later voted 73-31 to over-ride the veto. The issue now goes to the state Senate which is meeting tonight.

The winds of reform may be sweeping through Europe's last remaining hardline communist nation. Several days of highly publicized attempts by Albanian citizens to flee the Balkan state... and a large protest by pro-democracy forces Friday... prompted the conservative leadership to promise democratic changes.

South America's two biggest countries agreed Friday to take steps toward a common market. Under terms agreed to by the presidents of Brazil and Argentina, the nations will phase out all tariffs between them within five years. The Argentine foreign minister says the pact's immediate impact will be a 550-Million-dollar increase in annual business between the two nations.

A Salvadoran military source said Friday that authorities have arrested a

lieutenant colonel for concealing evidence in last November's massacre of six Jesuit priests. NO charges have been filed against the officer, who is accused of ordering the destruction of logbooks which allegedly contained information regarding the politically inspired murders.

-30- 1563

#90188u0183 07/07/1990 ~United Press International

(JULY 7) UPI - The Secret Service says authorities arrested an intruder for trespassing on the grounds of former President Reagan's Bel Air retirement home earlier this week. 33-year-old Gregory Gordon was nabbed on the fourth of July and charged with the federal crime of endangering a former president. Gordon, who is unemployed, was ordered held without bail. Nancy Reagan apparently caught a glimpse of the man but its NOT know if he actually entered the house.

An official at the NON-profit AmeriCares Foundation said Friday he's confident the group will receive the 150-thousand dollars it needs to airlift a third shipment of relief supplies to earthquake-affected parts of Iran. Doyt Conn says his optimism is rooted in the positive response corporations and the public have shown in response to the disaster.

#90188u0358 07/07/1990 ~United Press International

(JULY 7) UPI - With the Decade of the Rat suddenly over, the St. Louis Cardinals turned the calender back a generation looking to relive the Red Era.

Manager Whitey Herzog, the "White Rat" who led the Cardinals to three National League pennants and a World Series victory in the 1980s, announced his retirement Friday and the Cardinals called on Hall of Famer "Red" Schoendienst, who managed the team to two pennants and a world series victory in the 1960s, to bring them back to life.

So far, so good. The Cardinals responded to the Red touch and Schoendienst, who juggled his pitchers masterfully during his heyday, made all the right moves as John Tudor combined with three relievers on a four-hitter and St. Louis rolled to a 5-3 victory over the San Diego Padres.

"We just have to go out and play like we know how to play," said Schoendienst. "I thought we did well tonight. I think all the players liked Whitey. Whitey was always fair with them and they were fair with him. We've got a long season to go yet. I hope to see us play good ball, win and be competitive."

Tudor, 7-3, went six innings, allowing three hits and two runs, walking three and striking out four. Lee Smith pitched 1 1-3 innings for his 11th save.

"It's tough for all of us," said Tudor. "I don't think it's anything we expected. I guess everything just weighed on him and he made the decision that it was time to get out. We just haven't done it (the job) on the field. We have to put it behind us and try to win some games."

Dennis Rasmussen, 7-5, took the loss, giving up five runs - four earned - in 6 1-3 innings. The Cardinals were 33-47, 15 games behind the first-place Pittsburgh Pirates, and had lost 8-of-9 games before Herzog retired.

"I just can't believe that we have players as a team playing as bad as we've played," Herzog said. "It's just really been bad. We have made so many bad plays, we really haven't played as well as we can play defensively or fundamentally. I think it's a reflection on me."

The Cardinals did not play like losers Friday. Trailing 2-1 in the sixth, St. Louis scored twice to take a 3-2 lead. With one out, Willie McGee singled and took third on Pedro Guerrero's single. McGee scored when center fielder Joe Carter bobbled Guerrero's ball for an error, with Guerrero taking second. Guerrero went to third on an infield single by Todd Zeile and scored the go-ahead run on Terry Pendleton's groundout.

The Cardinals added two runs in the seventh on an RBI double by Ozzie Smith and a sacrifice fly by Guerrero. The Cardinals had taken a 1-0 lead in the first on Guerrero's RBI single.

The Padres tied it in the third on catcher Mark Parent's one-out home run,

his second of the season. San Diego took a 2-1 lead in the fifth on a leadoff home run by Garry Templeton, his seventh homer of the season. The Padres drew to 5-3 in the seventh on a sacrifice fly by Bip Roberts.

-- AROUND THE NL --

Elsewhere in the NL, Montreal edged Houston 3-2, Cincinnati rolled over Philadelphia 4-1, New York outslugged Atlanta 10-7, Pittsburgh beat Los Angeles 6-3, and Chicago topped San Francisco 5-2.

Expos 3, Astros 2

At Montreal, pinch-hitter Jerry Goff and Andres Galarraga singled home runs in the eighth to extend the Astros' losing streak to six games. Houston has lost 20 of its last 21 games on the road. Bill Sampen, 7-1, pitched 1 1-3 innings in relief for the victory. Juan Agosto, 4-3, took the loss.

Reds 4, Phillies 1

At Philadelphia, Barry Larkin, Billy Hatcher and Hal Morris homered to hand Philadelphia its third straight loss. Cincinnati starter Danny Jackson, 3-2, improved his career record against Philadelphia to 5-2 and Randy Myers notched his 17th save. Larkin hit his fourth homer of the year off Phillies starter Jose DeJesus, 0-2.

Mets 10, Braves 7

At Atlanta, Kevin Elster and Dave Magadan each drove in two runs during a six-run eighth inning and Mackey Sasser contributed four RBI to lift New York to its fifth straight win and 16th in its last 17 games. Rookie Steve Avery, 1-3, allowed five runs with two outs in the Mets' big inning. David Cone, 5-4, worked 7 1-3 innings and fanned 10.

Pirates 6, Dodgers 2

At Los Angeles, John Smiley, 4-3, pitched a six-hitter over seven innings and the Pirates capitalized on four Los Angeles miscues. Mike Morgan, 7-7, who lost his third straight game, balked in one run and wild-pitched a runner from first to third to set up another.

Cubs 5, Giants 2

At San Francisco, Luis Salazar drove in four runs - three coming on a wind-blown homer - and rookie Shawn Boskie, 3-4, allowed one run over 6 1-3 innings. Bill Long retired the final batter in the ninth to earn his second save. Giants' starter Scott Garrelts, 5-7, took the loss after allowing four runs over five innings.

BELGRADE, YUGOSLAVIA (JULY 7) UPI - Serbia's communist government said the situation was under control in rebellious Kosovo province Saturday despite a strike by hundreds of workers prompted by the continued police occupation of offices of Albanian-language media in the province.

The government of Serbia - the largest of Yugoslavia's six republics - dissolved all of Kosovo's governmental machinery and assumed control of the overwhelmlingly ethnic Albanian province on Thursday.

The move was justified under a law aimed at protecting the "territorial integrity" of Serbia and came four days after 114 ethnic Albanian lawmakers declared Kosovo an independent republic.

Officials said police occupied offices of Albanian-language media for a second day Friday. Although the action triggered a strike by hundreds of workers, the situation in the state was otherwise normal, they said.

About 1.7 million ethnic Albanians and 200,000 Serbs live in Kosovo. The majority charges it has been deprived of political and human rights by the republic's communist government, while the Serbs say ethnic Albanians want to secede from Yugoslavia and merge with neighboring Marxist Albania.

The province has witnessed periodic anti-Serbian unrest for the past decade and efforts to resolve the situation have long been deadlocked. More than 30 ethnic Albanians have been killed by security forces this year and about 300 people, including Serbian police, have been injured.

Kosovo is cherished by Yugoslavia's 8.5 million Serbs as the birthplace of their culture, history, and orthodox religion.

"It is calm in Kosovo and there are no incidents," Serbian Interior Minister Radmilo Bogdanovic told state-run Belgrade radio. But he indicated that Serbian authorities were having trouble reactivating government-owned broadcast and print media in the Kosovo capital of Pristina, 200 miles south of Belgrade, the managements of which were replaced in Thursday's takeover.

"We still have to consolidate the situation in the Pristina radio and television and in the Rilindja newspaper," Bogdonovic said.

The radio reported that about 300 ethnic Albanian journalists and other broadcast and newspaper employees walked off their jobs after punching in for work. "We shall return to work only after the police have left the building," a leader of the radio and television workers told reporters in

Kosovo, according to the radio.

Special Serbian para-military police units took over the headquarters of Pristina radio and television on Thursday afternoon, and all Albanian-language broadcasts were suspended for more than four hours. Broadcasts resumed only with music and Serbian-language news bulletins.

Jusuf Buxhiovi, the secretary of the Kosovo Democratic Alliance, the largest of the province's anti-communist ethnic Albanian groups, said he, the organization"s president, author Ibrahim Rugova, and two other members were taken to a Pristina police station for interrogation Thursday evening.

"We spent some three hours at the police for informative talks. The police behaved very correctly," Buxhiovi told reporters outside the Kosovo Writers Union, which was sealed off by police Thursday.

"The Serbian decision is illegal and anti-constitutional," Buxhiovi said. "The situation in Kosovo now is worse than a state of emergency. This situation is untenable for Yugoslavia and for Europe." Buxhiovi said his group planned to maintain daily contacts with reporters if "we are not arrested."

#90188u0379 07/07/1990 ~United Press International

(JULY 7) UPI - It is the best and worst of times for Andy Hawkins. After throwing a no-hitter in a losing cause against the Chicago White Sox in his last start, Hawkins again performed spectacularly for the New York Yankees Friday afternoon - pitching 11 2-3 shutout innings - only to drop a 2-0 12-inning decision to the Minnesota Twins in the first game of a twi-night double header.

It was the longest outing by any major league starting pitcher this season. In the two starts, Hawkins has allowed only six hits over 19 2-3 innings, with nothing to show for his efforts except two defeats. "I think right now I'm as good as I can get," Hawkins said. Unfortunately, his Yankee companions can't make such claims.

The so-called "Bronx Bombers" have failed to score in 24 consecutive innings for Hawkins dating to June 26. Nevertheless, hard-luck Hawkins appears undaunted.

"The no-hitter did have a positive effect on my confidence, it had to," said Hawkins. "Frankly in the last three games I've had more movement on the ball so that when I throw one down the plate they don't necessarily bomb it. I've had command and location and I feel great, in the groove like around the All Star game last year when I won eight of ten."

Hawkins, 1-6, slung 145 pitches over 11 2-3 shutout innings before running out of gas and giving up RBI singles to Brian Harper and Gene Larkin. In the second game, Dave Lapoint needed to go only five innings to earn a rare Yankees win, downing the Twins 5-3.

"If there was any way I could transfer my win to Hawkins I'd do it," said LaPoint. "He pitched his two best games of the year and I just got a lucky win. It has to turn around for him." LaPoint, 5-6, gave up five hits and three runs while walking three and striking out four. Dave Righetti pitched the ninth inning for his 17th save.

Yankee Manager Stump Merrill chose to focus on the on the win. "To bounce back after losing a tough first one, you've got to give them credit," said Merrill. "It wasn't pretty but we won and at this point any win is great. It was the first time in a while we've gotten a win from a starter."

Maybe so. But as far as a win from a starter is concerned, Andy Hawkins couldn't try much harder.

-- AROUND THE AL --

Elsewhere in the American League, Detroit blanked Kansas City, 4-2; Cleveland defeated Oakland 6-1 in the first game of a doubleheader and Oakland demolished Cleveland 12-1 in the nightcap; Toronto nipped Seattle 1-0; Chicago took Baltimore, 4-2; Texas roped Boston 4-0; and California beat Milwaukee 9-8.

Tigers 4, Royals 0

At Detroit, Jack Morris pitched a one-hitter - giving up only a first-inning single - and faced the minimum 27 batters while Cecil Fielder hit his 28th home run plus an RBI double. Morris, 8-9, gave up a ground single to Kurt Stillwell, then went on to retire the next 24 batters he faced.

Cleveland 6, Oakland 1 (1st game)
Oakland 12, Cleveland 1 (2nd game)

At Cleveland, Greg Swindell, 4-5, pitched a five-hitter to pace the Indians in the first game. Scott Sanderson, 9-5, gave up all six runs in the second innings to take the loss.

Rickey Henderson and Mark McGwire each hit two of Oakland's club-record seven homers to lift the Athletics to a second-game victory. A's starter Mike Moore, 7-7, gave up one run and four hits in seven innings for the win. Sergio Valdez, 2-5, took the loss.

Blue Jays 1, Mariners 0

At Toronto, David Wells and Tom Henke pitched a combined seven-hitter and John Olerud belted a home run to help shut down Seattle. Wells, 6-2, struck out seven and walked none and Henke pitched the ninth for his 16th save. Brian Holman fell to 8-7.

White Sox 4, Orioles 2

At Chicago, Lance Johnson hit a two-run triple and Melido Perez ended a personal four-game losing streak, moving Chicago back into first place in the AL West by .007 percentage points. Perez, 7-7, worked seven innings before Bobby Thigpen pitched the ninth for his major league-leading 27th save. Pete Harnisch, 7-5, suffered the loss.

Rangers 4, Red Sox 0

At Texas, Kevin Brown blanked Boston on seven hits and Rafael Palmiero drove in two runs with a double to help Texas. Brown, 10-4, walked three and struck out one. Wes Gardner, 2-5, gave up the first three Texas runs over 5 1-3 innings.

Angels 9, Brewers 8, 16 innings

At Milwaukee, Dante Bichette singled home Dave Winfield with one out in the top of the 16th inning to lift California. Greg Minton, 1-0, earned the win in his first appearance since April 17. Tom Edens, 1-1, stumbled for Milwaukee, who tied a club-record with six errors.

#90188u0385 07/07/1990 ~United Press International

ATHENS, GREECE (JULY 7) UPI - Northwestern Iran, devastated by an earthquake last month that killed an estimated 40,000 people, was rocked Friday night and Saturday by a new series of quakes, causing injuries and damage, the Iranian state news agency IRNA reported.

The news agency said a quake measuring 5.9 on the open-ended Richter Scale struck the Roudbar region in the northern province of Gilan Friday night - site of the massive 7.7 temblor on June 21 that killed tens of thousands of people and left a half million homeless.

According to Tehran University's Geophysics Center, the quake struck at 11:05 p.m. local time and was centered 125 miles northwest of the capital Tehran, where it also was felt, IRNA said.

Preliminary reports said at least two people were injured and two roads leading to Roudbar were blocked for four hours because of landslides triggered by the temblor.

Another quake registering 4.9 on the Ricther Scale jolted the central city of Yazd, 370 miles southeast of Tehran, about 9:30 a.m. local time Saturday, IRNA reported.

There were no immediate reports of casualties or damage in that quake. The massive quake June 21 left an estimated 60,000 people injured and several hundred aftershocks were reported before the latest series of quakes.

#90188u0401 07/07/1990 ~United Press International

KAMPALA, UGANDA (JULY 7) UPI - Nelson Mandela, deputy president of the African National Congress, told Ugandans Friday night chances of ending apartheid in South Africa have never been better.

Addressing a state dinner held in his honor by President Yoweri Museveni, Mandela said "prospects for victory over apartheid have never been better than today."

Mandela spoke on the second day of a four-day official visit to the east African country, before travelling next week to Ethiopia to attend the Heads of State meeting of the Organization of African Unity.

Uganda was the freedom fighter's first African port of call after a whirlwind 12-day tour of the United States and a two-day stopover in Ireland and Britain.

Mandela described the tour as "very successful," saying the people of countries he visited were fully behind the struggle to break down racial barriers in South Africa. "There is clear indication that the international alliance against apartheid has continued to grow in strength " he said.

He urged all black organizations in South Africa to combine forces in the struggle against apartheid, and warned that while he was optimistic about scheduled talks on July 18 with South African President Frederick de Klerk "the pillars of apartheid remain intact."

Mandela's visit to Uganda was timed to coincide with that of Zimbabwe President Robert Mugabe and Mozambique President Alberto Joachim Chissano.

Freed this year after spending 27 years behind bars in South Africa, 71-year-old Mandela is de facto leader of the country's most powerful anti-apartheid group. ANC President Oliver Tambo is currently hospitalized in Sweden.

#90188u0430 07/07/1990 ~United Press International
MANILA, PHILIPPINES (JULY 7) UPI - Americans are in danger of being attacked if they frequent Manila's Ermita entertainment district, a U.S. Embassy spokesman said Saturday.

The warning came amid continuing threats by the communist New People's Army to kill or kidnap U.S. nationals unless Washington dismantles its six military bases in the Philippines.

Embassy spokesman Stanley Schrager said U.S. officials received an "unconfirmed threat" against Americans in Ermita, the half-mile strip of bars that serves as Manila's red-light district. "Its hard to tell if the threat is valid or serious but we have an obligation to let Americans know so they can take precautions," Schrager said.

A bar owner said he received a note from the embassy Friday night about the unconfirmed threat and discreetly showed it to his American customers. A U.S. source said off-duty Marine guards at the embassy were barred from going to the Ermita bars.

Armed forces chief Renato de Villa on Friday ordered troops in Negros province to suspend all military operations to allow civilian negotiators to secure the release of American Timothy Swanson and Fumio Mizuno of Japan, both kidnapped by the NPA.

Swanson, 26, a Peace Corps volunteer from Cheyenne, Wyo., was kidnapped June 13 in the municipality of Silay on Negros, 300 miles south of Manila. Mizuno, 36, training director of the Organization for Industrial, Spiritual, and Cultural Advancement, was abducted May 29 in Murcia, also in Negros.

Their captors said the two foreigners would be freed within the month after they were cleared of suspicion of being spies. They denied they were asking ransom for the hostages.

Capt. Rodolfo Sebastian, commanding officer of the 339th Philippine Constabulary company, said troops were "exerting all peaceful means" to rescue the foreigners but that there had been no information of their whereabouts.

U.S. officials suspended the 29-year-old Peace Corps program in the Philippines June 27 and recalled 261 volunteers after receiving reports the 19,000-strong NPA, which is waging a 21-year-old rebellion, planned to attack them. The NPA has been blamed for the murders of ten U.S. nationals, including two airmen gunned down last May outside the U.S. Clark Air Base.

Also Saturday, about 2,000 supporters of Imelda Marcos celebrated her

acquittal on racketeering charges in New York, holding a motorcade and a rally at a seaside park.

Several hundred vehicles festooned with red, white and blue balloons and streamers sped around the capital, honking horns and cheering the wife of the late dictator Ferdinand Marcos.

The group later assembled at the Rizal Park, where they heard a mass to celebrate her acquittal Monday on charges she stole more than $200 million while her husband was in power and purchased properties in the United States.

Streamers said "Congratulations, Maam" and "Belated Happy Birthday." The crowd yelled "Imelda, not guilty. Long live Imelda." Mrs. Marcos celebrated her 61st birthday the day of her acquittal.

A former trade minister under Ferdinand Marcos was found guilty of misusing public funds and sentenced to a maximum term of 20 years in prison. Judge Bernado Pardo, in a decision handed down Friday, said Troadio Quiazon Jr., "misused, misappropriated, misapplied and embezzled" taxes collected for the government by a bank he headed.

Two other officials of the Development Bank of Rizal, Peter Sy and Ceferino Bautista, were convicted and sentenced with Quiazon. Another was acquitted.

Quiazon, who served under Marcos in the 1970s, was the first cabinet official of the former regime to be convicted. Last year, a court imposed a life sentence on a key Marcos ally, Quirino province Gov. Orlando Dulay, for the murders of two supporters of Corazon Aquino during the 1986 election campaign.

#90188u0438 07/07/1990 ~United Press International

BEIJING (JULY 7) UPI - Communist Party leader Jiang Zemin, criticizing Western sanctions imposed against China after last year's crackdown on dissent, Saturday warned the countries at this week's Houston summit not to "impose their views or values on us."

"If they interfere in the affairs of other countries, I am afraid that would not be proper," the party leader said in an interview with the president of one of Japan's biggest newspaper groups. His comments were carried by the official Xinhua news agency.

Japan, one of the seven leading industrial nations at the annual Western economic summit in Houston beginning Monday, is expected to press for a relaxation of sanctions imposed after Chinese troops crushed the democracy movement in June 1989.

The Western nations and Japan halted high-level political visits to China, suspended military cooperation and withheld new loans, including blocking new lending by the World Bank except for "humanitarian needs" projects. At their last summit, held soon after the crackdown in Beijing, the seven nations also issued a statement critical of China.

But Japanese Prime Minister Toshiki Kaifu wants the sanctions eased and was to meet Saturday in Houston with President Bush to explain his position. "Some Western countries are very unwise to have imposed economic sanctions on China, as this will bring about no positive result but will, instead, arouse the Chinese people's resentment," Jiang said.

He effectively told the summit seven to mind their own business, saying the nations "should confine themselves to discussion of economic and other issues among themselves." China has branded Western criticism as interference in its domestic affairs. "We will not impose our views or values on others and will never allow others to impose their views or values on us," Jiang said.

Jiang's comments in the interview, conducted Friday by Noboru Watanabe, the visiting president of the Mainichi Newspaper group, were the highest-level Chinese remarks on the upcoming summit and clearly aimed at the Japanese policy position.

Jiang called on Japan to develop its relations with China "independently," adding, "we have noticed that Japan is preparing to adopt a positive attitude toward economic cooperation with China."

Senior Japanese officials have said in Tokyo in recent days they want to resume political and economic ties with China, including freeing a "yen-loan" package worth $5.6 billion that was approved before the crackdown but suspended afterward.

Despite Bush's efforts to restore ties with Beijing, including renewing China's most favored nation trade status in May, the United States is unlikely to support a substantial easing because of continued anti-Beijing sentiment in Congress.

Although the Chinese government has attempted to portray an improved human rights record this year, critics have dismissed the moves as cosmetic. Western diplomats and human rights organizations estimated as many as several thousand people remain jailed.

#90188u0443 07/07/1990 ~United Press International

COLOMBO, SRI LANKA (JULY 7) UPI - Government troops have regained control

of a port in northern Sri Lanka after a month of heavy fighting, including recent clashes that left 62 rebels dead, military officials said Saturday.

The official said Ranjan Wijeratne, minister of state for defense, visited the strategic port town of Trincomalee Saturday following clashes between security forces and Tamil rebels.

Rebel fighters of the Liberation Tigers of Tamil Eelam had controlled Trincomalee, 190 miles northeast of Colombo, and other vital areas in Sri Lanka's northern and eastern provinces.

But after nearly a month of heavy fighting, military officials claimed to have regained control in some areas. "We have captured most areas of the Trincomalee District," said a senior military official. "There is about 40 percent more to clear."

Wijeratne, accompanied by the commanders of the Sri Lankan army, navy, and air force, toured Trincomalee and Kinniyai. The officials also visited the coastal town of Mutur, just 15 miles south of Trincomalee, where on Friday night the navy destroyed three boats carrying 30 guerrillas.

The military official said the rebels were trying to escape at the time of the attack. "We ordered them to stop," the official said. "But they would not obey our orders. We had to open fire, destroying the boats with the rebels."

The navy has deployed about 75 percent of its forces in the eastern province to cut off rebel escape routes and to keep land forces supplied, the source said. At least 32 other rebels were killed in five separate clashes Friday, the official said.

Sri Lankan security forces have been battling the Tigers since June 12, when guerrillas simultaneously attacked four army camps in the eastern province. Since then, at least 1,000 combatants and civilians have been killed in the fighting. Hundreds of thousands of people have fled their homes to escape the battles.

The Tigers are waging a struggle for an independent Taiml homeland in the north and east. They claim that the mostly-Hindu Tamils need a separate state because they are discriminated against by the nation's Sinhalese majority, which is mostly Buddhist.

SRINAGAR, INDIA (JULY 7) UPI - The governor of northern Kashmir region appealed Saturday for Moslem rebels to release the kidnapped son of a state district magistrate because he is "an innocent boy who had nothing to do with any political matters."

The appeal by Gov. Girish Saxena, the New Delhi-appointed administrator of Jammu and Kashmir state, came one day after suspected members of the Kashmir Students Liberation Front snatched Farooq Ahmad Shah, 23, from his

home in Srinagar.

Shah is the son of Ghulam Abbas Shah, the Srinagar district magistrate. Militants claiming to be members of the KSLF called the Shah home Friday to demand the release of two of their imprisoned colleagues in exchange for freeing the young man.

The district magistrate said he received a second call from the man holding his son Saturday afternoon. Shah said the man repeated his demand for the release of two friends in exchange for his son's freedom.

"I told him I cannot release any person because I am not competent enough to do that," Shah said in an interview. "I, however, gave him the phone number of the governor and asked him to contact the governor straight away." Shah said the man replied, "OK, we will wait up till 5 or 6 p.m. today." Then he hung up the phone.

Shah said he spoke to officials at Governor's House and was told they were considering the kidnappers' demands. Saxena earlier made an appeal on state-run radio for the kidnappers to release the young man on humanitarian grounds. "I appeal to them that they should set free an innocent boy who has nothing to do with any political matters," the radio quoted Saxena as saying.

Saxena, a former Indian intelligence chief, is the chief official charged with crushing a violent Moslem secessionist movement in the Kashmir Valley and restoring civilian confidence in the Indian administration of the region.

Moslem rebels have been fighting for independence from India for about two and a half years but the movement gained momentum and widespread popular support after government paramilitary troops fired on demonstrators in mid-January, killing at least 35 people.

The militants claim they need a separate state because the central government in New Delhi has for years denied them equal access to government jobs, development assistance and educational opportunities.

In an effort to curb the violence, Saxena declared the entire Kashmir Valley - once a popular site for tourists visiting the Himalayan region - a "disturbed area."

The declaration gives paramilitary police additional powers to end the revolt. It bars the public assembly of more than five people, lets authorities shoot to kill lawbreakers and allows them to destroy houses used as militant hideouts or bases for attacking security forces.

Saxena handed down a second order Friday night that extended special

powers to the armed forces, allowing them "to carry out searches and destroy hideouts of militants and elements indulging in subversive activities," the measure said.

Two people were killed Saturday in continuing violence in the Kashmir Valley, including a 75-year-old Kashmiri Hindu man who was stabbed to death by militants. They left behind a note claiming the man was a police informer but the message was not signed.

Authorities imposed a 24-hour curfew on Srinagar, the summer capital of Jammu and Kashmir state. Jeeps with loudspeakers cruised the city telling people to remain indoors but the curfew suddenly was lifted without explanation for five hours beginning at 2 p.m.

Militants fired at a private car in the old city of Srinagar late Friday, wounding a policeman and three civilians, police sources said. The four people were taking a fifth civilian, who had been wounded by security forces, to the hospital, they said.

The Jammu and Kashmir Liberation Front has threatened to fire at any private car moving on the streets. The organization issued the threat to prevent civilians from driving, which it hopes will help it to identify plainclothes security officers.

Sen. Alan Cranston, D-California, left New Delhi Saturday after holding talks with Indian officials on Kashmir and other issues of mutual interest. Cranston said in a departing statement that he had been prevented from visiting Kashmir because of the JKLF threat.

NAIROBI, KENYA (JULY 7) UPI - Armed police and troops using tear gas fought running battles with demonstrators in the Kenyan capital Saturday after an open-air meeting calling for multi-party democracy turned violent.

About 500 people gathered at 2 p.m at Kamukunji sports ground, a common green in the heart of Nairobi's eastern slum district, shouting multi-party slogans and demanding the release of ex-politicians Kenneth Matiba and Charles Rubia, arrested last week after a three-month campaign for political pluralism.

Thousands more gathered to watch the demonstration in the hot afternoon sun, gradually swelling the numbers of those actively participating in the meeting, which the government had banned two weeks ago. The meeting was proposed by the arrested men.

Violence broke out when a plainclothes policeman was spotted by members of

the crowd and attacked. As he fled to his car, protesters attacked another police vehicle and smashed its windows before hijacking a passing bus and driving it into the center of the sports ground.

Five truckloads of men from the crack paramilitary General Service Unit responded and began firing teargas into the crowd, which quickly moved toward the center of Nairobi. Some in the crowd hurled rocks and witnesses said they believed the troops responded with live ammunition but it could not be confirmed. The fighting continued in Nairobi as the afternoon wore on.

Kenya, which gained independence from Britain in 1963, had been one of the most stable countries in Africa until the 1978 death of President Jomo Kenyatta, who left a legacy of vendettas and corruption for President Daniel Arap Moi, a member of the Kalenjin tribe, one of the country's smallest.

Moi outlawed organized political opposition after a 1982 coup attempt, making the Kenya African National Union the only legal party. In 1986, Moi launched an extensive crackdown on dissidents and altered the constitution in 1987 to increase his powers.

Members of the opposition who battled police chanted multi-party slogans and made a gesture with two fingers that has come to denote support for pluralism in Kenya. "Tell the world we want two parties," some in the crowd shouted to reporters. "We don't want Moi's rule."

Gathitu Kariuki, a former university lecturer who was detained by the Kenyan government for two years in the mid-1980s for conspiracy to overthrow Moi, said the demonstration was proof Kenyans are determined to change the country's political system.

Kariuki, who addressed the crowd before the police arrived, told United Press International later he believed political change was inevitable. "You see what is happening. People want change," he said.

"They were not afraid to come even though their leaders are detained," he said "But it is directionless because of that. People need their leaders."

Matiba and Rubia, both former prominent members of the government, were detained on charges of endangering public security Wednesday after their application to hold a pro-multi-party meeting was turned down. Their detention spurred more people to attend the meeting in defiance, Kariuki said.

The Kamukunji sports ground is of great emotional significance in Kenya because Kenyatta made some of his first pro-independence speeches there in the 1950s when Kenya was still under British rule.

Kenyans have agitated for multi-party democracy before but the movement flared this year following allegations the government was responsible for the mysterious murder of Foreign Minister Robert Ouko in February. Government troops were called out to stop demonstrations during Ouko's funeral on Feb. 23.

WIMBLEDON, ENGLAND (JULY 7) UPI - Martina Navratilova won a battle with her nerves and made her Wimbledon dreams come true Saturday, downing fifth-seeded Zina Garrison 6-4, 6-1 to win a record ninth singles crown.

Navratilova, who had been tied with Helen Wills Moody at eight championships, did not enter the record book playing her best, for she made repeated unforced errors and only rarely summoned up the great shots of a champion. But, Navratilova won all eight service games by coming to net on every serve and broke her opponent's last three service games.

Navratilova, playing in her ninth consecutive final at The All England Club, had twice been denied by Steffi Graf the record she wanted so much. On Thursday, Garrison did the 33-year-old left-hander the favor of upsetting the defending champion in the semifinals. The second seed was a heavy favorite against the 26-year-old Texan, whom she had beaten in 27 of 28 previous meetings.

Garrison, playing in the first Grand Slam final of her 11-year career, was the overwhelming favorite of the Centre Court crowd. But this did not help her. Garrison was trying to become the lowest seed to win Wimbledon since No. 8 Karen Hantze Susman triumphed in 1962.

Navratilova won the 38-minute first set despite a shaky start. The Czechoslovakian native lost the first five points of the match as Garrison drilled winners off her forehand and backhand. The fifth seed had a break-point opportunity to take a 2-0 lead but Navratilova punched a backhand volley winner. The second seed then held serve, broke Garrison's next service game at 15 and served out the set.

In the second set, the third game proved to be crucial. Garrison fought through seven deuces and four break points but Navratilova finally broke her with a backhand passing shot to end the 13-minute game and was never challenged again.

Garrison, the surprise of the fortnight, failed to show the deep groundstrokes and sharply angled volleys that she used to dispatch Graf and the third-seeded Monica Seles.

Althea Gibson, the 1957-58 champion and the only black woman to win at Wimbledon, watched the match from the Royal Box at Centre Court.

TOULON, FRANCE (JULY 7) UPI - Hundreds of vacationers were evacuated from homes and campsites as wind-whipped fires roared through southern France, burning 2,400 acres of forest and brush, officials said Saturday.

Seventeen persons, including 15 firefighters, were slightly injured in the fires, which were brought under control Saturday. Flames destroyed a villa near St. Aygulf and about 20 camping cars at a campsite in Roquebrune-sur-Argens.

About 1,000 firefighters using nearly 200 pieces of equipment battled the fires throughout the night Friday. The flames were finally brought under control with the use of six firefighting planes and several helicopters dousing the fires.

About 500 people, mostly vacationers, were evacutated from homes near La Londe, taken to a municipal center for shelter. A similar situation occurred near Roquebrune-St. Aygulf, where some 300 people were evacuated.

Winds of 25 to 37 mph Friday died down overnight, but firefighters remained on alert with forecasters predicting more high winds and dry weather in the region over the weekend.

#90188u0501 07/07/1990 ~United Press International

SEOUL, SOUTH KOREA (JULY 7) UPI - Foreign Minister Choi Ho-jung said Saturday it is unrealistic for South and North Korea to share single membership in the United Nations as the communist Pyongyang government has proposed. Neither North nor South Korea currently holds a seat at the United Nations.

"Single U.N. membership for Korea is possible only after the two Koreas have been reunited," Choi said at a meeting with reporters. "Our stand remains that South and North Korea should have separate membership in the world body until their reunification."

Choi rejected a North Korean proposal that the two Koreas share a single seat in the U.N. General Assembly. The foreign minister did not say when South Korea will seek to enter the United Nations.

There have been published reports that President Roh Tae-woo may visit China for the Asian Games opening in Beijing in September and hold talks with Chinese leaders. But Choi said the Seoul government has not discussed such a visit with China. "If China takes a move in this regard, we will study the matter," he said.

#90188u0512 07/07/1990 ~United Press International

(JULY 7) UPI - Around the world... around the clock, U-P-I has the latest news.

President Bush is in Houston preparing for next week's economic summit. The president meets with Japanese Prime Minister Toshiki Kaifu later today to preview the conference agenda. Kaifu is expected to try to convince Bush to resume formal contacts and economic assistance to China.

The Louisiana state Senate reconvenes later this morning to consider a controversial abortion bill that could become the nation's toughest. There are signs the Senate might NOT have enough votes to over-ride Governor Buddy Roemer's veto of the measure. The Louisiana House over-rode his decision yesterday.

Secret Service officials say a 33-year-old unemployed Los Angeles man is being held without bond after allegedly trespassing inside the home of former President Reagan on July 4th. A Reagan spokesman says he woN'T dispute reports that Nancy Reagan saw the intruder, but adds the former president was in another part of the house at the time.

Boris Yeltsin, president of the Russian republic, has some strong advice for the Soviet Union's Communist Party leaders. During an address to the Soviet Communist Party Congress yesterday, Yeltsin said the leaders face a popular revolt and possible calls for their prosecution if they doN'T implement radical reforms.

Albania's communist leader Ramiz Alia promises sweeping democratic reforms in a bid to defuse unrest that has prompted thousands of Albanians to seek refuge in foreign embassies. The Austrian news agency says Alia yesterday delivered a nationally broadcast speech in which he criticized those trying to limit reforms.

#90188u0517 07/07/1990 ~United Press International

GENEVA (JULY 7) UPI - Third World debt has doubled in the past decade to a staggering $1.2 trillion and will keep growing unless rich nations take urgent action, a special U.N. report warned Saturday.

Former Italian Prime Minister Bettino Craxi, who was in charge of drawing up the special report, handed a preliminary version of it to U.N. Secretary General Javier Perez de Cuellar at a ceremony at the United Nation's European headquarters in Geneva. The debt problem will expand as Eastern European economies are integrated into the free market system, Craxi said.

The report called for increased official aid, rescheduling debts over a 30 or even 40 year period, and free trade agreements between wealthy industrial nations and their developing neighbors.

The so-called Craxi Report said the debt problem "is a responsibility of rich countries towards poor ones," and urged the 800 million who live in wealthy countries to aid the four billion population of poor nations. It is unjust that 70 percent of world income "is produced and enjoyed" by only 15 percent of the population, the report said.

People in Third World countries receive an average 2,385 calories of food a day compared to the 3,375 calories a day consumed by people in industrial countries. Life expectancy is only 47 years in black Africa compared to 77 years in western nations, the report said.

"The mortality rate of mothers (in childbirth) is nine out of 100,000 inhabitants in the United States, 1,500 in Nigeria and 500 in India," Craxi stated in his report.

Craxi lauded several Asian countries that managed to reduce their debts by increasing exports and reinvesting domestic earnings. "The debt crisis can be overcome when the state and the market-oriented sectors of the economy operate correctly," he said in the report. "People are prepared to make sacrifices and there exist financial institutions underpinning this process."

Rich countries must first meet the target - established by the U.N. for a September conference on Third World debt in Paris - of increasing development aid from 0.35 percent of their Gross National Product to 0.75 percent. Countries should also copy the United States, which set up a free trade agreement with Mexico, the report continued.

Finally, it said, countries must reschedule existing debts, reduce interest rates and eliminate debt servicing completely for the poorest nations. "A specific effort must be made in order to support Eastern European countries during the transition phase to carry out a rapid shift towards market-oriented economies, without incurring social troubles," Craxi said.

#90188u0522 07/07/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (JULY 7) UPI - African National Congress supporters marched on police stations across the country Saturday in a low-key national protest against the government's failure to curb black-on-black violence. Police prevented a march in the racially volatile town of Vereeniging south of Johannesburg.

The ANC had planned 20 marches across South Africa to cap its "National Week of Action" on the violence in strife-torn Natal province, but turnout was lower than expected.

The protests in Johannesburg and eastern Cape Province, considered a hotbed of anti-government sentiment, drew more than 1,000 people each. About eight other marches attracted crowds of between 100 and 800, municipal officials estimated.

"We can't expect to get tens of thousands every time there's an issue," said an ANC organizer in Johannesburg. "Also, people feared police

reaction."

Walter Sisulu, the ANC's internal leader, led the 1,500-strong Johannesburg procession and delivered a document to police demanding the government move to stop the ongoing strife in Natal.

"The terrible carnage taking place in Natal must stop," read the ANC memorandum. "The government has to do something to bring about peace in the region," said Sisulu, echoing a longstanding call by the ANC.

The Natal violence - virtually a civil war between rival Zulu tribal factions - flared in 1986 between ANC activists and the conservative Inkatha movement and has claimed more than 3,000 lives.

Police stopped more than 2,000 people from leaving the Sebokeng township to march through Vereeniging, a conservative stronghold 45 miles south of Johannesburg. Security forces shot and killed 12 people during an anti-apartheid demonstration in the township March 27.

Citing "heightened tension" and "a potential for violence" in Vereeniging, authorities refused to grant permission for the march, and police sealed off Sebokeng with roadblocks before dawn. Vereeniging is a center for right-wing extremist groups opposed to President Frederick de Klerk's racial reform program.

Municipal officials said about 1,200 people marched on police stations in the eastern Cape, up to 800 on Cape Town's police headquarters, and 500 in Pretoria.

The ANC's Natal action week began Monday with a one-day strike that kept as many as two million workers away from their jobs nationwide. Six people died in fighting between ANC supporters and anti-apartheid groups, which opposed the strike on grounds it could lead to intimidation and violence.

The ANC dedicated the rest of the week to awareness of the Natal conflict, saying only national action will pressure Pretoria to end the fighting. The ANC says the violence is a major factor blocking talks between it and the government over a post-apartheid constitution.

The ANC charges the province's conservative Inkatha movement, led by Mangosuthu Buthelezi, chief of the nominally self-governing black homeland of KwaZulu, is fomenting violence with covert help from the authorities.

Anti-apartheid activists criticize Buthelezi, who claims more than two million active supporters, for his willingness to meet with government officials and his refusal to endorse trade sanctions against the white-minority government. But Buthelezi and police say the violence has become endemic, breaking down into battles between warlords, and is almost

impossible to curb.

De Klerk on June 8 moved forward with his program of racial reform launched February by lifting a four-year-old state of emergency in three of South Africa's four provinces. But he maintained it in Natal, citing "extreme violence" that "needs extraordinary measures" and special powers for security forces.

#90188u0542 07/07/1990 ~United Press International

WASHINGTON (JULY 7) UPI - The leaders of the seven major industrialized nations, gathering this week in Houston, face a world of change in their first Economic Summit of the post-Cold War era.

Since meeting last summer in Paris, the leaders have witnessed the remarkable march of Eastern Europe away from communism toward market-oriented economies, the approach of a reunified Germany and the continued crumbling of the Soviet economy. In addition to these lofty matters of state, the world's leaders have felt steady pressure to improve the global environment.

Summit organizers said this week's meeting, Monday through Wednesday, is intended to help the heads of state learn how others have managed to weather the changes and cope with the unsettled economic climate.

The three-day meeting is expected to focus on agricultural trade reform, the environment, and economic assistance to such countries as the Soviet Union, China, and Latin America.

President Bush intends to focus his discussions with his counterparts from Canada, England, France, Germany, Italy, and Japan on the successful conclusion of the General Agreement on Tariffs and Trade's current Uruguay Round of trade talks.

Other topics on the president's agenda include drumming up support for his recent Latin American trade and debt-reduction initiative and a review of efforts to preserve the environment.

European leaders are expected to bring to the summit the issue of financial aid to the Soviet Union, while Japan lobbies for the release of $5.2 billion in development loans to China, which were frozen following the massacre at Tiananmen Square.

The successful conclusion of the current GATT negotiations, scheduled to end in December, rests with reaching agreements to ease European agricultural export subsidies and improve market access for foreign products.

"That is one of the things they will be debating behind the scenes," said C. Michael Aho, director of economic studies at the non-partisan Council on Foreign Relations.

Treasury Secretary Nicholas Brady said it is "especially important" to develop discipline in the area of agricultural trade, which he noted is rife with "very serious and expensive distortions."

Agricultural trade reform, called by one analyst "the first test of capitalist cooperation," has become one of the thorniest issues for world trade talks, with the United States and the European Community disagreeing about the scope of reform.

United States Trade Representative Carla Hills said she is hopeful the summit will clear up the major differences on agricultural reform, which include such trade-distorting measures as export subsidies, internal supports and barriers to market access.

"We are willing to negotiate but we simply must have a reduction in the three areas," Hills said. "Our choice is to ratchet up (U.S. export subsidies) or persuade Europe to bring down their stratospheric export subsidies whereby they bribe the market. That simply needs to change." Hills said the European Community annually spends $9 billion in agricultural export subsidies compared with about $500 million by the United States.

Edward Hudgins, deputy director of economic policies studies at the Heritage Foundation, a Washington "think tank," said the European leaders are expected to resist pressure to alter their agricultural policies.

"Basically, they have their attention fixed on 1992 and Eastern Europe integration," he said. "There is a tendency for them to say they don't have the time or incentive to deal with this."

The political and economic upheaval of Eastern Europe and the prospects of a reunified Germany are sure to be discussed in Houston, giving West German Chancellor Helmut Kohl a heightened presence at the meeting.

Japan, powered by its second-longest period of continuous postwar economic expansion, is expected to test its political wings in the international arena by pressing for foreign aid for China.

"This summit is a chance for Japan to really show how it has come to assert itself in the world economy, not only as an economic player but as a political players," said Roger Brooks, a former State Department official and now director of the Heritage Foundation's Asian Studies Center.

Bush and Japanese Prime Minister Toshiki Kaifu have scheduled a luncheon meeting Saturday where it is expected they will discuss China and the Soviet Union, Japanese Embassy officials said.

During the full summit meetings, the European nations, led by West Germany and France, are expected to push the concept of foreign aid to the Soviet Union, a position opposed by the United States.

DAMASCUS, SYRIA (JULY 7) UPI - Iran's official news agency and Middle East sources indicated Saturday that a Western hostage held by pro-Iranian fundamentalist Moslem groups in Lebanon may soon be freed.

The Iranian News Agency did not identify which of the 16 Western hostages would be let go, but Damascus-based diplomatic sources said it would likely be Anglican church envoy Terry Waite, who was abducted in Moslem west Beirut on Jan. 20, 1987, while attempting to negotiate the release of other hostages.

The sources said Waite's church had extended significant aid to the victims of last month's earthquake in Iran that killed an estimated 40,000 people. The report could not be immediately confirmed.

The Iranain agency IRNA quoted well-informed sources in the Lebanese capital of Beirut as saying that a Western hostage would be released and that he probably would be a European.

Ten Europeans and six Americans are still being held in Beirut by pro-Iranian Shiite Moslem groups that have demanded the release of Shiite prisoners held in Israel and other concessions.

Sources confirmed the IRNA report, saying a Western hostage would likely be released. "There are prospects that another Western hostage held in Lebanon would be soon released," a Damascus-based Iranian source told United Press International. "An announcement to this effect would probably be made in Beirut within the next two days."

A pro-Syrian official in west Beirut said there were serious efforts to free a Western hostage and "something might show up within the coming few days." Diplomatic sources in Damascus told UPI they thought that the Western hostage would be Waite.

No group has claimed responsibility for Waite's abduction, but Walid Jumblat, the Druze militia leader who had provided security for Waite, charged publicly that the church envoy was being held by the pro-Iranian Hezbollah, or Party of God. In Beirut, a spokesman for Hezbollah said his

party had no connection with the IRNA report.

Two American hostages, Robert Polhill and Frank Reed, held in Lebanon by a pro-Iranian group, were set free in Damascus this spring in what sources said was a goodwill gesture by Iran.

#90188u0551 07/07/1990 ~United Press International

HOUSTON (JULY 7) UPI - The Economic Summit is expected to generate an immediate $20 million for its host city, but civic leaders have their sights set on an eventual economic impact of at least ten times that amount.

"We like to look at the impact on a much broader scale, and I've not seen anyone who can put an accurate number on that," said Lee W. Hogan, president of the Greater Houston Partnership.

"The exposure we get through this is going to be extremely valuable," he said, "at least ten times" the revenues generated immediately for hotels and restaurants.

Organizers are counting on positive publicity while Houston is protrayed to the world for three to four consecutive days. "Therein lies the promise - and the peril. If those who visit Houston are impressed with its hospitality and its vitality, Houston will be viewed as a 'world-class' city on par with London, Paris, and Tokyo," said Ben Love, retired chairman and chief operating officer of Texas Commerce Bancshares.

Mayor Kathy Whitmire agreed, saying the Port of Houston and tourism in particular should be boosted by the exposure surrounding the July 9-11 international meeting.

Although the immediate impact will be the same as any other meeting drawing an estimated 7,000 participants, the summit is unique because 4,000 of its participants will be media representatives.

"The real difference is the news media and the high-level policy makers who will be coming," Whitmire said, adding Houston normally has one or two heads of state visit the city each year.

"But to have seven heads of government of the countries that are most important economically of any countries in the world all come here at the same time is incredible," Whitmire said.

The community has devoted extensive time and money into convincing the media, and also the world, that Houston is an attractive place for its residents, its businesses and its tourists.

The city of Houston and its business community have raised more than $5 million in cash and contributions to finance the event. The State Department will chip in $5.2 million.

About $500,000 will be spent to provide 14 food lines open 24 hours for three days at the George R. Brown Convention Center to feed the media covering the summit, Love said.

"When you talk to people in other countries about Houston and about Texas, they have an image of oil and cowboys, both of which are accurate, but sometimes they don't know the rest of the story," Whitmire said.

"My hope is that they will recognize Houston as a major center for international commerce and they will see Houston as a very progressive and open city ... what I want them to remember is that Houston is a very friendly place, a great place to visit and a great place to do business," Whitmire said.

Barton Smith, chairman of the University of Houston Economics Department, said the dollar value of the image impact stemming from the Economic Summit is difficult to calculate.

"The best outcome will be if the image of Houston that is conveyed to the world finally puts to rest outsiders' notions that Houston will never thrive again," Smith said.

#90188u0563 07/07/1990 ~United Press International

(JULY 7) UPI - The Louisiana state Legislature tries to over-ride the governor's veto of a tough anti-abortion bill... President Bush meets in Houston today with the Japanese prime minister... and the Soviet Communist Party Congress enters its sixth day in Moscow. Those and other stories, next, from U-P-I.

The Louisiana state Senate re-convenes this morning to consider a measure that could become the nation's most restrictive state abortion law.

Governor Buddy Roemer vetoed the bill that would ban virtually all abortions in Louisiana, but the state House over-rode his decision.

The state Senate must approve any over-ride of a governor's veto... and there are indications the Senate might NOT have the necessary votes.

The bill would make it a felony to perform an abortion, punishable by up to 10 years in prison and a fine of up to 100-thousand dollars.

Roemer vetoed the bill yesterday, saying he believes exceptions should be allowed for female victims of rape and incest.

If the state Senate over-rides Roemer's veto, it is likely the bill would end up before the U-S Supreme Court as a test case.

#90188u0569 07/07/1990 ~United Press International

(JULY 7) UPI - President Bush is finished with one summit and is now preparing for the next.

The president meets with Japan's prime minister today in Houston to preview an economic summit that begins Monday.

The talks come one day after NATO completed a London summit pledging to make the military and political structure of Western Europe more palatable to the Soviet Union. But the world's economic powers are NOT expected to be so generous when it comes to financial aid to Moscow.

Economic assistance to the Soviet Union and China looms as a major issue of the upcoming talks of the seven major industrialized democracies.

Japan and the United States oppose extensive aid to the Soviet Union. But Japan's Prime Minister Toshiki Kaifu is hoping to persuade Bush today to resume formal contacts and economic assistance to China.

The 28th Communist Party Congress enters its sixth day today in Moscow.

Yesterday, party leaders got a stern lecture from Boris Yeltsin, the maverick president of the Russian republic.

The mainly conservative delegates listened attentively but in stony silence as Yeltsin called for radical reforms.

The white-haired politician told the delegates they might have a popular revolt on their hands if they fail to accept political changes.

Yeltsin called on the party to change its name to the Democratic Socialist Party and to ban party cells from the army, the K-G-B and the work place.

He also urged communist leaders to abandon the doctrine that requires members to adhere to a single party line.

Yeltsin's dramatic speech was greeted by tepid applause. Several hundred military officers didN'T bother, sitting with their hands in their laps.

#90188u0576 07/07/1990 ~United Press International
TOKYO (JULY 7) UPI - Japanese Prime Minister Toshiki Kaifu will argue for giving aid to China but not to the Soviet Union at the Economic Summit of Industrialized Nations, which begins in Houston Monday.

Aid to the two reforming communist states is expected to be high on the agenda at the summit, the first of the industrialized nations forums to take place in the post-Cold War 1990s.

Kaifu hopes to persuade his counterparts to end a ban on loans to China imposed after Beijing's bloody crackdown on pro-democracy demonstrators in June 1989.

Japan has the closest cultural and geographical links to China of any of the summit nations and has been rapidly increasing its economic ties. Kaifu is expected to argue that China has made progress on human rights and the time has come to restore normal relations.

As for financial aid to the Soviets, the Japanese government "holds great reservations," said Noboru Hatakeyama, a senior official at the Ministry of Trade and Industry.

French President Francois Mitterrand and West German Chancellor Helmut Kohl support substantial aid for the Soviet Union. The United States, Japan, the United Kingdom, and Canada have reservations about aid for Moscow.

The major obstacle in Japanese reticence about aiding the Soviets is a 45-year-old territorial dispute. Tokyo is demanding the return of a group of islands in the Kuril archipelago occupied by the Soviets since the end of World War II. "There is no way for Japan to give the Soviet Union aid until this (territorial) matter is solved," Hatakeyama said.

As for China, Japan is ready to send a $5.4 billion loan to the Beijing government if it can win the approval of the Western allies. Japanese officials argue that aid to China is necessary to avoid further isolation of the Chinese and encourage Beijing to adopt democractic reforms.

Japan is unlikely to extend loans without the support of the other summit nations, said Kuniko Inoguchi, professor of political science at Sophia University in Tokyo. But conservative politicians are pushing for Japan to set its own course with China.

Japan should set its own ultimatums for Beijing, such as the release of more political prisoners, and give aid when the conditions are met, said Seizaburo Sato, a professor at University of Tokyo and adviser to former Prime Minister Yasuhiro Nakasone.

On the Soviet issue, Japan is expected to stand on the sidelines while other summit nations try to reach a consensus. Japanese political observers said they do not expect the other summit leaders to bridge their differences on Soviet aid, sparing Japan from being singled out on the issue.

Japan may be willing to participate in alternative programs for non-financial aid to the Soviets. Hatakeyama said Japan is willing to send economic experts to Moscow to give advice and give the Soviet Union observer status in the General Agreement on Tariffs and Trade, an international trade organization. "In these measures we would be ready to support (Soviet President Mikhail) Gorbachev's perestroika," Hatakeyama said.

#90188u0580 07/07/1990 ~United Press International

BANGKOK, THAILAND (JULY 7) UPI - Thailand Saturday asked Indonesian President Suharto to host a new round of Cambodian peace talks because the Jakarta government is co-chairman of an international conference on Cambodia. The visiting Indonesian leader, burned by past failures, did not respond immediately to the invitation.

"If they (the four Cambodian factions) want to have a meeting, it should be Indonesia who hosts it," Prime Minister Chatichai Choonhavan told reporters after he met with Suharto.

Earlier, resistance leaders had asked Thailand to host the next round of talks in a series that has also included three meetings in Jakarta as well as in France and Japan.

Chatichai said the four competing Cambodian factions - the U.N.-recognized three-part resistance and the Vietnamese-backed Phnom Penh regime - have not directly approached him for a meeting. Instead they went through former Defense Minister Gen. Chavalit Yongchaiyudh.

Government spokesman Suvit Yodmanee said Chatichai wanted Indonesia to host any further talks because Indonesia is a co-chairman with France of an international conference on Cambodia.

However, Suharto didn't react to Chatichai's remarks, Suvit said. He said Chatichai also hailed Indonesia's recent normalization of diplomatic relations with China. "The normalization will benefit all sides as China is a great country," he said.

The spokesman said Chatichai and Suharto agreed to set up a joint economic commission to expand bilateral trade, investment and fishery relations. The two countries also agreed to avoid double taxation, he said.

Suharto, heading a 30-member delegation on a two-day working visit to Thailand, was returning home Saturday evening after playing golf with Chatichai.

#90188u0587 07/07/1990 ~United Press International

MOSCOW (JULY 7) UPI - A furious Mikhail Gorbachev bludgeoned the Communist Party Congress with the specter of Josef Stalin's purges Saturday, bringing to a halt personal attacks on party leaders and preventing Politburo members from having to face embarrassing evaluations of their work.

Gorbachev intervened in the proceedings of the 28th Communist Party Congress after many of the more than 4,000 delegates interrogated his closest allies, often derisively.

Gorbachev sat silently through the morning session as Politburo member Aleksander Yakovlev faced searing criticism from angry delegates, most of them conservatives unhappy with the reformist party leadership Gorbachev has assembled.

But when the conclave's sixth day resumed after a lunch break and delegates exposed Foreign Minister Eduard Shevardnadze to the same rough treatment, Gorbachev had seen and heard enough. "If you want to bury us along with the party, go right ahead," said a visibly disturbed Gorbachev.

Gorbachev, the party's general secretary since March 1985 and the country's executive president for four months, said the Congress was on the verge of becoming a "kangaroo court."

As a wave of reaction rolled through the main hall of the Kremlin's Palace of Congresses, Gorbachev warned: "On this path we are heading straight back to 1937," an allusion to the peak of Stalin's deadly purges of party officials.

The admonition had an immediate effect on the delegates, who voted to stop the unprecedented cross-examination of Politburo members and reversed their earlier decision to subject each party leader to a vote on his performance.

The delegates voted, 2,495-1,545, to replace the personal evaluations with a collective judgment of the entire Politburo and the Central Committee, sparing individuals from being singled out.

In the day's most dramatic moment, Shevardnadze acknowledged under aggressive questioning from the floor that he had made laudatory speeches about Leonid Brezhnev, the discredited late Soviet leader, at past party

congresses.

"I open my soul to you," Shevardnadze said, his voice shaking with emotion. "When I was seven years old, I wrote a poem praising Stalin. Is that the most damning argument against the foreign minister?"

Noting that he was born in 1928, Shevardnadze said he belongs to a tragically fated generation." The white-haired Soviet Georgian's passionate response to his interrogators appeared to move the delegates, who gave him a prolonged ovation when he finished speaking.

Politburo hard-liner Yegor Ligachev, who preceded Shevardnadze to the podium, faced milder questioning from the largely conservative gathering that includes some of his strongest supporters. Ligachev drew applause when he warned that the Soviet Union will break up if the Communist Party disappears as an effective political force.

Earlier in the day, Vadim Mebvedev, the party's ideology chief, became the most recent Politburo member to indicate he would leave his high post.

In dramatic face-to-face encounters, delegate after delegate stood to confront Politburo member Yakovlev, blaming him for allowing secessionists to take power in the Baltic republics and setting off ethnic conflicts across the Soviet Union.

Yakovlev, a 66-year-old historian widely viewed as the architect of Gorbachev's perestroika reforms, is one of several party leaders who has told the Congress he will leave the Politburo to focus on his government duties as a member of the new Presidential Council.

The delegates' aggressive grilling of Yakovlev, Medvedev, and Shevardnadze suggested they will ignore the urging of Russian republic President Boris Yeltsin, who warned them Thursday that they must reform or face the wrath of the Soviet people.

Yeltsin said the rise of the conservatives may cause a mass desertion by disenchanted party members, an exodus he warned could turn into a popular revolt. The delegates gave Yeltsin only brief, tepid applause when he finished. A bloc of several hundred military officers sat with their hands in their laps.

#90188u0591 07/07/1990 ~United Press International

(JULY 7) UPI - Albania's communist leader Ramiz Alia promises to implement a wide-range of democratic reforms he introduced last spring. The Austrian news agency A-P-A says Alia criticized ''certain powers'' that oppose the reforms, an apparent dig at conservative members of

Albania's Central Committee.

Alia's remarks came in an effort to calm civil unrest that has prompted thousands of Albanians to seek refuge in foreign embassies in the nation's capital.

The news agency says the Communist Party leader promised to restructure all aspects of Albanian life, including the economy, security, culture and the party itself.

But citizens continued to flood the streets of the capital as Alia delivered the nationally broadcast address.

A tiny Balkan nation, Albania remains one of the world's most isolated and rigidly controlled nations and the last avowedly Stalinist country in Europe.

A government report finds that accidents, murders and suicides claim the lives of more children than all diseases combined.

The report by the Centers for Disease Control in Atlanta says death by injury- either deliberate or accidental- accounted for 64 percent of all fatalities among children aged one to 19 in 1986... the most recent year for which data is available.

The C-D-C report says car accidents ranked number-one as the top killer of young Americans in 1986. Homicide was the second leading cause of death-by-injury, with the murder rate for black children five times higher than for white children.

Suicide ranked third with 80 percent of the victims being male.

Dr. Juan Rodriguez, the author of the report, says the kinds of deaths mentioned in the study can be prevented in many cases. He says health professionals can use prevention techniques like those used to avoid diseases.

#90188u0598 07/07/1990 ~United Press International

ROME (JULY 7) UPI - Flamboyant French businessman and soccer club owner Bernard Tapie has bought control of Adidas, the world's leading sportswear manufacturer, the West German company announced Saturday.

Gerhard Ziener, president of the Adidas supervisory board, said 80 percent of the share capital, owned by the heirs of the company's founder, Adi Dassler, will shortly be transferred to Bernard Tapie Finance S.A. of Paris.

The company was founded in 1920 and grew to be the largest sports goods manufacturer in the world, controlling the marketing of the World Cup, the Olympic Games, and other major sporting events.

It had sales of $2.8 billion last year, despite encountering financial difficulties recently. Adidas has 27 affiliates in 20 countries and is represented through franchises in more than 160 countries.

Fifteen of the 24 soccer teams that qualified for the World Cup finals in Italy, including the finalists West Germany and Argentina, use Adidas products.

Tapie, a 45-year-old Socialist Party deputy and owner of the Marseilles soccer club, joked at a press conference called in Rome to announce the sale that the referee's whistle would be the only non-Adidas product on the field at Sunday's World Cup title game.

"It is the first time that I have the opportunity to involve myself at the same time in my three passions, sport, business and politics," Tapie said. "Sport because Adidas is the No. 1 in the world, business because the company's recent troubles represent an exciting industrial and financial challenge."

Tapie said his passion for politics would be satisfied "because the acquisition of a German company by a French one shows the determination of our two countries to be the leaders in the Europe of tomorrow."

-30- 1991

#90188u0624 07/07/1990 ~United Press International

SOFIA, BULGARIA (JULY 7) UPI - Political leaders scrambled Saturday to find a replacement for former President Peter Mladenov amid predictions the next head of state would come from outside the ruling Bulgarian Socialist Party.

The resignation late Friday was unprecedented in Bulgaria's modern history and sparked confusion in a country still struggling to make the transition from monolithic communist state to multi-party democracy.

Mladenov, a liberal communist who helped orchestrate the Nov. 10 overthrow of hard-line leader Todor Zhivkov, resigned amid controversy over an inflammatory remark he made at an anti-government protest Dec. 14.

Jeered by demonstrators who besieged the National Assembly building, Mladenov had muttered the words, "Let the tanks come." The remark was captured on videotape and came back to haunt him in the final days of last month's campaign for parliamentary elections.

Within hours of the resignation, leaders of the major political parties had already begun negotiations to choose Mladenov's successor. No clear favorite had emerged Saturday, but most of the names being circulated as potential candidates were not members of the ruling Bulgarian Socialist Party, or former communist party.

The BSP won a majority of seats in the Grand National Assembly in multi-party elections June 10 and 17, but lacks the two-thirds majority needed to ram its own nomineee through the Parliament, making it likely a consensus candidate will be chosen.

Douma, the Socialist party newspaper, mentioned three possible successors to Mladenov: Krustyu Petkov, a professor and leader of the Independent Trade Unions, and independents Blagovest Sendov and Lyuben Koulishev, who played a key roles in round-table talks between the communist party and democratic opposition this spring.

Other names cited were Zhivko Stalev and Dimiter Popov, who head the non-partisan Central Electoral Commission, Peter Dertliev, leader of the Bulgarian Social Democratic Party and Viktor Valkov, who heads the Bulgarian Agrarian Party.

Mladenov's resignation sparked wild celebrations by hundreds of students staging sit-in strikes at Sofia University and in front of the presidential building.

Some ran out of university buildings shouting "victory", and literally danced in the streets into the early hours Saturday. The students had set an 8 p.m. deadline Friday for Mladenov to resign, warning they would call a general strike next week if he failed to do so.

Mladenov, who was foreign minister and a member of the Communist Party Politburo under Zhivkov, was a key player in the Nov. 10 overthrow of Zhivkov and succeeded his former boss as party leader and president of the State Council.

He and other liberal communists implemented sweeping reforms, abolishing the Communist Party's guaranteed monopoly on power, ending the official persecution of the ethnic Turkish minority, legalizing opposition and calling democratic elections. Mladenov was unanimously elected to the new post of Bulgarian president under an agreement worked out during the round-table talks.

#90188u0631 07/07/1990 ~United Press International

MEXICO CITY (JULY 7) UPI - Cuba reacted with surprise and anger over U.N.

Secretary General Javier Perez de Cuellar's sharp criticism of the country's human rights record, the official Cuban news agency Prensa Latina reported Saturday.

Prensa Latina, monitored in Mexico City, quoted a letter from Cuban Foreign Minister Isidoro Malmierca to Perez de Cuellar that said, "with profound surprise and irritation we learned of your unacceptable comments."

At a news conference Thursday in Geneva, Perez de Cuellar accused the government of President Fidel Castro of "violating human rights," lamenting that he could not go to Cuba to observe the situation personally.

Perez de Cuellar said Cuba and Haiti are the only two Latin American countries without a democratic system of government. Malmierca said Perez de Cuellar's post as head of the United Nations "does not give him the right to judge the organization's member states." The letter accused Perez de Cuellar of false judgments by trying to compare Cuba with the rest of Latin America.

"The Cuban people are obliged to reject your hasty remarks that do not correspond to the high level of the post you occupy," Malmierca said in the letter.

#90188u0638 07/07/1990 ~United Press International

STORRS, CT (JULY 7) UPI - The University of Connecticut will name University of Maryland athletic director Lew Perkins its new athletic director, a published report said Saturday.

Perkins, 45, a native of Chelsea, Mass., and a close friend of UConn basketball coach Jim Calhoun, could be introduced at a UConn news conference as early as Monday, The Hartford Courant reported.

The Courant based its report on information from an unnamed source at the Big East school, but Harry J. Hartley, UConn's interim president and chairman of the 23-member search committee said Friday a decision on the new athletic director had not been completed. Hartley said he was confident his goal of having a full-time athletic director by Sept. 1 will be met.

Perkins had been UConn's first choice for athletic director in 1987, but he left the same position at Wichita State position to take the job at Maryland instead. UConn hired Todd Turner in 1987. Turner accepted the athletic director's job at North Carolina State on April 20.

Perkins, who could not be reached for comment, was one of three finalists submitted by the search committee to Hartley at a meeting Tuesday. The

others were Jack Kvancz, athletic director of George Mason University in Virginia and Kevin White, athletic director of the University of Maine.

White, through a statement released by Maine, withdrew his name from consideration Friday. There were 60 candidates for the job, said Hartley.

Perkins, the so-called "Mr. Fix-it" of sports programs, also has been athletic director at South Carolina-Aiken and Pennsylvania. He revamped Wichita State's athletic program and replaced basketball and football coaches whose programs were on probation.

Maryland's basketball team is appealing NCAA probation, which will take three years. It also includes a two-year ban on post-season play and a one-year ban on live television appearances.

Perkins was not named in any violations that led to the probation. Perkins who reportedly earns $116,000 a year at Maryland, played basketball at the University of Iowa, where he graduated in 1967.

#90188u0704 07/07/1990 ~United Press International

(JULY 7) UPI - The stage is set for an emotional scene today in the Louisiana state Senate. Senators re-convene this morning to consider whether to approve an over-ride of Governor Buddy Roemer's veto of a bill that would ban virtually all abortions in the state. The House already voted for an over-ride, but it's NOT clear where the votes will fall in the state Senate.

President Bush meets with Japan's prime minister today in Houston as the two leaders prepare for a seven-nation economic summit that begins Monday. Japanese Prime Minister Toshiki Kaifu is hoping to convince Bush to resume formal contacts as well as economic assistance to China. But Bush may NOT be receptive to the suggestions... only one year after the bloody pro-democracy crackdown in Beijing.

Northwestern Iran was rocked last night and today by a new series of earthquakes, causing injuries and damage to the region that was devastated by an earthquake last month. The Iranian news agency IRNA says a quake measuring five-point-nine on the Richter Scale hit a northern province last night, blocking roads and injuring at least two people. There are NO immediate reports of casualties or damage in another quake that jolted a central city today.

The federal Centers for Disease Control says accidents, murders and suicides kill more American children than all diseases combined. The C-D-C says deaths from injury- either deliberate or accidental- accounted for 64 percent of all fatalities among people aged one through 19 in 1986. But

the top killer of young Americans is car accidents, killing
10-thousand-535 in 1986.

#90188u0708 07/07/1990 ~United Press International
VIENNA (JULY 7) UPI - Albania declared an amnesty Saturday for thousands of refugees holed up in foreign embassies in Tirana and said all were free to pick up passports and leave the country, provided they depart voluntarily.

The amnesty, effective immediately, was apparently aimed at easing a crisis in several Western embassies where thousands of refugees were jammed in corridors and courtyards without sufficient food, water or sanitary facilities.

"The Albanian citizens who have entered the foreign diplomatic representations ... and come out of them (will) be excluded from penal prosecution for offences related to this act," the official Albanian Telegraphic Agency said Saturday, reporting a decree of the People's Assembly Presidium. "In case they want, these citizens are granted a regular passport to go abroad just as any other Albanian citizen," the decree stated.

Hungarian diplomats in Tirana were told by the authorities they could escort the refugees to the passport offices to ensure the government keeps its word, Budapest radio said.

It was not immediately clear whether the refugees would leave the embassies. Earlier offers by the government to provide the refugees with passports were met with skepticism.

The amnesty announcement came a day after communist leader Ramiz Alia promised in a televised speech to introduce sweeping democratic reforms, which he said would affect all aspects of life in Europe's most isolated and rigidly controlled state.

Despite the promises of change, hundreds of Albanians continued streaming into foreign embassies overnight, apparently unhindered by security forces diplomats and news reports said. The Austrian news agency, APA, reported from Tirana that as many as 5,000 people were being sheltered in foreign missions.

In Bonn, a Foreign Ministry spokesman said about 2,000 refugees were being housed in the West German Embassy alone, and he described conditions there as critical.

Foreign Minister Hans-Dietrich Genscher, citing deteriorating health

conditions at the embassy, said he would make a joint appeal with the French and Italian governments for safe passage out of the country for the refugees.

Italian Ambassador to Albania Giorgio de Andreis, in a telephone interview with state-run Italian television, estimated about 1,500 people were seeking refuge in his embassy, up from about 300 the previous day.

"The Albanian view is that the problem must be solved at the root by the rapid departure of the refugees from the country," Andreis said, explaining why Italian aircraft loaded with relief supplies have not been allowed to fly to Tirana.

The Tirana government, in a separate statement carried Saturday by ATA news agency, lashed out at the foreign embassies for not encouraging the refugees to leave.

"Why do they (foreign diplomats) keep these persons in embassies, when they are not penally prosecuted ... and not even hindered from being granted passports to go abroad? It is clear they do such a thing to create a state of tension and opposition to the laws and regulations of the Albanian state," ATA said. "Such brutal interference and anti-human acts are unacceptable and punishable," it said.

Alia, in his speech late Friday, proposed a party congress scheduled for autumn 1991 be held within the next six months to map out how his proposed reforms would take effect.

He also criticized "certain powers" who he said were opposing democratization, an apparent reference to a conservative clique within the government led by the widow of Enver Hoxha, Albania's longtime authoritiarian leader until his death in 1985.

As Alia was speaking, thousands of Albanians massed in the streets to demand democratic reforms, APA said. In one instance, police with truncheons attacked a group of protesters, beating several and scattering hundreds of others.

The rush to foreign embassies began Sunday amid reports of clashes between demonstrators and security forces in the capital. By late Monday more than 200 Albanians were being sheltered in about a dozen embassies. Some of them had been shot by police while trying to scramble over fences into the embassy compounds. The number of asylum-seekers soared Thursday and Friday after police stopped trying to halt the defections.

#90188u0725 07/07/1990 ~United Press International

PARIS (JULY 7) UPI - The president of the Church of Scientology in France and two other officials of the group have been arrested in connection with a probe into illegal practice of medicine and fraud, court sources said Saturday.

Daniele Gounord, president of the group, Jean-Paul Chappelet, the financial director, and Yves Veau, head of the affiliated Celebrity Center, were jailed Friday in Paris. They were to be transported to Lyon, about 250 miles southeast of the capital, to be questioned by an investigating magistrate. The sources had originally said the three were indicted on charges of fraud and illegal medical practice.

The investigation, prompted by the 1988 suicide of a devotee of the psycho-religious group, has already produced three indictments of Scientology members, the sources said.

Patrice Vick, an industrial designer who entered the Lyon "dianetics" center of the Scientology group in 1986, killed himself by jumping from a 12th-floor window in March 1988.

His widow, Nelly, filed a complaint last year with authorities in Lyon claiming her husband remained in a state of depression after entering the center.

Indicted were Jean-Jacques Mazier, director of the Scientology center in Lyon, and two other officials of the Lyon branch, Alain Barou and Corrine Medallin. The three were charged with fraud and illegally practicing medicine. Police raided the Lyon offices of the association June 26, seizing various documents as well as medical equipment.

Dianetics is the name given to the procedure invented by Scientology's founder, the late science fiction writer L. Ron Hubbard. The group, which claims to promote a science of mental health, has been accused of being a cult that brainwashes its adherents.

(JULY 7) UPI - A Two Live Crew concert set for tonight in Dallas will NOT take place. The city's fire department cancelled a Two Live Crew performance at the Longhorn Ballroom because the night club does NOT have the proper permits. But the controversial rap group did perform a ''clean'' version of its concert last night in San Antonio. Some members have been charged with obscenity because of the group's sexually explicit lyrics.

New York City will open several acupuncture clinics this summer in an effort to help wean crack cocaine addicts off the drug. City health

officials say they believe the ancient Chinese medical technique has a calming effect on crack users, and reduces their craving for crack. The city recently doubled its annual acupuncture funding to nearly three -Million dollars.

Jesse Jackson will preside at an outdoor funeral service planned for Tuesday in Washington, D-C, for homeless advocate Mitch Snyder. At a memorial service yesterday, the homeless of the nation's capital remembered Snyder as their ''father,'' with Jackson comparing him to Jesus Christ and Martin Luther King. Snyder was found hanged Thursday in what police said was an apparent suicide.

#90188u0737 07/07/1990 ~United Press International

WARSAW, POLAND (JULY 7) UPI - Prime Minister Tadeusz Mazowiecki and Solidarity leader Lech Walesa held a surprise meeting Saturday to discuss their growing differences over the pace of reform in Poland's fledgling democracy.

A statement carried by the Polish News Agency PAP said the two former colleagues met in Warsaw under the auspices of Archbishop Bronislaw Dabrowski, head of the Polish Roman Catholic Episcopate.

"They exchanged views on the current situation in the country and on the changes taking place in it," PAP said. The statement said the two men hoped their differences would not esacerbate the tense situation in Poland.

Walesa has criticized the Mazowiecki administration for not weeding out communists from the bureaucracy faster and for the drastic drop in the standard of living, especially of farmers and workers, since a tough economic stabilization program took effect Jan. 1.

The two met for five hours without advisors and with only Dabrowski present but not participating, the government press office said. After the meeting Walesa, looking irritated, refused to talk with reporters and returned to Gdansk by plane. "There was a communique," he said.

The statement said both men "think that maintenance of the social calm and lawfulness are the conditions for a deep reconstruction of the state." "They agreed they will continue to cooperate in the interest of the country and of further progress of democracy," PAP quoted the statement as saying.

For the past week there has been a question over where the two Solidarity activists would meet. Walesa invited Mazowiecki to meet Sunday at the shipyard, the birthplace of Solidarity and Walesa's stronghold. But he accepted Mazowiecki's counteroffer to meet in Warsaw. The premier said the

two must meet "as partners" and he would not accept a subordinate role.

Earlier in the day, Polish farmers marched through Warsaw, demanding higher prices for their crops and calling on the government to let them choose their own agriculture minister. The demonstration was timed to coincide with a meeting between government representatives and a delegation of farmers.

Deputy Prime Minister Leszek Balcerowicz led the government delegation for talks with representatives of various organizations of farmers, including Farmers' Solidarity, which is headed by Gabriel Janowski. "We enter the talks with the attitude that the government side as well as we want to achieve understanding," Janowski said.

Balcerowicz explained that the mechanism of artificially fixed prices is not compatible with the changes taking place in the economy, the Polish news agency PAP said. He said a special system of market instruments is being introduced to keep prices at a proper level.

Farmers have strongly criticized the government's agricultural policy since the beginning of the year. They have blocked roads, marched and on June 29 occupied the Agriculture Ministry building. The occupation ended when police ejected them.

The incident prompted the resignation last Thursday of Agriculture Minister Czeslaw Janicki, who was unable to talk the government into making more concessions to farmers.

The farmers want guaranteed minimum prices for their products and better organization of wholesale purchases, protection against food imports and lower interest on credits.

The talks come a day after the Parliament refused to approve Prime Minister Tadeusz Mazowiecki's candidate for agriculture minister, Artur Balazs, a 38-year-old farmer.

His candidacy was rejected last September by Parliament when Mazowiecki was forming his cabinet. Instead Balazs became head of the office for rural social affairs. Farmers' organizations put forward Gabriel Janowski as their candidate, saying he will better represent the interests of farmers in the government.

"He knows what he wants, is full of energy and surrounds himself with good advisers," said Tadeusz Szymanczak, one of the organizers of the protest march of a few hundred farmers from across Poland who came to Warsaw to await the results of the talks.

Szymanczak said the decisions by Balazs did not satisfy the farmers'

expectations. Mazowiecki, in proposing Balazs' candidacy Friday, argued he needed someone with energy and with experience in government work.

Farmers claim the government's policy in agriculture stifles production by making it unprofitable. "In six months' time or a year, prices of food may go up very much because many producers may abandon production," Janowski said.

Bank representatives are also participating in the talks, in which the lowering of interest on credits for farmers - a major issue in the dispute - was the first item on the agenda.

#90188u0748 07/07/1990 ~United Press International

HOUSTON (JULY 7) UPI - President Bush briefed Japanese Prime Minister Toshiki Kaifu Saturday on the NATO summit, saying the United States was "very pleased" with the Soviet Union's reaction to the Western alliance's pledge of non-aggression.

Bush, who met with Kaifu as a prelude to the coming week's Economic Summit of the seven major industrialized democracies in Houston, also offered his "personal reflections" on the NATO meeting in a cable to Soviet President Mikhail Gorbachev, White House spokesman Marlin Fitzwater said.

The exact content of the cable to Gorbachev was not disclosed by administration officials, but Fitzwater said the president expressed encouragement about Gorbachev's economic reform program, also known as perestroika.

Fitzwater said it was clear that the president was satisfied with positive comments by Gorbachev and Soviet Foreign Minister Eduard Shevardnadze on the NATO meeting in London, which ended Friday.

According to Fitzwater, Bush told the Japanese prime minister: "We are very pleased. They (the Soviets) believe the summit was very productive and heartening to what they want to do."

The 16-nation Western alliance offered political integration and military restraint to the remnants of the Warsaw Pact with pledges of non-aggression, reduced reliance on nuclear weapons, expedited arms reductions and limits on armed forces in Europe.

The leaders also extended an invitation to Gorbachev and other East European leaders to address the alliance and "establish regular diplomatic liaison" in the transformation of Europe.

Although NATO pledged to make the military and political structure of

Western Europe more palatable to the Soviet Union, the world's economic powers may be not be as forthcoming with financial aid for Moscow.

Foreign aid to the Soviet Union and China loomed as a key component of the three-day Economic Summit between West Germany, Great Britain, Japan, the United States, France, Italy and Canada. The formal talks begin Monday at Rice University.

Japan and the United States oppose extensive aid to the Soviet Union, and Kaifu would like Bush to relax U.S. intensity about Soviet concerns and resume formal contacts and economic assistance to China.

Fitzwater said the United States is "not looking to change its policy" on China, adding that the White House would like Beijing to make "more progress" in "terms of opening up the country."

Fitzwater said that, before the United States would consider changes, Beijing must provide an accounting of the fate of dissidents, release political prisoners, and give "a better understanding of exactly what happened" during the bloody pro-democracy crackdown of June 1989.

The European community has decided against reconsidering its sanctions against China. British Prime Minister Margaret Thatcher opposes direct aid for Moscow, supporting the U.S. view that Gorbachev must reform his economy and resolve regional issues before receiving Western assistance. Thatcher, along with the United States and Japan, supports providing only technical assistance to Moscow.

Fitzwater said the summit leaders "will be interested in ways of moving" the Soviet Union to a free market economy. "There are lots of ways to do that without direct aid," the spokesman said.

Favoring direct aid to the Soviet Union are West Germany, France and Italy who, along with the United States, Britain and Canada, are members of NATO who also participate in the Economic Summit.

Bush said he has "some big problems" with direct aid on the order of the $15 billion suggested in recent weeks by West German Chancellor Helmut Kohl, but said he fears no "breach of alliance cohesion" if the Economic Summit ends with a division over aid to the Soviet Union.

#90188u0819 07/07/1990 ~United Press International
(JULY 7) UPI - The Massachusetts Legislature was at work early today, enacting the largest tax hike in state history. The one-point-three-BILLION-dollar combination of income, sales and gasoline levies is designed to revive the flagging economic ''miracle'' touted by Governor Michael Dukakis in 1988.

Discussion is expected to come down to money- specifically aid to the Soviet Union and China- when President Bush and Japanese Prime Minister Toshiki Kaifu meet today in Houston. The talks are viewed as a preview to next week's Economic Summit of the seven major industrialized democracies.

The Louisiana state Senate today considers an over-ride of Governor Buddy Roemer's veto of what might become the nation's toughest anti-abortion law. A survey by U-P-I shows 16 senators leaning toward an over-ride, 15 opposed and eight undecided. The Louisiana House voted for an over-ride yesterday.

Serbia's communist government says the situation is under control in rebellious Kosovo province today, despite a strike by hundreds of workers. The work stoppage is being held to protest the continued police occupation

of offices of Albanian-language media in the province.

Nelson Mandela is in Uganda, where he'll visit for another day before traveling to Ethiopia next week for a meeting of the Organization of African Unity. The deputy leader of the African National Congress told Ugandans last night that the chances of ending aprtheid in South Africa are better than ever.

#90188u0832 07/07/1990 ~United Press International

MONROVIA, LIBERIA (JULY 7) UPI - President Samuel Doe's shattered government announced a cease-fire by makeshift radio and soldiers fired into the air in celebration, but intermittent fighting continued Saturday on the outskirts of the besieged Liberian capital.

After four days of silence by state radio, a message was broadcast

appealing for shops to open and government workers to return to their offices. It said a cease-fire had been agreed on. The appeal, however, was ignored and virtually every office and store remained closed.

Monrovians, beleaguered by looting government troops, rebels bent on tribal reprisals, severe food shortages, and deprived of running water and electricity for more than a week, said they wanted to believe the announcement but could not.

There was no comment on the cease-fire claim from rebels, led by former Doe aide Charles Taylor, who have been fighting for six months to overthrow a government they accuse of corruption, tribalism, and brutal suppression of opposition.

The cease-fire claim was announced from Doe's fortified beachside executive mansion - on the frequency of the state Liberian broadcasting system - from a VHF two-way radio transmitter, diplomatic sources said. The radio went off the air after the Friday night announcement.

Very few people heard the broadcast because the state radio station, located on the Eastern outskirts of Monrovia, stopped transmission last Tuesday as rebels advanced on the city.

Soldiers fired repeated shots into the air from U.S.-supplied M16 rifles, celebrating what they thought was progress in ending the rebellion that has escalated into a bloody tribal war.

Less fighting was reported Saturday on the western and eastern outskirts of the city following a day in which Monrovia echoed with the rumble of heavy artillery and the crackle of gunfire.

Relief workers said about 40 casualties from the fighting, both civilians and soldiers, had been treated at an emergency field hospital set up by a Belgian agency at a Catholic hospital.

Hundreds of people, fearing tribal reprisals by either soldiers or rebels, have been trying to get into already overcrowded refugee compounds, some of which are protected by the all-Swiss International Committee of the Red Cross.

Refugees said many people jumped a wall Friday night to join them at the American community school. Western diplomats said some 17,000 people had gathered for safety at the compound of the U.S. government's ship-tracking transmitter - one of only seven of its kind in the world - which fell behind rebel lines on Monday.

Managers at the Omega station, just outside Monrovia, have refused rebel demands that they hand over Krahns and Mandingos among the refugees. Doe

is of the Krahn tribe, and Mandingos are accused of supporting him and growing wealthy during his corrupt ten-year administration.

The heaviest fighting Friday was around Monrovia Free Port, where residents said soldiers Friday afternoon shot their way into a warehouse and made off with scores of bags of rice belonging to the United Nations. The United Nations pulled out of Liberia after its compound full of refugees was attacked by soldiers in May.

They said the rice, a staple that has been in short supply, was later being sold for two Liberian dollars a cup. It normally would cost a few cents. The Liberian dollar is officially equal to the U.S. dollar.

Soldiers made people trying to find food at near-deserted stalls of the waterfront market walk past them with their hands held above their heads. A little boy tried to hold his palms outward and balance on his head a bucket of water filled from a gutter. The stench of a rotting corpse shot several days ago filled the air. People near the body were foraging in puddles of dirty water for water weeds to cook.

Creeks and wells in the city are crowded with people bathing or collecting water for cooking and drinking. Health officials feared outbreaks of cholera and other water-borne diseases.

A U.S. Embassy spokesman denied a report that the embassy had supplied water to Doe's Israeli-built mansion. He said a water tanker escorted by Marines had gone friday to a creek near the mansion to collect water for the embassy compound.

Around a supermarket, dozens of people gathered under umbrellas during a rainstorm Saturday morning. "I just want potatoes," said one man. Like most fresh vegetables, potatoes disappeared from stores and stalls more than a week ago. "I'll take anything, any food they have," said another Monrovian.

#90188u0884 07/07/1990 ~United Press International

(JULY 7) UPI - The Louisiana state Senate reconvenes this morning to consider a strict abortion bill. Governor Buddy Roemer vetoed the measure yesterday, but the House voted to over-ride his decision. The state Senate must approve any over-ride of a governor's veto, but there are indications the Senate might NOT have enough votes to do that. A two-thirds majority is needed.

When Japanese Prime Minister Toshiki Kaifu meets with President Bush in Houston today, he's expected to ask the president to end economic sanctions against China. The two leaders are meeting to preview next

week's economic summit which begins in Houston on Monday. The three-day conference is expected to focus on foreign aid to China and the Soviet Union.

Boris Yeltsin, the president of the Russian republic, was given a stony reception yesterday when he warned Communist Party leaders to implement radical reforms or face a possible popular uprising. Yeltsin made the comments during a speech in Moscow to the 28th Soviet Communist Party Congress, which is now in its sixth day. Yeltsin said the party can regain the nation's trust only through democratization.

The Massachusetts legislature ended a marathon session early this morning after approving the largest tax hike in state history. Under the measure, revenues totaling one-point-three-BILLION dollars would come from income, sales and gasoline tax increases. The measure is strongly supported by Governor Michael Dukakais, and aides say he may sign the bill during the weekend.

#90188u0889 07/07/1990 ~United Press International

PENSACOLA, FL (JULY 7) UPI - The study of UFOs has been a taboo topic even among those who study the paranormal, but an astronomer told participants at a UFO symposium Saturday that a bigger effort must be made in the "new science."

"We are like aboriginies, and a Coke bottle falls out of the sky," said Brian T. O'Leary, an astronomer and author about worldwide UFO sightings. "We don't know what to make of it."

O'Leary, of Phoenix, Ariz., was among the speakers at the 21st annual Mutual UFO Network symposium being held in northwest Florida through Sunday. The event has attracted 700 people, from experts in the field to average people interested in flying saucers and extraterrestrials.

Pensacola was chosen for the symposium because of more than 200 purported UFO sightings in the area since 1987. The most infamous sighting was in November 1987 in nearby Gulf Breeze, when Ed Walters claimed he took pictures of UFOs outside his home.

The Gulf Breeze sightings are among the topics to be discussed at the symposium. Other topics range from an update on Alabama sightings to a discussion about religion and UFOs.

O'Leary said he has been interested in the study of the universe since he was a boy, and was a mainstream scientist until he had some psychic experiences, including a near-death incident.

He said the 19th century gave the world its model of the universe, a world where the atom was the smallest object and the universe had immutable laws. But Albert Einstein and others found reality was different.

Over the years other areas of science have opened up, including the study of mind over matter and the fields of parapsychology. But even experts in those fields shun UFOs.

"UFO research is the black sheep of the black sheep of science," said O'Leary, referring to researchers in the paranormal. "UFOs are a taboo subject."

O'Leary likened the mainstream's resistance to a grieving process. First there is denial, then fear, then bargaining, and eventually acceptance. "Many haven't gone beyond denying," he said.

He noted that the Cold War between the West and East has ended, and it is time the world align itself as a species. He called for additional scientists to study the "new science."

O'Leary said the new science sees individuals as part of a greater whole, to the point where some see the earth as a living organism and people as cells of that whole. He likened a single person to being a flea on an elephant.

He also showed a slide of the supposed UFO photographed by Walters in 1987. It showed what appeared to be the bottom of the UFO, from which a portion of the inside appeared. "Maybe even this is a living organism," he said.

#90188u0917 07/07/1990 ~United Press International

WASHINGTON (JULY 7) UPI - Democratic and Republican members of a House panel that studies defense policy clashed over whether there is still a chance of an attack by Soviet conventional forces in Europe or elsewhere.

The House Armed Services Committee's Defense Policy Panel, in a report to be released Sunday, said the threat of a Soviet conventional attack is an "empty" one and the decline in Soviet conventional capabilities is irreversible.

But all 15 Republicans on the panel dissented from that central conclusion, saying Soviet power remains substantial even though it has declined in Europe and warning that modernization of Soviet nuclear weapons continues.

The report, titled "The Fading Threat: Soviet Conventional Military Power in Decline," was issued amid congressional debate on how deeply to cut President Bush's request for military spending in the 1991 fiscal year. Bush is seeking $306.9 billlion, but the House budget resolution granted him $283 billion.

The panel agreed the "worst thing" for lawmakers can do is spend too little on defense. But Democrats said the report showed the administration is being "overly cautious" in cutting spending, while Republicans disagreed and said in some areas - such as strategic weapons - spending possibly should go up.

The panel's report was based on an ongoing study of the Soviet military threat conducted since July 1988 and involving interviews and hearings with U.S. intelligence officials, private experts and senior Soviet officials. Its central findings are:

- The conventional threat to the United States and Western Europe is "greatly diminished and cannot be revived."

- The Soviet global conventional threat has not declined as quickly as in Europe but because of declining morale and resources "is becoming an empty threat - large-scale Soviet military interventions outside Soviet territory seems beyond the Red Army's powers, no matter who rules in Moscow."

- While the Soviet Union continues to modernize its strategic forces, the risk of nuclear war has "receded," because of the reduced chance of a small-scale conflict that could lead to a nuclear exchange.

- Soviet military spending is declining. The growing Soviet economic crisis "raises serious doubt" the Soviets can continue their current pace of weapons modernization and "adds significant uncertainty about what the Soviet threat will look like in the future."

Republicans said the report's tone was "over-confident" and "unjustified" - particularly with the future of a unified Germany in doubt and without a signed agreement yet on limiting conventional forces in Europe.

"Endorsing this report is tantamount to believing that the Soviet Union is already militarily impotent. ... Such a view is more wishful thinking that a reflection of reality," said Rep. Jim Dickinson, R-Ala., ranking Republican on the panel. But Rep. Les Aspin, D-Wis., panel and committee chairman, said the report shows "we can cut (defense) selectively without jeopardizing our security."

#90188u0984 07/07/1990 ~United Press International

MOSCOW (JULY 8) UPI - Foreign Minister Eduard Shevardnadze hailed Saturday the outcome of a historic NATO summit, saying the alliance's new stances on nuclear arms and troop levels are ''serious steps aimed at meeting us halfway.''

The heads of state from the 16 NAT0 countries, seeking to assure Moscow that the West is not a threat, concluded a two-day conference in London Friday with a declaration renouncing first use of atomic weapons and agreeing to negotiate possible troop reductions in a united Germany.

''An opportunity is emerging to make substantial progress in consolidating stability and confidence in Europe and the world as a whole,'' Shevardnadze told delegates to the 28th Communist Party Congress.

The NATO statement endorsed an enhanced role for the 35-nation Conference on Security and Cooperation in Europe, in line with Moscow's urging in recent months that the military roles of NATO and the Warsaw Pact be reduced and the two blocs move toward mutual assistance.

''The stands of NATO and the U.S.S.R. ... are identical in many respects '' Shevardnadze said. ''So these are serious steps aimed at meeting us halfway.''

President Mikhail Gorbachev, whom the Western leaders invited to address them in the future, welcomed the alliance's revamped strategy Friday, and

Foreign Ministry spokesman Gennadi Gerasimov said NATO Secretary-General Manfred Woerner will visit Moscow next week to discuss the rapid changes in Europe.

Delegates to the Communist conclave sharply criticized Shevardnadze and fellow Politburo member Aleksander Yakovlev, accusing them of losing Eastern Europe to anti-communist forces and prompting the disintegration of the Warsaw Pact.

''It is not the socialist system that has collapsed, but the system of distorted notions of socialism,'' Shevardnadze told the congress.

#90188u0992 07/07/1990 ~United Press International

BATON ROUGE, LA (JULY 7) UPI - The state Senate fell three votes short Saturday of enacting a near-ban on abortion over the governor's veto, dealing a perhaps fatal blow to efforts to pass the toughest state abortion law in the nation.

Senators agreed to a second vote, perhaps as soon as Sunday, although the Senate has no rule specifically allowing a veto override to be considered

twice.

Nevertheless, Senate backers of the bill were not optimistic. No governor's veto has been overridden in Louisiana in this century. "We need three votes," said Sen. Allen Bares, an abortion opponent from Lafayette. "I would not be optimistic."

But Rep. Louis "Woody" Jenkins of Baton Rouge, author of the measure, said he would not give up. "I think (the chances of an override are) good," he said. "I have faith. We'll keep up."

The upper chamber voted 23-16 to put the near-ban on abortion into effect. A total of 26 votes would have been needed to obtain the two-thirds majority needed to override Gov. Buddy Roemer's veto.

The Louisiana House had voted 73-31 to override on Friday, just hours after Roemer announced he was vetoing the bill because it did not allow abortions even in the case of pregnancies caused by rape or incest.

Immediately after Saturday's vote, the vastly outnumbered abortion-rights supporters began cheering in the balcony of the Senate chamber. More than 150 anti-abortion activists, many of whom wore "Override" bumper stickers on their chests, sat in stunned silence. During debate, some had openly prayed, others read Bible verses and some clutched rosary beads.

The measure would make it a felony to perform an abortion unless the woman's life was threatened by her pregnancy. The measure carried a maximum prison term of ten years and a fine of up to $100,000.

In his veto message, Roemer said that, as a congressman, he had voted for a no-exception abortion bill, but that he had changed his mind over the past decade and had decided exceptions should also be allowed for rape and incest.

"Women cannot and should not be forced to bear the consequences of these traumatic, illegal acts," the governor wrote in the message. "These exceptions are very important to the women of Louisiana whose rights and lives must also be protected."

The Senate had last month approved the bill 24-15, and only one senator, Lawson Swearingen of Monroe, changed his vote Saturday. Swearingen said he had voted for the bill initially because he hoped a compromise could be reached on the rape and incest clauses. Anti-abortion lawmakers on several occasions have flatly rejected any such compromise.

The Louisiana measure could represent the last effort in a state legislature this year to enact a law to challenge the U.S. Supreme Court's 1973 Roe vs. Wade decision, which struck down state bans on abortion.

Abortion opponents have had mixed results this year, passing restrictions in Pennsylvania and the territory of Guam, but failing in states like Florida and Idaho. The flurry of legislative action followed last year's Supreme Court ruling that states in some instances could limit abortions.

Several confrontations occurred outside the State Capitol building during Saturday's debate and, at one point, state troopers and Baton Rouge police stepped between anti- and pro-abortion activists. Several reporters were accosted and cursed by abortion opponents.

During the debate, one woman in the Senate balcony jumped up and - in response to a point that had been made on the floor - shouted, "Yes, there is. Yes, there is. Yes, there is. I said it. I said it. Abortion when I want it." She was hauled out of the chamber by two state troopers, but was not arrested.

#90188u0996 07/07/1990 ~United Press International

(JULY 7) UPI - A U-S Embassy spokesman in Manila says Americans are in danger of being attacked if they frequent the entertainment district of the Philippine capital. The spokesman says there is an unconfirmed threat to kidnap or kill U-S nationals unless the United States dismantles its six military bases in the Philippines. The spokesman says it is hard to tell if the threat is real and serious, but officials have an obligation to warn American citizens.

The Massachusetts Legislature gave final approval early today to the largest tax hike in state history... a one-point-three-BILLION-dollar package of increases in income, sales and gasoline levies. Democratic Governor Michael Dukakis supported the measure and could sign it into law during the weekend. Angry Republicans and tax-hike opponents said the supporters will face retribution at the polls in the Fall.

#90188u1007 07/07/1990 ~United Press International

CARACAS, Venezuela (JULY 9) UPI - The government will not sell its Citgo oil products firm in the United States, a top state oil company executive said Saturday.

The comments by the executive came one day after the president of the state oil company Petroleos de Venezuela, Andres Sosa Pietri, said that the government would allow transnational companies to participate in some oil exploration and development projects.

The executive, who asked not to be named, denied Citgo was up for sale.

Citgo will remain in Venezuelan hands ''because, in this moment, it has strategic value for the United States and Venezuela,'' he said.

The company refines and distributes petroleum products in the U.S. Midwest. It originally belonged to the Southland Corp., but was sold to the Venezuelan oil company in 1986.

''That Venezuela is the owner of Citgo is good news for the United States because it does not lack petroleum reserves,'' the executive said. ''One must not forget that this powerful nation was traumatized by the 1973 Arab oil embargo.''

Venezuela did not participate in the embargo despite its membership in OPEC, the Organization of Petroleum Exporting Countries.

#90188u1046 07/07/1990 ~United Press International

(JULY 7) UPI - President Bush has arrived in Houston for next week's Economic Summit of the seven major industrialized democracies. Bush is to hold face-to-face talks today with Japanese Prime Minister Toshiki Kaifu . Foreign aid to the Soviet Union and China is expected to take center stage at the summit. Bush and Kaifu oppose extensive aid to the Soviet Union.

In Moscow, delegates to the 28th Communist Party Congress today overwhelmingly approved unprecedented evaluations of their leaders. The decision to vote on the performance of each member of the ruling Politburo came after the party's ideology chief became the most recent Politburo member to indicate that he will leave his high post.

The fate of the nation's toughest anti-abortion legislation rests on the shoulders of the Louisiana Senate. The 39 senators reconvened today to consider over-riding the veto yesterday by Governor Buddy Roemer. The Louisiana House later voted to over-ride Roemer's veto, and if the Senate follows suit, the bill would become law.

There could be a meeting soon between Secretary of State Baker and Israeli's new foreign minister, David Levy. The foreign ministry says Baker sent a ''very warm and friendly'' letter to Levy, suggesting he's willing to meet. The Baker invitation signals the first high-level contact in more than four months between the two countries.

Forest fires raging through southern France has forced the evacuation of hundreds of vacationers from homes and campsites near La Londe. Officials say the wind-whipped blazes have charred more than 24-hundred acres of forest and brush. 17 people... including 15 firefighters... were slightly injured in the fires.

Seattle, Washington, is the scene of this year's annual international Alcoholics Anonymous convention. Some 71 countries are represented, including the Soviet Union. By yesterday, more than 45-thousand people had registered and more are expected to sign up for the four-day conference, which ends tomorrow.

CAIRO, Egypt (JULY 8) UPI - Libyan leader Moammar Gadhafi has asked his neighbor, Egyptian President Hosni Mubarak, to mediate between his country and the United States, well-informed sources said Saturday.

Gadhafi dispatched an aide, Mustapha el Kharoboui, to Cairo to deliver a message on the subject to Mubarak, the sources said.

El Kharoubi was accompanied by Gadhafi's cousin, Ahmed Gadhaf el Dem, Libya's intelligence service chief.

''In his message, Gadhafi urged Mubarak to exert mediation efforts in order to narrow the existing gap in the positions of Tripoli on the one hand and Washington on the other,'' a source said.

On April 14, 1986, U.S. warplanes bombarded targets around the Libyan capital of Tripoli and Benghazi after the United States charged Libya with aiding terrorists.

Last month, the Bush administration said it did not rule out the likelihood that Libya was building a second chemical weapons plant, adding that reports that a first plant was knocked out by fire appeared to have been a hoax.

#90188u1105 07/07/1990 ~United Press International
NEW YORK (JULY 8) UPI - The United States is planning a decisive blow against South American drug chiefs by staging a hemispheric drug raid using the armies of three nations where the cocaine cartel operates, a published report said Saturday.

Newsweek magazine said briefing papers obtained from the U.S. Southern Command headquarters in Panama documented plans for a raid carried out by the armies of Colombia, Bolivia and Peru and coordinated by the Southern Command.

The magazine attributed the plan to Gen. Max Thurman, head of the Southern Command who was responsible for the U.S. invasion of Panama and the

seizure of Panamanian strongman Manuel Noriega. It said the armies of the three participating countries would hit targets only in their own countries.

The attack would involve a massive use of force applied swiftly and simultaneously to the cartel's ''entire support structure,'' according to briefing documents.

Possible targets include the drug lords' homes, drug-processing centers and clandestine airfields used for drug smuggling, the magazine said.

Although U.S. troops are slated to play only a background role in the strike, Thurman is prepared to use them if the need arises, the magazine said.

The Pentagon also has plans to send American commandos to seize at least two Colombian drug chiefs if President Bush gives the order, Newsweek said.

No date has been picked for the attack, but Newsweek said it had been told by a senior Southern Command officer that the intelligence necessary to pick targets would be ready as early as August.

#90188u1284 07/07/1990 ~United Press International

BATON ROUGE, LA (JULY 8) UPI - Diana Townsend raised her hands to the sky bowed her head, and prayed for the state Senate to override Gov. Buddy Roemer's veto of legislation calling for a ban on virtually all abortions in Louisiana.

It was a scene repeated over and over on the steps of the state Capitol by about 1,500 mostly anti-abortion supporters, who gathered for the battle to enact the nation's most restrictive state abortion law.

''Some of these woman here really don't know anything,'' Townsend said as she watched the abortion-rights group standing on the steps. ''Being a mother is what it's all about. That's what the Lord made women to do.''

A few feet away from Townsend, Tara Banning, an abortion-rights activist, held up a sign that read ''300 Kids in Lake Charles Need Homes! Sign Here:'' Nine of the anti-abortion supporters signed up to adopt the children.

Inside the Senate chamber, the chant ''override'' could be heard for the final three hours of debate on the override measure - which failed by three votes as the upper chamber sustained Roemer's veto of the anti-abortion bill.

Speakers were set up outside so the protesters could hear what was going on inside the chamber. The public observation areas of the chamber had filled to capacity earlier in the day, with a majority of the 200 wearing ''Override'' bumper stickers on their chests.

In the chamber, many anti-abortion activists prayed, raised their arms, read Bible verse or clutched rosary beads as lawmakers debated.

Several reporters complained of being accosted outside by anti-abortion supporters. One told of being grabbed by a woman who asked him if he was a reporter.

When he said he was, the woman told him to get the story straight and called him an obscene name.

Another reporter was grabbed by a middle-age man, who asked him to pray with him. The reporter wrestled away from the man, who began shaking both fists and jumping up and down as if in a trance.

While outside, the anti-abortionists fell to their knees in prayer. Some clapped and sang ''Jesus Loves the Little Children.''

Many of the protesters had arrived at the Capitol as early as 8 a.m. As the temperatures rose into the upper 90s and emotions ran hot, some of the anti-abortion supporters brought cups of ice and water to the abortion rights groups.

Some people, however, were not quite as nice.

A woman identifying herself only as Barbara from Baker, La., stood on the edge of the Capitol lawn, far away from the shouting anti-abortion groups held a sign that read, ''Support Vasectomies.'' Barbara said several anti-abortion supporters approached her, read her sign and said, ''Your father should have had one.''

''I'm just really amazed,'' Barbara said. ''The pro-life groups have a very, very un-Christian-like attitude.''

The protest at times became a shouting match between the two groups. At one point state troopers stood between the groups because of reports that some anti-abortion activists were spitting on the abortion-rights groups.

Most of the noise was made by the anti-abortionists, who far outnumbered their competition and kept shouting for nearly three hours. Shouts of ''sustain'' could be heard from the abortion-rights activists.

The anti-abortion supporters fell silent and appeared stunned as the vote of the Senate sustaining the veto was made public. The anti-abortion group

watched the abortion-rights activists scream and chant and clap and hug each other.

#90188u1287 07/07/1990 ~United Press International

(JULY 7) UPI - Leaders of the world's major industrialized democracies are gathering in Houston for next week's Economic Summit. Formal talks begin Monday at Rice University. But today President Bush and the Japanese Prime Minister, Toshiki Kaifu, got together to talk about their opposition to providing extensive aid to the Soviet Union. Kaifu hoped to persuade Bush to relax U-S intensity about Soviet concerns and resume formal contacts and economic assistance to China.

The Louisiana Senate is debating whether to over-ride the veto of the nation's toughest anti-abortion bill. Governor Buddy Roemer vetoed the legislation yesterday but the House voted to over-ride and if the Senate gets the 26 votes it needs for an over-ride, the bill would become law. NO Louisiana governor in modern times has had his veto over-ridden, and senators say privately that anti-abortion lawmakers are short of the two-thirds vote needed.

Iran's official news agency and diplomatic sources in Damascus, Syria, indicate that a Western hostage in Lebanon may be freed soon. The Iranian News Agency did NOT identify which of the 16 Western hostages held by pro-Iranian fundamentalist groups in Lebanon would be let go. But the diplomatic sources say it would likely be Anglican church envoy Terry Waite. Waite was kidnapped in Moslem west Beirut in 1987, while trying to negotiate the release of other hostages.

#90188u1327 07/07/1990 ~United Press International

SAN FRANCISCO (JULY 8) UPI - With a hymn and a prayer, a Lutheran disciplinary panel opened hearings Saturday against two small churches that broke rules by ordaining three homosexuals as ministers.

A 12-member committee representing the 5.3 million member Evangelical Lutheran Church of America met with some 150 members of the San Francisco congregations of St. Francis Lutheran Church and First United Lutheran Church to weigh whether the two churches should be removed from the ELCA for disobeying Lutheran guidelines that bars ordination of homosexuals.

Observers said it was the first time in Lutheran history that church members, not just pastors, have been subject to disciplinary hearings. The hearings are scheduled to end Monday.

Panel co-chairman the Rev. Rudolph Ramseth, a retired pastor living in Sacramento, Calif., said the committee had a ''heavy burden.'' Its decision, he said, could have far-reaching effects not only for the accused parishes but ''quite likely for the church universal.''

ELCA attorney Robert Brorby said that while the churches did not show ''evil intent,'' they knowingly made a choice contrary to rules followed by 11,000 other Lutheran churches ''and must accept the consequences.''

He acknowledged the case is difficult.

''Nothing that will happen here will give me any pleasure or joy. There's no way I'm going to come out of this hearing happy,'' he said.

In their defense, First United Lutheran Church and St. Francis Lutheran Church, which have congregations of 100 and 130, gave the panel 115 statements by church members supporting one gay and two lesbian ministers who were ordained Jan. 20. A number of witnesses from the churches testified before the church panel.

The first was Mary Bell Smith, 75, a lifelong Lutheran who attends St. Francis and whose son is gay.

''Working with gays and lesbians, I know them to be truly worthy and have seen and felt the hurt the church has placed on them through the centuries '' said Smith, who is active with the group Parents and Friends of Lesbians and Gays, Inc.

The Rev. James DeLange, 56, a grandfather who is pastor of St. Francis, said that about half of his congregation is gay or lesbian. He explained that a ministry, supported by 13 Lutheran churches in San Francisco, was started to reach the homosexual community.

DeLange said the St. Francis congregation has supported the ELCA and disagreed with it only on the rules barring homosexuals from being named as ministers.

DeLange said the Lutheran reaction to naming the gay and lesbian ministers has been described by some bishops as ''divisive and counterproductive'' to church goals.

''But I am convinced our action has given them permission to put these issues on the table for discussion,'' he said. ''Only history will tell us if our action helped or hindered the cause of gay and lesbian rights in the church.''

United Lutheran has named Jeff Johnson, 27, who is gay, to the ministry. St. Francis named a lesbian couple, Phyllis Zillhart, 32, and Ruth Frost, 42, as ministers to establish a Lutheran Lesbian and Gay Ministry for the homosexual community.

Testifying before the panel, Frost said the battle was over ''inclusion'' in the church, which she said is supposed to open its arms to the oppressed and disenfranchised.

''We are offering a ministry of affirmation and spiritual care to people who have long been denied it,'' said Frost.

Ramseth said the panel was ''earnestly that the presence of the Holy Spirit is very real and will bestow on us the word of wisdom'' to deal with the issues raised.

The panel said it wouldn't make an immediate decision in the case but would eventually render a written ruling on whether to expel, censure or temporarily suspend the two churches from the national body.

#90188u1361 07/07/1990 ~United Press International

(JULY 7) UPI - In a meeting with President Bush in Houston today, Japanese Prime Minister Toshiki Kaifu hopes to persuade Bush to resume formal contacts and economic assistance to China. But that does NOT appear likely one year after China's crackdown on its democracy movement. Bush and Kaifu will stay in Houston to prepare for next week's Economic Summit.

The atmosphere is described as electric in the Louisiana state Senate chamber... where lawmakers are debating over-riding a veto of the nation's toughest anti-abortion law. Since Louisiana's House approved the over-ride last night, Senate approval would turn the bill into state law.

The official Iranian news agency today said pro-Iranian Moslems in Lebanon may soon free a Western hostage... most likely a European. Syrian-based diplomatic sources say the hostage will likely be Anglican Church envoy Terry Waite. The sources said Waite's church extended significant aid after last month's earthquake in Iran.

Confusion in Bulgaria. Political leaders are scrambling to find a replacement for former President Peter Mladenov, who resigned last night amid controversy over suggesting six months ago that tanks be used to quell anti-government protests. His resignation further complicates the country's transition to a multi-party democracy.

Albania today declared an amnesty for its citizens seeking refuge in foreign embassies in the capital city of Tirana . The government said the refugees are free to pick up their passports and leave the country. But diplomats say NOT all of the refugees want to leave the country... they are simply afraid of the Albanian police.

#90188u1363 07/07/1990 ~United Press International

HOUSTON (JULY 8) UPI - Hundreds of protesters screamed obscenities and shook their fists in anger Saturday at more than 50 Ku Klux Klan members protesting the upcoming Economic Summit, while police stood by in riot gear.

No injuries or incidents of physical violence were reported.

More than 450 city police officers roamed through the crowd on horseback and by foot as the protesters booed, cursed, and screamed at the Klan members, who were demonstrating against the three-day summit.

Leaders of the seven major industrialized democracies will participate in the summit, which begins Monday.

Police earlier in the day found large pieces of jagged metal scattered throughout the parade route, a spokesman said.

''These definitely could have been used as potential weapons, but we have no way of knowing for sure that they would have been,'' Officer E.D. Hillman said. ''A witness told us he saw a white truck hurriedly leaving the immediate area where some of the metal was found.''

Police barricades and ropes kept protesters back from the parade route, but some people had face-to-face confrontations with Klan members. One red-faced man shook his fist while yelling, ''Open your mind!''

Using the threat of arrest, police repeatedly warned reporters and photographers not to enter certain areas, citing security risks for the upcoming summit. The Klan, however, were allowed to march through those particular areas.

The Klan members represented the White Camelia Knights of the Ku Klux Klan and the Texas White Knights, both from the city of Humble.

''We want to let George Bush and some of these other world leaders know that white racism and white power are both alive and well in America,'' said Charles Lee, a spokesman for the Klan.

''We are opposed to the summit taking place at all because we think what they (delegates) are going to be doing is actually plotting against the American taxpayer,'' Lee said. ''They have people coming down here representing Japan, when those people (Japanese) are waging an economic war against our country.''

-30- 2302

#90188u1507 07/07/1990 ~United Press International

(JULY 7) UPI - President Bush huddles with Japan's prime minister in Houston... Louisiana's Senate today fails to over-ride the governor's anti-abortion-bill veto... And diplomatic sources predict that a Western hostage may be freed soon in Lebanon... U-P-I has details of these top stories and more, next.

President Bush told Japanese Prime Minister Toshiki Kaifu today that he's pleased with the Soviet Union's reaction to the recent NATO summit.

Bush briefed Kaifu on the summit at a meeting in Houston... a prelude to this week's Economic Summit of the seven major industrialized democracies.

The White House says Bush also offered his ''personal reflections'' on the NATO meeting in a cable to Soviet President Gorbachev .

White House spokesman Marlin Fitzwater said the president expressed encouragement about Gorbachev's economic reform program.

Fitzwater says Bush told Kaifu that Soviet comments show they ''believe the summit was very productive and heartening to what they want to do.''

NATO's meeting in London ended yesterday with pledges of non-aggression, reduced reliance on nuclear weapons, speedier arms reductions and limits

on armed forces in Europe.

But the world's economic powers may NOT be as forthcoming with financial aid for Moscow in their formal talks... which begin on Monday at Rice University.

-30- 1517

#90188u1510 07/07/1990 ~United Press International

(JULY 7) UPI - The Louisiana Senate today failed to over-ride a veto of what would have been the strictest anti-abortion law in the nation.

The state Senate in Baton Rouge voted 23-16 for the measure... but that's three votes short of the two-thirds majority necessary for the over-ride.

But the upper chamber may have at least one more chance to enact the measure. The issue of how and when the Senate can again vote is clouded. There are NO rules covering a second vote on an over-ride in the state Senate.

Immediately after the vote, a handful of abortion-rights activists shouted and cheered, while more than 150 anti-abortion supporters sat sullenly in the chamber.

Outside... more than one-thousand anti-abortion activists fell quiet after chanting ''over-ride'' for more than three hours.

The measure would make it a felony to perform any abortion unless the woman's life was threatened by the pregnancy. Any person convicted of the crime would face up to 10 years in prison and a fine of up to 100-thousand dollars.

Governor Buddy Roemer describes himself as an opponent of legalized abortion... but vetoed the bill yesterday because it did NOT contain exceptions for rape and incest. Hours after the veto, the House voted to over-ride.

-30- 1429

#90188u1514 07/07/1990 ~United Press International

(JULY 7) UPI - Freedom may come soon for one of 16 Western hostages held by pro-Iranian Shiite Moslem groups in Lebanon.

Iran's official news agency today quotes well-informed sources in the Lebanese capital of Beirut as saying that a Western hostage will be released and that he probably will be a European.

Diplomatic sources in Damascus, Syria, confirm the report... saying the

lucky prisoner will likely be Anglican Church envoy Terry Waite. He was abducted in Moslem west Beirut in 1987, while trying to negotiate the release of other hostages.

The sources say the Anglican Church sent much aid to the victims of last month's earthquake in Iran that killed an estimated 40-thousand people.

But a Moslem official in Beirut said it may be Irishman Brian Keenan who will be set free.

Keenan holds dual Irish and British citizenship and was an English teacher at the American University of Beirut when he was abducted in 1986. Ireland has attempted in recent months to forge stronger ties with Iran... and three Irish senators visited Tehran a week ago to appeal for Keenan's release.

NO group has claimed responsibility for either hostage's disappearance.

A pro-Iranian group freed American hostages Robert Polhill and Frank Reed from Lebanon this spring.

-30- 1445

#90188u1522 07/07/1990 ~United Press International

(JULY 7) UPI - Bulgarian leaders are knocking heads together to try to come up with a fast replacement for former President Peter Mladenov , who quit late last night amid an escalating controversy.

The liberal communist's resignation... unprecedented in modern Bulgarian history... ended weeks of criticism over a suggestion he muttered six months ago during anti-government protests.

He said, ''Let the tanks come''... a remark captured on videotape and almost forgotten until political opponents used it against him in the closing days of parliamentary elections last month.

Within hours of the president stepping down, leaders of the major political parties began debate on who should be the country's next chief executive.

And while NO clear favorite has so far emerged, most contenders whose names are being circulated are NOT members of the ruling Bulgarian Socialist Party... or former communist party.

The confusion further complicates the country's transition toward a multi-party state.

Mikhail Gorbachev lost patience today with the 28th Communist Party

Congress.

The Soviet president lashed out at conservative delegates who for the past week have grilled his top supporters as well as ripping his reforms.

Gorbachev managed to hold his tongue through the morning session as he watched delegates interrogate one Politburo member.

But then the conclave turned on Foreign Minister Eduard Shevardnadze about speeches he had made praising the late discredited Soviet leader Leonid Brezhnev.

Shevardnadze braved the criticism by saying his youthful support of Brezhnev and even of Joseph Stalin was a result of what he called his ''tragically fated generation.''

Afterwards, Gorbachev took the podium and said the congress was dangerously close to becoming a ''kangaroo court.''

Gorbachev also warned that conservatives are ''heading straight back to 1937,'' an allusion to the peak of Joseph Stalin's deadly purges of party officials.

Delegates backed off after the speech, reversing an earlier decision to subject each party leader to a vote on his performance.

-30- 2300

#90188u1532 07/07/1990 ~United Press International

(JULY 7) UPI - ARCO Chemical Company today said the use of contract workers at its plants in NO way contributed to an explosion and fire that killed 17 workers.

ARCO president and chief operating officer Harold Sorgenti said contract people have worked for years at the plant in Channelview, Texas... and their expertise is as strong as ARCO's own employees.

ARCO chairman of the board Lodwick Cook said ARCO does NOT operate with contract employees just for the sake of a cost-cutting measure... but to- in his words- ''provide continuity.''

The Oil, Chemical and Atomic Workers International Union yesterday linked use of what it called ''untrained'' contract workers to unsafe conditions that have allegedly made plant accidents ''predictable but preventable.''

Of the 17 people who died in Thursday night's blast and fire, 12 worked on a contract basis. One was a contract truck driver, and five were ARCO employees.

The explosion was touched off in a waste-water treatment unit... perhaps by a spark from a generator.

New York police reportedly are zeroing in on the self-dubbed ''Zodiac'' gunman.

A report says detectives have narrowed the field of suspects to three to five men who fit the developed profile. That description is of a six-foot-tall, 180-pound black man with an interest in ballistics and astrology.

The report quotes an unnamed official as saying detectives are watching the men closely... especially as police are preparing to throw out a city-wide dragnet on Wednesday night and early Thursday... the 21st day since the gunman's last attack.

Police note that the Zodiac shooter has so far struck every 21 days.

Another report says police were unable to trace a possible suspect by a partial fingerprint lifted off a letter from the gunman.

News sources say the print turned up NO match for the print in local, state and F-B-I files.

The gunman has killed one man and wounded four people whose astrological signs he somehow knew.

-30- 2179
#90188u1537 07/07/1990 ~United Press International
(JULY 7) UPI - Seattle, Washington, is the host city for what may be the world's biggest support group.

That's because at least 45-thousand conventioneers are meeting to celebrate the 55th anniversary of Alcoholics Anonymous at the 1990 Alcholics Anonymous and Al-Anon International Convention.

The group is a melting pot of nationalities and backgrounds.

Members come from 71 countries... some as far away as the Soviet Union and Australia.

18 conventioneers are younger than 15, while two-thousand are older than 65.

And the majority of them has NOT touched alcohol in at least four years.

The three-day convention is the biggest ever held in Seattle.

The city's tourist bureau estimates that each visitor will spend about one-thousand dollars... ultimately bringing in about 45-MILLION dollars, none of it spent on booze.

-30- 1004

#90188u1575 07/07/1990 ~United Press International

PEORIA, IL (JULY 8) UPI - The family of a mine engineer held captive for 61 days by Colombian rebels in the Amazon jungle put on a ''thank-you fiesta'' Saturday for the people who helped raise the $60,000 ransom that freed Scott Heimdal.

''They're warm, compassionate, supportive - even when things looked really really bleak,'' Heimdal's mother, Marge, said of the people who helped them in Peoria, a city of 125,000 in central Illinois.

The party was held at a city park and more than 200 people shook hands with Scott Heimdal, Marge, his father Roy, his sisters Linda and Angie, and his Ecuadoran fiancee, Sandra Durango.

Heimdal was kidnapped April 28 as he traveled by motorized canoe on a river near the border of Ecuador and Colombia, near where he was employed at a gold mine. He was held for 61 days. Heimdal said members of the EPL, the Popular Liberation Army, kept him in good health as they moved through the Colombian jungles during negotiations over a ransom.

The rebels ultimately decided on a figure of $60,000. Marge and Roy Heimdal alone could not afford that sum, but they made an appeal to people in Peoria and the five-figure amount was raised in less than four days.

The Heimdals then flew to Quito, Ecuador, to personally bargain for their son's safe release.

Scott was found June 29 by Ecuadoran police in a boat on the San Miguel River. He was transported to Quito, and the reunited family returned to Peoria last week - just in time for Scott's 28th birthday Thursday.

''I'd call it a thank-you fiesta,'' Marge Heimdal said of Saturday's reception.''We're sharing Scott because he belongs to Peoria now - not just mom and dad.''

-30- 1882

#90188u1596 07/07/1990 ~United Press International

ENNIS, MT (JULY 8) UPI - Earth First! members trickled into the Gravelly Mountains Saturday for their annual Round River Rendezvous hours after a

federal appeals judge refused to block the meeting.

About 20 members of the radical environmentalist group set up portable toilets, solar electricity panels, a bicycle generator, stage and beer depot for the estimated 300 to 500 wilderness advocates and musicians expected to camp amid the Douglas fir trees and wild roses, strawberries, lupen and yarrow by midweek.

Judge Alex Kozinski of the 9th U.S. Circuit Court of Appeals in San Francisco Friday night refused an emergency request to halt the 11th annual Earth First! Round River Rendezvous.

It was the third legal defeat in a week for the conservative Mountain States Legal Foundation and 77 other plaintiffs, who claimed the Forest Service permit for the meeting should be revoked because Earth First! members would spike trees, sabotage mining equipment or booby-trap off-road vehicle trails if allowed to meet.

Kozinski said the plaintiffs, including several mining and snowmobile groups, failed to prove they would be significantly harmed by the gathering, or that their case would likely prevail if given a full hearing.

Earth First! members setting up camp Saturday claimed ignorance when asked if they knew of any members spiking trees or committing other sabotage against loggers. But several said they had sat in ancient trees to prevent clear-cutting and engaged in other acts of civil disobedience.

Earth First! organizer Philip Knight of Bozeman, Mont., said the annual meeting might offer workshops on ecological sabotage techniques, such as how to spike a tree without killing it.

The nine-day permit period for the Rendezvous began Saturday, but Knight said plans for workshops and talks were ''haphazard,'' and none would be held before Monday.

Though some Earth First! members said civil disobedience had occurred after previous Rendezvous gatherings, they said no such actions had ever occurred during such a meeting.

The U.S. Forest Service, Madison County Sheriff's Department and a nearby talc mine increased security Saturday to handle the Earth First! influx. But law enforcement was obvious only at the gravel road leading to the mine, where a sheriff's deputy sat in his patrol car behind a ''Road Closed'' sign.

No Earth First! members had attempted to approach the mine, which had also added private security guards, the officer said, adding that a deputy would guard the road site for the duration of the meeting.

-30- 2780
#90188u1619 07/07/1990 ~United Press International
(JULY 7) UPI - Top Bush administration officials today restated White House opposition to aid for Moscow. White House Chief of Staff John Sununu said that the Soviets are a long way from economic reform. Aid to the Soviet Union promises to be a divisive issue at Monday's summit in Houston of seven top economic powers.

The Louisiana Senate today came three votes short of over-riding a veto of the nation's toughest anti-abortion bill. There are NO clear rules on whether the issue can be considered again, but members agreed to allow a second vote, which could come tomorrow. The House has already voted to over-ride the veto.

A Lutheran disciplinary panel opened hearings in San Francisco today against two churches that broke rules by ordaining three homosexuals as ministers. A panel co-chair said the committee's decision on whether to expel the churches could affect churches around the world.

About 10-thousand African National Congress supporters marched on police stations today in 10 cities in South Africa. The protest was aimed at the government's failure to curb black-on-black violence. Turnout was lower than expected, and the A-N-C conducted half the marches they planned to cap a ''Week of Action'' in strife-torn Natal province.

Solidarity leader Lech Walesa refused comment today following a meeting with Polish Prime Minister Tadeusz Mazowiecki to discuss their growing differences about the pace of reform. Walesa has ripped Mazowiecki for NOT weeding communists from the bureaucracy faster.

#90188u1623 07/07/1990 ~United Press International
(JULY 7) UPI - Colombian officials say army troops discovered five-Million dollars in cash stuffed into garbage cans on a Bogota-area farm yesterday. Police say the farm was owned by the brother of a former top member of the Medellin cocaine cartel gunned down in a police shoot-out seven months ago.

About two-thousand people are partying on a popular Long Island beach today, an annual event hosted by a number of fraternities. New York police say they have dramatically beefed up security at Jones Beach to avoid a repeat of last year's party violence that left three people with gunshot wounds.

An employee at a Dallas nightclub says tonight's show featuring the

controversial rap group 2 Live Crew will go on as scheduled... despite yesterday's cancellation by the Dallas Fire Department. The employee says club owners are NOT particularly concerned about the group's alleged pornographic rap music.

#90188u1852 07/07/1990 ~United Press International

(JULY 7) UPI - The Bush administration is staking out its position against economic aid for the Soviet Union. Three top Bush advisers today spoke out against the aid in preparation for Monday's start of an international economic summit. White House Chief of Staff John Sununu said he's concerned assistance would stifle rather than promote economic reform. President Bush met in Houston today with Japanese Prime Minister Toshiki Kaifu, who also opposes aid to Moscow.

Louisiana senators say they may try again tomorrow to over-ride a veto of a bill that'd outlaw all abortions except where a woman's life is at stake. Earlier today, the senate fell three votes short of the two-thirds majority needed to make the bill a law. Governor Buddy Roemer vetoed the measure yesterday because it did NOT make exceptions in cases of rape or incest.

Middle East sources confirm Iran's report today that a Western hostage will soon be freed by a Moslem group in Lebanon. Diplomatic sources in Syria believe it will likely be Anglican Church envoy Terry Waite. The sources say Waite's church sent a lot of aid to Iran following last month's earthquake. But a source in Beirut says Irishman Brian Keenan may be the one set free. Three Irish senators visited Tehran a week ago to appeal for Keenan's release.

Soviet President Gorbachev lashed out at delegates at the 28th Communist Party Congress today. Gorbachev says the delegates' decision to review each individual Politburo member on his performance smacked of the political witch hunts during the Joseph Stalin era. Delegates responded by deciding to issue a collective judgment on the entire Politburo and the Central Committee.

#90188u1872 07/07/1990 ~United Press International
(JULY 7) UPI - A House panel is set to release a report that says the Soviet conventional military threat in Eastern Europe is ''empty'' and the decline of Soviet conventional capabilities is irreversible. But all 15 Republican members of the House Armed Services Committee panel dissented from the conclusion that's due out tomorrow. They say Soviet power remains substantial, even though it has declined in Europe.

Stormie Jones... the world's first heart-liver transplant recepient... was released from a Pittsburgh area hospital today after suffering what was called a ''mild episode of rejection.'' Doctors say they have monitored the 13-year-old Texan since Thursday in order to re-adjust doses of an anti-rejection drug. Jones has been in and out of the hospital seven times since 1988.

French police arrested the president of the Church of Scientology and two other church officials today in Paris on charges of fraud and practicing medicine without a license. Court sources say the indictments stem from the death of a church member who killed himself after checking into the dianetics clinic in 1988. The group... which claims to promote the science of mental health... has been accused of being a cult.

Eau Claire, Michigan, has crowned a new champion of cherry-pit spitting. Rick ''Pellet Gun'' Krause of Sparta spit into the wind today to successfully defend his title in the 17th annual competition. Winds gusting up to 15 miles an hour prevented ''Pellet Gun'' from matching his record spew of more than 72 feet. But his 50-footer was good enough today. Brian Krause... who's a son of the ''Pellet Gun''... took the 12-and-under competition.

-30- 1835

#90188u1958 07/07/1990 ~United Press International
(JULY 7) UPI - The Liberian government has announced a cease-fire with rebels... but NOT everyone was listening. Last night's announcement came from President Samuel Doe's mansion by way of a two-way radio on the frequency used by the state radio station, which went off the air earlier this week. Residents of the capital of Monrovia say they want to believe the announcement... but canNOT. The rebels have made NO reply, and intermittent fighting continued today.

Solidarity leader Lech Walesa and Polish Prime Minister Mazowiecki met for five hours today in Warsaw to discuss their sharp differences over the pace of reform and the direction of the economy. Walesa refused comment after the meeting, but a communique said both leaders will ''continue to cooperate in the interest of the country.'' The meeting comes as Polish farmers demonstrated in the Polish capital to demand higher prices for their crops.

A U-N report says Third World debt has doubled in the past ten years to one-point-two-TRILLION dollars... and will only get worse unless rich nations extend a helping hand to poorer nations. The study said it is unjust that 70 percent of the world income is held by 15 percent of the world's population. Findings also suggest poor nations can reduce debts by increasing exports and re-investing domestic earnings.

European environmental officials... many of them from Eastern Europe... arrive tomorrow in Knoxville, Tennessee, to study U-S efforts to deal with pollution. The University of Tennessee is hosting the 17-day event... which will be attended by seven countries. An organizer of the conference says Eastern Europe is fighting a serious pollution problem and is two decades to three decades behind America, technologically.

-30- 1926
#90188u2060 07/07/1990 ~United Press International
(JULY 7) UPI - A defeat for abortion foes in Louisiana...

The Bush administration repeats its opposition to economic aid to Moscow...

And, firefighters battling wildfires in Alaska get some help from the weather...

These stories... and more... next, from United Press International:

Abortion-rights supporters have won the battle, but the war is NOT yet over.

The Louisiana Senate fell three votes shy today of the two-thirds majority needed to over-ride a veto and pass the toughest state abortion law in the nation.

But senators have agreed to a second vote on the issue- possibly tomorrow- before the session adjourns on Monday.

The bill's sponsor... Representative Louis ''Woody'' Jenkins... says he has NOT given up hope and says the chances are ''good'' for an over-ride. But other senate backers are NOT as optimistic... especially since NO governor's veto has been over-ridden in Louisiana this century.

The Louisiana House passed the bill with a two-thirds majority yesterday, only hours after Governor Buddy Roemer announced he had vetoed it. Roemer... who counts himself as an abortion foe... said he refused to sign the bill because it did NOT make exceptions in the case of rape or incest.

Louisiana is one of several states that has attempted to ban abortions

this year. Restrictions on abortions have passed in Pennsylvania and the territory of Guam, but failed in states like Florida and Idaho.

The flurry of legislative action followed last year's Supreme Court ruling that states in some instances could limit abortions.

-30- 1739

#90188u2083 07/07/1990 ~United Press International

(JULY 7) UPI - Preparing for an international showdown over aid to the Soviet Union, the Bush administration has come out with its guns blazing.

Three top Bush advisers today spoke out against monetary aid to Moscow... citing Soviet aid to Cuba and heavy Soviet spending on its military. The issue may divide the upcoming Economic Summit, set to begin Monday in Houston.

West Germany, Italy and France support Soviet aid.

President Bush met in Houston today with Japanese Prime Minister Toshiki Kaifu... who, along with Great Britain, also opposes aid to Moscow.

Kaifu will instead argue for ending a ban on loans to China imposed after Beijing's bloody crackdown on pro-democracy demonstrators last year. Japan has the closest cultural and geographical links to China of any of the summit nations and has been rapidly increasing its economic ties.

Houston got off to a rocky start in greeting its foreign visitors. Hundreds of protesters screamed obscenities and shook their fists today at more than 50 Ku Klux Klan members protesting the Economic Summit. NO injuries or fights were reported.

A spokesman for the Klan says they want to let world leaders know that... in his words... ''white racism and white power are both alive and well in America.''

Fire officials hope a new system of cooler, moister air will help them gain an upper hand in the parched Alaskan interior... where lightning-sparked wildfires continue to burn despite an all-out effort to contain them.

But the Weather Service says there's NO real break in sight for what has been an usually hot season. Temperatures have hit 90 degrees and above in areas as far north as the Artic Circle perimeter.

The Alaska Fire Service says an estimated 185 fires have charred some 280-thousand acres so far.

The biggest, deadliest threat continues to be the 47-thousand-acre fire near the town of Tok. The blaze has quadrupled in size since Wednesday, when it jumped natural and man-made firelines.

Another 35-thousand-acre fire continues to rage in the Yukon Flats National Wildlife Refuge.

Governor Steve Cowper... returning from an aerial inspection of the countryside... says firefighters are concentrating on blazes that jeopardize life and property.

-30- 2437

#90188u2106 07/07/1990 ~United Press International

(JULY 7) UPI - A report is out that the United States plans to mastermind a military strike by three countries against the drug cartels that plague them.

The published report says briefing papers obtained from the U-S Southern Command in Panama plan a raid to be carried out by the armies of Colombia, Bolivia and Peru.

The magazine attributes the plan to the chief of the Southern Command... General Max Thurman... who was responsible for the U-S invasion of Panama. It says the armies of the participating countries would hit targets only in their own countries.

The report says possible targets include drug lords' homes, drug-processing centers and clandestine airfields.

U-S troops are slated to play only a background role, but Thurman is allegedly prepared to use them if the need arises.

The Pentagon also reportedly has plans to send American commandos to seize at least two Colombian drug chiefs if President Bush gives the order.

According to the report, NO date has been picked for the attack... but the intelligence necessary to pick targets will be ready as early as August.

Government troops in Kenya reportedly have established uneasy control in the country's capital following a day of clashes between troops and pro-democracy demonstrators.

The crackdown followed an open-air meeting in Nairobi that turned violent when some 500 demonstrators called for a multi-party system and demanded the release of two former politicians arrested Wednesday for supporting pluralism.

Thousands more gathered to watch the banned demonstration. Violence broke out when participants spotted and attacked a man whom they believed was a plainclothed police officer.

Five truckloads of paramilitary troops used tear gas and clubs to try to scatter the rampaging demonstrators. And UNconfirmed reports say government forces also used live ammunition.

By dusk, troops had succeeded in clearing many of the streets as police armed with ax handles patrolled in their cars.

Kenya President Daniel Arap Moi outlawed organized political opposition after a 1982 coup attempt.

-30- 2286

#90188u2114 07/07/1990 ~United Press International

(JULY 7) UPI - Albania says citizens seeking protection in foreign embassies are free to leave the country.

The communist government of the southeastern European country today declared an amnesty for the thousands of people who've flooded the foreign embassies in Tirana, the capital. Albania says they may pick up their passports and leave the country.

It is NOT immediately clear whether the refugees will do so. Earlier offers by the government to provide passports were met with skepticism.

Budepest radio reports Hungarian diplomats were told they could escort the refugees to the passport offices to ensure the government keeps its word.

The amnesty announcement came one day after Albania's communist leader promised to introduce sweeping democratic reforms in Europe's most isolated and controlled state. But, despite the promises of change, hundreds of Albanians continued streaming into foreign embassies overnight.

The West German government says it will make a joint appeal with the French and Italian governments for safe passage out of the country for the refugees.

A Texas judge apparently believes in the old saying that the show must go on.

Civil District Judge Merrill Hartman this afternoon agreed to let the controversial rap group 2 Live Crew perform at a Dallas nightclub tonight.

The judicial injunction halts earlier action taken by the Dallas Fire Department to cancel the performance.

Fire inspectors had said the Longhorn Club did NOT have the correct type of permit to host the show. They issued a statement yesterday... saying although the facility had a license to operate as a private club, the license would NOT permit the sale of tickets for admission to the public.

The legal storm is the latest to greet the band since a Florida judge ruled its album, ''As Nasty As they Wanna Be,'' obscene.

There are indications that more than two-thousand advance tickets have been sold for tonight's performance, which goes to prove another saying- NOTHING sells like censorship.

-30- 2218

#90188u2119 07/07/1990 ~United Press International

(JULY 7) UPI - A minister and author told a U-F-O symposium today that most clergy would like the government to keep quiet if it has proof of alien visitors.

Barry Downing... pastor of a church in Endwell, New York... discussed the religious significance of U-F-O's during the 21st annual Mutual U-F-O Network symposium in Pensacola, Florida.

Pensacola was chosen as the site because of more than 200 purported U-F-O sightings in the area since 1987. The most controversial was in 1987... when a man claimed he took close-up pictures of U-F-O's.

Downing... author of ''The Bible and Flying Saucers''... says he thinks U-F-O's are real and that the government knows about them. He also believes they have been around for centuries and stimulated religious beliefs.

But Downing says modern Western religions would be ''traumatized'' by proof of U-F-O's. He added that perhaps science is the only way modern people can perceive divine revelation.

The symposium has attracted about 700 people, and runs through tomorrow.

-30- 1192

#90188u2147 07/07/1990 ~United Press International

(JULY 7) UPI - The Bush administration today re-stated its rejection of a West German-French proposal that would funnel as much as 15-BILLION dollars into the Soviet economy. Aid to the Soviets is expected to be the most contentious issue raised at next week's Houston economic summit.

Soviet Foreign Minister Shevardnadze today praised NATO for its recently

ended two-day London summit. Among the points Shevardnadze lauded were the declaration of ''last resort'' for nuclear weapon use and the possibility of negotiating troop levels in a united Germany.

Anti-abortion lawmakers in the Louisiana Senate say the odds are against their over-riding a gubernatorial veto of a restrictive anti-abortion bill. Earlier today, the upper chamber fell three votes short of over-riding Governor Buddy Roemer's veto.

A published report today says the Pentagon is planning to work the armies of three South American countries to stage a massive raid against international drug traffickers. NO U-S forces are slated to be used in the reported scheduled actions in Peru, Colombia and Bolivia.

Iran's state-run news agency says one pro-Iranian Moslem fundamentalist group in Lebanon may soon release a Western hostage. There's NO indication who may be freed... although diplomatic sources in Syria say it could be Anglican Church envoy Terry Waite.

-30- 1511

#90188u2148 07/07/1990 ~United Press International

(JULY 7) UPI - There's NO word if refugees at Western embassies in Albania plan to take up a government offer made today to give asylum-seekers passports to leave the communist nation. Thousands of people are holed up in the foreign compounds.

Polish Prime Minister Mazowiecki met today with one of his most persistent critics... Solidarity leader Lech Walesa . The two wrapped up their five-hour meeting by saying social calm is needed to allow re-construction of the Polish society.

Street battles broke out today between government forces and pro-reform demonstrators in the Kenyan capital. The chaotic nature of the skirmishes has made it impossible to determine how many people were injured or possibly killed in the tumult.

Fire officials in Alaska say firefighters are gaining the upper hand on many of the estimated 185 wildfires burning throughout the state. However, the two largest blazes... near the town of Tok and the city of Fairbanks... are raging out of control.

More than 50 white-robed racists marched through the streets of Houston today to, in the words of one marcher, show ''George Bush and some of these other world leaders... that white racism and white power are both alive and well in America.'' Some 450 Houston police officers watched the rally to protect the Ku Klux Klan members.

-30- 1488
#90188u2261 07/07/1990 ~United Press International

Most of the names bandied about to succeed Mladenov are NOT former communists... leading to speculation that a consensus candidate will be chosen for the post.

Officials in Colombia today said they've found five-Million dollars stuffed into three garabge cans on a farm belonging to the brother of deceased drug kingpin Jose Rodriguez Gacha. Meanwhile, newspapers report the attorney general asked that the former National Police chief be stripped of retirement benefits because he allegedly took drug payoffs. The chief reportedly could NOT explain how he became rich on his police salary.

ARCO Chemical Company today categorically denied its use of contract workers contributed to a devastating explosion and fire that killed 17 workers at its Channelview, Texas, plant Thursday night. ARCO's C-E-O told reporters the only difference between contract workers and regular employees was the payroll which they were on. Harold Sorgenti says contract workers knew operations as well as regular employees.

A lynx and the driver of a car that hit the animal are both recovering from a run-in earlier today in New York state. The rare cat apparently wandered far from its home in the Adirondacks when it was struck by a car near the Pennsylvania border. Sheriff's deputies say the woman driver put the 22-pound feline into her car to take to the hospital, but received a couple of gashes on her arm for the effort.

-30- 1893
#90189d0510 07/08/1990 ~French/German News Agency
WARSAW (JULY 8) - Solidarity president Lech Walesa and Prime Minister Tadeusz Mazowiecki met for six hours Saturday to try to patch up differences over the pace of Polish reform that threaten to tear Solidarity apart.

A brief communique issued after their meeting here under church auspices emphasised the two men's wish "to continue their cooperation," and to "ensure the success of reforms (and) ... move democracy forward," the communique said.

The two men called for "the maintenance of social harmony" so that "differences in political opinions and the interests of various social

groups do not destabilize the situation."

"The differences of political opinions and interests of diverse social groups" should not "destabilize the situation" in Poland, they said.

Observers here believe the repeated admission of differences indicates the two men fell short of working out a solution to their fundamental divergences.

The prime minister and his supporters consider that reforms should take place gradually, without engaging in a "witch-hunt" of former communists.

Mr. Walesa and his followers are demanding more radical change, and as a first step have called for the departure of President Wojciech Jaruzelski and his replacement by Mr. Walesa as head of state.

The meeting was held under the auspices of Archbishop Bronislaw Dabrowski, secretary of the Polish episcopate, according to the communique.

Mr. Mazowiecki had proposed last Sunday to meet with Mr. Walesa to discuss differences that have arisen within Solidarity over government policies.

Numerous members of Solidarity and the government have criticized Mr. Walesa for his presidential ambitions, while Mr. Walesa has openly stated his disapproval of government policies.

The Solidarity leader had invited Mr. Mazowiecki for "face to face" talks in Gdansk on the sidelines of a Sunday meeting of shipyard workers and Solidarity deputies and senators.

The prime minister rejected the invitation to visit Walesa's stronghold, but proposed a meeting between the two men in Warsaw under the auspices of Msgr. Dabrowski to try to heal the rift in the Solidarity movement.

-30- 2385

#90189d0560 07/08/1990 ~French/German News Agency

SOFIA (JULY 8) - Bulgaria's ruling Socialist Party (BSP) has moved to head off a renewed swelling of anti-government protests by calling a new congress to effect reforms in a party tainted by the continued presence of once-leading Stalinists.

The BSP, formerly the Communist Party, announced the congress after 15,000 protestors defied a ban on demonstrations by taking to the streets Saturday to celebrate the resignation of President Petar Mladenov, a leading member of the old party.

Several dozen protestors continued a sit-in in front of the presidential

office, demanding a date be fixed for the trial of former state and party leader Todor Zhivkov, toppled last November.

Meanwhile protest leaders were planning to redirect pressures at parliament, which is set to open Tuesday.

With protesters still clamoring in the streets, BSP leaders held an emergency meeting Saturday and announced a congress for October with the promise of major reforms within the party.

Party president Alexander Lilov denounced what he called "an attack by the opposition and a power-grab by forces outside parliament."

Mr. Lilov said "the opposition's ambitions are being realised" while the BSP has "lost all initiative" after winning an absolute majority in general elections last month. Mr. Lilov tendered his resignation as party president, but it was refused.

Mr. Lilov called on party members and supporters to mobilise to "defend parliamentary democracy." He added that the BSP must "reform itself in a decisive manner" at all levels at the October congress, which will precede important local elections.

-30- 1816

#90189d0650 07/08/1990 ~French/German News Agency

NAIROBI (JULY 8) - Kenya looked set for a vicious circle of demonstrations and repression, diplomats and observers said here Sunday after clashes between pro-democracy advocates and police left scores of people injured.

Riots erupted in Nairobi's eastern suburb of Kamukunji Saturday, three days after police arrested two dissident former cabinet ministers and several other opponents of President Daniel arap Moi's single-party regime.

The violence was the worst since anti-government demonstrations broke out following the mysterious murder of Foreign Minister Robert Ouko in February.

Protests over the jailing of former ministers Kenneth Matiba and Charles Rubia had already sparked protest from the United States and a call for their release.

But Sunday, the newspaper of the sole and ruling Kenya African National Union (KANU) party bluntly rejected U.S. concern.

Replying to Washington's chief envoy in Nairobi, Smith Hempstone, editor-in-chief Philip Ochieng wrote in the Sunday Times: "Shut up, Mr.

Ambassador!"

Mr. Hempstone, who delivered the U.S. protest, had earlier provoked the Kenyan regime's anger, in May when he warned that the U.S. Congress would be unwilling to aid countries that failed to adopt party pluralism.

Mr. Moi responded to the new U.S. protest over the crackdown on dissidents by saying that "Kenya is a sovereign state" and would take "no lessons from anyone".

A diplomatic source, wondering "just how far President Moi will go to stifle the opposition", expressed fears Sunday that a cycle of demonstrations and repression had been unleashed.

Observers said the repression of Saturday's riots showed he was determined to crush any attempt to introduce a multi-party system.

Youths at Kamukunji, where some 5,000 people had gathered, flashed the two-fingered V-for-victory salute, a sign of support for democracy seen across eastern Europe last year. In Kenya it signifies support for a multi-party system.

In another development, the Times reported on its front page Sunday that the two detained former ministers' lawyers, Paul Muite and Gibson Kamau Kuria, had taken refuge at the U.S. Embassy.

Both attorneys have been missing since Thursday, but an embassy spokesman denied they were there.

-30- 2467

#90189d1250 07/08/1990 ~French/German News Agency

ATLANTA, Georgia (JULY 8) - The Soviet circus stranded near here for more than a month has filed for U.S. bankruptcy protection, the circus' lawyer said.

Attorney Richard Keck, who is handling the case on a pro-bono basis, said the Great Circus Bim Bom filed for Chapter 11 protection Friday in Bankruptcy Court in Atlanta.

The bankruptcy action will consolidate claims and lawsuits against the circus so it can straighten out its finances, Mr. Keck said.

Two lawsuits have been filed against the circus by equipment companies, said Mr. Keck.

The circus -- named for two turn-of-the-century Russian clowns -- has been stranded in the city of Marietta since May, when investors withdrew their

financial support and forced the circus to cancel its two-year, goodwill tour of the United States.

Unable to restart their tour because they cannot pay the companies holding their performing animals, costumes and equipment, some 70 circus members have been forced to live on charity.

The circus blames the Florida-based International Showbusiness Inc. for improperly managing its tour.

About 30 circus workers who stayed with International Showbusiness have departed Marietta to seek work in West Virginia.

#90189d1280 07/08/1990 ~French/German News Agency

PANAMA CITY (JULY 8) (AFP) - Three Panamanians and a Costa Rican have returned to Panama after their small plane was hijacked to Colombia by suspected drug traffickers last week, officials said Sunday.

President Guillermo Endara said in a statement the plane's copilot and three passengers returned to Panama Saturday night.

Sources said one of the hijackers was believed to be drug trafficker Carlos Geas, who recently escaped from prison here.

The odyssey began Thursday when five passengers aboard a Twin Otter HP-759 commuter plane en route from Colon to Panama City forced the plane to fly to neighboring Colombia.

The next day, the hijackers released the plane's copilot and the three other passengers in Viterbo, Colombia, near the industrial city of Medellin which is home to a cocaine-trafficking cartel of the same name.

The hijackers then forced the pilot to fly them to an unknown destination. Authorities did not know the fate of the pilot, who was identified as Warren Lam, brother of Mr. Endara's private secretary.

Renato Famiglieti, deputy director of Panama's police detective branch, was in Colombia Sunday to investigate the hijacking.

#90189d1310 07/08/1990 ~French/German News Agency

ALEXANDRA, South Africa (JULY 8) - On a dusty hillside outside Johannesburg's most squalid black township, an African National Congress supporter gunned down by police was buried Sunday amid a clamour for "justice."

Meshack Kunene was killed on his 23rd birthday a week ago Saturday at a rally to celebrate the homecoming from exile in Lusaka of ANC secretary general Alfred Nzo.

According to eye-witness Obed Bapela of the ANC-aligned Alexandra Civic Organisation (ACO), a black police constable called Alex had shot Mr. Kunene with a handgun while sitting in his police car, as Mr. Kunene waited for ANC officials to end a discussion with a police captain.

Mr. Bapela said Mr. Kunene, a keen marshall but not an ANC leader nor a member of its army Umkhonto we Sizwe, had been beaten up by police in the past,
and had been threatened by policemen the very day of his death.

Police said Mr. Kunene was shot when they opened fire on rioters trying to stop the arrest of a man smoking marijuana.

ANC internal leader Walter Sisulu told some 2,000 mourners the shooting of Mr. Kunene and police shootings last week in the Hex River Valley near Cape Town and Ratanda township, outside Heidelberg some 60 kilometres southeast of here, were "criminal acts against our children."

"Here in Alexandra it is crystal clear that the cold-blooded murder of Meshack Kunene was premeditated."

It was an "important violation" of the talks the ANC began with the government at Groote Schuur in Cape Town on May 2-4, he said -- the Groote Schuur minute committed both sides to the search for peace.

-30- 1811

#90189d1600 07/08/1990 ~French/German News Agency

NEW DELHI (JULY 8) - The Kashmir state government said Sunday that it was ready to negotiate with Moslem militants to secure the freedom of the kidnapped son of a local official as troops hunted for the hostage.

The state government sent a message to the kidnappers through a "reliable channel" urging them to establish direct contact with authorities, the Press Trust of India (PTI) reported from the state's summer capital Srinagar.

"The administration is prepared to have a dialogue with the persons concerned with the abduction," it quoted unnamed official sources as saying.

Farooq Ahmed, the 23-year-old engineer son of Srinagar District Magistrate Ghulam Abbas, was kidnapped Friday in Srinagar, the urban hub of

anti-Indian Moslem militants fighting for the secession of Kashmir.

In a telephone call to Mr. Ahmed's father, the outlawed Jammu and Kashmir Liberation Front (JKLF) claimed responsibility for the kidnapping and demanded that two jailed militants be freed in exchange for his release.

But the JKLF has set no deadline and made no attempt to get in touch with the administration of Governor Girish Saxena, which has urged the Front to release Mr. Ahmed unharmed.

Army and paramilitary troops pursued a major search in Srinagar and elsewhere in the Kashmir valley for the hostage and his kidnappers, raiding several suspected militant hideouts, PTI said.

The JKLF, the main pro-independence militant group, was also responsible for the December kidnapping of the daughter of federal Home Minister Mufti Mohammad Sayeed. She was released unharmed after the government bowed to its demands and set free five jailed militants.

But in April, a senior company executive, a leading academic and his private secretary were kidnapped and killed after the government refused to release any more prisoners.

The latest hostage crisis broke a day after the state administration declared the entire Kashmir valley a "disturbed area," arming security forces with wide-ranging powers to search, arrest and shoot suspects.

Governor Saxena on Friday handed over control of security in the areas designated disturbed to the army.

On Sunday, the state's main pro-Indian political party hit out at the "disturbed area" declaration, calling it draconian and charged New Delhi with political bungling.

"It is unfortunate that the union government has once again bungled in taking this extreme and undemocratic measure without consulting parliament and it will have to face the adverse repercussions," the National Conference said.

The pro-Moslem party has been sidelined by the bitter battle between militants and security forces. The party headed the Jammu and Kashmir state government for more than three years before quitting in January in the face of the escalating Moslem militancy.

"The people of Kashmir feel that their basic human rights have been further trampled through the latest draconian laws," it said in a statement, citing fears that the powers could be misused to terrorise civilians.

The National Conference, an ally of former prime minister Rajiv Gandhi's Congress (I) party, accused the present Indian government of lacking a coherent policy on Kashmir.

"The National Front government has been taking ad hoc decisions at different intervals without appreciating the situation in Kashmir properly " it said.

Many ruling party officials have pinned the blame for the current unrest on the National Conference, accusing it of alienating Kashmiris during its rule marked by widespread charges of corruption.

More than 700 people have died this year in violence linked to the separatist campaign in Kashmir, India's only Moslem-majority state whose ownership is also claimed by Pakistan.

ADEN (JULY 8) - Egyptian President Hosni Mubarak left here Sunday for Addis Ababa to attend the 26th summit of the Organization of African Unity (OAU), of which he holds the rotating presidency, officials said.

Mr. Mubarak, who arrived here Sunday from Taiz, discussed the situation in the Arab world, the Israeli-occupied territories and relations between Egypt and the newly unified Yemen with President Ali Abdallah Saleh.

Egypt and Yemen along with Jordan and Iraq form the Arab Cooperation Council.

Mr. Mubarak and Mr. Saleh also met Saturday in Taiz, 200 kilometers (124 miles) south of the capital Sanaa, with Yasser Arafat, chairman of the Palestine Liberation Organization, to discuss developments in the Palestinian problem, Sanaa radio reported.

LYONS, France (JULY 8) - Thirty-six people were hurt, one seriously, when a British tourist coach overturned on the Paris-Lyons motorway Sunday, police and hospital officials said.

The British single-decker bus which left Hamilton, Scotland, Saturday was on its way to Spain with 67 passengers when it went out of control and overturned onto the side of the road around 6.30 a.m.

The driver, who was unhurt, told police he had been fully awake and did not understand what had happened.

Twenty-nine of the injured went to hospital in Macon, central France, including John Masson, a Scotsman, who was placed in intensive care.

Seven others were taken to two private clinics in Macon.

Most were expected to be released soon, hospital officials said.

On June 3, 12 British holidaymakers were killed and 18 seriously injured when their coach plunged into a ditch near Joigny, south of Paris, after a tire burst.

HOUSTON, TX (JULY 8) - Canada will remain united despite pressure for the independence of French-speaking Quebec, Prime Minister Brian Mulroney said here Sunday.

Mr. Mulroney, who was interviewed by ABC Television before this week's summit of leaders of the world's seven biggest free-market economies, said linguistic differences had been a constant friction point throughout Canada's history.

"There have always been linguistic problems and challenges," he told the U.S. network, referring to tensions between Quebec and the English-speaking provinces following the failure of the so-called Meech Lake accord.

The accord, scuttled two weeks ago, would have recognized Quebec as a "distinct society," opening the way for the province to sign the constituiton.

The expiration of a deadline for ratifying the constitutional amendment sparked sharp secessionist sentiment in Quebec, threatening the breakup of the confederation.

Mr. Mulroney said Canada "has been referred to as two nations warring in the bosom of a single state."

But he expressed confidence that Canada would remain a single nation and that he could resolve the divisive issue.

"We always had -- in the succession of generations -- to deal with it. Prime ministers have done it for 123 years and continue doing it," he said.

When asked about a recent decline in his popularity, Mr. Mulroney recalled that his approval rating was mediocre three months before national elections but that his party still obtained a majority in Parliament.

"I hope to do it again," he said.

Pamplona, SPAIN (JULY 8) EFE - Three people were badly gored Sunday on the second day of the Running of the Bulls in the annual San Fermin festival in the northern Spanish city of Pamplona, authorities said.

A Swedish citizen, a Frenchman and a Spaniard were said by doctors to be in serious condition with multiple wounds in the face, legs and buttocks.

Six fighting bulls raced through the streets behind the hundreds participants in the five-minute event that takes place every morning during the the nine days of festivities.

Bulls are set loose in the cordoned-off streets and stampede in direction of the bullring, where they will face bullfighters later in the day.

On Saturday, 57 people were injured, including one Spnaiard that was gored in the neck and buttocks. Over 50 people have been killed since the bull-running became a traditional part of ther San Fermin festival neraly four centuries ago.

Twelve other people suffered fractures, scrapes and bruises in the second run of this year's fiesta, which was popularized in Ernest Hemingway's 1926 novel, The Sun Also Rises.

MANAGUA (JULY 8) EFE - Leaders of Nicaragua's National Workers Front (FNT) trade union Sunday urged 85,000 state employees to stick by a 12-day-old strike, despite government threats to sack workers who do not return to their jobs this coming week.

Heads of the FNT, which supports the former leftist Sandinista government, met Sunday to discuss the threats. They gave the government of President Violeta Chamorro until Monday to reopen negotiations on their demands.

The union leaders also urged other workers to join the natiowide stoppage, which has been slammed as illegal by Chamorro's two-month-old U.S.-backed government.

Talks between union leaders and government representatives broke down Friday with both sides accusing the other of intransigence.

The FNT-led strike has brought much of Nicaragua to a standstill.

Among the 18 points on the union's list of demands are a dlrs 200 monthly wage, reforms to Chamorro's economic policy, state subsidies to water, light and transport companies, and an end to the privatization of land and businesses confiscated by the Sandinistas.

Chamorro officials have accepted discussing only wage hikes, reclassification of job categories, state funding for some industries, job stability and the repayment of debt.

Labor Minister Francisco Rosales has dismissed the dlrs 200 wage demand as +absurd+.

The unions claim that such a wage is necessary to keep up with price hikes implemented by Chamorro's government.

Police chief Rene Vivas Saturday warned workers taking part in the stoppage not to occupy government offices, while police have been ordered to ensure workers wishing to go back to their jobs can do so.

Chamorro took office in April after beating the Sandinistas in February elections.

Observers say the Sandinistas have used the present strike as part of a campaign to defend the leftist policies they followed in the years after the 1979 revolution which swept them to power.

NEW BRAUNFELS, TX (JULY 8) UPI - The pilot of a small racing airplane was killed in an air show crash Saturday after his craft bumped wings with a plane piloted by astronaut Robert ''Hoot'' Gibson, authorities said.

The Formula-1 single-seat plane piloted Henry ''Rocky'' Jones of Newport News, Va., spiraled into a cornfield, killing Jones instantly, a spokesman for the New Braunfels police.

Jones and Gibson were racing with five other planes in the ''Aerofest '90'' air show at the New Braunfels Airport when their planes bumped, police said.

Gibson, a veteran of two shuttle flights, maintained control of his aircraft and was not injured, police said.

Gibson made his first flight into space, as co-pilot aboard the shuttle Challenger during a mission in February 1984. He went on to serve as

commander of the veteran shuttle Columbia, which took off on the 25th shuttle mission Jan. 12, 1986, a flight delayed six times because of problems at the launch pad and bad weather.

Gibson flew 56 combat missions in Vietnam and helped provide air coverage for the evacuation of Americans from Saigon in 1975.

#90189u0129 07/08/1990 ~United Press International
(JULY 8) UPI - The Bush administration is spending the weekend preparing for Monday's start of a three-day Houston summit between the world's major industrial powers. The key topic among presidential aides is how to defuse support for offering immediate financial aid to Moscow. The issue could prove to be the most contentious among the leaders of the seven economic allies.

President Bush has made clear he thinks caution is needed when considering possible Soviet aid. Joining him in this view are Britain and Japan. Advocates of financial aid to Moscow include France, West Germany, Canada and Italy. White House Chief of Staff John Sununu justified the U-S stance by saying any aid to Moscow could possibly be used to stifle political reform.

Lawmakers in the Louisiana state Senate failed Saturday to over-ride a gubernatorial veto of what would be the nation's most restrictive anti-abortion law. Legislators in the upper chamber agreed to re-consider the over-ride, perhaps as early as Sunday... even though supporters of the measure are pessimistic that they'll gain the support needed for the action.

Television personality Bill Cullen, who hosted or appeared on dozens of T-V and radio game shows since the mid-1940's, died Saturday at his Bel Air, California, home. His manager said the 70-year-old Cullen died from complications related to lung cancer. Cullen once appeared on all three

networks at the same time, and turned in his longest stint as a panelist on ''I've Got a Secret.''

#90189u0131 07/08/1990 ~United Press International

(JULY 8) UPI - Iran's state-run news agency Saturday quoted well-informed sources in Beirut who say pro-Iranian Moslem fundamentalists plan to release a Western hostage in the near future. Middle East sources confirmed the report, and speculated on which of the 16 Western captives will be freed. Diplomats in Syria say Anglican Church envoy Terry Waite is the likely candidate because of the aid his church extended to earthquake-stricken Iran.

The winner of Saturday's cherry-pit spitting contest in Eau Claire, Michigan, lived up to his nickname. Rick Krause, who is also known by the handle ''Pellet Gun,'' dribbled away from the pack by spewing his pit more than 50-and-a-half feet. The phlegmatic projectile fell short of his record 72-feet seven-and-one-half inch-fling. The contest was waged amid wind gusts of up to 15 miles an hour.

#90189u0150 07/08/1990 ~United Press International
(JULY 8) UPI - Unfortunately for the Phillies, outfielder Von Hayes lacks the recuperative powers of the Reds' Mariano Duncan.

Both Hayes and Duncan suffered off-the-field accidents last week and the effects were manifest in Cincinnati's 5-0 shutout over Philadelphia Saturday night.

While Hayes was recovering from a cut to his little finger sustained while

moving exercise equipment, Duncan drove in two runs in his first game since injuring his neck in a car accident to lead Cincinnati.

''He's (Hayes) their big guy, their No. 1 guy,'' Reds manager Lou Piniella said. ''Certainly we feel fortunate coming in here when he's out of the lineup.''

Hayes was batting .267 with nine home runs and 37 RBI on 56 hits before the injury.

Duncan's single in the second inning off Phillies starter Bruce Ruffin, 6-8, scored Eric Davis and Glenn Braggs to put Cincinnati ahead 2-0.

Veteran Rick Mahler, 3-3, supported Duncan's efforts by giving up only six hits, walking one and striking out five. Mahler pitched his first shutout of the season, the ninth of his career, and his first complete game since June 7, 1989.

''Mahler did a super job,'' Piniella said. ''He spotted the ball well. He maintained his fastball throughout the game. I thought he was throwing better at the end than he was early. It was just an outstanding effort.''

Mahler was making his first start since June 29.

''The key for me is to change speeds,'' Mahler said. ''I had control and command of all my stuff. That's what I have to do to be successful. I moved my fast ball in and out and kept them off balance.''

Ruffin was chased after getting rocked for two runs in the third giving the Reds a 4-0 advantage.

The Phillies were outscored 18-3 in losing three straight to the Reds including their fourth game in a row and the 11th in their last 15 contests.

Cincinnati went ahead 5-0 in the sixth when Hal Morris walked, stole second, went to third on a single by Joe Oliver and scored on Mahler's fielder's choice groundout.

--- AROUND THE NL ---

Elsewhere in the National League, San Francisco edged Chicago 10-9, Atlanta nipped New York 4-3, Montreal beat Houston 3-1, Los Angeles defeated Pittsburgh 4-2 and San Diego downed St. Louis 3-1.

Giants 10, Cubs 9

At San Francisco, Mike Kingery lined a two-run single with one out in the

ninth inning to rally San Francisco. With one out, Matt Williams singled off Les Lancaster, 7-5. Gary Carter singled, and pinch-runner Dave Anderson replaced Carter. Lancaster threw a wild pitch to advance the runners before Kingery drove in both. Jeff Brantley, 3-1, notched the victory.

Braves 4, Mets 3

At Atlanta, Jim Presley's eighth-inning homer enabled Kent Mercker to earn his first major league win, and the Atlanta Braves handed the New York Mets only their second loss in 18 games. Mercker, 1-0, entered the game in the eighth when Atlanta starter John Smoltz injured his foot covering first. He allowed one hit over two innings for the win. Jeff Innis dropped to 1-2.

Dodgers 4, Pirates 2

At Los Angeles, Tim Belcher tossed a seven-hitter and Eddie Murray homered and singled to drive in the first three Los Angeles runs, lifting the Dodgers. Belcher, 7-6, struck out five and walked two in completing his second straight game and fourth of the season. Walt Terrell, 2-7 and winless in his last seven starts, gave up four runs on five hits and three walks in 2 1-3 innings.

Expos 3, Astros 1

At Montreal, Spike Owen snapped a seventh-inning tie with a home run and added an RBI single in the eighth to pace Montreal. Zane Smith, 5-6, allowed eight hits in seven innings for the win, walking three and striking out six. Dave Schmidt recorded his 12th save in the Expos fourth straight triumph. Jim Deshaies, 4-7, yielded six hits in 6 1-3 innings.

Padres 3, Cardinals 1

At San Diego, Bruce Hurst pitched a two-hitter and Jack Clark had three hits, including a tie-breaking fifth inning homer, to guide San Diego. Hurst, 5-7, hurled his third complete game of the season, allowing only two hits, four walks and striking out four. Joe Magrane, 4-12, allowed eight hits and two runs over six innings.

-30- 4409

#90189u0188 07/08/1990 ~United Press International

(JULY 8) UPI - Kevin Appier is not one of Kansas City's high priced pitchers but he pitched like one Saturday night.

Appier's rookie salary of $100,000 is chump change next to the bankrolls of starters Mark Gubicza, Storm Davis, Bert Saberhagen, and reliever Mark

Davis,who earn between one and two million dollars a year.

But Appier's one-hitter against the Detroit Tigers was a million-dollar performance.

Appier gave up a leadoff single to Lou Whitaker in the first inning, then held Detroit hitless the rest of the way in pitching Kansas City to a 4-0 victory.

In improving his record to 4-3, Appier became one of several lower priced pitchers to have a winning record, joining Steve Farr, Steve Crawford and Luis Aquino.

Gubicza, Davis, Saberhagen and Davis all have losing records.

Appier notched his first complete game in his ninth major league start and followed the Friday one-hitter by the winningest pitcher in the 1980's, Jack Morris.

''It was a similar game to Friday night,'' said Royals Manager John Wathan. ''There was a hit in the first inning, then that was it. It was the same score, too. It's been a strange season all year. This is just another chapter.''

Kurt Stillwell, who got the key hit for the Royals, a two-run single in the third, was the only Kansas City batter to get a hit against Morris in Kansas City's loss.

Appier, who walked four, hit one and saw two Detroit runners reach base on errors, was helped by two double plays.

Whitaker lined a 1-0 pitch to left for a solid single but Detroit didn't get close to a hit the rest of the way, although some balls were hit hard.

''He hit a good pitch - on the outside part of the plate. He just reached out and smoked it to left,'' said Royals catcher Mike Macfarlane.

Appier's one-hitter was the 13th by a Kansas City pitcher and the first since Charlie Leibrandt threw one on May 16, 1987, against Milwaukee.

Frank Tanana, 5-6, started for Detroit.

Appier hit Mike Heath and walked Whitaker with one out in the eighth but got Tony Phillips to hit into a double play.

--- AROUND THE AL ---

Elsewhere in the American League, Toronto defeated Seattle 4-2, New York

edged Minnesota 5-4 in 12 innings, Cleveland blanked Oakland 1-0, Baltimore downed Chicago 4-1, Texs rapped Boston 7-4 and California clipped Milwaukee, 4-3 in 11 innings.

Blue Jays 4, Mariners 2

At Toronto, Jimmy Key and Duane Ward combined on a three-hitter and George Bell drove in three runs to lead Toronto to its fifth consecutive win. Key improved to 5-4. Ward notched his seventh save with two shutout innings. Russ Swan fell to 1-2.

Yankees 5, Twins 4, 12 innings

At New York, Wayne Tolleson scored from first base on Roberto Kelly's two-out single in the 12th inning to lift New York. Terry Leach, 2-2, gave up Kelly's hit and absorbed the loss. Lee Guetterman, 6-3, went 3 2-3 innings, to pick up the win.

Indians 1, Athletics 0

At Cleveland, Bud Black tossed his first career two-hitter and Chris James drove in the game's only run to lift Cleveland. Black, 7-4, carried a perfect game into the fifth inning before hitting Dave Henderson with a pitch. The left-hander retired the final 11 A's en route to his second shutout and third complete of the season. Curt Young, fell to 4-3 with the loss.

Orioles 4, White Sox 1

At Chicago, Tim Hulett smacked a two-run triple to back John Mitchell, who won his first major league game in three seasons, and lead the Baltimore Orioles. Mitchell, 1-2, picked up his first win since Aug. 5, 1987. Gregg Olson pitched the ninth for his 16th save. Greg Hibbard, 6-5, lost his first game since June 5.

Rangers 7, Red Sox 4

At Arlington, Texas, Nolan Ryan struck out 12 and Ruben Sierra and Pete Incaviglia smacked home runs. Ryan, 8-4, won the 297th game of his career. It was his third straight win and his 12 strikeouts were the most against the Red Sox in 11 years. Texas ended the 10-game winning streak of Mike Boddicker, 11-4, whose last loss had come on April 25.

Kenny Rogers worked the ninth for his seventh save.

Angels 4, Brewers 3, 11 innings

At Milwaukee, Jack Howell lined an opposite-field home run with two out in

the 11th inning to lead California. Randy Veres, 0-1, allowed Howell's fifth home run of the season and took the loss. Mike Fetters, 1-1, allowed one hit over the final two innings for his first major league victory. It was the second consecutive extra-inning game between the teams.

#90189u0196 07/08/1990 ~United Press International

DALLAS (JULY 8) UPI - Dozens of people angered because the controversial rap group 2 Live Crew refused to perform smashed wooden chairs, tables and windows while battling security officers at a Dallas nightclub Saturday night, witnesses said.

The group, whose album ''As Nasty As They Wanna Be'' was ruled obscene by a Florida judge, was given clearance to perform Saturday by a Texas judge.

But a dispute over money developed between the band and the nightclub management and the group never actually came on stage. The nightclub management erroneously reported earlier that the band had taken the stage.

At 11:15 p.m. Saturday, more than three hours after the concert was to begin, a voice came over the club's public address system telling the crowd of 540 people that there would be no show until the band was paid.

When the band's stagehands began packing up the equipment 20 minutes later a man demanding a refund jumped on stage and was dragged away by security personnel.

Patrons then became angry. At least 50 of them began smashing chairs and tables, throwing bottles and fighting with security officers, witnesses said.

''We kind of got out of the way pretty quick and let them do what they were going to do,'' Tom Taylor, 31, who was near the stage when the violence erupted, told the Dallas Times-Herald.

The incident inside the Longhorn lasted about 12 minutes and most of patrons fled the building, witnesses said.

But the melee continued outside as some of the building's windows were smashed and several cars were vandalized, witnesses said.

Only a handful of police officers were near the scene when the melee began because the nightclub had arranged for its own security, police officials said. About 50 officers with helmets and night sticks eventually arrived to help clear the parking lot, police said.

There were unconfirmed reports of some minor injuries.

A judge earlier in the day issued a temporary restraining order against the City of Dallas in a dispute about whether the Longhorn Ballroom had proper permits to sell the public tickets to see 2 Live Crew.

Dallas fire officials Friday ordered the performance canceled, saying the Longhorn had licenses as a private club, which did not permit it to sell tickets for admission to the general public.

State District Judge Merrill Hartman, however, ruled against the city and scheduled hearing on the matter.

During a Saturday afternoon news conference, 2 Live Crew leader Luther Campbell, who uses the stage name ''Luke Skyywalker,'' said people have misunderstood the group's act.

''We consider it to be comedy,'' Campbell said of the ''As Nasty As They Wanna Be'' album. ''It's just like Andrew Dice Clay (a comedian criticized for jokes some people consider obscene, sexist and racist), only people can dance to our act. We project ourselves on our videos as funny.''

While patrons at the Longhorn waited for the act to take the stage, vendors hawked T-shirts bearing the words ''Me So Horney'' and other lyrics from the rap group's songs. Canine and mounted police units stood watch a block from the club while a handful of demonstrators extolled free expression and rap music.

''I came down here to see just how outlandish people can be, but I couldn't get my friends to come with me,'' Charlie Humphreys, 30, told the Times-Herald. ''They thought the crowd would be too rough and the police would harass them. You can just feel the electricity in the air.''

Winifred Manning, 40, said curiosity about the controversy surrounding 2 Live Crew got the better of her. ''I want to see what could be that obscene that people want to ban them,'' Manning said.

''I hope they live up to their hype,'' Eli Cantu, 18, told the Times-Herald. ''For them to be arrested in Miami, they must do something on stage. It would be neat if they were arrested and we could say we were there.''

The rap group performed the ''clean'' version of its concert in San Antonio Friday night without incident, although one city inspector ordered the concert's sound level lowered because it violated a noise ordinance.

Two of the four band members were arrested in Florida last month and all were charged with obscenity violations because of the sexually explicit lyrics used in a nightclub performance.

The Longhorn Ballroom has been the scene of many colorful performances through the years, including the punk rock group The Sex Pistols.

COLOMBO, Sri Lanka (JULY 8) UPI - Government troops supported by air force jets and navy gunboats began a ''flushing-out'' operation against a Tamil rebel stronghold in the eastern jungles of Sri Lanka Sunday, and a senior military official said soldiers had killed nine guerrillas in recent fighting.

Security sources said soldiers and paramilitary forces were advancing on a jungle hideout near the city of Amparai, 130 miles east of the capital, where an estimated 4,000 rebels from the Liberation Tigers of Tamil Eelam were thought to be hiding.

Air force planes provided cover for the military advance, the sources said while navy gunboats had been moved into position along the eastern coast to prevent the Tiger rebels from fleeing the area by sea.

''We cannot comment on the operations immediately. We are also awaiting details,'' one source said. ''This is the final phase of the flushing-out operations in the area,'' the source added.

More than 1,000 people have been killed in fighting between government troops and Tiger rebels since June 12, when guerrillas launched simultaneous attacks against four army camps.

Since then the Colombo government has regained control of most of the eastern district. The move on the jungle hideout at Kandikudichiaruat was seen as a final push to crush the militants in the eastern part of the country.

The Tiger rebels are fighting for an independent Tamil homeland in the east and north of the country. They claim the minority Tamils, who are mostly Hindu, need a separate country because of years of discrimination by the majority Sinhalese community, which is predominantly Buddhist.

A senior military official said nine Tiger rebels had been killed in fighting in the past 24 hours, including eight who were slain when troops captured a major guerrilla ammunition dump near the northeastern city of Trincomalee, 155 miles northeast of the capital.

Fighting also continued in the north of the country Sunday, with Tiger rebels firing mortars and small arms at three different army camps, including Jaffna Fort, a 300-year-old star-shaped Dutch fortress on the

edge of downtown Jaffna city.

A military official said troops were poised for an attack by air, sea and ground on rebel strongholds in the north, which is still under Tiger control despite nearly four weeks of fighting.

The official said the planned attack is part of a government strategy to liberate the northern Jaffna peninsula from the Tiger rebels, who have boasted that Jaffna was their ''sovereign state.''

JOHANNESBURG, South Africa (JULY 8) UPI - Police have detained a number of right-wing whites following a week of urban terrorist bombings aimed at black civilians as well as liberal and moderate white lawmakers, authorities said Sunday.

The Sunday Times reported squads of police captured three high-profile right-wing activists, two of them fugitives from Namibian justice, in pre-dawn swoops Friday.

The newspaper identified the three as Leonard Veenendal, Darryl Stopforth and David Rootenberg. Veenendal and Stopforth are wanted Namibian authorities on charges of murder and weapons possession but are out of their reach as no extradition treaty exists between South Africa and Namibia.

A police statement, in response to the report, said only that ''a number of whites have been arrested'' and are being held in terms of the Internal Security Act, which permits detention without trial.

A Department of Law and Order official confirmed ''some conservative whites'' were detained early Friday and ''we are looking at their possible involvement in the bombings.''

The arrests came about three hours before a bomb blast ripped through a Johannesburg transport terminus used mainly by black commuters, injuring 27 people. The law and order official said the explosive could have been on a 12-hour timer.

The blast followed four other bombings and one attempted attack over the past week blamed by authorities on white extremists outraged at Pretoria's program of racial reform, but the attacks until Friday only damaged property.

Targets in the bombings which began June 29 included the homes and businesses of a liberal Johannesburg city councillor and a councillor of

the ruling National Party, and the premises of a left-wing Afrikaans newspaper. A bomb was defused outside offices of a black union.

A shadowy white-supremacist group, the White Wolves, has claimed responsibility for the explosions at the councillors' property, demanding President Frederik de Klerk call an election to test white support for his apartheid reforms to avert further terrorism.

Law and Order Ministry spokesman Brig. Leon Mellet has said police ''are doing everything'' to apprehend those responsible.

De Klerk's moves to dismantle 42 years of white minority rule and privilege have angered the right-wing parliamentary opposition as well as extremists, and leader of the Conservative Party Andries Treurnicht has warned, ''This so-called reform could well provoke people to take drastic measures.''

#90189u0214 07/08/1990 ~United Press International

AMRITSAR, India (JULY 8) UPI - Suspected Sikh extremists bombed a shop Sunday where a crowd was watching the final episode of a long-running Indian television serial, killing two people and wounding about 20, authorities said.

The two people killed were among at least 17 slain in Punjab state in northwestern India within 24 hours, authorities said. About 1,600 people, including 500 Sikh extremists, have been killed in the daily violence in Punjab this year.

Radicals within India's Sikh religious minority are fighting to create the theocratic state of Khalistan, or ''Land of the Pure,'' in Punjab. About 10,000 people have been killed in the violence since 1984, when Indian troops attacked the Golden Temple of Amritsar, Sikhdom's holiest shrine, to drive out heavily armed extremists.

The attack on the Golden Temple led several months later to the assassination of Prime Minister Indira Gandhi by two of her Sikh bodyguards.

The attack on television viewers occurred Sunday at a television shop near a Sikh religious shrine in the town of Fatehgarh Shurian, 20 miles northeast of Amritsar, police said.

About 50 people had gathered to watch the final episode of the long-running Indian television serial ''Mahabharat,'' a story about good and evil based on the Hindu religious text ''Mahabharata.''

The television serial had become immensely popular since it went on the air Oct. 2, 1988, drawing viewers from all religious groups in the country. While the viewers, including Sikhs and Hindus, were absorbed with the program, someone planted a crude bomb in the shop, authorities said.

''There was a dark and gray smoke and a big light when the bomb exploded '' said Mangal Dass, who was slightly injured in the attack. ''The blasting sound was so powerful that one of the injured lost his hearing.''

''People ran here and there in panic as blood was pouring out of them,'' said Shiv Dayal, who was wounded in the leg.

Authorities said five of the 20 wounded people were seriously injured. Most of the wounded were hit by bomb fragments in the lower parts of their body, but some were sitting on the ground and were wounded in the abdomen and head.

#90189u0215 07/08/1990 ~United Press International

NEW YORK (JULY 8) UPI - The Bush administration has decided to permit the launch of U.S. commercial satellites on Soviet-built rockets for the first time, it was reported Sunday.

The New York Times quoted government and industry sources as saying the decision, which still needs formal approval from President Bush, was made last week in the National Space Council, headed by Vice President Dan Quayle.

As a result of the new policy, the newspaper said, an Australian commercial venture will be allowed to hire an American company to run a base in northern Australia. From that base, Soviet-built rockets will carry satellites into space for customers from around the world, including the United States, the Times reported.

The launches from the Cape York Space Agency facility could begin as early as 1995. The Soviet space agency, Glavkosmos, would supply rockets and engineers, but would not own a share in the venture, the Times reported.

Despite warming U.S.-Soviet relations, the decision last week reportedly was the first indication the United States was willing to relax its traditional opposition to Soviet launch of U.S. satellites, whose technology is tightly controlled because of its military applications.

The administration decision to allow the USBI division of United Technologies Corp. to participate in the Australian venture will increase the competition for American companies in the payload launch business.

Those companies already compete with the European consortium Arianespace and with China, which last year won limited approval to launch U.S.-built satellites from its territory.

U.S. rocket companies had opposed allowing the Soviet Union to provide launch services for American customers, but satellite makers had favored opening up the market. Both groups say the administration decision on the issue is even-handed, because it includes provisions designed to ensure that the Soviet Union prices its rockets fairly, the Times reported.

#90189u0217 07/08/1990 ~United Press International

SIDON, Lebanon (JULY 8) UPI - Israeli warplanes Sunday raided bases of the pro-Iranian Hezbollah group in southern Lebanon, wounding four fundamentalists and sending plumes of smoke into the sky, witnesses and security sources said.

At least two warplanes dropped large bombs on Hezbollah positions in the villages of Jbaa and Ain Beswar, east of the port city of Sidon, 24 miles south of Beirut, the witnesses said.

Big clouds of smoke billowed into the sky as the planes appeared to have scored direct hits, the witnesses said.

Moslem security sources said the air strike wounded at least four Hezbollah members and inflicted material damage.

Witnesses said extremist gunmen barred photographers from Western organizations from approaching the targeted area.

The strike was the second this week by the Israelis and the 12th into Lebanon this year.

In Tel Aviv, an Israeli army spokesman said air force planes attacked a base of the Hezbollah terrorist organization near the village of Jarjou, 11 miles southeast of Sidon, destroying the target.

All jets that launched the strike returned safely to base, the spokesman said.

Hezbollah's radio station, which broadcast from southern Beirut, said four Israeli warplanes carried out the noon raid.

Gunners of the fundamentalist group confronted the jets with automatic anti-aircraft gunfire as the planes unleashed hot-air balloons to confuse any heat-seeking missiles fired from the ground, the radio said.

Hezbollah radio charged that gunmen of the pro-Syrian Shiite Amal militia, Hezbollah's staunch local foe, bombarded Hezbollah positions in the area while the Israeli planes were striking.

There was no reaction from Amal on the accusation.

''We call on all our fighters at advance positions to be on full alert in anticipation of renewed attacks by the Israeli enemy,'' Hezbollah radio said in a broadcast later in the day.

The mountainous region east of Sidon has been the scene of fierce fighting between Hezbollah and Amal since last December. The two groups have been competing for supremacy among Lebanon's estimated 1.5 million Shiites.

The region also is overlooked by gunners of the Israeli-backed South Lebanon Army, who are dug in at strategic locations around the Christian town of Jezzine, 23 miles south of Beirut.

#90189u0235 07/08/1990 ~United Press International

NEW YORK (JULY 8) UPI - Bronx prosecutors are expected to decide later this month whether to charge more people - including the landlord - in the Happy Land social club fire that killed 87 people, a published report said Sunday.

New York Newsday reported that a continuing criminal investigation will determine whether charges should be brought against the landlord of the Bronx social club, millionaire Alex DiLorenzo III, or the leaseholders of the building, Jay Weiss and Morris Jaffee. Weiss is the husband of actress Kathleen Turner.

Julio Gonzalez, who allegedly set the March 25 blaze after a fight with his estranged girlfriend, has been indicted on 87 counts of intentional murder. He is awaiting trial in the Brooklyn House of Detention.

The newspaper said investigators have been reviewing legal precedents, corporate records and conducting interviews to determine what the businessmen knew about the unsafe conditions at Happy Land.

Prosecutors have already begun pretrial motions and court hearings before Bronx Administrative Judge Burton Roberts, who still must decide whether to handle the case himself, Newsday said.

Gonzalez's attorney, Richard Berne, has been contesting the legality of statements his client made to police after he was arrested on March 25, the night of the fire, the newspaper said.

Berne has also challenged the legality of a search made the same day at Gonzalez's apartment.

Newsday said Berne has not yet indicated whether he will mount an insanity defense for Gonzalez, who police contend doused the club with $1 worth of gasoline after a fight with his estranged girlfriend, Lydia Feliciano.

Berne told the newspaper Gonzalez had been ''undergoing a psychiatric evaluation of great depth'' with defense experts over the last two months.

The focus of the interviews is to determine whether he was mentally capable at the time of the fire to know the nature and consequences of the alleged arson.

#90189u0242 07/08/1990 ~United Press International

LIBREVILLE, Gabon (JULY 8) UPI - Gabonese opposition leader Joseph Redjambe, whose death last May sparked a week of rioting in the West African nation, was buried in his home town under a state of siege, witnesses said Sunday.

''Peace, serenity, and dignity marked the funeral of Joseph Redjambe'', said General Ella Abessolo, military governor of Ogooue Maritime Province where the funeral took place Saturday.

The province, which includes the economic center of Port Gentil where the heaviest rioting and anti-government demonstrations took place, remained under a state of siege as government troops maintained a heavy presence.

''There is no more tension, calm has returned and economic activity has resumed,'' Abessolo said of the situation in the province.

Redjambe's mysterious death May 22 in a hotel in the capital of Libreville sparked widespread riots in the country, shaking the government of President Omar Bongo and bringing oil production in Port Gentil to a halt for three days.

The riots came as Gabon, like a number of other former French colonies in West Africa, moved toward establishing a multi-party democratic system.

Under a new constitution approved last spring, opposition political parties have been legalized for the first time since Gabon gained independence from France in 1960. General elections are set for this fall.

Redjambe's funeral in his home town of Oumba was attended by several thousand people, witnesses said.

The government, fearing the ceremonies would lead to new riots, delayed the funeral for more than a month. The opposition leader's body was finally transported last Thursday from a morgue in Libreville to the headquarters of the opposition Gabonese Progress Party, where it was placed on view.

The government posted hundreds of army troops around the presidential palace and other strategic points in the capital to guard against renewed violence.

The exact cause of Redjambe's death has not been disclosed. The government made public only partial results of an autopsy carried out in the presence of French doctors and has never released the results of toxocological tests.

Opposition leaders charge that Redjambe, a prominent business and political figure in oil-rich Gabon, died of poisoning, possibly administered by a woman he had gone to the hotel to meet. Needle marks were found on his abdomen.

#90189u0276 07/08/1990 ~United Press International

KHARTOUM, Sudan (JULY 8) UPI - A ministerial council set up to discuss a political and economic merger of Sudan and Libya will hold its first session Thursday, the state-run newspaper Al Ingaz Al Watani reported Sunday.

Twelve ministers from each country will be represented on the council, which was created when Sudanese military leader Gen. Omar al-Bashir visited Tripoli in March.

Al-Bashir, who seized power in Sudan last year, and Libyan leader Moammar Gadhafi declared they intended to merge the two countries in pursuit of the goal of Arab unity, and opened their common border to visa-free transit by each others' citizens.

Oil-rich Libya has pumped millions of dollars of aid into Sudan, the largest country in Africa, which is impoverished despite its reserves of oil.

The 12 Libyan representatives on the council will arrive in Khartoum on Wednesday, the daily newspaper said.

''The meeting is expected to review means for the realization of solidarity and unity between the two countries and for the utilization of their economic potentialities in all spheres and to invest them for the benefit of the two peoples,'' the newspaper said.

An integration charter drawn up by the two governments at the time of al-Bashir's visit to Libya has not yet been signed, despite predictions in the official Sudanese media that its ratification would go ahead on June 30, the anniversary of al-Bashir's coup.

Western diplomats have expressed doubts about the seriousness of the planned merger, describing it as a Sudanese bid to strengthen economic ties with oil-rich Libya.

Libya has tried unsuccessfully before to merge with its neighbors, most recently with Chad.

BAY CITY, MI (JULY 8) UPI - An accident that injured six people at a fireworks display that drew a crowd of 400,000 could have been much worse, a state senator who witnessed the incident said Sunday.

Authorities said the accident occurred shortly after 11 p.m. Saturday, just minutes after Gov. James J. Blanchard and Rep. Bob Traxler, D-Mich., had left the igniting pit area in Veterans Park along the Saginaw River.

''Apparently, what happened is one of the huge fireworks which had been detonated and taken off, sprayed some sparks back into two of the metal tubes (holding other fireworks),'' said state Sen. James Barcia, D-Bay City, who was standing 15 to 20 yards from the pit area.

''It appeared to me that there were two explosions approximately at the same time. They exploded about 12 inches off the ground. So it blew about eight people onto the ground. About three of the people had their jackets frayed and blew their safety glasses and ear protection right off.''

Burned by the explosion were Patrick Meyer, Robert Carrigan, Terry McPeak, Scott Peterson, David Beyer - all part of the organization that set up the display - and state police detective Sgt. Robert Harken. Meyer and Harken were admitted to the Bay Medical Center, where they were in fair condition Sunday. McPeak was in serious condition at the hospital. Carrigan and Peterson were treated and released.

Beyer was taken to Bay Medical Center and was later transferred to St. Mary's Hospital in Saginaw. His condition was not released.

Barcia said the fireworks display has been an annual event at the park for 26 years and there have been no previous incidents.

''It was quite a massive explosion,'' Barcia said. ''Fortunately, just

those six were injured. It's just a miracle that perhaps a lot of the other fireworks didn't go off, because there was a trailer behind us and it was filled with a large number of explosives.

''It was just a freak accident that it went the way it did. It's a good thing the governor had left about 10 to 15 minutes before. We're all very fortunate that more explosions didn't occur. If more had exploded, we could have had some more serious problems.''

The incident was the third serious fireworks accident in the United States in four days.

In Columbia Heights, Minn., 11 people received minor injuries from a Fourth of July fireworks display when wind apparently carried hot debris over the crowd. Also Wednesday, 19 people were injured in Torrington, Conn., when a fireworks display malfunction and shot toward spectators.

#90189u0299 07/08/1990 ~United Press International

BANGKOK, Thailand (JULY 8) UPI - U.S.-backed resistance forces launched a counterattack against troops of the Vietnamese-backed Phnom Penh government deep inside Cambodia, killing at least 94 soldiers, resistance radio reported Sunday.

Earlier, resistance leader Son Sann called for a ''technical meeting'' of the four battling factions in Cambodia to try to remove some of the obstacles to peace remaining after 11 years of conflict.

The radio ''Voice of the Khmer'' said resistance forces loyal to Prince Norodom Sihanouk launched ''a fierce counterattack'' against government troops in Kompong Thom, about 80 miles north of Phnom Penh.

It said 94 government soldiers were killed and 40 taken prisoner in the fighting last week. Government shelling killed 15 civilians, it said.

The government brought in 3,500 soldiers from nine provinces and 1,200 Vietnamese soldiers to counter a resistance thrust into Kompong Thom late last month, the rebel radio said.

Vietnam has denied repeated resistance reports of Vietnamese soldiers in battle, insisting that all its combat forces withdrew from Cambodia last September, although advisers, technicians and intelligence officers have remained.

The rebel radio said the large government force was assembled ''to attack and mop up Cambodian resistance groups which are controlling a number of major district seats in Kompong Thom Province.''

It said resistance forces were still actively operating around the provincial seat, which fell into resistance hands for four hours last month.

The government forces began a large-scale drive on July 2, but were stalled by the counterattack three days later, the radio said.

Sihanouk's forces receive diplomatic backing and ''non-lethal'' aid from the United States as well as military help from Thailand, Singapore and China.

On Saturday, former Prime Minister Son Sann, the leader of a second U.S.-backed group, the Khmer People's National Liberation Front, called on the government and the Chinese-backed Khmer Rouge faction to join the two non-communist groups in a meeting to try to revive progress towards a peace settlement.

Son Sann said Sihanouk supported the meeting, but was ill and unable to attend. He said he had received reports that the Phnom Penh government had also agreed to the meeting.

He said the meeting should be held in either Bangkok or Paris.

Son Sann said the meeting was necessary because he and Khmer Rouge leader Khieu Samphan did not fully agree with a cease-fire statement signed by Sihanouk and Phnom Penh government leader Hun Sen in Tokyo last month.

He said the talks should cover details of a Supreme National Council, the role of the United Nations and plans to make the ancient ruins at Angkor Wat a peace zone.

Son Sann said he did not hope for 100 percent agreement at the proposed talks, but said that 60 or 70 percent would be enough.

The current Cambodian government was installed by the Vietnamese army after its 1978 invasion ousted the Khmer Rouge, blamed for the deaths of 1 million people, from power.

#90189u0307 07/08/1990 ~United Press International

COLOMBO, Sri Lanka (JULY 8) UPI - President Ranasinghe Premadasa said Sunday the international community must be involved in any negotiations to end the government's month-long war with Tamil rebels, and new fighting between troops and guerrillas left at least 31 people dead.

The president's remarks came as government troops, supported by air force

planes and navy gunboats, closed in on a jungle stronghold in eastern Sri Lanka where an estimated 4,000 guerrillas of the Liberation Tigers of Tamil Eelam are thought to be hiding.

''The destruction of lives and public property in the north and east can be prevented only if the LTTE stops its military activities,'' Premadasa said in a speech at Puttalam, 80 miles north of the capital.

''It is only with the involvement of the international community, in a manner acceptable to us, that the dialogue (with the Tiger rebels) can recommence.''

More than 1,000 people have been killed in fighting between government troops and Tiger rebels since the war erupted June 12, when guerrillas launched simultaneous attacks against four army camps.

The Tiger rebels are fighting for an independent Tamil homeland in the north and east of the country. They claim the minority Tamils, who are mostly Hindu, need a separate state because of years of discrimination by the majority Sinhalese community, which is predominantly Buddhist.

Military sources said at least 31 people were killed in new violence Sunday in the teardrop-shaped island at the southern tip of India.

The Ministry of Defense also issued a statement saying it had confirmed that Tiger rebels had killed 289 policemen held prisoner. More than 600 policemen were surrounded in several eastern cities at the start of hostilities and forced to surrender.

The statement said 315 officers were still missing and ''it is most unlikely that the policemen have been spared.''

At least 21 Tiger rebels dressed in olive camouflage uniforms were killed Sunday when soldiers captured a major guerrilla ammunition dump near the northeastern city of Trincomalee, 155 miles northeast of the capital, military sources said.

#90189u0313 07/08/1990 ~United Press International

WIMBLEDON, England (JULY 8) UPI - Stefan Edberg squandered a two-set advantage Sunday then regained his poise and reclaimed the Wimbledon crown from Boris Becker with a 6-2, 6-2, 3-6, 3-6, 6-4 triumph.

The Swede, who also beat the West German for his 1988 title, denied Becker a fourth title at The All England Club. Not since 1927 has a Wimbledon finalist recovered from a two-set deficit to win.

Edberg and Becker, meeting in the final for the third straight year, had only played five sets once before in their 24 career meetings. At the 1989 French Open, Edberg also led by two sets, let Becker even the match but held on to win the fifth.

On Sunday, Edberg trailed 3-1 in the fifth set. In the fourth game, he double-faulted by more than eight feet, to give Becker the break at deuce. But the Swede immediately broke back, taking Becker's serve at 30 when the defending champion missed two easy forehand volleys, sending both wide. At 4-4, Becker lost his serve again. Edberg whipped a backhand top-spin lob winner to gain the break at 15, then he looked skyward and raised his fist in exultation.

Edberg served out the match, winning his second match point, at 40-30, when Becker's service return sailed wide, ending the 2-hour, 58-minute final.

Edberg, who also won the Australian Open twice, earned $391,000. Becker, who has lost just two times in 23 Centre Court appearances, earned $195,500.

Edberg's triumph salvaged a frustrating year. At the Australian Open, he had to retire in the third set of the final due to a pulled stomach muscle giving Ivan Lendl the championship. At the French Open, where he was the top seed, Edberg lost in the first round.

The Swede, who possesses classic strokes, entered the final having lost just three sets in his six Wimbledon matches and appeared to be reaching peak form.

Edberg, the No. 3 seed, took the first two sets in an efficient 56 minutes never dropping his serve or even being faced with break point. Becker, whose serve was broken in the third and fifth games of each set, could not deal with Edberg's service returns, which were drilled at his feet or stroked down the sidelines.

Becker, the No. 2 seed, is normally a fierce competitor, but he was almost docile through the first 11 games. After Edberg flicked a forehand top-spin lob for a winner, for a service break and a 2-1 second-set lead, the West German's head dropped and during the changeover he just stared down at the ground.

Interspersed through the next few games were Becker's shouts at himself as he tried to gather his game and his determination.

In the third set, Becker's shots and resolve finally hardened. The set was decided by the sole service break. In the second game, Edberg lost the first three points, pulled within 30-40 then watched helplessly as Becker

smashed a backhand crosscourt winner on a service return. The West German served out the set by winning his next four games at love, 15, 30 and deuce.

In the fourth set, Becker broke his opponent twice, in the third and ninth games, and seemed to be in control of the match.

#90189u0328 07/08/1990 ~United Press International

(JULY 8) UPI - Around the world, around the clock... here's the latest news from U-P-I.

Residents in the eastern Alaska town of Tok are keeping watch on the progress of a wildfire raging near the village. The nearly 50-thousand-acre blaze is burning out of control east, southeast, northeast and north of the town. Firelines and the wind helped divert the blaze Friday, and on Saturday firefighters switched from a defensive to an offensive stance in combatting the huge fire.

Members of the radical environmental group Earth First! are gathering in Montana's Gravelly Mountains for the group's annual retreat. A contingent of more than seven-dozen groups tried earlier to prevent Earth First! from holding the meeting. But their bid was squelched by a San Francisco federal appeals judge who refused to revoke the group's camping permit.

Philadelphia police say 133 people... including 10 juveniles... were arrested Saturday for blocking the entrance to an abortion clinic. Despite the illegal gathering, the head of the women's health center said her facility saw all clients who were scheduled for treatment. 124 anti-abortion activists were arrested Friday at the center for trespassing.

A Peoria, Illinois, family embraced their neighbors Saturday, thanking them for helping raise a 60-thousand-dollar ransom to free Scott Heimdal from captivity. Marge Heidal commended the people who contributed to win her son's release from Colombian rebels, calling them ''compassionate and supportive.'' Scott Heimdal spent 61 days in captivity before being released June 29th.

#90189u0331 07/08/1990 ~United Press International

(JULY 8) UPI - American writer Mark Richard was honored Saturday with the 15th annual Ernest Hemingway Foundation Award. It's bestowed on what a three-person panel considers the best first-published book of fiction by an American... and it carries with it a 75-hundred-dollar payday. Richard's prize-winning effort was his short story collection, ''The Ice at the Bottom of the World.''

Backers of relaxed marijuana laws in Oregon say they failed to gain enough support to put the issue before voters on the November ballot. Sponsors of the so-called ''Drug Abuse Funding Act of 1990'' say they lacked nearly 10-thousand signatures to place the issue on a referendum. The initiative called for legal pot possession with the purchase of a 50-dollar license. Half the proceeds would have funded drug and alcohol treatment programs.

-30- 983

#90189u0472 07/08/1990 ~United Press International

(JULY 8) UPI - Democrat and Republican members of a House panel that studies defense policy disagree about whether a Soviet conventional weapons threat still exists in Europe. In a report to be released today, the House Armed Services Committee's Defense Policy Panel says the Soviet threat in Europe is an ''empty'' one. But the 15 Republicans on the panel did NOT agree with the central conclusion, saying Soviet power remains substantial.

As President Bush prepares for next week's economic summit in Houston, he's making his position clear on Western economic aid to the Soviet Union- he opposes it. The issue is certain to be at the top of the summit agenda. West Germany, Italy, France and Canada support financial aid for Moscow at this time. But the United States, Japan and Great Britain are waiting for President Gorbachev to advance his reform program.

Soviet President Gorbachev interfered in the Communist Party Congress yesterday as party leaders launched personal attacks against one another. Gorbachev broke in after the mostly conservative body spent hours criticizing and severely questioning several of his top aides. The Soviet leader warned party leaders NOT to turn the Congress into a ''kangaroo court.''

Iran's official news agency and Middle East sources say another Western hostage being held in Lebanon could soon be freed. The agency did NOT say who would be released, but diplomatic sources in Damascus say it probably will be Anglican Church envoy Terry Waite. The Damascus sources say Waite's church supplied aid to victims of last month's Iranian earthquake. But other sources in Beirut say Irishman Brian Keenan may be the one freed.

#90189u0512 07/08/1990 ~United Press International

HOUSTON (JULY 8) UPI - With protecting the environment a possible topic for debate at the Economic Summit, President Bush and Canadian Prime Minister Brian Mulroney agreed Sunday to open negotiations on a bilateral accord to cut acid rain.

The proposed agreement, long a Canadian priority, would lock the two countries into a timetable and specific targets for reductions in sulfur dioxide, the pollutant most blamed for acid rain damage to forests and lakes.

The announcement, made after a brief Bush-Mulroney meeting, came on the eve of a seven-nation summit where Bush could come under pressure from allied leaders to respond more actively to such environmental problems as global warming.

Bush gave environmental issues a high public profile at the 1989 Economic Summit in Paris by including William Reilly, head of the Environmental Protection Agency, in the official American delegation.

This year, with Bush resisting calls by European leaders for action to combat global warming, Reilly is absent. White House chief of staff John Sununu, chief defender of Bush's go-slow approach, said Saturday on Cable News Network that the United States would not succumb to ''political

stimulation'' or ''emotional responses.''

Interviewed Sunday on ABC's ''This Week with David Brinkley,'' Secretary of State James Baker said that even without Reilly present, Bush ''is here and he is fully versed, informed on the issues respecting the environment.''

The U.S.-Canadian initiative was characterized by U.S. officials as more of a political gesture to Mulroney, who has pressed for years for formal U.S. commitments on acid rain, than a move to take heat off Bush during the three-day meeting.

In effect, it fulfills a promise made in the earliest days of his administration, when Bush offered to begin discussions on an acid rain accord - something President Reagan deferred to further study - once Congress acted on clean air legislation that included timetables and targets for emission reductions.

''I think that this day will be remembered in the history of our relationship for the significant departure that it constitutes from past positions (regarding) the protection of the environment in North America '' Mulroney told reporters.

U.S. officials were careful to describe the proposed agreement as an accord rather than a treaty. The latter would require Senate ratification, which could reopen the debate over acid rain or face other political complications.

Deputy White House press secretary Steve Hart said Bush decided to move forward with negotiations after concluding the House and Senate bills probably will produce a compromise Clean Air Act acceptable to the administration.

House-Senate conferees are scheduled to begin work on the legislation next week. Bush and Mulroney said Reilly and Canadian Environment Minister Robert de Cotret will open preliminary talks on the bilateral accord July 16 in Ottawa. Formal negotiations will begin ''shortly thereafter,'' they said.

''We look forward to a close working relationship between Canada and the United States to assure that our agreement on air quality and our other bilateral programs yield tangible environmental improvements and benefits '' the leaders said in a joint statement.

Although Mulroney said he and Bush had ''fought long and hard to get where we are today,'' the proposed agreement would merely provide a framework for the pollution reductions each country has already promised.

The clean air legislation on Capitol Hill would require a 50 percent cut in sulfur dioxide emissions, produced largely from coal-burning utility plants and factories, by the year 2000. Canada is embarked on a similar program.

In his brief appearance before reporters, Mulroney refused to say how the agreement would provide Canada, which blames its acid rain problems on pollution from the United States, with more protection than the pending legislation.

U.S. officials said the document could establish a mechanism for monitoring implementation of the required emission reductions, follow-on studies and even enforcement or dispute-settlement procedures. More ambitious reduction targets are not envisioned, the officials said.

#90189u0560 07/08/1990 ~United Press International

CHANNELVIEW, TX (JULY 8) UPI - The night he died in a massive explosion and fire at the ARCO Chemical Co. plant where he worked, a 24-year-old millwright called his new bride repeatedly to say he was worried about a pump at the plant.

''Michael told me they were about to start a compressor that they had fixed,'' Lori Davis said Saturday. ''But they were afraid to do it because they thought it might blow.''

Her husband's last call Thursday was to say the pump was about to restarted and he'd soon be heading home to Baytown. Minutes later, the 11:20 p.m. inferno killed Davis and 16 other workers in the plant just east of Houston.

Lori Davis went to sleep Thursday night secure that her husband had finished a grueling 16-hour shift. The next morning she woke up alone.

She called ARCO looking for Michael, who was employed by Austin Industrial Inc., one of the companies that provided maintenance at the plant under contract. Upon being told that someone would call her back, she turned on the television and was shocked by horrifying pictures of the plant.

''I called ARCO again. 'Where is my husband?' I asked. They said they'd call me back. I was looking at the explosion on TV. I didn't wait. I went to ARCO. I already knew something was wrong the night before. He said they'd been afraid to start that pump up, that something wasn't right,'' said Davis, 26.

The couple was married June 9 after dating for about a year. They had attended high school together, and he was planning to adopt her 4-year-old

son.

''We had the rest of our lives ahead of us,'' she said. ''It shouldn't have happened. I'm going to wait until he's in the ground, and then I'm going to make them pay.''

She blames Austin Industrial and ARCO for his death even though ARCO managers say they took all proper precautions.

''He worked 86 hours last week,'' she said. ''They worked the guys too hard. They'd been on 16 hours, and instead of waiting until things were safe and getting another crew, they rushed it. They were wrong. This needs to be said, and I'm not afraid of saying it.''

ARCO managers say they do not believe fatigue was a factor in the explosion. They acknowledged employees regularly worked 16-hour shifts and said the practice is common for refinery workers.

''I don't think that work hours had anything to do with it,'' said plant manager Earl McCaleb. ''It's not all that uncommon to work 16-hour shifts throughout the industry.''

James Stafford, attorney for the family of 25-year-old operator John Blackstock, said there was gross negligence by ARCO. Stafford said he plans to file suit Monday against ARCO, and the family of another dead worker already has filed suit.

Stafford said employees of Austin Industrial brought the wrong part to repair the compressor pump. But he said the part was used anyway and probably caused the blast. Stafford said Blackstock had complained to managers, saying he did not want to start the compressor because he considered it unsafe.

Gerald T. Davis, public relations manager for ARCO, said the company knew nothing about workers using a wrong part.

Stafford said Blackstock had worked his way up at ARCO since graduating from high school. He was to be married in September.

Harold A. Sorgenti, president of Arco Chemical, said the company had used contract workers at many of its plants for years, including the Channelview plant, which opened in 1977.

Occupational Safety and Health Administration officials, conducting the investigation into the accident, said they would conclude their review in about a week.

Nothing on the site can be removed until OSHA finishes its review. State

District Judge Shearn Smith issued a temporary restraining order Friday that ''prohibits the changing of any of the matters that might be of interest to those investigating the occurrence, any kind of evidence.''

An attorney representing Sandra Davis, wife of blast victim Gregory Davis, obtained the order.

Smith said a hearing on the restraining order is slated for Thursday.

#90189u0576 07/08/1990 ~United Press International

SEABROOK, NH (JULY 8) UPI - The Seabrook nuclear power plant resumed operating at 75 percent of capacity Sunday after shutting down for three days while technicians resolved a vibration problem, a plant spokesman said.

The plant reached 75 percent power at about 10 a.m. EDT, said Ron Sher, a spokesman for Seabrook operator New Hampshire Yankee.

''At that level the generator is producing 900 megawatts. That's equivalent to the energy needs of three-quarters of a million homes,'' the spokesman said.

Sher said testing at the present level would continue for a week or two, before preparations are made for 100 percent operation, expected late this summer.

Seabrook reached 75 percent power, its highest level so far, for the first time on Thursday and operated for nearly five hours. The plant then automatically disconnected from the power grid and shut itself down after instruments detected low oil pressure in a hydraulic control system.

Technicians' analysis showed oil pressure was normal, but electronic monitoring equipment was responding to vibrations from the plant's turbine.

Sher said switches in the monitoring equipment were moved to an area not affected by turbine vibrations.

The controversial $6.5 billion Seabrook plant received its full-power license in March. Since then, technicians have been operating the reactor at increasingly higher power levels.

The plant will not be placed in commercial service until utility regulators in all six New England states have approved customer charges for Seabrook power by the utilities that own it. It is not know when that might be.

Seabrook's nearly 20-year history has been marked by regulatory delays, court challenges and demonstrations by opponents of the plant. The project also led to the bankruptcy in January 1988 of the plant's lead owner, Public Service Co. of New Hampshire.

(JULY 8) UPI - The world's economic superpowers begin a summit in Houston tomorrow with the key issue expected to be Western aid to the Soviet Union. President Bush remains staunchly opposed to giving Moscow direct financial aid at this time. The president says he wants to see more reforms enacted, and is concerned about Soviet economic support of Cuba and the BILLIONS of dollars spent on military programs.

Japanese Prime Minister Toshiki Kaifu also opposes Western aid for the Soviet Union, but he is expected to push for aid to China. Japanese officials indicate Kaifu will try to convince his summit partners to end trade sanctions that were imposed against Beijing after last year's crackdown on pro-reform demonstrators. Kaifu might argue that China has made progress in human rights.

China's leaders are known to be nervous about the decline of socialism around the world, and an editorial in today's state-run People's Daily seeks to dismiss those concerns. The editorial says China can survive only through renewed study of- quote- ''the truth of Marxism.'' The article acknowledges that many nations have abandoned socialism in favor of capitalism, but says that's all the more reason for a deeper study of Marxism.

Land management officials in Alaska say cooler air is giving firefighters the extra help they need in fighting wildfires sparked by lightning. The two biggest fires- a 47-thousand-acre blaze near the town of Tok and a 35-thousand-acre fire on the Yukon Flats National Wildlife Refuge- still raged out of control yesterday. Officials say there are 185 fires burning throughout Alaska.

#90189u0692 07/08/1990 ~United Press International

(JULY 8) UPI - The economic summit of the world's seven top industrialized democracies gets under way in Houston tomorrow. The leaders

are expected to focus on the thorny issues of Western aid to the Soviet Union and the removal of sanctions against China. President Bush does NOT favor giving Moscow financial help until Soviet President Gorbachev implements more reforms.

Hundreds of protesters screamed obscenities and shook their fists in anger at more than 50 Ku Klux Klan members in Houston yesterday. The Klan members were demonstrating against the Economic Summit, saying the visiting delegations are plotting against the American taxpayer. NO injuries were reported, although some people had face-to-face confrontations with the Klan members.

South African authorities say they have detained several right-wing whites following a week of urban bombings. The blasts were aimed at black civilians as well as liberal and moderate white lawmakers. A police statement says the high-profile right-wing activists are being held under the Internal Security Act, which permits detention without trial.

The Louisiana state Senate could try again as early as today to over-ride a veto of a controversial anti-abortion bill. The Senate yesterday failed to override Governor Buddy Roemer's veto of the measure which would allow abortion only if the mother's life is in danger. The House voted to override Roemer's veto, but backers of the bill are NOT optimistic the Senate will be able to do the same.

#90189u0798 07/08/1990 ~United Press International

HOUSTON (JULY 8) UPI - The 16th Economic Summit of Industrialized Nations opens Monday with its American hosts determined to see that contentious issues of aid, trade and the environment are debated in private and papered over in public.

President Bush, official head of the meeting that will see him confer with leaders of Britain, Canada, France, Italy, Japan and West Germany, arranged a Texas-style reception Sunday for his early arriving guests - a barbeque followed by a rodeo demonstration.

On the eve of the three-day meeting of the world's seven most powerful democracies, U.S. officials reaffirmed their resistance to European calls for concerted Western aid to prop up Mikhail Gorbachev and the Soviet economy.

''That's not right now in the cards,'' Secretary of State James Baker said on ABC's ''This Week with David Brinkley.'' Instead, he said Bush would seek support for ''technical economic assistance'' to help Gorbachev reform the Soviet economy.

Baker also said U.S. officials had supplied the Soviets at the Malta summit in December with recommendations on ''how much soap could be put on the shelves'' if they redirected their estimated $15 billion a year in aid to totalitarian regimes like Cuba.

National security adviser Brent Scowcroft reinforced the U.S. opposition to direct economic aid on Cable News Network, promoting private investment - rather than handouts from the West - as the key to instituting a market-based economy.

Moreover, he said food aid, proposed by some to help Gorbachev ease potentially destabilizing discontent among Soviet citizens demanding benefit from his reforms, is ''the worst kind of aid to give ... because it doesn't generate growth.''

Taking note of the immense waste and inefficiency plaguing state-controlled Soviet agriculture, he said, ''If we could cut that in half, you'd have an enormous transfusion into the Soviet economy.''

Bush, who exercised his prerogative as host to hold the summit in his adopted hometown, told reporters he looked forward to briefing other leaders on a letter from Gorbachev, but offered no hint of a change in policy.

White House press secretary Marlin Fitzwater said Gorbachev, in the July 4 letter, reviewed his reforms and asked for ''principally technical economic assistance and some credit that could be beneficial to his reform effort.''

''It doesn't raise any new issues or new requests,'' Fitzwater added.

While unprepared to join in what West Germany and France have proposed as a $15 billion multilateral program of loans, grants, credit and joint ventures, Bush has made clear he would not seek to block such efforts by individual countries.

That go-it-alone view applied as well to aid to China, evidenced Saturday when Bush said he would not criticize Japan for its proposed resumption of loans to China while retaining U.S. economic sanctions against Beijing for the Tiananmen Square massacre.

When asked about the expected absence of a firm summit consensus on the aid issue, Scowcroft said only that ''these are consultative, not determinative organizations.'' Translation: within bounds, each country can do as it pleases.

On other issues ranging from farm subsidies to global warming, summit organizers geared for an annual ritual that will see the leaders confront tough questions but, if past is prologue, without yielding dramatic answers.

U.S. officials worked behind the scenes on a final communique that would endorse economic assistance to Moscow only in broad and conditional terms, give a shot in the arms to world trade talks, and mask differences over environmental issues.

Bush also was seeking a summit agreement to drum up broader international participation in his June 27 initiative in aid to Latin America, a combination of loans, debt forgiveness and investment and trade promotion.

The program, intended to reassure hemispheric neighbors that their needs will not be overlooked in the rush to rebuild Eastern Europe, would be modeled after an aid program for Poland and Hungary that was initiated at the Economic Summit in Paris but implemented by the broader G-24 group of industrialized nations.

European and Japanese opposition to a U.S.-proposed end of agricultural

subsidies stood in the way of compromise language urging a successful end to the Uruguay Round of global trade negotiations by a December deadline.

#90189u0818 07/08/1990 ~United Press International

LOS ANGELES (JULY 9) UPI - Gasoline prices at the pump are virtually unchanged nationally compared with two weeks ago, an analyst said Sunday.

Trilby Lundberg, director of the Lundberg Survey, said a survey of 13,000 retail gasoline outlets July 6 showed the national average price for a gallon of gasoline in all grades, including taxes, was 117.66 cents, compared to 117.68 during a similar survey June 22.

''We have virtually no change in the weighted pump price,'' Lundberg said, who added there were some regional changes.

''During the period, there were rises and falls of wholesale and pump prices with the West and Rockies rising, while the rest of the country fell, especially in the Midwest,'' she said.

She said the increases in the West were due to refinery problems and the production of special gasoline to meet demands for lower emissions in several localities.

At self-service pumps, the average price for a gallon of unleaded regular was 105.55 cents, premium unleaded was 122.96 cents, and regular leaded sold for 107.75 cents.

At full-service pumps, the average price for a gallon of unleaded regular was 132.20 cents, premium unleaded sold for 145.76, and regular leaded was 129.80 cents per gallon.

#90189u0978 07/08/1990 ~United Press International
(JULY 8) UPI - President Bush is scheduled to meet with Canadian Prime Minister Brian Mulroney today in Houston on the eve of the summit between the world's economic powers. Bush and Mulroney are expected to hold a news conference after their talks. Bush will later meet with the president of the European Community and end the day with a Texas rodeo and barbecue.

Bombs dropped by at least two Israeli warplanes today scored direct hits on a three-story building housing members of the Hezbollah extremist group. Two members of the group were killed and three others wounded in the attack on bases in the mountainous area of southern Lebanon. The attack was the second by Israeli jets in less than a week... and rescuers say several people were buried under rubble.

Today marks the start of the second week of a standoff involving thousands of refugees being sheltered in foreign embassies in the capital of Albania. The crisis has now claimed it first victims in the Albanian leadership with the reshuffling of the ruling politburo. Albania's Communist Party leader today announced the firing of the defense minister... the demotion of the interior minister and the forced retirement of two other politburo members.

The president of Sri Lanka says any negotiations to end his government's month-old war with Tamil rebels must be an international effort. His comment comes as new fighting today claimed at least 31 lives. More than one-thousand people have been killed in the month of fighting. Soldiers are reportedly closing in on a jungle stronghold where four-thousand rebels are thought to be hiding.

A Michigan state senator today says a fireworks accident that injured six people at a show last night in Bay City could have been much worse. The victims... including a state police officer... all suffered burns when a firework display went awry before a crowd of some 400-thousand people. One of the victims was hospitalized in serious condition. An explosion was caused when sparks from one display prematurely ignited other fireworks.

#90189u1065 07/08/1990 ~United Press International
(JULY 8) UPI - World leaders continue to trickle into Houston, Texas, for tomorrow's Economic summit. President Bush today hosts a Texas-style barbecue and rodeo for allied leaders already on hand. Bush got an early start this morning as he and Mrs. Bush joined British Prime Minister Thatcher and her husband at church in his adopted hometown.

Secretary of State Baker today said the Bush administration for the first time will allow Soviet rockets to carry U-S commercial satellites into space. The United States has traditionally opposed such launches for fear of revealing satellite technology that has military applications.

Add six more victims to the list of Colombian casualities. Authorities say six police officers were gunned down in the cocaine capital of Medellin overnight. In one incident, gunmen open fired on two off-duty police officers as they relaxed in a pool hall. 165 officers have been killed so far this year.

Police in Northern Ireland say they believe the Irish Republican Army was behind an attack on a police patrol this morning near Belfast. An unknown number of gunmen reportedly open fired on police and threw a bomb that failed to explode before escaping. One officer and an alleged gunman were shot and seriously wounded in the exchange.

Solidarity leader Lech Walesa today said neither he nor any other Polish leader was prepared for life after communism. Walesa told delegates at the Solidarity parliamentary caucus that the country's current headaches are rooted in the fact that leaders- quote- ''have NOT at all talked about what will come after communism.''

-30- 1776

#90189u1071 07/08/1990 ~United Press International

(JULY 8) UPI - A Michigan state senator who witnessed a fireworks accident that injured six people in Bay City says things could have been much worse. State Senator James Barcia today said fireworks sprayed sparks back into tubes holding other fireworks... causing two explosions. Last night's incident was the third serious fireworks accident in the United States in four days.

A group calling itself Artists Against Religious Oppression claimed responsibility this morning for leaving a political calling card on the steps of a Los Angeles Roman Catholic Church. They say they left a 10-foot cross covered with marital aids and condoms to remind churches to stay out of politics and medicine.

The first heads are reportedly rolling among the ruling communists in Albania. The Austrian news agency today reports the Albanian Communist Party leader announced a reshuffling in the ruling politburo, including firing the defense minister. The change comes as thousands of Albanians enter their second week as refugees in foreign embassies in the capital of Tirana.

Police say Israeli planes today bombed bases of the pro-Iranian Hezbollah group in southern Lebanon... killing two gunmen and wounding three others.

Authorities say at least two planes dropped large bombs in two villages south of Beirut. Rescuers say an UNknown number of gunmen are buried under the rubble.

The director of the American Institute for Preventive Medicine says research at Cornell University indicates tightly knotted neckties can interfere with blood flow and affect vision. Don Powell says ties doN'T strongly affect most workers, but added top-notch vision can be critical for many workers... such as pilots.

#90189u1153 07/08/1990 ~United Press International

(JULY 8) UPI - U-S and Canada agree to talks on acid rain on eve of Houston Economic Summit... Louisiana senators seek to push through tough anti-abortion bill... And word that the makers of the flawed Hubble telescope mirrors were heavily rewarded for work. These stories and more, next, from U-P-I.

President Bush and Canadian Prime Minister Brian Mulroney agreed in Houston today to open negotiations on an agreement to cut acid rain.

The proposed accord would lock the two countries into a timetable for reductions in sulfur dioxide... the pollutant most blamed for acid rain damage to forests and lakes.

Clean air legislation in Congress would require a 50 percent cut in sulfur dioxide emissions by the year 2000. Canada has a similar program.

The announcement comes on the eve of a seven-nation Economic Summit in Houston where allied leaders could pressure Bush to take more action against environmental problems such as global warming.

Bush gave environmental issues a high public profile at last year's Economic Summit by including Environmental Protection Agency chief William Reilly in the American delegation. Bush is now resisting calls by European leaders for action to combat global warming... and Reilly is absent.

White House chief of staff John Sununu said yesterday that the United States will NOT give in to political or emotional appeals.

The United States and Greece today signed an eight-year defense cooperation agreement that permits two major U-S military bases to continue operating on Greek soil.

The agreement to renew the lease of major air and naval bases on the island of Crete is the first major international accord signed by the Greek government since conservative Prime Minister Constantine Mitsotakis

took office in April.

U-S Defense Secretary Cheney... in Athens for the signing ceremony... called the pact a ''contribution to the strength of NATO.''

But the small print of the treaty also closes two other major bases in Greece and some 20 minor U-S military installations.

The cutbacks in Greece are part of Washington's plans to trim military spending.

The new accord allows the Crete bases to continue operating for eight years.

#90189u1179 07/08/1990 ~United Press International
(JULY 8) UPI - The Bush administration plans to clear the way for Soviet rockets to carry U-S-built satellites for the first time.

Secretary of State James Baker today confirmed a newspaper report which quotes government sources as saying the National Space Council made the decision last week.

Vice-President Quayle heads the space council... but the measure still needs formal approval from President Bush. Baker says the president has decided the first launch can go forward.

That launch is to be in northern Australia. An Australian business will hire an American company to run the Cape York Space Agency as early as 1995. Soviet-built rockets are to carry satellites into space for customers from around the world... including the United States.

The Soviet space agency would reportedly supply rockets and engineers, but would NOT own a share in the venture.

The United States has in the past opposed such launches... citing a need to protect military secrets.

Solidarity leader Lech Walesa says he and other Polish leaders are NOT at all prepared for life after communism.

He told a group of about 160 deputies and senators from the Solidarity parliamentary caucus today that their lack of preparation was to blame for the country's long list of political and economic problems.

He said- quote- ''We have NOT at all talked about what will come after communism and how we will lead Poland to the second stage.''

Walesa accused the Solidarity delegates of backing away from society and their own roots... just as the communists did before them. He also warned social protests may result because- in his words- society does NOT know what is being plotted.

Polish farmers today announced they will block roads on Wednesday to protest the government's refusal to meet their demand to guarantee minimum prices for their products.

The farmers contend the government's agricultural policy is stifling production.

#90189u1191 07/08/1990 ~United Press International

(JULY 8) UPI - South African police fired tear gas and unleashed attack dogs into a crowd of one-thousand black protesters in a Pretoria township today, triggering a stampede in which at least 230 people were injured.

A spokesman for the anti-apartheid alliance United Democratic Front says chaos erupted when police fired tear gas into a crowd of protesters gathered at the Mamelodi township stadium to discuss recent rent increases.

The crowd reportedly tried to run when the police sent in specially trained attack dogs, a move that sparked an all-out stampede.

One witness said ''people were running and screaming all over the place.''

Police confirmed the incident, but said they took action after the protesters... who were holding what authorities called an illegal meeting... refused to go home and started stoning patrol cars and setting up barricades.

The township's hospital superintendent says at least 230 people were admitted for injuries ranging from hyperventiliation to fractures. She said many would be in the hospital for a few days.

A group calling itself Artists Against Religious Oppression says it woN'T stop harassing the Los Angeles Roman Catholic Archdisocese until the church stops harassing abortion clinics and homosexuals.

The group claimed responsibility this morning for leaving a couple of calling cards on the steps of two Catholic churches.

They bolted to the door of one church a 10-foot cross covered with marital aids and condoms and scattered red coathangers on the sidewalk. They spray-painted slogans such as... ''safe sex saves and Mahony kills''... a

reference to L-A Archbishop Roger M. Mahony.

The protests were the most recent in an ongoing series of church defacements and other incidents targeting Los Angeles-area Catholic churches and the archbishop.

A spokeswoman for the group says the message is that the church should stay out of politics and medicine... stop oppressing women, gays and lesbians... stop preaching sin and lies... and start preaching safe sex and truth.

An archdiocese spokesman says the vandalism was- quote- ''obviously the work of extremists... and adds nothing to the public policy debate on abortion and AIDS.''

ROME (JULY 8) UPI - In 1982 and 1986, West Germany approached soccer's highest peak only to tumble back.

On Sunday night, after eight years of waiting, the West Germans planted their flag on the mountain top.

In a game that was neither beautiful nor filled with goals, West Germany rejoiced in triumph all the same, defeating defending champion Argentina 1-0 to win the World Cup championship.

West Germany, the losing finalist in the previous two World Cups, used a penalty kick in the 84th minute from Andreas Brehme to win this rematch of the 1986 final.

Such was West Germany's domination that Argentina failed to manage even one legitimate shot. As for Argentina's Diego Maradona, the magnificent midfielder playing in his last World Cup, he was virtually anonymous and left in tears.

''We absolutlely dominated the game from the first minute,'' said outgoing West German Coach Franz Beckenbauer, who became the first man to manage and captain World Cup winners. ''We were clearly the better team as we played in a positive way.''

The penalty kick by Brehme was sufficient to give West Germany its third title, tying the West Germans with Italy and Brazil for the most World Cup crowns. West Germany previously won in 1954 and 1974. It lost the World Cup final to Italy in 1982.

Argentina was bidding to become the first nation to win successive World

Cups since Brazil in 1958 and 1962. Argentina beat West Germany 3-2 in the 1986 final in Mexico City.

''From the first minute until the last, there was no doubt to who would win, even though it took us a long time to score,'' Beckenbauer said. ''(The penalty) was not the key to the result because I think we would have scored in extra time by continuing to play patiently.

''We played in an excellent way. It was just too bad that Argentina did not participate. They played a far too defensive game. I can't say it was an excellent game, but it's not up to us the way our adversaries choose to play.''

Entering the match with four players suspended, Argentina may have been hoping to steal the title in a penalty-kick shootout, as it did in the quarterfinals and semfinals.

Instead, Argentina's hopes of repeating died on a penalty kick. Before an Olympic Stadium crowd of 73,603 fans and a television audience of some 1 billion viewers, the critical play came with Argentina playing a man short.

Argentina's Roberto Sensini took down Rudi Voeller in the penalty area while the West German striker was receiving a pass. Brehme then kicked low and left, just beyond the outstretched arms of goalkeeper Sergio Goycoechea.

Goycoechea, a replacement for injured Nery Pumpido since the second game of the tournament, had sent Argentina into the final by sparking penalty-kick shootout victories over Yugoslavia and Italy.

Brehme's goal brought thunderous cheers from the West German crowd, which practically owned the north and south curves of Olympic Stadium. Black, red and yellow West German flags streamed the stadium when the final whistle blew.

''At first, I didn't think I kicked it hard enough,'' said Brehme, whose goal settled a championship game that produced the fewest goals since the World Cup began in 1930. ''But when I saw him go the other way, I knew it would be good. It was an important kick. I knew the World Cup would be decided on that kick. I just tried to block those thoughts and concentrate on the kick.''

After the game, attended by West German Chancellor Helmut Kohl, the West German players paraded around the stadium. When they arrived at the southern curve, the stands became a sea of West German flags.

In West Germany, tens of thousands of Germans took to the streets in celebration. In most cities traffic broke down half an hour after captain

Lothar Matthaeus received the golden trophy.

In Argentina, President Carlos Menem said West Germany was the better team but he assailed referee Codesal Mendez, a gynecologist in Mexico.

''After that officiating, he should go back to concentrating on medicine to not cause more damage to soccer,'' Menem said.

About 5,000 fans sang and shot off fireworks in downtown Buenos Aires.

#90189u1240 07/08/1990 ~United Press International

(JULY 8) UPI - Two high administration officials today denied reports that U-S troops might be used in drug raids in South America. But they did NOT deny a report that the United States is coordinating a military operation against drug cartels by the armies of Colombia, Bolivia and Peru.

President Bush gave in today to what has long been a Canadian priority by agreeing to U-S-Canadian talks about cutting acid rain. The proposed agreement would lock the two countries into a timetable and specifically target ways in which to reduce sulfur dioxide, the pollutant most blamed for acid rain damage to forests and lakes.

Abortion foes lined up early outside the Louisiana State Capitol in Baton Rouge to lobby for a veto over-ride on a law that would ban most abortions. The state's higher chamber fell three votes shy of passing the measure yesterday and is expected to vote on it again this afternoon.

Nelson Mandela told Ugandans today that white extremist groups plotting to maintain South Africa's apartheid system should NOT be viewed as a threat to reform. The black nationalist said it is NOT likely such groups could overthrow President De Klerk.

#90189u1258 07/08/1990 ~United Press International

(JULY 8) UPI - Sudan today said it will meet with Libya this week to discuss a political and economic merger of the two countries. Sudan's military leader and Libyan leader Moammar Gadhafi declared their intention to merge their countries to pursue Arab unity. Western diplomats express doubts about the seriousness of the merger.

Rebels in Liberia apparently retreated to the outskirts of the capital of Monrovia today. It is NOT clear whether the rebels are only regrouping to await reinforcements. Residents have reported infighting among the rebels. Their apparent fallback comes a day after President Samuel Doe toured the center of the capital in an open jeep.

The bride of one of the men who perished in an explosion at an ARCO chemical plant in Texas Thursday says her husband called her repeatedly on the night of the blast, saying he was worried a newly-repaired compressor might blow up. Lori Davis says her husband's last words to her were that he would soon be on his way home.

The mother of a man held captive in South America refuses to answer questions about the kidnapping of Scott Heimdal and negotiations to win his release from Colombian rebels. In Peoria, Illinois, Marge Heimdal yesterday said Ecuadoran police are still investigating, and other hostages are still involved.

(JULY 8) UPI - The Bush administration today shot down a published report that alleged the United States was planning a military raid against Latin American drug cartels. Defense Secretary Cheney ... who was joined by national security advisor Brent Scowcroft... says Washington is NOT in on any plans for a raid. But Cheney refused to say whether such an operation

is being planned by Latin American countries.

Saudi Arabian reports say the Palestinian Central Council will re-group to discuss how to respond to President Bush's decision to suspend talks with the organization. The country's Middle East News Agency quotes the chairman of the Palestinian National Council saying specifics like time and place have NOT yet been decided, but that the meeting will probably take place later this month.

A pastor tonight will attempt to defend his congregation from possible expulsion from the Lutheran church for ordaining a homosexual. Pastor John Frykman prepared his comments for a church disciplinary hearing in San Francisco. In the remarks, Frykman says homosexuality is NOT a sin... while there are many cases of heterosexual pastors sexually exploiting their parishioners.

#90189u1774 07/08/1990 ~United Press International

(JULY 8) UPI - The anti-abortion movement lost a significant battle today in Louisiana. The state Senate threw in the towel on attempts to over-ride Governor Buddy Roemer's veto on what could have been the nation's toughest anti-abortion law. The legislation would have made performing an abortion a felony- even in cases of incest and rape- punishable by up to 10 years in jail and a fine of up to 10-thousand dollars. Despite the defeat, the bill's sponsor says the fight is far from over.

NASA reported today that tests conducted this weekend on fuel line fittings taken from the shuttle Columbia have turned up leaks. A space agency official says the significance of the findings canNOT be determined until more testing is done and analysis of the data is completed. NASA officials plan to discuss the findings tomorrow at a news conference. Columbia's fuel line leak prompted the space agency to ground the shuttle fleet.

A white extremist group in South Africa today claimed responsibility for a recent wave of right-wing bombings. The claim follows the arrest earlier today of nine alleged extremists whom police believe are responsible for the blasts. A message faxed to a news agency says the group... which calls itself W-B-L... threatens to attack Law and Order Minister Adriaan Vlok unless the nine are released.

Firefighters got a little help from rain today in their efforts to extinguish some 200 fires that are eating their way through the Alaskan interior. A spokesman for the state's Bureau of Land Management says some 21-hundred firefighters are concentrating on containing flames that threaten lives and property... which makes up about half the blazes. The biggest fire is the 69-thousand-acre blaze in the Yukon Flats Wildlife

Reserve.

(JULY 8) UPI - Canadian officials say they're pleased with today's agreement with the United States to start talks this summer on reducing acid rain. President Bush had previously said talks on acid rain could wait until Congress advanced on clean-air legislation. But a senior Canadian official, in Houston for tomorrow's economic summit, says Bush has now agreed to open talks regardless of when legislation emerges from congressional conference.

The United States and Greece signed a defense agreement in Athens today that will close 22 U-S installations in the country... including two major bases. The eight-year agreement will continue two major U-S bases on Greek-controlled land on the island of Crete. The United States is reducing the number of bases across the globe as part of spending cutbacks. U-S Defense Secretary Dick Cheney hails the pact as a ''contribution to the strength of NATO.''

The Seabrook nuclear power plant in New Hampshire resumed partial operations today after being shut down for three days because of a technical fault. A plant spokesman says technicians had to fix a vibration problem in the plant's turbine. The plant reportedly will operate at 75-percent capacity while technicians run a battery of tests for the next week or two.

Hospital officials at St. Vincent's Medical Center in Portland, Oregon, today said Academy Award-winning actor Gene Hackman checked out of the facility yesterday after a five-day stay. The 60-year-old Hackman entered the hospital Tuesday after experiencing chest pains. The following day, doctors used a balloon catheter to clear a constricted artery to his heart. Physicians say the procedure came in the nick of time to prevent a heart attack.

#90189u1881 07/08/1990 ~United Press International
(JULY 8) UPI - Last-minute manuevering keeps alive a less restrictive anti-abortion bill in Louisiana...

President Bush treats fellow economic summit partners to a Texas-style party...

And weekend tests find signs of leaks in the shuttle Columbia's fuel-line fittings...

These stories... and more... next, from United Press International:

President Bush gave a hearty welcome to the leaders of the world's richest nations in Houston tonight... hoping a Texas barbecue will help make their disagreements easier to swallow.

The president's country-style affair marks the eve of the 16th Economic Summit of Industrialized Nations, beginning tomorrow, which will attempt to settle differences over aid to the Soviet Union and other countries.

The party next door to the famous Astrodome featured a Wild West theme with mock storefronts and a gateway with the legend- ''Howdy Pardner.''

The leaders had a dinner featuring beef brisket, ribs and sauce, cole slaw and baked beans. After dinner, they got a close-up look at rodeo animal pens and watched demonstrations of Western riding and other skills.

Bush tossed two ringers in the horseshoe pits. Japan's Toshiki Kaifu and Canada's Brian Mulroney also tried their arms.

Mulroney was the only national leader to join Bush in wearing the special black summit cowboy boots... featuring a map of Texas in red, white and blue, and the flags of the seven summit nations.

Tomorrow, the leaders will get down to the business of whether to give aid to the struggling Soviet economy. Some of the leaders say the meeting will produce a framework to help Soviet President Gorbachev GOHRB'-ah-chawf... whose people are growing increasingly tired of shortages.

Bush opposes money for the Soviets while they continue to aid Cuba and spend BILLIONS of rubles on weapons. Japan instead wants to aid China... another move Bush says he opposes.

Yet another issue which may raise some hackles is the environment. Bush has resisted calls by European leaders for action to combat global warming. But today he agreed with Canada's Mulroney to open negotiations on reducing acid rain.

The proposed agreement would lock the two countries into a timetable for cuts in sulfur dioxide... the pollutant most blamed for acid rain damage to forests and lakes.

#90189u1909 07/08/1990 ~United Press International

(JULY 8) UPI - Tests on the shuttle Columbia's fuel system this weekend have sprung a leak... which is just what engineers were hoping for.

Scientists at Rockwell International's lab in Downey, California, want to duplicate a leak detected on the launch pad. Using a variety of sensors, engineers hope to pinpoint the cause of the small leak so they can make repairs and get the shuttle back into space.

A NASA spokesman says the significance of the observations canNOT be determined until more testing is done and the data analyzed. NASA managers plan to discuss those results at a news conference tomorrow afternoon in Washington.

At Cape Canaveral, Florida, technicians are gearing up to pump liquid hydrogen into the shuttle Atlantis's external tank Friday or Saturday to isolate a similar leak. Engineers hope to avoid shipping parts to California for testing.

Given the progress of the leak investigations, it appears likely NASA will be UNable to meet its schedule of launching more than one flight before Discovery's mission in October.

A previously unknown South African white extremist group claimed responsibility today for a bomb explosion that ripped through a Johannesburg transport terminal Friday.

The group... which calls itself the W-B-L... said in a statement faxed to a news agency that it will also attack South Africa's law and order minister unless police release nine people the group referred to as ''comrades.''

Police confirmed this morning that they have arrested nine alleged white extremists in connection with a rash of recent bombings throughout the country to protest racial reforms.

In a township near Pretoria today, police reportedly fired tear gas and unleashed attack dogs into a crowd of some one-thousand people who'd met to discuss rent problem. The action triggered a stampede... injuring scores of people.

A spokesman for the anti-apartheid alliance United Democratic Front says trouble began when police moved in to break up what had been labeled an ''illegal'' meeting.

Police confirmed the incident, but said they used tear gas and dogs only after the group refused to disband and some protesters started throwing rocks at patrol cars.

#90189u1942 07/08/1990 ~United Press International

(JULY 8) UPI - Police in the Albanian capital of Tirana today stepped up efforts to prevent more citizens from seeking refuge in foreign embassies by sealing off main streets leading to the diplomatic district.

Already, some six-thousand people have made it to foreign missions... where they are awaiting visas and passports.

But a Hungarian news agency quotes an embassy official saying he is waiting for a signal from the Albanian government so he can move 40 Albanians holed up at the mission by the book.

Yesterday, the Albanian government declared amnesty for all embassy runaways.

The political drama is further heightened by reports some Albanians are trying to run a gauntlet for the border.

A Greek border guard says Albanians are braving tightened security- including gunfire and electrified barb wire- to escape to Greece.

The country's Communist Party leader Ramiz Alia responded to the crisis today by reshuffling the ruling Politburo. Alia... who advocates cautious reform... ousted the defense minister and pensioned two other Politburo members.

#90189u1957 07/08/1990 ~United Press International

(JULY 8) UPI - One-quarter of the nation's working force reportedly has experienced discrimination.

A poll says 25 percent of all Americans feel they have been discriminated against in the workplace. Furthermore, 51 percent of all respondents believed ''all or most'' employers are guilty of dicriminatory practices.

The study also found 78 percent of those questioned believe employers hired or promoted on a discriminatory basis... despite official equal opportunity policies.

The random telephone survey of 803 adult Americans focused on employment discrimination and perceptions of job issues... ranging from drug testing and privacy in the workplace to family matters.

Only two percent said they either consulted or hired an attorney or filed a lawsuit in response to perceived discrimination... while 10 percent said they had complained to state and federal agencies.

The director of the N-double-A-C-P is calling for an end to what he

described as a campaign of ''harassment'' against prominent black politicians.

Association director Benjamin Hooks complained of selective prosecution of black leaders such as Washington, D-C, Mayor Marion Barry. And Hooks cited a long list of investigations of other blacks... including Los Angeles Mayor Tom Bradley, New York Mayor David Dinkins and Pennsylvania Representative William Gray.

Hooks raised his objections in remarks prepared for his keynote address today in Los Angeles to open the N-double-A-C-P's 81st national convention.

Hooks also called for passage of a new civil rights bill in Congress... and a renewed commitment by prosperous blacks to help those in drug- and gang-riddled communities. Hooks says if black suburbanites allow the inner city to languish, black America... for the first time... will be worse off than previously.

#90189u2016 07/08/1990 ~United Press International

(JULY 8) UPI - Police in the Albanian capital today sealed off the main streets leading to the city's embassy district. The move follows the fleeing of thousands of Albanians into the foreign compounds in an attempt to escape hard-line communism.

A weekend of specialized tests in Downey, California, has turned up signs of leaks in the shuttle Columbia's fuel line fittings. A space agency spokesman says more tests must be run before drawing conclusions on the flaw that has grounded the nation's space planes.

South African police UNleashed attack dogs and hurled tear gas canisters to disperse a crowd of one-thousand black protesters in a township near Pretoria. More than one-fifth of the demonstrators were injured.

The South African ministry of law and order today announced it has arrested nine white supremacists for a string of bombings against targets fighting apartheid. Members of an UNknown group warned violent reprisals unless the nine are released.

Firefighters in Alaska received a little natural help today when scattered showers sprayed some of the state's 202 wildfires. However, there was NO precipitation in the Yukon Flats Wildlife Refuge, where the state's largest blaze is raging out of control.

Canadian officials say they are pleased President Bush has eased his opposition to open talks on acid rain. Bush vowed today to open talks on the divisive issue this summer. Previously, he said talks should be put on

the back burner.

-30- 1638
#90189u2098 07/08/1990 ~United Press International
(JULY 8) UPI - The Louisiana Senate has approved a watered-down version of a bill that bans most abortions. The action ends a heated weekend of debate over the measure. Governor Buddy Roemer vetoed a more restrictive version of the bill Friday because it contained NO exceptions in cases of incest and rape. The Senate failed to over-ride the veto yesterday. They settled on watering down the bill and attached it to another, UNrelated measure. The House votes on the new version tomorrow.

Environmentalists from the seven nations gathered in Texas for the Houston economic summit say the world's richest nations are among the biggest culprits when it comes to spoiling the environment. The conservationists issued a report card today that ranked U-S environmental policy as ''poor.'' Also receiving poor marks was Italy, which was ranked as having the worst environmental policy.

A published report in Baltimore quotes a NASA official as saying the company that produced the Hubble Space Telescope's faulty mirror system raked in 11-Million dollars in bonuses. And despite Hubble's dismal performance in the cosmos, the company... now known as Hughes Danbury Optical Systems... is in line to receive another bonus.

Secretary of State Baker today confirmed a published report that the Bush administration has decided to allow a Soviet rocket to launch a U-S commercial satellite in Australia. The UNprecedented decision follows previous fears the Soviets would learn military technology from the satellites. But national security adviser Brent Scowcroft maintains the decision ''does NOT have anything to do with the U-S space program.''

#90189u2106 07/08/1990 ~United Press International
(JULY 8) UPI - Solidarity leader Lech Walesa today accused lawmakers who belong to the Polish labor union of losing touch with the people. Walesa told a group of 160 members of the Solidarity parliamentary caucus they are doing just what the communists did in alienating workers. Observers say Walesa has shifted his criticism to Solidarity lawmakers and away from Polish Prime Minister Tadeusz Mazowiecki.

Tens of thousands of homes in the Minneapolis-St. Paul area were without electricity today after thunderstorms packing 70-mile-an-hour winds knocked down trees and power lines. The early-morning storm caused NO injuries, but resulted in power outages in about 95-thousand homes. A spokesman for Northern States Power Company says some homes may be without

electricity until sometime Tuesday.

Sudan and Libya say they are ready to proceed with talks on the joining of the two African nations. Sudan's state-run newspaper today reported talks on a political and economic merger of the two countries will begin Thursday. The neighbors already have opened their common border to visa-free transit by their citizens. Libya has previously tried and failed to merge with its neighbors... most recently with Chad.

Thousands of people gathered in Budapest today for dedication ceremonies of the first state-sanctioned monument erected to memorialize Jewish victims of Nazi atrocities in World War Two. The monument... at the Great Synagogue... is dedicated to the more than 600-thousand Hungarian Jews killed after the Nazi invasion. Edgar Bronfman, president of the World Jewish Congress, says communist governments in Europe NEVER really recognized the tragedy.

BOULDER, COLO. (JULY 9) BUSINESS WIRE - ''We selected SMARTSCAN because they provided the best technical solution through the utilization of their automated conversion process,'' said Kevin Ruggiero, GIS manager for Northampton County, Pa.

''The use of their unique technology is expected to provide a higher quality database for the county.''

The contract awarded to SMARTSCAN is for the automated conversion of 673 parcel maps (100,000 parcels) and unrectified SCS soils maps, which cover an area of approximately 376 square miles. An existing assessor database will be integrated with the new parcel data to create a complete parcel database.

All parcels, soil survey polygons, municipal and district boundaries will be scanned, captured, rectified and registered to the county's orthophoto base and converted into 1'':400' and 1'':100' tiles. The entire conversion process will be completed using SMARTSCAN's proprietary automated data conversion system. The data will be output in ARC/INFO Export format for use on Northampton's system.

SMARTSCAN Inc. is the leading automated GIS conversion services company, providing map conversion services to governmental organizations, natural resource companies and public utilities. SMARTSCAN uses proprietary scanning, artificial intelligence, and interactive graphics technology to automate and improve the quality of the digitizing process.

DECATUR, AL (JULY 9) BUSINESS WIRE - William D. Powell, president of First Federal Savings Bank, (NASDAQ/NMS:FFSD) Decatur, Monday reported increased earnings for the Savings Bank's third quarter and nine months ended June 30, 1990.

''First Federal's earnings and net interest margin continued to improve in the third quarter, resulting in a 48.8 percent increase in net income from the third quarter of fiscal 1989,'' stated Powell. ''Since last year, we have concentrated on improving our interest rate margins. In the third

quarter, our net interest margin increased for the fifth consecutive quarter and was 2.53 percent, up from 1.97 percent in the third quarter of fiscal 1989.

''Our asset quality remains very high as a result of our historical emphasis on conservative loan underwriting. At the quarter's end, we had no repossessed assets and only a nominal amount of foreclosed real estate. The improvement in our net interest margin and our low level of loan delinquencies have contributed to First Federal's strong capital base.''

Third quarter net interest income after provision for loan losses increased 18.0 percent to $1.7 million compared with $1.4 million in the same period of fiscal 1989. First Federal benefitted from a generally lower interest rate environment and less emphasis on high-cost jumbo savings certificates.

Net income for the current quarter increased 48.8 percent to $515,000, or 44 cents per share, compared with net income of $346,000, or 28 cents per share, in the third quarter of the prior year.

For the nine months ended June 30, 1990, net interest income after provision for loan losses increased 5.1 percent to $4.6 million compared with $4.4 million in the same period last year. Net income increased 2.0 percent to $1,250,000, or $1.04 per share, compared with $1,226,000, or $1.00 per share, in the first nine months of fiscal 1989. Net income for fiscal 1989 benefitted from a gain of $273,000 on the sale of investments. For the same period in fiscal 1990, no comparable gains were recorded.

First Federal is a federally-chartered, FDIC-insured savings bank operating seven full- service offices and one mortgage lending office in north Alabama. The common stock of First Federal Savings Bank is traded in the NASDAQ National Market System under the symbol FFSD.

#90190b0018 07/09/1990 ~Business Wire

SAN ANTONIO, TX (JULY 9) BUSINESS WIRE - Valero Energy Corp. (NYSE:VLO) today reported second quarter 1990 net income of $19.9 million, or 51 cents per common share, compared to 1989 second quarter net income of $18.5 million, or 47 cents per common share, assuming full dilution.

For the first six months of 1990, Valero's net income was $29.6 million, or 73 cents per common share, compared to net income of $29.9 million, or 73 cents per common share, assuming full dilution, for the first six months of last year.

Refining and marketing operations for the second quarter reported record operating income of $34.5 million, exceeding the previous record of $31.7 million reported for last year's second quarter. Throughput volumes were 23 percent higher during this year's second quarter than last year's, offsetting slightly lower throughput margins which were down eight percent. Last year's second quarter margins reflected a sharp increase in unleaded gasoline prices due to the Alaskan oil spill and the initial reduction of vapor pressure in gasoline by the Environmental Protection Agency.

The net income contribution from Valero's equity interest in Valero Natural Gas Partners, L.P. was $2.5 million for the second quarter of 1990 compared to $1.3 million reported for the same period last year. Through subsidiaries, Valero is general partner of and has an approximate 49 percent interest in the partnership.

Natural gas pipeline operating income increased by 50 percent from last year's second quarter to the most recent one. Both gas sales and transportation volumes for the second quarter of 1990 were higher than those of last year's second quarter to increase consolidated throughput by 10 percent. Second quarter 1990 sales margins also were higher than those of 1989's second quarter while transportation fees were unchanged. The partnership's pipeline operations benefitted from increased sales under term contracts due in part to hot weather throughout Texas during the second quarter.

Natural gas liquids (NGL) operating income for the second quarter 1990 was lower than that of the same period last year, but NGL operating income for the first half of this year is more than double that of last year's first six months. Demand for NGLs should increase with the completion of new facilities by the petrochemical industry scheduled for later this year, which, combined with current low NGL inventories, should increase NGL prices.

Valero Energy is involved primarily in refining high-sulfur atmospheric residual oil into premium products, such as unleaded gasoline, through its specialized refinery in Corpus Christi, Texas and in the marketing of those products. Valero Natural Gas Partners, L.P. owns a 7,100-mile network of natural gas transmission and gathering lines throughout Texas and in Oklahoma, purchases and sells natural gas throughout the U.S., provides third party gas transportation services, and owns 11 natural gas processing facilities.

CONTACT: Valero Energy Corp., San Antonio

#90190b0024 07/09/1990 ~Business Wire
SAN DIEGO (JULY 9) BUSINESS WIRE - Investor's First Bancorp, the San Diego-based merchant banking firm, held its annual shareholders meeting recently at the firm's new corporate headquarters on the ninth floor of the Tokai Bank Building in Mission Valley.

The firm's chairman, L. Edward Long Sr., opened the meeting with a discussion of the last fiscal year, the firm's first year as a publicly traded company. The shareholders then elected the slate of officers, directors and certain committee members as it was presented by management. The list of individuals includes: L. Edward Long Sr. -- chairman, president and chief executive

officer (a) William L. Fones -- senior vice president/acquisitions and

finance (a) Randall S. Williams -- first vice president and secretary (a) Kathy Cruce-Long -- first vice president and assistant

Co secretary/treasurer (a) Mike S. Rafii -- head underwriter/loan committee Jesse J. Peralta -- vice president/retail operations

(a) Designates a member of the board of directors.

Shareholders approved the final steps necessary for the company to complete its transition from mortgage banking to becoming a full-service merchant banker. A $5 million private placement that utilizes a combination of debt and equity was also approved by IFB shareholders.

As part of the firm's restructuring, management presented the following proposals, each of which was approved unanimously by shareholders: 1. Repurchase of 8 Million Shares

Approve the formation of a special class of preferred stock, which will be utilized to finance the repurchase of 8 million Class A common shares. The new issue will be known as Class S preferred and will have the same voting and dividend rights as the Class A common that it will replace. A total of 400,000 shares at $5 par value has been authorized. 2. Authorization of a Reverse Split

A ''reverse split'' of the Class A common stock at one new share for each 10 existing shares will take place on July 8, 1990, for shareholders of record the effective date will be July 7. 3. Non-Dilution Agreements

Management was authorized by shareholders to negotiate non-dilution

agreements with new and existing shareholders when such an agreement would benefit the corporation. 4. NASDAQ Application Authorized

Shareholders authorized management to proceed with the final filing, so that the firm could have its Class A common stock listed on NASDAQ. The firm has reserved the symbol ''IFBC'' and hopes to begin trading in late July or early August of 1990. 5. New Transfer Agent

The company has entered into an agreement with Capital Transfer and Registrar Inc. to serve as the company's transfer and dividend paying agent. 6. $5 Million Private Placement

The firm has entered into an agreement to raise additional capital. In certain situations, the company will use mortgages as collateral. The offering utilizes a combination of debt and equity, which will provide up to $3 million in equity and $2 million in subordinated debt. Shareholders were presented copies of the ''Offering Memorandum'' and approved the issues as outlined therein. 7. Employee Stock Ownership Program

In a move that will allow the firm to acquire high-caliber, top-performing employees, shareholders authorized management to create an Employee Stock Ownership Program (ESOP).

FINANCIAL RESULTS FOR FISCAL YEAR 1990

Investor's First Bancorp reported positive results for the year ended March 31. In addition to the completion of the firm's first year as a profitable public company, the company is in the final stages of having its shares listed on NASDAQ. This can provide a great deal of liquidity and thus increase the value of the firm's shares

Upon listing on NASDAQ, the firm plans to utilize its stock to make acquisitions. Following are the unaudited results for the last fiscal year.

1990 as compared with 1989 Paid-in capital increased $ 3,165,726 Assets increased 3,321,785 Shareholders equity increased 3,231,352 Revenues increased 369,259 Investments increased 1,382,391

Year in review 1990 Earnings per share (see note 1) 15 cents

Note 1 -- This is based on 609,672 shares outstanding, which represents the number of shares outstanding after the 8 million share repurchase and the reverse split as outline herein.

Note 2 -- The company currently holds investments in the publicly traded stock of clients that total $1,382,391.

After management presented an oral version of the firm's business plan and discussed the direction that the company was taking, the meeting was opened to questions from the shareholders. Upon providing answers to their questions, the 1990 annual shareholders meeting was closed and the shareholders were given a tour of the firm's new corporate headquarters.

SANTA CLARA, CA (JULY 9) BUSINESS WIRE - Catalyst Semiconductor Inc. announced Monday the worldwide expansion of its sales and customer engineering support activities.

''Consistent with our global marketing strategies, two new centers were opened in Hamburg, West Germany and Orlando, Florida, USA,'' stated Ari Schifrin, executive vice president of Catalyst. Appointed as sales managers for the respective territories are Ralf Krohn for Southern Europe operating from Germany, and Don Dabney for the Eastern United States.

According to Schifrin; ''Our customer base is expanding rapidly including some of the top and finest worldwide corporations. Close proximity of our sales and applications support centers will assure the best service to them.''

Schifrin indicated that additional centers will be opening later this year in Europe and the United States. ''Our worldwide business continues to increase, and we intend to maintain our leadership position,'' added Schifrin.

Catalyst Semiconductor Inc., a privately held company founded in 1985, is a technology leader in CMOS nonvolatile memories and is dedicated to the development of next generation memory products and their applications.

The company's innovative products include: Smart Card microcomputers, CMOS NVRAMs, CMOS E2PROMs, CMOS EPROMs, CMOS SRAMs and CMOS Flash Memories. ''Additional new families of advanced products are scheduled for introduction this year,'' concluded Schifrin.

KANSAS CITY, MO (JULY 9) BUSINESS WIRE - Kathleen Hughes, a veteran public relations professional in the telecommunications industry, has been named vice president of corporate communications for United Telecommunications Inc. and US Sprint, effective July 15.

Hughes, who was director of media relations for BellSouth, will report to Richard Devlin, executive vice president of external affairs. She will direct the company's domestic and international press and public relations activities.

''Kathleen Hughes is one of the most respected communicators in our industry and we are very fortunate to have her join our team,'' Devlin said. ''After divestiture she set up BellSouth's media relations department in Washington D.C., and led it to the outstanding reputation it enjoys in the industry today.''

Prior to joining BellSouth, she held corporate communications positions with Bell Communications Research, AT&T, New Jersey Bell, and Michigan Bell.

MOUNTAIN VIEW, CA (JULY 9) BUSINESS WIRE - Sun Microsystems Inc. Monday introduced SimplifySQL, a set of productivity tools that, for the first time, greatly simplifies the use of three of the leading database management systems (DBMS) on workstations.

The new package was designed by Sun with assistance from Ingres, Oracle and Sybase for Sun's SPARC family of workstations. SimplifySQL utilizes an intuitive graphical user interface, OPEN LOOK, that gives users of DBMS products from these three vendors a consistent look and feel. OPEN LOOK was designed by Sun and AT&T and is part of Sun's standard window system.

The window-based tools within the new Sun software make it easy to perform such tasks as creating databases, formulating queries and generating reports. With SimplifySQL, users can access and manipulate Ingres, Oracle and Sybase databases via pull-down menus and point-and-click mouse controls rather than have to memorize and type in complicated Structured Query Language commands, which are somewhat different for each DBMS product.

Sun performed initial product development with Ingres Corp., while Oracle and Sybase also provided technical assistance. SimplifySQL will soon add

support for the Informix DBMS to the other three leading databases.

SimplifySQL greatly eases the complexity of DBMS products for the average user and also helps advanced users more efficiently design and modify database layouts. In addition, SimplifySQL will help DBMS administrators reduce the demands placed on them, since databases will become much easier to access and manipulate by the users these administrators support.

Sun's new DBMS productivity package includes four modules that utilize the user friendly OPEN LOOK interface. SessionManager offers a visual way to select the DBMS product being used and to open and close databases; DataBrowse allows users to create database queries by pointing and clicking on the desired tables and data fields rather than typing in SQL commands; ReportWrite is a graphical report editor that enables users to interactively create customized database reports; and SchemaDesign is an advanced tool that makes possible the graphical creation, viewing and modification of database layouts, including tables, table relationships and data fields.

Sun Microsystems Inc., headquartered in Mountain View, is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating system and productivity software.

MOUNTAIN VIEW, CA (JULY 9) BUSINESS WIRE - ASK Computer Systems Monday announced the appointment of Eric Carlson to the new position of vice president of engineering and product operations.

This new appointment completes the management transition initiated by the return of ASK's founder and chief executive officer, Sandra Kurtzig, in September 1989.

In this position, Carlson will be responsible for all current Hewlett-Packard and Digital Equipment product development, for development of ASK's new open systems products and for IBM product operations at Data 3, a division of ASK. He also has responsibility for ASK's integration services and tools business.

''Eric is an important addition to ASK's management team because of his breadth of experience in applications, systems and hardware technologies '' stated Kurtzig. ''This expertise is key to positioning ASK as a broader solutions vendor.''

Carlson, 45, joins ASK from UNISYS where he was vice president and general manager of UNIX Systems. Prior to the acquisition of Convergent Technologies by UNISYS, Carlson was vice president and general manager of Convergent's UNIX Systems Division. Carlson joined Convergent in 1982. Previously, he spent ten years with IBM in various technical and managerial positions.

Carlson holds a Ph.D. in computer science from the University of North Carolina. He also earned a masters in city and regional planning and a B.A. in economics. Carlson is the author of numerous technical articles and books. Since 1982, he has also held a seat on the Los Gatos (Calif.) Town Council, and was mayor of Los Gatos from 1987 to 1988.

ASK Computer Systems is the leader in enterprise-wide information systems for manufacturing companies. There are 300,000 ASK system users worldwide operating 25,000 ASK software products.

MOUNTAIN VIEW, CA (JULY 9) BUSINESS WIRE - ASK Computer Systems Monday announced the completion of a management transition that was initiated by the return of company founder and chief executive officer, Sandra Kurtzig, in September 1989.

This announcement coincides with the appointment of Eric Carlson to the new position of vice president of engineering and product development.

Reporting to Kurtzig are three vice presidents who head up major functional areas. Les Wright, who joined the company in 1984, continues as vice president of finance and chief financial officer. Wright is responsible for all financial, MIS and administrative activities.

Irwin ''Jake'' Jacobs was appointed vice president of sales and marketing in March. His experience includes 17 years with Digital Equipment Corp. where he was vice president, commercial OEMs.

Eric Carlson, who joined the company today as vice president of engineering and product operations, is responsible for the Hewlett-Packard and Digital Equipment product development divisions, for ASK's new open systems development division and for development of IBM products at ASK's Data 3 division.

His expertise will be critical to positioning ASK as a broader solution vendor. Carlson spent eight years with Convergent, now a division of

UNISYS, and ten years with IBM Corp.

Other management changes include the promotion of four longstanding ASK employees. In June, Lindsay MacDermid was promoted to vice president of Asia/Pacific Operations. This new position will better serve this important market. MacDermid, who was formerly ASK's vice president of customer support, has been with the company since 1981.

Mary Marley replaces MacDermid as vice president of customer support. Marley joined ASK in 1980 as a sales representative and most recently was western regional sales manager. In March, Peter West was promoted to vice president of business development from his prior position as manager of product marketing.

West has been associated with ASK since 1978. He oversees product marketing and third party relationships. Marty Browne, who joined the company in 1974, was promoted to head current HP and Digital product development as well as the open systems group. Browne is vice president of applications development.

The management team is rounded out by two existing vice presidents. Evan Rowe, vice president of North American sales, joined ASK in 1988 from Tektronix. In 1985 David Sohm joined ASK after serving 12 years with the Hewlett-Packard Co. Sohm was vice president of marketing until 1989 when he was appointed general manager of Data 3 Systems, a division that supplies software for IBM AS/400 computers.

Sohm and Browne report to Carlson. Rowe, West, MacDermid and Marley report to Jacobs.

ASK Computer Systems is the leading provider of enterprise-wide information systems for manufacturing companies. There are 950 ASK employees supporting 300,000 system users worldwide.

STAMFORD, CT (JULY 9) BUSINESS WIRE - A wide selection of Xerox document processing equipment has become the basis for Xerox Corp.'s continuing sponsorship of the United States Olympic Committee (USOC) and the U.S. Olympic Team.

Xerox is providing the equipment for use at USOC headquarters in Colorado Springs, Colo., at the Lake Placid, N.Y., training center and at over a dozen meetings throughout the United States during each sponsorship year. The current Xerox/USOC contract runs through 1992.

Equipment is also installed for the USOC at such major athletic events as the Pan Am Games, the Olympic Festivals and the summer and winter Olympic Games.

In exchange for this support, the USOC authorizes Xerox to use the committee's name, its emblems and the emblems of many of the events in which U.S. teams are involved in the company's advertising and promotional activities.

The Xerox-USOC association began in 1981 when Xerox first became a sponsor. For the period leading up to the 1984 Summer Olympic Games in Los Angeles, Xerox provided the USOC with copiers, duplicators and facsimile units.

In the 1985-1988 period, leading up to the 1988 Winter Olympic Games in Calgary, Canada, and the 1988 Summer Olympic Games in Seoul, Korea, Xerox again provided the USOC with copiers and facsimile units.

For the current sponsorship period, Xerox has broadened its product support of the USOC to include copiers and duplicators, color copiers, electronic printers, document scanners, desktop publishing systems and a variety of new, yet-to-be-announced products. The USOC is gradually broadening its use of Xerox products and hopes to realize significant productivity improvements in its business operations.

An example of this involvement can be found in the Twin Cities of Minneapolis and St. Paul, where over 200 Xerox employees have been assisting in the preparations for and staging of the Olympic Festival '90, now underway. The festival is sponsored by the USOC and a local organizing committee.

In addition to its USOC sponsorship, Xerox is also a sponsor of the 1992 Summer Olympic Games in Barcelona, Spain, and many of its operating companies in Europe and Asia are sponsors of the National Olympic Committees in their respective countries.

DENVER (JULY 9) BUSINESS WIRE - Chemex Pharmaceuticals Inc. (NASDAQ:CHMX)

and Block Drug Co. (NASDAQ:BLOCA) of Jersey City, N.J., have signed a definitive agreement by which Block Drug will purchase the product ACTINEX(tm), a topical application of nordihydroguaiaretic acid (NDGA) for the treatment of actinic keratoses.

A New Drug Application (NDA) for the product is currently under review by the Food and Drug Administration.

Chemex has the rights to develop all other applications of NDGA in humans and animals.

According to Herbert H. McDade Jr., chairman and chief executive officer of Chemex, ''This gives us the ability to move forward with the development of other interesting compounds for which we have filed Investigational New Drug Applications (INDs).'' The transaction is subject to approval by Chemex shareholders at their annual meeting in September, the satisfaction of certain contractual conditions and certain termination rights of Block.

Under the agreement, Block could pay up to a total of $10 million, including prepaid royalties, if specific regulatory and marketing milestones are achieved. The agreement also provides for the payment of additional royalties once worldwide sales of ACTINEX achieve a certain level.

Chemex Pharmaceuticals Inc., based in Denver, has several IND and INDA applications filed with the FDA for products of its own invention and others that have been in-licensed, primarily for dermatology.

SHEPHERD, MT (JULY 9) BUSINESS WIRE - United Tote Inc. (NASDAQ:TOTE), a worldwide supplier of wagering systems, said it has received a loan commitment to refinance a substantial portion of the debt associated with the acquisition of Autotote Systems Inc.

Chairman of the Board Lloyd Shelhamer said the $46.9 million loan commitment was made by Maryland National Bank of Baltimore, with participation by the U.S. Bank of Washington, and is subject to the satisfaction of a number of conditions. The loan commitment will expire on Sept. 30, 1990.

The proposed loan will replace bridge loans totaling $45.2 million provided by the two commercial banks and Wembly Inc., a major stockholder,

which have been in place since Dec. 11, 1989 when United Tote purchase Autotote for $87.8 million of cash and securities.

Shelhamer also said that, in order to allow the additional time necessary to close on the proposed loan, United Tote has entered into agreements with its bridge loan lenders which extend the terms of the bridge loans through Sept. 30, 1990.

United Tote provides wagering systems to more than 300 pari-mutuel and sports wagering facilities worldwide.

SAN JOSE, CA (JULY 9) BUSINESS WIRE - EMCON Associates (NASDAQ:MCON) Monday announced a complete settlement of the lawsuit among EMCON, Waste Management Inc. and its subsidiary Chemical Waste Management Inc. of Oak Brook, Ill., Golder Associates Inc. of Atlanta, Ga., and Gundle Lining Systems Inc. of Houston, Texas.

The suit, which had been pending in San Francisco federal court since July 1989, related to a March 1988 waste mass slippage at Chemical Waste's Kettleman Hills, Calif., hazardous waste treatment and disposal facility.

Without any admission of liability, and based on the continuing significant expense of the litigation and its interest in future business relations among the parties, EMCON has agreed to pay an amount just under $5 million to Chemical Waste; other parties to the case have agreed to contribute additional settlement funds directly to Chemical Waste.

The settlement involves full releases of any further claims based upon the incident. EMCON expects that the settlement will result in a charge to earnings of approximately $4.5 million (pre-tax) for the third quarter ending on Sept. 30, 1990.

EMCON provides comprehensive engineering and consulting services in waste management and environmental protection. Established in 1971, EMCON today is a leader in the design and development of waste management facilities and remediation programs. EMCON serves public and private clients throughout the United States.

SALT LAKE CITY (JULY 9) BUSINESS WIRE - Evans & Sutherland Computer Corp. (NASDAQ:ESCC) announced Monday that Systems Management Inc., a subsidiary of AAI, has chosen the ESIG-600 visual imagery system for the Coast Guard's new HH-60J Jayhawk Operational Flight Trainer.

The $6.1 million visual system includes Evans & Sutherland's five channel ESIG-600, CRT projector displays and 24-foot motion base compatible dome. The ESIG-600 was selected for its superior high resolution calligraphic lighting and advanced texturing capability.

The system data base encompasses 262,000 square miles of the southeastern United States and will have a library of ships, aircraft and other specialized features, while also providing Night Vision Goggle capabilities.

The HH-60J simulator is a cooperative effort between the Coast Guard and Naval Training System Center, in Orlando, Fla., who is acting as the procurement agency. Training to be offered on the system will include Search and Rescue and Night Vision Goggle tactical training. Delivery to the Coast Guard's Aviation Training Center in Mobile, Ala. is scheduled for 1992.

Evans & Sutherland visual systems have been sold to every U.S. branch of service, several allied military forces, NASA, commercial airlines around the world, prime-training contractors and major airframe manufacturers. The company employs 1,400 people and is headquartered in the University of Utah Research Park, Salt Lake City.

Evans & Sutherland designs, builds, sells and services interactive computing systems for vehicle training and for general engineering and scientific applications.

#90190b0087 07/09/1990 ~Business Wire

SAN JOSE, CA (JULY 9) BUSINESS WIRE - Mike Kirby, 50, has been named president of Areal Technology and appointed to the board of directors at the two-year-old manufacturer of high-capacity 2 1/2-inch disk drives for data storage applications in laptop portables and ''notebook'' computers.

At the same time, Areal announced that Steve Drexler, 41, had been named chairman of the board of the company, and that a multi-million dollar equity agreement with Nippon Sheet Glass Ltd., Tokyo, had been completed. NSG was one of Areal's earliest investors, and is a technology partner of the company.

Kirby replaces Jack Swartz as president and board member. Drexler, a co-founder of Areal Technology, replaces Swartz as chairman while retaining his position as chief financial officer. The Areal board now comprises Drexler, Kirby and Raymond Niedzwiecki, a co-founder of Maxtor Corp., and now vice president of manufacturing at Brier Technology.

George Doran, vice president of manufacturing, and Arnie Thornton, vice president of engineering, complete the Areal executive staff, and are members of the company's executive operating committee.

The reorganization of the Areal executive staff reflects the distinct product strategies that apply to the small, rigid disk drives now available to systems designers. ''We intend to focus 100 percent of our attention on the rapidly growing markets for 2 1/2-inch drives,'' Kirby said. ''That's where the large-volume OEM marketplace for disk drives is today. We are no longer putting any efforts into larger capacity 3 1/2-inch devices.''

Areal's first 2 1/2-inch devices, the 50-Mbyte microDrive2 MD-2050 and the 100-Mbyte MD-2100, were announced late last year. Initial shipments of the 50-Mbyte drive will begin this fall, and will ramp up quickly at Areal's San Jose facility and at other facilities overseas. 100-Mbyte drives are expected to begin shipping at low volume levels by the first quarter of 1991, with additional 2 1/2-inch products to be announced by that time.

The multi-million dollar agreement between Areal and Nippon Sheet Glass gives Areal the working capital needed to complete the design of this family of 2 1/2-inch drives, and to begin setting up volume production facilities. In exchange, NSG has received additional equity in the company.

Kirby is a marketing executive with over 20 years experience in the data storage industry and joined Areal in early 1989 as vice president of marketing. Before that, he was founder and general manager of NCL America Inc., a leading supplier of disk drive controllers and input scanning systems. He remains on the board of directors of that company. Prior to that he held sales and marketing positions with companies such as Data Technology Corp., Rotating Memories Inc., and Shugart Associates. He began his career in the industry with IBM.

Steve Drexler, is a co-founder of Areal and served as the company's vice president of finance until his promotion to board chairman. He is a CPA with extensive business experience in the electronics industry, and has consulted for other disk drive and controller start-up companies.

He served as the controller of a start-up company for two years, and has over 14 years experience as a CPA, including 5 years as head of his own firm, and has worked with a number of major accounting firms including Price Waterhouse.

Areal Technology Inc., was formed in 1988 to design, manufacture, and market very high-capacity, very low-cost low- profile Winchester disk drives. The company maintains a 24,000 square foot headquarters facility in San Jose, and employs 25.

SANTA CLARA, CALIF. (JULY 9) BUSINESS WIRE - Auspex Systems Inc., a manufacturer of high-performance Unix servers for network computing environments, announced Monday that it has raised a total of $12 million in equity investments and licensing fees from Fuji Xerox Co., Ltd. and Nissho Electronics Corp. of Japan.

In addition, Fuji Xerox has entered into a technology licensing agreement with Auspex and Nissho Electronics has been appointed the exclusive distributor of Auspex products in Japan.

According to Auspex President and Chief Executive Officer Larry Boucher, the company will use the funds to expand and deepen its channels of distribution, support and field operations in the United States and in the Far East, as well as finance new product research and development.

Boucher said, ''This latest round of financing is a strong indicator of the momentum Auspex has gained since its first product launch last October. We are extremely pleased to have Fuji Xerox and Nissho Electronics as our corporate partners in Japan.''

Under terms of Fuji Xerox's technology agreement with Auspex, Fuji Xerox is authorized to use Auspex's technology to manufacture, distribute and support Auspex products under the Fuji Xerox brand name in Japan, Korea, Taiwan, the Philippines, Thailand and Indonesia.

Fuji Xerox Co. Ltd. is a joint venture established in 1962 between Fuji Photo Film and Rank Xerox. Headquartered in Tokyo, Fuji Xerox manufactures and sells computers, office equipment and related products with an increasing emphasis on network computing. One of the leading companies in network computing in Japan, Fuji Xerox' sales were $3.27 billion in 1989.

Nissho Electronics, a public company listed on the Tokyo Stock Exchange, is a leading distributor/VAR for computer and communications products in Japan. Established in 1969 as a subsidiary of Nissho Iwai Corp., one of the largest trading companies in the world with annual sales of more than $80 billion, Nissho Electronics imported more than $30 million in U.S. technology products in its last fiscal year.

Auspex Systems was founded in December 1987 and launched its first product the NS 5000 Network Server, in October 1989. Investors include Asset Management; Mayfield Fund; Merrill, Pickard, Anderson & Eyre; Mohr Davidow Ventures; New Enterprise Associates; TVI; Weiss, Peck & Greer; Berkeley International and Sequoia Capital.

#90190b0100 07/09/1990 ~Business Wire

CARLSBAD, CA (JULY 9) BUSINESS WIRE - GASCARD Inc. (GASCARD or the ''company'') of Carlsbad, announced Monday its earnings for the third quarter and nine months ended May 31, 1990.

The company reported its fourth consecutive quarterly profit of $66,641, or $.001 per share, compared to a loss of $164,736, or $.002 per share for the same quarter last year. Profit before tax was $92,349 compared to last year's pretax loss of $164,736. Revenue for the current quarter was $1,296,826 vs. $1,232,093 last year.

Tax expense of $25,708 was recorded during the quarter ended May 31, 1990. Due to the accounting treatment of net operating loss and tax credit carryforwards, most of this expense will not give rise to an actual tax liability, but, rather, represents a permanent timing difference for the purposes of tax and financial reporting.

For the nine months ended May 31, 1990, GASCARD recorded a profit of $144,021, or $.002 per share, on revenues of $3,708,347 vs. a loss in the

same period last year of $642,260, or $.009 per share, on revenues of $3,373,860. Profit before tax was $196,995 compared to last year's pretax loss of $642,260 for the nine month period.

GASCARD provides fuel management services to tens of thousands of commercial fleets that transact over 12,000,000 gallons of fuel per month through more than 2,000 locations in 40 states. GASCARD has developed and markets nationally a comprehensive card-activated fuel management system designed to reduce commercial and governmental fleet fueling costs. The GASCARD system can prevent unauthorized purchases, lower accounting, administrative, and other costs of fleet fueling, and eliminate or lessen the environmental risks of underground fuel storage tank ownership or operation.

Each billing cycle the GASCARD system reports complete fleet fueling transaction data --- date, time, site, vehicle, driver, odometer, miles per gallon, cents per mile, product, volume, price, extension, and excise tax details --- which fleet managers can use to maximize fleet efficiency. Through the company's franchisees, which are typically independent petroleum marketers, the GASCARD system is marketed primarily for use by local and regional delivery, sales and service fleets such as fuel and beverage distributors, overnight package delivery services, taxis, public utilities, and governmental agencies.

The company was originally organized in May 1981, and went public through an offering of its common stock in March 1987. In January 1990, the U.S. Patent Office issued Patent No. 4,891,503 to GASCARD for its Distributed Authorization System.

#90190b0103 07/09/1990 ~Business Wire

MOUNTAIN VIEW, CA (JULY 9) BUSINESS WIRE - QMS Monday introduced the four-page-per-minute QMS-PS 410 printer, the newest member of QMS' PostScript printer family.

Designed for the personal PostScript printer marketplace, which includes single users and small workgroups, the QMS-PS 410 has a U.S. list price of $2,795.

With the new printer, QMS is introducing the QMS ASAP III (Advanced System Architecture for PostScript) controller technology. ASAP III standard features include a controller based on a 16.67 MHz/68020 CPU, simultaneous interface operation, automatic emulation switching, and an expanded collection of resident fonts.

Among the new printer's features is automatic emulation switching, which allows it to analyze incoming data and automatically select the appropriate page description language, either PostScript or HP PCL, or optional HP GL when installed.

For compatibility with PC, Macintosh and networked systems, the printer ships with RS-232-C serial, Centronics parallel and AppleTalk interfaces. The printer's simultaneous interface capabilities allow all three interfaces to be active at the same time, thus eliminating the need to change interface settings, either manually or via software.

The printer comes standard with 2 MB of RAM -- enough to print a letter- or legal-size page. Memory is expandable up to 6 MB.

QMS is a leader in the rapidly expanding nonimpact print systems market and is a major producer of enhancement products for impact printers. The company offers a wide selection of intelligent laser and thermal transfer printers for electronic publishing, office automation, advanced imaging and automatic identification applications. QMS is listed on the New York Stock Exchange under the symbol AQM.

Adobe Systems Inc. (NASDAQ:ADBE), founded in 1982 by Dr. John Warnock and Dr. Charles Geschke, is headquartered in Mountain View. Adobe is the developer of PostScript, the industry-standard page description language for electronic printing and publishing and Display PostScript, a device-independent graphics software component for computer displays.

In addition, the company develops and markets a line of application software products. Revenues for 1989 were over $120 million.

PALO ALTO, CA (JULY 9) BUSINESS WIRE - Hewlett-Packard Co. Monday announced an $8.2 million contract with Taco Bell, a unit of New York-based Pepsico, to provide HP Vectra personal computers (PCs), software and printers to the fast-food chain.

HP will install and service the machines in Taco Bell outlets nationwide and automate back-office functions with a variety of cost-saving applications, including labor, cost-of-sales and inventory-management systems.

Under the terms of the contract, HP will deliver and install 1,750 HP

Vectra QS/16S i386SX-based PCs in Taco Bell-owned stores during the next 18 months. Taco Bell owns and operates more than 1,800 outlets nationwide.

HP also will provide 22 configurations of systems software, memory and hard-disk drives. The systems include either the MS-DOS or SCO UNIX operating system. HP also will provide systems installation and on-site service for Taco Bell.

''Taco Bell is pursuing exciting visions of a highly automated future for the fast-food industry,'' said Michel A. Naggiar, marketing director of HP's Personal Computer Group. ''A fast-food kitchen is about as far as you can get from the tidy, air-conditioned offices in which PCs traditionally operate.''

For 1989, Taco Bell sales grew by 27 percent to $1.4 billion, with net income rising 40 percent to $112 million. Overall, Pepsico's restaurant group, which also includes Kentucky Fried Chicken and Pizza Hut, posted a 20 percent annual profit gain.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 93,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

SAN JOSE, CA (JULY 9) BUSINESS WIRE - Marking the acceptance of The Wollongong Group Inc.'s PathWay products into the networking mainstream, Bell South Corp. has approved use of PathWay as a connectivity software.

The amendment expands on an existing contract in which The Wollongong Group provided WIN/TCP (Wollongong Integrated Networking/Transmission Control Protocol) products for Bell South's computing network.

Under the new amendment, The Wollongong Group will connect more than 10,000 of Bell South's PCs using PathWay for DOS and other local network software.

The Wollongong Group has begun initial installation at Bell South's Birmingham Data center in Alabama. As part of the amendment, the company

will provide technical support and maintenance.

PathWay client/server products from Wollongong allow users access to corporate-wide network resources. Based on industry standard protocols such as NetBIOS, SMB and TCP/IP, PathWay products are available for all major computing platforms. Specific products available for DOS include PathWay Access, PathWay Client Plus and PathWay Server.

For more information regarding the Wollongong Group and its PathWay or WINS product families, call 800/872-8649 (outside calif.) or 800/962-8649 (in calif.)

The Wollongong Group Inc., a recognized leader in open systems network solutions, specializes in integrating dissimilar computers, operating systems, and local area networks. Based on current industry and international standards, including TCP/IP and OSI, Wollongong products encompass four core technologies: protocols, network management, network security and applications services.

The company provides, on a contract basis, requirements analysis and development services for the design and implementation of complex network information systems.

Privately held, the company manages east and west coast facilities, as well as an international distribution channel. Wollongong employs more than 180 people and is headquartered in Palo Alto, Calif.

WESTLAKE VILLAGE, CA (JULY 9) BUSINESS WIRE - Consolidated Energy Systems Inc. (OTC) has signed a contract to acquire Thermodynamic Engineering Inc. a Camarillo, Calif. firm engaged in the design, engineering and

manufacturing of environmental test chambers.

Based on unaudited financial statements for the 10-month period ended April 30, Thermodynamic has gross assets approaching $1 million, annualized gross revenues of $3 million, and is profitable. Under the purchase agreement, Consolidated has acquired 80 percent of all classes of equity stock in Thermodynamic, which shall operate as a subsidiary of Consolidated.

The remaining 20 percent interest is retained by the chief executive officer, who will sign a three-year employment contract, before Aug. 31, to remain as chief executive officer of Thermodynamic.

The purchase price to be paid by Consolidated is 2.4 million shares of its restricted common stock and the assumption of $100,000 in notes due from Thermodynamic to its previous major shareholder. Under other provisions of the agreement, Consolidated shall undertake co-signer shareholder status for existing contract commitments from the acquired company to its landlords, banks, etc.

Although the acquisition has occurred as of June 30, the agreement provides the parties with a one-month period to complete certain due diligence investigations and is subject to cancellation on or before July 31.

Richard Abruscato, president and chief executive officer of Consolidated, states that the acquisition of the engineering/manufacturing company is an important additional component in the success of Consolidated's corporate strategy.

Consolidated has, over the past two years, brought into its corporate group a multimillion dollar cogeneration partnership (half-owner), an energy conservation lighting division, and electronics manufacturing firm and a venture capital corporation.

Abruscato states: ''The acquisition of Thermodynamic, with an experienced engineering and design department, can further enhance Consolidated's ability to provide our customers with comprehensive energy services. It may also positively impact our objective of soon being listed on NASDAQ or other exchanges.''

In a separate verbal consulting agreement between Consolidated and Thermodynamic to be memorialized by the end of July, Consolidated has already provided valuable services to Thermodynamic including legal, business and tax guidance. Abruscato notes that Consolidated will be making subsequent announcements concerning the status of the acquisition and consulting agreements immediately following the July 31 deadline for due diligence.

Consolidated Energy Systems, founded in 1984, is a publicly traded company with emphasis on developing cogeneration and energy conservation projects. Consolidated has been a public company since 1987 with common shares and warrants (to purchase common shares) presently traded over-the-counter.

NOVATO, CA (JULY 9) BUSINESS WIRE - WordStar International Inc. announced Monday that it has selected the Douglas Stewart Co. of Madison, Wis. to be the exclusive educational distributor of its WordStar word processing software.

The Douglas Stewart Co. will help launch an educational reseller program for WordStar by distributing WordStar, WordStar 2000 and Easy Extra word processing software products to colleges and universities around the United States. WordStar word processing software is the only high-end wordprocessing software carried by the company.

Craig Stewart, president of the Douglas Stewart Co. said he is pleased about the agreement with WordStar. ''We're excited to be able to offer WordStar products to our educational resellers. WordStar made inroads in microcomputer word processing, and it continues to be one of the most sophisticated products available today,'' Stewart said.

Dean Scott, vice president of worldwide marketing for WordStar International, said the relationship with the Douglas Stewart Co. will mean a greater market penetration for the WordStar educational reseller program.

The educational reseller program will offer WordStar products at specially discounted prices to students and educators. To build awareness of the software in the educational marketplace, Douglas Stewart has outlined a marketing strategy which includes attendance at trade exhibitions, catalog merchandising, advertisements and direct mail promotions.

Douglas Stewart will kick off the WordStar educational reseller program at its annual C2ES College Consumer Electronics Show, July 7-10, in Madison.

The Douglas Stewart Co., founded in 1950, serves college stores and higher education manufacturers exclusively. It distributes computer software and hardware products and consumer electronics products to over 500 college campus stores nationwide.

In addition to a network of sales representatives, the company uses target advertising and marketing programs to reach educational resellers.

WordStar International Inc. is a leading developer of business productivity software products. WordStar word processing products are among the largest-selling micro-computer software programs in the world with 14 different language versions and an installed base of more than 3.5 million.

CHICAGO (JULY 9) BUSINESS WIRE - United Airlines announced Monday that members of its frequent flier program in Colorado will be eligible for free companion tickets if they take at least two round-trip flights out of the state on United or United Express in the next two months.

''Colorado is very important to United,'' said John C. Pope, executive vice president-marketing and planning, ''and this attractive officer will give our Colorado customers even more reason to fly United and United Express through the summer vacation season.''

United said the free companion certificates will be issued by mail to customers who qualify for them by flying at least two round-trip flights from Colorado to other states during the period from July 10 to Sept. 15, 1990.

The offer is good only for Colorado residents, and the maximum number of free companion tickets that can be earned is four.

The certificates can be redeemed at United or United Express between Oct. 1, 1990 and Feb. 12, 1991. They are not valid during the Thanksgiving and Christmas/New Year's peak-demand periods of Nov. 20-26, 1990 and Dec. 20, 1990 to Jan. 7, 1991.

Passengers flying on complimentary companion tickets must be on the same itinerary and fly in the same class of service as the paying customer. The companion tickets will be good any day except Friday and Sunday. Reservations must be made seven days in advance of travel, and a Saturday night stay is required. Companion tickets are nontransferable.

The offer applies for travel to any destination served by United or United Express in the United States including Alaska and Hawaii.

United operates 191 daily flights from Denver with nonstop service to 58

cities. The carrier also offers daily service between Colorado Springs and Chicago.

AKRON, OH (JULY 9) BUSINESS WIRE - American Business Computers Corp. (NASDAQ:ABCC) has announced a new contract with Pepsi-Cola Company. This Agreement grants Pepsi-Cola world wide exclusive rights to Fountain Soft Drink Dispensers and componentry designed by ABCC.

Pepsi-Cola and ABCC have been business partners since September, 1986. The initial Agreement in 1986 involved one specific soft drink dispensing system--the OmnitronR. Now the scope of the partnership has been broadened to include the existing new products such as the counter top Minitron and Omnitron II, and yet unnamed future fountain soft drink dispensers.

In addition to expanding Pepsi's rights to new fountain soft drink dispensers developed by ABCC, this Agreement broadens the partner ship between Pepsi and ABCC to include certain Approved Fountain Soft Drink System Manufacturers. The Approved Manufactures will produce the machines developed by ABCC on an exclusive basis for Pepsi. Under Pepsi's direction, all members of this business partnership will contribute to the Sales and Marketing of the new Pepsi dispensing systems.

''This is a phenomenal opportunity for ABCC,'' stated Joe Shannon, CEO.''Now, we will be able to maximize the return on our technol ogy by working closely with Pepsi and the Approved Manufactures. Everyone will benefit from the partnership, including ABCC. Previ ously, ABCC relied on royalties as the main source of income from fountain soft drink dispensing systems. This new Agreement provides the opportunity for ABCC to supply proprietary component parts to the Approved Manufactures. Through this Agreement, Pepsi will be able to offer their customers improved performance with lower priced dispensing systems, the Approved Manufactures will in crease sales and margin and ABCC will have an established revenue stream.''

American Business Computers Corp. develops and markets state-of-the-art products for the foodservice industry, which increase the efficiency, control, and profitability of food and beverage operations.

TUCSON, AZ (JULY 9) BUSINESS WIRE - Hughes Aircraft Co. and Delco Electronics Corp. Monday unveiled a new, joint subsidiary that will manufacture high-technology electronics in Tucson for both automotive and military applications.

''This new subsidiary, H E Microwave, is a perfect example of the type of synergism General Motors expected when it acquired Hughes in 1985,'' said H E Microwave President Freeman B. Nelson.

''This subsidiary will take advantage of the high-technology electronics and engineering leadership of both Delco Electronics and Hughes as well as Delco's leadership in high volume, low cost electronic manufacturing,'' added H E Microwave Vice President Jerry E. Jackson, chief engineer, hybrid electronics, for Delco Electronics.

The establishment of H E Microwave was announced at a news conference called by U.S. Rep. Jim Kolbe, R-Tucson, at Hughes' Missile Systems Group's manufacturing facility, where the new company is located.

''The announcement of this exciting new company is a tremendous boost to the economic community of Tucson. The opportunities for the kind of technological career positions which will be made available are indeed promising and the future looks even brighter,'' Kolbe said. ''This endeavor allows advanced technologies once reserved for military use to be applied to commercial products.''

H E Microwave's first two products will utilize microwave radar technology developed by Hughes for use on next-generation tactical aircraft. Both products employ tiny transmit/receive (T/R) radar modules that use gallium arsenide microwave monolithic integrated circuit chips.

The modules also will be incorporated in an active array radar antenna for use on future tactical fighter aircraft. Such a system could incorporate several thousand T/R modules.

These modules also can be used in telecommunications and direct broadcast satellite television systems, in private business networks, in electronic warfare and in the full spectrum of military and commercial airborne, shipborne, ground-based and space-based radar systems.

H E Microwave will develop highly automated manufacturing systems for the production of the transmit/receive modules. It also will provide systems engineering, product design and process design, through the pilot

production phases of its products.

The initial complement of engineering personnel will transfer to Tuscon from Hughes and Delco Electronics facilities in California and Indiana. Hiring of skilled assembly and test personnel is expected to begin in Tucson later this month or in early August. H E Microwave also will be working with the University of Arizona College of Engineering to provide internships and training opportunities.

By the time employment reaches its peak, anticipated for 1998, H E Microwave expects to have created approximately 750 jobs. Production of the first T/R modules, which will be for military applications, is expected by September. Deliveries are expected to surpass 1 million modules per year in 1996 and to reach more than 5.2 million annually in 1998. This will represent nearly $134 million in annual sales by the end of 1996, increasing to almost $450 million in 1998.

H E Microwave was incorporated in Delaware Sept. 5, 1989, as an affiliated subsidiary of both Hughes and Delco Electronics, which are subsidiaries of GM Hughes Electronics, a unit of General Motors Corp.

SACRAMENTO, CA (JULY 9) BUSINESS WIRE - Access Health Marketing Inc. a company specializing in healthcare marketing, announced Monday the acquisition of Baxter Healthcare Corporation's Marketing and Planning Software business.

The Marketing and Planning Software business developed products that are in more than 500 hospitals nationwide, including ''HEALTH-MATCH,'' a leading healthcare referral system in the industry.

The acquired business is being renamed ACCESS Marketing Systems and will become a subsidiary of Access Health Marketing. Other Access Health Marketing subsidiaries will include Referral Systems Group, Inc., which licenses ''ASK-A-NURSE'' and ''Cancer HELPLINK'' programs to more than 170 hospitals nationwide, and Health Connect, a provider of healthcare telemarketing services.

According to Access Health Marketing president Ken Plumlee, the acquisition of the Baxter Marketing and Planning Software business is part

of the company's expansion plans.

Baxter has developed the most comprehensive product line of marketing software in the healthcare industry. Its ''HEALTH-MATCH,'' ''LIFE MATCH '' ''HEALTH-PASS'' and ''MARKET MODEL'' programs are both PC- and mini-computer-based and are in use in more hospitals and healthcare facilities throughout the country than any other marketing software.

The programs enable end-users to perform a variety of marketing functions, including database marketing, healthcare referral processing, membership management and market share analysis.

According to Plumlee, Access Health Marketing will remain in the Chicago area.

''The Baxter Marketing and Planning Software business has gained its leadership position because of the quality of its product line and its commitment to supporting its clients,'' said Plumlee. ''We will work with existing management to expand customer service and will work with existing clients to further enhance our product line.''

Access Health Marketing is the recently announced parent company of Referral Systems Group, Health Connect, and ACCESS Marketing Systems, Inc. and is a leading provider of marketing services in the healthcare industry. Company headquarters are located at 7777 Greenbach Lane, Citrus Heights, Calif. 95610; telephone, 916/722-2100.

CUPERTINO, CALIF. (JULY 9) BUSINESS WIRE - Cupertino National Bancorp (NASDAQ:CUNB), parent company of Cupertino National Bank, announced Monday that earnings for the second quarter 1990 were $332,000 or 32 cents per share (a) on a fully diluted basis, compared to $257,000 or 37 cents per share for the like period a year ago.

At June 30, total assets reached an all-time high of $118.2 million reflecting a 40.6 percent year-to-year increase, while loans totalled $85 million, a 37.7 percent increase, and deposits were $106.6 million, an increase of 38 percent.

Bank President Don Allen stated, ''The second quarter followed our strategic plan in rebuilding earnings per share after doubling capital in September, 1989.''

Cupertino National Bank serves the mid-Santa Clara County market, specializing in commercial loans for local companies, construction lending to quality builders, Small Business Administration lending, and trust services to both individuals and businesses.

The independent bank features a ''one-stop banking'' philosophy emphasizing customized service.

EL MONTE, CA (JULY 9) BUSINESS WIRE - Marshall Industries (NYSE:MI) Monday reported preliminary operating results for its fourth quarter and fiscal year ended May 31, 1990.

The company estimated net sales for its fourth fiscal quarter to be at a record level of $153 million, compared with a previous high of $135 million in its fourth quarter of fiscal year 1989. Accordingly, sales for its fiscal year 1990 are estimated to be $544 million, also a new record. Annual sales were $533 million in fiscal year 1989.

Similarly, net income per share in the fourth quarter was estimated to be at a new quarterly high, in the range of 70 cents to 72 cents per share, compared with the previous record of 65 cents in the first quarter of fiscal 1989. Thus net income per share for fiscal year 1990 is estimated to be in the $2.23 to $2.25 per-share range, compared with $2.31 in fiscal year 1989.

The company stated that these figures are preliminary and that the year-end audit had not yet been completed. Final audited figures for the fiscal year will be available later in July.

Management commented that the record level of sales in the fourth quarter was principally a result of increased volume in semiconductors and computer subsystems. Improved net income per share in the quarter resulted primarily from the higher level of sales.

Marshall Industries is a leading national distributor of industrial electronic components, computer products, electronic test instruments and production supplies.

FREMONT, CA (JULY 9) BUSINESS WIRE - Vitalink Communications Corp., (NASDAQ:VITA) a leading LAN internetworking company, announced Monday that it is demonstrating its first implementation of an Access Module for Digital Equipment Corp.'s DECmcc at the DECWorld show in Boston.

Vitalink's Internetwork Access Module (VIAM) is fully compliant with Digital's Enterprise Management Architecture (EMA). The Access Module manages the complete line of Vitalink's LAN internetworking products and will be part of Digital's live network demonstration of the DECmcc tools.

An original member of the DECmcc Strategic Vendor Program, Vitalink has been actively involved in the ongoing development of the DECmcc network management tool with respect to its ability to effectively manage third-party non-Digital devices.

''From an early stage, Vitalink has aggressively supported the goals of the EMA program and the underlying architecture. We believe that DECmcc will be a breakthrough tool for efficiently managing enterprise-wide, multivendor networks,'' said Paul Schaller, vice president of marketing at Vitalink.

Vitalink's Phase 1 of the Access Module provides comprehensive status and statistical information about Vitalink LAN internetworking products, including both Ethernet and token ring bridges and routers. Phase 1 will be available concurrent with the release of DECmcc v1.1 in 1991.

Phase 2, planned for release later in 1991, will include broad support for the SET command, allowing the DECmcc operator to configure and directly control the Vitalink LAN internetworking products from both the graphical- and terminal-based DECmcc interfaces.

Vitalink manufactures and markets a variety of remote LAN internetworking solutions. Its TransPATH bridge/router gives users the flexibility of a full-featured bridge with a TCP/IP router.

Introduced in 1984, the TransLAN bridge is designed to interconnect remote Ethernet local area networks. TransRING offers remote bridging capabilities to token ring environments, and Vitalink's WANmanager, a powerful, self-learning network management station, allows users to monitor and control their wide area network.

Vitalink Communications Corp., founded in 1980, manufactures and markets a complete family of LAN interconnection systems including Ethernet and token ring remote bridges, routers and bridges/routers plus comprehensive network management systems. All products are sold directly by Vitalink and indirectly via a network of distributors.

#90190b0176 07/09/1990 ~Business Wire

SEATTLE (JULY 9) BUSINESS WIRE - Celerex Corp. announced Monday that three major shareholders of the company have agreed to provide $3 million of bridge financing to be used for the cost of equipment and operations as the company continues to roll-out its credit card and check transaction and verification systems.

The company is also discussing financing of existing and future system installations with an equipment leasing concern. Celerex's off-line system allows previously all cash businesses, including fast food restaurants, parking facilities, variety stores and amusement vendors, to offer credit card and check payments which are ''faster than cash.''

The major shareholders will provide funds as required for the company's operations in the form of a bridge loan. The bridge loan will be repaid from the proceeds of a private placement offering of the company's common stock currently being offered to accredited investors and/or from other financing arrangements. Any portion of the bridge loan not repaid through these sources will be converted to common stock of the company on the same terms as negotiated for the private placement.

The company also stated that it had begun discussions with potential strategic partners regarding long-term funding and business synergy. These discussions have not reached the negotiations stages, but indicate an interest in the concept of bringing credit cards and checks to previously all cash markets.

Celerex is in the electronic payment business, specializing in credit card authorization, electronic draft capture and check verification. Celerex's stock is traded through the NASDAQ System under the symbol CEXY.

ALBANY, NY (JULY 9) BUSINESS WIRE - Lawrence A. Shore was recently appointed president of Lawrence Group Inc. by Albert W. Lawrence, owner and founder.

Lawrence Group Inc. is the holding company for Lawrence Agency Corp., the 16th largest insurance brokerage in the country, and its subsidiaries; Lawrence Insurance Group Inc., a publicly traded insurance underwriting corporation on the American Stock Exchange, and its subsidiaries, United Community Insurance Co., United Republic Reinsurance Co., Senate Insurance Co., and Commercial Resources Insurance Co.; and for A.W. Lawrence Management Corp.

Shore joined Lawrence Group Inc. in 1985 and recently retired as chief executive officer and president of Lawrence Insurance Group Inc., and as president of United Community Insurance Co. His earlier positions at Lawrence Group Inc. included: vice president of finance, United Community Insurance Co.; president, A.W. Lawrence Management Corp.; president and controller, Senate Insurance Company Ltd.; president, Senate Syndicate Inc.; vice president, Commerical Resources Insurance Co.; and assistant treasurer, Lawrence Underwriting Managers Inc.

Prior to joining the Lawrence Group in 1985, Shore was employed by the General Electric Company for 33 years. During his prestigious career at General Electric, Shore held responsible managerial positions in general management, finance, and strategic planning. In addition, he was manger of Business Development and Planning for General Electric's International Apparatus and Engineering Services with full profit and loss responsibilities.

A graduate of Michigan State University with a bachelor's degree in Business Administration, Shore actively supports the community as a member of the boards of the Albany Symphony Orchestra, Albany-Colonie Chamber of Commerce, Empire State Youth Orchestra, University Albany Foundation, and

the Senior Services Center of Albany Foundation.

Shore and his wife, Marie, reside in Loudonville, N.Y.

Lawrence Group Inc. is a vertically integrated, multi-line national insurance enterprise offering individualized personal and commercial insurance programs.

ALBANY, NY (JULY 9) BUSINESS WIRE - F. Herbert Brantlinger was recently appointed chief executive officer and president of Lawrence Insurance Group Inc., a public insurance underwriting company.

He will be located in the company's operating headquarters at 33 Elk Street in Albany. The announcement was made by Albert A. Lawrence, chairman of the board.

Brantlinger will assume the responsibilities of the company, including overseeing all claims, sales, underwriting, marketing, and product development functions.

Lawrence Insurance Group Inc. is comprised of United Community Insurance Co.; United Republic Reinsurance Co.; Senate Insurance Co.; and Commercial Resources Insurance Co. Brantlinger has also been appointed chief executive officer and president of United Community Insurance Co., Lawrence Insurance Group Inc.'s flagship property/casualty underwriting subsidiary.

As chief executive officer of Lawrence Insurance Group Inc., Brantlinger indicates he will ''continue the positive direction and forward momentum of the company as it grows and expands into all 50 states, offering quality customer service while developing individualized insurance programs to its growing customer base. Emphasis will be on achieving increased earnings per share while at the same time maintaining superior customer service.''

Brantlinger joined the Lawrence Group in 1989 as First Executive Vice President of United Community Insurance Co. He began his career in the insurance industry 28 years ago with the Hartford Insurance Group in Hartford, Conn., where he most recently held the position of vice president of marketing. Earlier, he held responsible management positions in Hartford offices throughout the United States.

Brantlinger graduated from Wittenburg University in Springfield, Ohio,

with a bachelor's degree in business administration. His professional affiliations have included a seat on the board of directors of ADAPT, which was formed in 1982 to acquire medium and large insurance agencies. In 1988, controlling interest in ADAPT was acquired by Lawrence Agency Corp., a division of the Lawrence Group Inc. In addition, he was a member of the Assurex Development Corp. board.

Brantlinger currently sits on the boards of the Lawrence Insurance Group Inc.; United Community Insurance Co.; Senate Insurance; and United Republic Reinsurance Co. of Houston, Texas, all components of Lawrence Group Inc.

Brantlinger and his wife, Martha, have three children, David, Elizabeth, and Amy and reside in Voorheesville, N.Y.

Lawrence Insurance Group Inc. is licensed or authorized through its subsidiaries in 45 states and the District of Columbia with applications in process in the remainder. The company's common stock is traded on the American Stock Exchange. Executive offices of Lawrence Insurance Group Inc. are located at 770 Broadway in New York City, while operating headquarters is at 33 Elk Street in Albany, N.Y.

SAN FRANCISCO (JULY 10) BUSINESS WIRE - Scot H. Graham will join Mitsui Fudosan (U.S.A.) Inc. in December as vice president.

The announcement was made jointly by Mitsui and AMB Investments Inc., Graham's current employer.

Graham, 34, has had full-time responsibility since 1987 for AMB's development management of 505 Montgomery, Mitsui's San Francisco office highrise project, where his duties include marketing, leasing and cost and budget control. The project is nearly 90 percent leased, and AMB's contract with Mitsui terminates this fall.

''AMB and Mitsui have maintained a superb working relationship, and Mr. Graham has been integral to its success,'' said Hamid Moghadam, a partner with AMB. ''Although we regret losing him, his addition to the Mitsui staff will enhance the continuity of their operations here on the West Coast, and throughout the U.S.''

''505 Montgomery has been a most successful project and initiation to the San Francisco marketplace,'' said Yoichiro Hamaoka, head of Mitsui's San Francisco office. ''We count on Mr. Graham's continued counsel and assistance as we address new challenges here.''

Prior to joining AMB in 1986, Graham held a variety of management positions with Cadillac Fairview Corp. Ltd., first in Los Angeles and then in San Francisco. Previously, he worked with the Boston Company Real Estate Council Inc. and the Phoenix Community Development Corp.

A graduate of Stanford University with a bachelor's degree in Economics, Graham holds an MBA with a concentration in finance from UCLA Graduate

School of Management. He is single and lives in San Francisco.

Mitsui Fudosan (U.S.A.) Inc. is a subsidiary of Mitsui Real Estate Development Co. of Japan. The company has been involved in real estate development in this country for over a decade and its $1 billion U.S. portfolio includes several prestigious buildings in California, New York, Illinois and Hawaii.

AMB Investments Inc. is a San Francisco-based real estate investment and development firm. Since its formation in 1983, the firm has had extensive experience working on a diverse range of innovative real estate transactions with clients and partners, ranging from large individual and institutional investors to corporations, professional firms, financial institutions and trusts.

The firm was actively involved in the acquisition and closing of the 505 Montgomery transaction, as well as serving as Mitsui's development manager following the acquisition.

NEW YORK (JULY 9) BUSINESS WIRE - ACTV Inc. (NASDAQ:IATV) announced Monday that it has been awarded a $650,000 contract to provide a unique interactive television training system to Alexander Proudfoot Co.

The ACTV system, which is slated for delivery during the third quarter of this year, utilizes unique patented television technology that permits all trainess to experience television responsiveness, personalized feedback and score keeping. During the television program, the trainees will be asked to make choices or respond to questions using an ACTV answering device. The narrator of the program will then make comments on the choices given and personalize the feedback based on the respondent's input.

The program will be used to train Proudfoot personnel at the company's Productivity College, located at its headquarters in West Palm Beach, Fla.

Alexander Proudfoot Co. is a worldwide leader in the field of designing and installing profit, productivity, quality and service improvement programs.

Proudfoot, through the installation of its customized productivity systems and the development of a management capacity program, improves a company's

productivity, quality, customer service and profitability. It is the thirteenth largest consulting firm in the world and currently operates in 27 countries on five continents.

ACTV has developed and is marketing new television technologies that allow viewers to personalize what they are watching by responding to choices and questions posed by the programming. The choices viewers make instantly change and customize the programs they are watching.

In addition, the company has an agreement with McCann Erickson, and through McCann Erickson, with its clients AT&T, Coca Cola, General Motors, to explore and evaluate sports and special event programming opportunities.

VANCOUVER, BC (JULY 9) BUSINESS WIRE - ASIAMERICA EQUITIES, LTD. (NASDAQ/NMS Symbol: ASIAS) Monday announced that the Superior Court of the District of Montreal has approved the plan of arrangement of its subsidiary, Nalcap Holdings Inc. (NASDAQ/NMS Symbol: NPHIF).

All shareholder, regulatory and legal approvals to execute the plan have now been obtained. It is management's intention to put the plan into effect as soon as possible.

Under the plan, holders of less than 20 shares of Nalcap will automatically receive approximately U.S. $30.25 in exchange for their shares. Holders of between 20 and 100 shares may elect to keep their Nalcap shares or have them redeemed for cash. The court's judgment set the record date at May 14, 1990, for those shareholders who would be affected by the plan.

The company anticipates that between 21,000 and 108,000 shares will be redeemed, at a maximum cost of approximately $3.3 million.

Subsequent to the execution of the plan, ASIAMERICA's holding of Nalcap will increase to between 67 percent and 74 percent of the voting shares and between 46 percent and 49 percent of the total shares outstanding. The latter figures include shares that are under an order of cancellation by the court, which is under appeal.

As a result of the plan, the number of Nalcap's shareholders will be reduced by a minimum of 5000, thereby substantially reducing the costs associated with maintaining a large register. Small shareholders will obtain a fair price for their shares without the costs associated with

their sale.

Through an issuer bid, Nalcap previously authorized the purchase of up to 65,000 of its common shares, at a price of $28.33 per share, during the period from February 1990 to February 1991. Together with the issuer bid, ASIAMERICA's holding of Nalcap may be increased to over 80 percent, without considering the shares under litigation.

ASIAMERICA EQUITIES, LTD. is an international financial management and industrial services group.

SAN JOSE, Calif. (JULY 9) BUSINESS WIRE - Silicon Valley Group Inc. (NASDAQ/NMS:SVGI) announced Monday that Russell G. Weinstock has been promoted to chief financial officer and vice president of finance.

Weinstock succeeds Anthony R. Muller who resigned from the post today to pursue new career challenges.

Muller, who has served as CFO since 1985, leaves the company with an impressive track record of financial growth. Since 1986, SVG has grown from a $28 million dollar company to a $131 million dollar company in 1989 with a higher sales rate in the current year.

This growth has been fueled by internal growth and strategic acquisitions, including the recent purchase of Perkin-Elmer's optical lithography unit which is now SVG Lithography Systems Inc. (SVGL).

According to Papken S. Der Torossian, SVG president and chief executive officer, Muller was instrumental in negotiating these mergers and acquisitions, contributing to the company's current position as a global leader in the semiconductor equipment market. He is now relinquishing his responsibilities to seek new executive opportunities.

Commenting on Weinstock's appointment, Der Torossian noted, ''It is rare to have two people with this level of financial expertise working for one company. With his strong leadership skills and history in relevant industry positions, Russ is well-prepared to step in and fill this crucial role.

His experience will further ensure the smoothest possible transition and sustain our strong relations with the financial community. We are well-known for our financial discipline and with five years as corporate controller in hand, Russ is ideally suited to guide all future financial operations.''

Promoted to vice president of the company in April, Weinstock worked closely with Muller and was equally essential in the financial consolidation of SVG's recent acquisitions. Prior to joining the company in 1985 as corporate controller, Weinstock held positions of increasing financial responsibility with both start-up and major corporations within the electronics industry.

Most recently, he was vice president of Disctron and earlier MCO division controller at Sperry Univac. Prior financial management posts include five years at RCA Corp.

Silicon Valley Group Inc. is a leading manufacturer of automated wafer processing equipment for the worldwide semiconductor industry. The company's two product divisions are the Track Systems Division, focused on photolithography processing equipment, and the Thermco Systems Division, offering oxidation, diffusion, and low pressure chemical vapor deposition (LPCVD) processing systems.

SVG's newly acquired subsidiary, SVG Lithography Systems Inc. (SVGL), delivers photolithography tools which utilize step-and-scan technology.

SAN JOSE, CALIF. (JULY 9) BUSINESS WIRE - International CMOS Technology Inc. announced Monday that they have signed all location agreements with regional distributors Insight Electronics and Nu Horizons.

These distributors will be added to the existing network which consists of Marshall Industries, Western Microtechnology and Reptron.

Insight Electronics is headquartered in San Diego with California offices in Orange County, Los Angeles, Sunnyvale and San Diego. Northwest offices are located in Portland, Ore. and Seattle.
Insight is a western regional distributor.

Nu Horizons will be distributing ICT's products in the east coast with offices in New York, New Jersey, Pennsylvania, Maryland, Florida and Boston. Nu Horizons is an eastern regional distributor and is headquartered in Hauppauge, N.Y.

SECAUCUS, NJ (JULY 9) BUSINESS WIRE - ILIO INC. (NASDAQ/NMS Symbols: ILIO ILIOW, ILIOU) Monday announced that it has reached an agreement with Marine Midland Bank to increase the company's credit lines by approximately 27 percent, to $14 million.

This marks the second increase in credit lines announced by the company in the past six months.

Commenting on this development, Jerry Ross, ILIO's chairman of the board and chief executive officer, said, ''We are extremely pleased to announced this further increase in ILIO's credit lines, which demonstrates Marine Midland Bank's confidence in the company's continued prospects for growth as well as the continued demand for ILIO product.''

ILIO INC. designs, markets, sells and distributes women's cotton sportswear and apparel primarily under the ''Ilio'' trademark and through private label arrangements.

The company markets its lines of sportswear, which retail for under $30, to moderately priced department stores, specialty stores, specialty chains and mass merchants. ILIO completed its initial public offering in November 1989.

SAN JOSE, CA (JULY 9) BUSINESS WIRE - AAC Acquisition Corp., a subsidiary of Acer America Corp. and a member of the Taiwan-based Acer Group Monday commenced its previously announced tender offer for all the outstanding shares of common stock and Series B common stock of Altos Computer Systems in each case, at $8.35 per share net to the seller in cash.

The tender offer is being made pursuant to a merger agreement signed July 4, between Acer and Altos.

The offer is conditioned upon, among other things, there having been validly tendered and not withdrawn prior to the expiration of the offer, that number of shares of common stock and Series B common stock representing at least 90 percent of the then outstanding shares of each of the common stock and the Series B common stock of Altos, assuming the exercise of all outstanding and exercisable options.

The Altos board of directors has approved the merger agreement and unanimously recommends that its shareholders accept the offer and tender their shares.

The offer and withdrawal rights will expire at midnight New York City time on Friday, Aug. 3, unless the offer is extended. The terms and conditions of the tender offer are set forth in tender offer materials being filed today with the Securities and Exchange Commission. These materials will be mailed promptly to Altos shareholders.

Alex. Brown & Sons Inc. is acting as the dealer manager for the offer and Georgeson & Co. Inc. is acting as the information agent. Copies of the Offer to Purchase and Letter of Transmittal may be obtained from the information agent by calling 800/223-2064 or from the dealer manager by calling 415/544-2800 (collect).

Founded in 1977, Altos designs, manufactures and markets UNIX-based networked, multiuser solutions for distribution in 60 countries. More

than 128,000 Altos systems have been installed worldwide. Fiscal 1989 sales for Altos were $140 million. Altos stock is traded on NASDAQ National Market System, under the symbol ALTO.

The Acer Group, founded in 1976 and based in Taiwan, is a multinational organization with more than 5,000 employees worldwide and revenue totalling more than $700 million in 1989.

Acer's full product line extends from personal computer systems and peripherals to data communications products, ASICs, and multiuser systems. The firm markets it products through an established network of more than 10,000 dealers in over 70 countries.

The Acer Group is the largest microcomputer manufacturer in Taiwan. Stock of Acer Inc., which heads the Acer Group, is traded on the Taiwan Stock Exchange.

CALABASAS, CA (JULY 9) BUSINESS WIRE - Tekelec (NASDAQ:TKLC), a telecommunications test systems company, Monday announced the election of Daniel L. Brenner to its board of directors at its annual meeting of shareholders held May 11, 1990.

''Brenner brings a wealth of communications experience to our board, primarily from a regulatory aspect, which will complement the technical and business professionals that comprise our current board,'' said Peter N. Vicars, president, chief executive officer and a director of Tekelec.

In addition to his current professorship with the Communications Law Program at UCLA's School of Law, Brenner is a member of the board of advisors of Falcon Cable Systems and the board of directors for the Corporation for Public Broadcasting. He previously held the position of senior advisor to the chairman of the Federal Communications Commission (FCC) in Washington, D.C.

Recognized as a leading test equipment manufacturer, Tekelec's product line encompasses testing of data protocols, transmission services and equipment, and signalling and emerging intelligent network applications. Its products are actively marketed worldwide with subsidiaries in Japan and the United Kingdom.

PROVIDENCE, RI (JULY 9) BUSINESS WIRE - Nortek Inc. (NYSE:NTK) announced Monday that its wholly-owned subsidiary, Mammoth, has been awarded a contract in excess of $10 million to manufacture air conditioning equipment for Mall of America, a shopping and entertainment complex under construction in suburban Minneapolis.

Mammoth's heating and air conditioning product, Custom Penthouse, was chosen by the developer, Melvin Simon & Associates Inc., after almost a year of discussions and negotiations, because it provides proven reliability, low operating costs and positive effects on the construction cycle and budget.

The Mammoth equipment will air condition 3.4 million square feet, which includes all areas of the Mall except for four anchor department stores. The entire mall is planned to be 4.2 million square feet of retail shops, restaurants and entertainment facilities and upon completion is expected to be the largest mall in the United States.

Mammoth has facilities in Plymouth and New Germany, Minnesota and Holland, Michigan and has independent sales representatives in 82 offices around the United States, Canada and Western Europe. Notable recent air conditioning projects include Canary Wharf, London, England; Meridan Corporate Park, Indianapolis, Indiana; International Diabetes Center, St. Louis Park, Minnesota and Litchfield Precision Components, Litchfield, Minnesota.

Nortek Inc. is a diversified Fortune 500 corporation, manufacturing and marketing residential and commercial building products and commercial ventilating and air conditioning systems.

#90190b0631 07/09/1990 ~Business Wire

PLYMOUTH, NH (JULY 9) BUSINESS WIRE - Demonstrating a bit of chemical magic, IBM researchers Monday revealed a greatly improved method of

growing thin crystal layers of germanium on silicon.

The development makes more practical the production of silicon-germanium crystal alloys, materials with great promise in electronics and computers.

The researchers discussed their work, the first successful demonstration of this new technique of crystal growth, at the Gordon Research Conference meeting in Plymouth today.

In developing their new technique, the IBM scientists solved a long-standing problem in growing germanium on silicon: when the germanium crystal grows to more than three atoms thick, it tends to clump or ball-up rendering it useless for electronics applications.

The scientists have discovered a way to coax the germanium to lie flat on the silicon by creating a kind of crystal parfait. They start with a thin layer of silicon. Then, before growing the germanium on top, they first add a single atomic layer of the element antimony. The antimony rises to the surface -- like a layer in a parfait -- and forces the layer of germanium to grow flat underneath it.

The scientists call their new method of crystal growth ''surfactant-mediated epitaxy.'' The antimony acts as a surfactant, an agent that changes the surface properties of the silicon (making it chemically more stable), so that the germanium can grow on top of the silicon more smoothly.

Epitaxy is the growth of one crystalline layer on top of another. The researchers grow the germanium-silicon crystals using molecular beam epitaxy.

The scientists have successfully grown flat layers of germanium 10 atoms thick on silicon, with a perfect match between the crystal structure of the germanium and the silicon.

Earlier, the researchers successfully used arsenic as the surfactant to grow layers of germanium on silicon.

That accomplishment was published in the August 1989 issue of Physical Review Letters. They believe they'll eventually find a broad range of surfactants that work well in their surfactant-mediated epitaxy process. Today's report was the first public discussion of the team's success using antimony as the surfactant.

The new process makes feasible the use of silicon-germanium crystals in a wide range of applications. Germanium has several properties of interest in electronics and, in fact, the first transistor ever built was made of germanium.

Combined with silicon, germanium-silicon alloys could offer potential applications in transistors, lasers, photo detectors and diodes.

Earlier this year, IBM researchers announced they had fabricated from silicon enriched with a few percent germanium the world's fastest experimental transistor, operating at 75 billion cycles per second, or nearly twice as fast as the previous record.

Tromp's collaborators include Matthew Copel, Mark Reuter, Francoise LeGoues, Tim Kaxiras and Michael Horn von Hoegen.

PHOENIX (JULY 9) BUSINESS WIRE - CyCare Systems Inc. (NYSE:CYS) Monday announced that it is in the process of reviewing certain asset categories in connection with reporting second quarter results.

The principal areas of attention involve software products relating to product lines being discontinued or reduced in scope as well as inventories and facilities relating to such product lines and intangible assets including goodwill. Further, due to economic deterioration in certain areas, reserves against accounts receivable are also being reviewed. The amount of the write-downs will be approximately $21 million.

Ray Maturi, CyCare president and chief operating officer, has gone through a careful review process of the company during his first six months. After evaluating CyCare's businesses and product lines, the decision was made to concentrate on physician controlled entities.

Maturi stated, ''Success in these strategic areas is critical to our long-term growth, and it is crucial that these key programs will continue to receive a high level of commitment and resources. This led to the present decision to write-down assets related to those product lines that will be deemphasized or eliminated with the strategic redirection of the company.''

Maturi added, ''We expect this action to enable us to focus our efforts and resources in core businesses, strengthen the balance sheet and improve the long-term growth and profitability of the company.''

Cycare is one of the nation's leading providers of computerized information processing, systems and services to the healthcare industry

with over 4,800 clients, including physicians, medical group practices, faculty practice plans, hospitals and managed care organizations.

#90190b0638 07/09/1990 ~Business Wire

CUPERTINO, CA (JULY 9) BUSINESS WIRE - Tandem Computers Inc. (NYSE:TDM) Monday announced standards-based networking products that increase the multivendor networking capabilities for Tandem online transaction processing and large database applications enabling large enterprises to leverage and maximize current and future computer investments.

Tandem now offers compatibility with protocol standards through Layer 7 of the Open Systems Interconnection (OSI) model, the international seven-layer reference model that provides a framework for defining standards to link dissimilar computer systems.

In addition, Tandem has enhanced connectivity for its SNAX and TCP/IP software, and PSX MS-DOS based workstations to allow them to use open wide area networking connections.

SNAX is the family name for Tandem's IBM Systems Network Architecture (SNA) communications products. Tandem TCP/IP is Tandem's product for Transmission Control Protocol/Internet Protocol, a set of layered communications protocols defined by the U.S. Department of Defense Advanced Research Projects Agency.

The Tandem OSI Application Services (OSI/AS) and Transport Services (OSI/TS) software enable Tandem users to develop applications without detailed knowledge of the underlying OSI protocols and independently of the communications environment.

Together OSI/TS and OSI/AS provide compatibility with OSI protocol standards through Layer 7 of the OSI reference model. Users connected to OSI networks can access Tandem applications with these services.

Both OSI products provide continuous network access and are integrated with Tandem's Distributed Systems Management (DSM) products to help enhance operational control of an OSI network. DSM is a family of Tandem products that consolidate network management functions into a single, unified view of a distributed online network.

Tandem also announced additions to its SNAX product line by providing X.25 connectivity. Tandem customers can combine the power and functionality

of Tandem applications communicating with SNA devices and hosts using low-cost packet-switched data networks.

Tandem has added several features to its TCP/IP product including X.25 networking, a mail gateway and network administration software. These enhancements allow customers to take advantage of Tandem applications in a wide range of TCP/IP network environments.

In addition, Tandem's PSX MS-DOS based line of personal computers can now implement support for the X.25 protocol. These products can share wide area network connections with other products that implement the X.25 protocol, which reduces the cost of integrating networks.

All prices listed below are in U.S. dollars. OSI/AS, OSI/TS, X.25 for SNAX, and X.25 for PSX workstations are currently available. X.25 for TCP/IP enhancements will be available the fourth calendar quarter 1990.

Tandem Computers Inc. manufactures and markets computer systems and networks for online transaction processing, large database, and UNIX system applications. Company headquarters are located at 19333 Vallco Parkway, Cupertino, 95014. The telephone number is 408/285-6000.

#90190b0639 07/09/1990 ~Business Wire

DENVER (JULY 9) BUSINESS WIRE - Nevada Goldfields Corp. Monday announced that it has signed a letter of intent to offer to acquire up to 100 percent of the issued and outstanding shares of Antioch Resources Ltd. in exchange for shares of Nevada Goldfields.

Terms of the share exchange agreement and share exchange ratios have yet to be negotiated. The offer is subject to approval of requisite Canadian and U.S. regulatory authorities.

Robert H. Allen, 62, and Richard C. Atkinson, 48, two of the principals of Antioch Resources, will join Nevada Goldfields' board of directors and will assume active roles in assisting with refinancing activities in the company.

Allen was involved in founding Gulf Resources and Chemical Corp. where he served as chief executive officer from 1962-1982. Allen serves on several boards of directors including Federal Express Corp. and First City Bancorporation of Texas. In 1986 he co-founded Getty Resources Ltd., a publicly held Canadian mining company, which was sold in January 1988 to Total Resources (Canada) Ltd.

Atkinson, a professional engineer, co-founded Getty Resources where he served as president, chief executive officer and director from inception until it was sold. Atkinson is a director of Energex Minerals Ltd.

Antioch is a Spokane, Wash., based company actively involved in gold exploration in Canada and which holds an option to purchase the Logan gold mine in Nova Scotia, upon which extensive exploration has been conducted.

Nevada Goldfields Corp. is a Canadian public company with two gold mines in Nevada. Its shares trade on The Toronto Stock Exchange under the symbol NGF, on NASDAQ under the symbol NGFCF, and on the Stuttgart Exchange, West Germany, under the symbol NGF SG.

#90190b0648 07/09/1990 ~Business Wire

KIEL, WEST GERMANY (JULY 9) BUSINESS WIRE - Dr.-Ing. Rudolf Hell GmbH, a leading manufacturer of color reproduction equipment, has filed suit against Optronics Inc. (a division of Intergraph Corp.) in the United States District Court in Boston charging Optronics with infringement of Hell's United States Patent 4,084,183 entitled ''Method For the Electro-Optical Reproduction of Half-Tone Pictures.''

The patent relates to color separation recorders used in the printing and graphic arts industries. The suit seeks monetary damages and injunctive relief.

Hell offered to license Optronics to use the patented screening technology on what is believed to be reasonable terms and conditions and regrets that Optronics' refusal to accept such terms made the action necessary.

Hell carefully reviewed each and every argument raised by Optronics with respect to Optronics' objections to taking a license as well as to Optronics' assertions relating to its perceived bases for invalidating the patent and claiming non-infringement. In the opinion of Hell's counsel, such arguments and assertions are without merit.

The patented technology represents a substantial improvement for moire free reproduction of color separations on an earlier, now-expired Hell patent 3,657,472. This earlier patent was identified and discussed when the application for the newer patent in suit was under examination before the United States Patent and Trademark Office. Assertion of this patent infringement charge is nothing more than the utilization of the legal rights granted to Hell under the patent law.

Hell has made substantial investments over a long period of years in developing its patented screening technology, and intends to remain vigilant in protecting its proprietary rights. Other important vendors and manufacturers of color separation recorders already have taken licenses under Hell's patented screening technology.

Hell's commercially successful technology often has been emulated but when such emulation rises to the level of patent infrigement and takes place without license, Hell intends to vigorously pursue its remedies at law.

Hell designs, manufactures, and sells color reproduction equipment for the publishing market and the printing and graphic arts industries.

#90190b0649 07/09/1990 ~Business Wire

WESTBORO, MA (JULY 9) BUSINESS WIRE - Banyan Systems Monday announced a new software offering: VINES for 486 Platforms, which enables users to take full advantage of the high-performance Intel I486 architecture.

The product is now being shipped.

The first VINES product to support I486-based PCs, VINES for 486 Platforms fully interoperates with all other Banyan servers and Banyan certified platforms, as well as with all VINES-integrated software options.

In addition, all applications which currently run in the VINES environment (including those developed with the VINES Applications Toolkit) are also fully compatible with I486-based platforms. This high level of hardware and software interoperability gives Banyan customers complete freedom to implement different hardware platforms as VINES servers within a multi-server network according to their unique network requirements.

The first I486-based PC to be certified by Banyan is Compaq's new DeskPro 426/25. Vendors of other I486-based PC's are certifying their platforms with VINES under the recently announced Vendor Certfication Program.

The I486 architecture offers increased processing power compared to the earlier 386, allowing CPU-intensive distributed applications to run about twice as fast on I486 platforms as on 386 platforms. In a corporate network environment, this performance advantage is most beneficial to

compute-intensive server-based network services, such as VINES network mail, VINES 3270/SNA gateway, high-speed wide and local area network bridging, and applications based on ORACLE Server for VINES, VIA for VINES database server, and other distributed databases or client/server applications.

The faster processor also provides benefits to typical network users who need only file, print, global naming (offered by StreetTalk, and security (offered by VANGuard).

#90190b0650 07/09/1990 ~Business Wire
DEERFIELD BEACH, FL (JULY 9) BUSINESS WIRE - July 9, Sensormatic Electronics Corporation (SNSR/NASDAQ) today announced strong operating results for the year ended May 31, 1990.

Worldwide revenues for the fiscal year ended May 31, 1990 rose to $191.3 million, a 27 percent increase from the prior year's revenues of $150.9 million. Operating income outpaced revenue growth and increased 36 percent to $24.6 million. Net income rose 20 percent to $20 million, or $0.72 per share, from last year's $16.7 million, or $0.60 per share. Worldwide backlog at fiscal year-end was a record $28 million, a 56 percent increase over last year's year-end backlog of $18 million.

Fourth quarter revenues reached a record high of $56.6 million, a 24 percent increase over last year's comparable quarter revenues of $45.6 million. Operating income continued to grow at a faster rate than revenues, increasing 32 percent to $7.8 million. Net income from continuing operations in the fourth quarter rose by 17 percent to $6.2 million and by 21 percent to $0.23 per share compared to last year's $5.3 million, or $0.19 per share.

Additionally, the Company announced its fourth quarter order rate was the highest in its corporate history. A number of orders in excess of a million dollars each were received in the last several months from major retailers such as Woolworths, Fred Meyer and Blockbuster Video, for systems and labels protecting hard goods, and from such traditional soft goods apparel retailers as Marshalls, Mervyn's and Dillards.

Only a portion of these orders were shipped and recorded as revenues in the fourth quarter with the balance to be shipped in future periods.

Commenting on the year's performance, Ronald G. Assaf, President and Chief Executive Officer, stated, ''The growth momentum resulting from our new

product introductions has continued into this year. Every product line and each geographic area of the business worldwide reported increased revenues for the year.''

Mr. Assaf continued, ''We are especially pleased with the dramatic growth in operating income which significantly outpaced our excellent revenue growth. This improvement was due to proportionately lower operating expenses and to gross margins which improved this year, despite nearly doubling the shipment of lower margin disposable labels to hard good retailers. We expect recurring revenues from disposable labels to be a major source of Company revenues and profits in the current fiscal year, and beyond.''

Sensormatic Electronics Corporation is the world leader in loss prevention technology. Sensormatic's electronic article surveillance (EAS) systems are used primarily by retailers to deter shoplifting. Sensormatic also manufactures and markets closed circuit television systems for retail, commercial and industrial applications, and its POSdata subsidiary is the fastest growing distributor of point of sale bar code scanners in the United States.

All of the Company's divisions are linked to the largest worldwide sales and service organization in the EAS industry.

FORT LAUDERDALE, FL (JULY 9) BUSINESS WIRE - MODCOMP, the premier supplier of real-time computer systems for NASA and other major aerospace, government and commercial users, Monday announced it has won a multi-million dollar award from Jet Propulsion Laboratory to supply its standards-based real-time computer systems for NASA's Deep Space Network (DSN), a facility used to track, control, and receive data from deep space probes.

MODCOMP is to supply 57 Tri-Dimensional (Tri-D) Model 9735 Motorola 68030-based real-time computers with the REAL/IX Operating System, MODCOMP's real-time implementation of AT&T's UNIX System V Operating System.

The systems will be used in the DSN, a project which provides spacecraft tracking and communications, among other things, for NASA's scientific missions in deep space, such as Voyager 1, 2, Magelian, and Galileo. These new systems will be used to track, command, and to obtain a higher rate of telemetry data from spacecraft traveling in deep space.

Recently, MODCOMP computers were also used by the National Radio Astronomy Observatory to control the movement of the Very Large Array (VLA), the most powerful and flexible radio telescope ever built. The VLA was used by the DSN to capture the enormous amount of data Voyager 2 sent back to Earth from Neptune last August.

The Jet Propulsion Laboratory, a multi-mission laboratory and a part of the California Institute of Technology and a National Aeronautics and Space Administration (NASA) Center, is primarily known as the leader in America's exploration of the solar system.

The DSN is managed by JPL and communicates with and tracks automated spacecraft throughout the solar system. The DSN consists of a worldwide complex of large dish antennas, powerful transmitters, and sensitive receivers to track, command and obtain data from lunar and planetary spacecraft.

The DSN antennas are positioned on three continents at these locations: at Goldstone in Southern California's Mojave Desert; near Madrid, Spain; and near Canberra, Australia. MODCOMP's computers will continue to be used at those three locations, as well as JPL's Pasadena, Calif. headquarters.

Real-time systems are designed to respond to prioritized, external events

within a predetermined period of time (usually measured in microseconds), which is critical in many applications requiring predictable systems response.

Real-time collection of and processing of data is absolutely imperative during a spacecraft encounter with a planet such as Mars, since there is no second chance to retrieve the data.

MODCOMP, founded in 1970, is a worldwide supplier of high-performance computer systems, products, and services for real-time applications. MODCOMP is an AEG company.

#90190b0653 07/09/1990 ~Business Wire

REDMOND, WA (JULY 9) BUSINESS WIRE - Microsoft Corp. Monday announced the promotion of Jeff Raikes to vice president of office systems in the Microsoft applications division.

Raikes was one of the charter members of the division, and helped Microsoft grow to be the world's largest PC applications company, with applications representing more than 50 percent of the company's total revenues.

Raikes will continue to serve as general manager of the office business unit (OBU), the largest business unit in Microsoft Corp., reporting to Mike Maples, vice president of the applications division.

''Jeff has been the driving force behind many milestones in Microsoft applications, including making the Word family the only complete, multiplatform word processing line,'' said Maples. ''In recognition of his experience and leadership skills, I'm very pleased to make this promotion.''

As vice president of office systems, Raikes holds development and marketing responsibility for Microsoft's word processing business, including four versions of Microsoft Word, and workgroup applications, including electronic mail and other emerging technologies such as handwriting recognition.

''My objective is to help lead the transition, both at Microsoft and among our customers, from thinking in terms of standalone products to providing a total office solution,'' said Raikes. ''We've already started to incorporate this solutions approach in our word processing and electronic mail strategies and will continue to evolve our office systems to meet specific customer needs.''

Raikes, 32, joined Microsoft in 1981 as the first product manager for end-user tools in the newly formed applications division. In the following nine years, his career path paralleled the growth of the division where he held positions of group product manager, director of marketing, and OBU general manager. Raikes has also been an active member of the Software Publishers Association board of directors since 1987.

Raikes received a bachelor of science degree at Stanford University with an emphasis in engineering/economic systems. Before joining Microsoft, he was engineering program manager in the applications group at Apple Computer.

Microsoft Corp. (NASDAQ: MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems languages and application programs, as well as books, hardware and CD-ROM products for the microcomputer marketplace.

COLUMBUS, OH (JULY 9) BUSINESS WIRE - Goal Systems International Inc. today announced that it has completed its preliminary investigation of the products included in a lawsuit filed against Goal by CA Management Inc., a wholly-owned subsidiary of Computer Associates International Inc. (CA).

The suit, filed June 25 against Goal, J. William Bennett Co., Inc. and Jerry Bennett, alleges the violation of copyright, trade secret and

ownership rights associated with CA's job rerun product, CA-11, which competes with Goal's RUNTRAC product.

Goal Systems has taken several immediate actions in response to its findings, including starting development of a new version of RUNTRAC by a team with no access to the infringing code. In addition, the voluntary suspension of RUNTRAC sales commenced with the filing of the suit will continue until a completely new version is available. In the meantime, current RUNTRAC customers will be able to use the existing product without interruption and will continue to receive support. The company also terminated Jerry Bennett.

A temporary restraining order granted to CA expired July 6. A preliminary injunction hearing originally scheduled for that date was not held due to negotiations between the two companies regarding a possible settlement. These negotiations did not prove fruitful and were discontinued.

Goal Systems acquired RUNTRAC (an automated rerun/restart system) and JOBTRAC (an automated production control system) from J. William Bennett Co. Inc. in November of 1988. Bennett was the owner of J. William Bennett Co. Inc. and became an employee of Goal Systems at that time. In the suit CA seeks unspecified monetary damages, an accounting for profits and injunctive relief. Goal Systems management estimates that revenue attributable to RUNTRAC during the fiscal year ended Jan. 31, 1990 was less than $1 million.

Goal Systems (NASDAQ:GOAL) designs, develops and markets software grouped into two product lines. The Data Center Management Division consists of a broad range of systems software products for IBM and compatible mainframe computers which allow users to manage, automate, monitor and analyze the use, cost and performance of their data processing resources. The Information Technology Division offers performance support products including computer-based training and computer-based reference software and associated courseware and professional services. Revenue for the fiscal year ended Jan. 31, 1990 was $86.6 million.

STOCKHOLM, SWEDEN (JULY 9) BUSINESS WIRE - Ericsson Radar Electronics of Sweden has been selected to lead the development of advanced skin antennas for the European space plane, Hermes.

Communications with Hermes will be accomplished by using skin antennas mounted flush with the surface of the space plane. Seven separate antenna

functions, with virtually global coverage, are planned. Each antenna function needs two or more separate radiating elements. The total number of elements adds up to 32 units.

Full scale development of flight models is scheduled to start in 1991 with first delivery in 1996.

Ericsson is an international leader in telecommunications, recognized for its advanced systems and products for wired and mobile communications in public and private networks. Ericsson's wholly owned North American subsidiary is based in Richardson, Texas.

Ericsson ADRs are traded on NASDAQ under the symbol ERICY.

SAN FRANCISCO (JULY 9) BUSINESS WIRE - The Good Guys! (NASDAQ:GGUY) Monday announced that sales for its third quarter ended June 30 were $65,358,000, up 56 percent, from $41,924,000 in the third quarter of fiscal 1989.

Comparable store sales increased 29 percent. Earnings will be released later in the month.

For the first nine months of fiscal 1990, sales increased 51 percent to $215,138,000, from $142,903,000 for the like period last year. Comparable store sales for the first three quarters rose 26 percent from year-ago levels.

In commenting on the results, Ronald A. Unkefer, chairman, said: ''We are extremely pleased by our strong sales momentum of the first nine months of fiscal 1990. We believe this reflects both our commitment to outstanding customer service and the hard work of everyone on The Good Guys! team.

''As part of The Good Guys! continuing expansion program, on July 1 we opened our first store in the exciting Los Angeles area,'' Unkefer added. The Beverly Connection store will be the first consumer electronics store in the Los Angeles area open 24 hours a day, seven days a week -- beginning July 13.

''And on June 1 we celebrated the opening of our 23rd store, located in Fresno. This is another new market for us, and we've been very encouraged by our strong sales during the grand opening period.''

The Good Guys! is a leading specialty retailer of consumer electronics in California and Nevada, and markets a broad range of high quality, brand name products.

BENTONVILLE, AK (JULY 9) BUSINESS WIRE - Wal-Mart Stores Inc. (NYSE/PSE:WMT), and Western Merchandisers Inc., Amarillo, Texas, Monday announced execution of a memorandum of intent whereby Western Merchandisers' rack jobbing, One-Stop, and warehousing (support) operations will be acquired by the Bentonville based retailer.

The announcement was made by David Glass, president and chief executive officer of Wal-Mart Stores Inc.; Sam H. Marmaduke, chairman of the board of directors, and John H. Marmaduke, president of Western Merchandisers Inc.

The acquisition by Wal-Mart involves $28 million of Wal-Mart common stock in a tax-free exchange. The exchange is subject to, among other things, Western Merchandisers' shareholder approval, filing notices pursuant to the Antitrusts Improvements Act of 1976, compliance with federal and state security laws and receipt of private letter rulings from the Internal Revenue Service.

Before the closing of the Wal-Mart transaction, Western Merchandisers will ''split-off'' its retail book, music, and video business currently handled by Hastings Books & Records Inc., Disc Records Co., and RTH Inc., in a tax-free distribution into Hastings Books & Records Inc., leaving the rack jobbing, One-Stop, and warehouse (support) operations as Western Merchandisers' sole operation.

Current Western Merchandisers' shareholders will be given the option of retaining their shares in Western Merchandisers and ultimately exchanging them for Wal-Mart common stock or exchange their current Western Merchandisers' stock for shares of Hastings or a combination of both.

Following the ''split-off'' of the retail business, Western Merchandisers' common stock will be exchanged for Wal-Mart common stock, and Western Merchandisers will become a wholly owned subsidiary of Wal-Mart.

Western Merchandisers' principal office will remain at its present location in Amarillo, and its support operations, which include distribution centers in Amarillo, Dallas, Houston, Denver, and Salt Lake City, will continue substantially in the same manner as in the past.

Wal-Mart Stores Inc., had 1,438 Wal-Mart stores, 129 Sam's Wholesale clubs and four Hypermart USA units in operation on July 9, compared with 1,307

Wal-Mart stores, 108 Sam's Wholesale clubs, 14 dot Discount Drug stores, and three Hypermart USA units a year ago.

#90190b0676 07/09/1990 ~Business Wire

PURCHASE, NY (JULY 9) BUSINESS WIRE - IBM has announced a $1.85 million initiative to aid homeless families through grants to community-based organizations across the United States.

The IBM Homeless Initiative is designed to help the homeless become self-sufficient. It also addresses the special needs of children who face the prospect of growing up without benefit of a secure, stable learning environment.

Grant recipients include United Way agencies in five cities, Enterprise Foundation of Columbia, Md., and Better Homes Foundation in Newton Centre, Mass. The United Way agencies are located in Chicago, Dallas, Los Angeles, Washington, D.C., and White Plains, N.Y.

''IBM is particularly concerned about the growing population of homeless families and children in this country and the disadvantages they will face if not helped,'' said James G. Parkel, IBM director of corporate support and community programs.

''We acknowledge our obligation as a corporation to help improve the quality of life in our society,'' Mr. Parkel said.

''That's why we've awarded grants to these organizations that will tackle the homeless issue in their communities with a cooperative, grass-roots approach.''

Announced today are grants totaling $1 million to the five United Way organizations. These grants will allow the agencies immediately to implement new programs or improve existing programs and services for homeless families in their respective communities.

In addition to today's grants, IBM earlier this year announced a five-year $750,000 contribution to the Enterprise Foundation and awarded $100,000 to the Better Homes Foundation.

The Enterprise Foundation is a nonprofit organization dedicated to providing affordable housing for poor and homeless people throughout the country. The IBM grant will help in that effort. It supplements an additional $650,000 IBM has awarded the foundation since it was established in 1982.

The Better Homes Foundation, founded in 1988, is a nonprofit organization dedicated solely to helping homeless families. IBM's grant enabled the foundation to launch a pilot program -- called IBM's Project Kidstart -- that links parents and children in the greater Boston area to community resources providing health care, preschool programs and other educational and social services. Under the program, homeless families will be provided long-term support through professionally trained caseworkers assigned to them.

The United Way efforts will focus on providing a range of support services to homeless families with children.

In Chicago, for example, the IBM grant will allow the United Way to expand current programs at four local agencies to include health care services for women with young children, homeless Hispanic families, and families

made homeless because of domestic violence. In another example, programs in Los Angeles will offer families multiple services, including mental health clinics, drug treatment groups, and job and literacy training programs.

FREMONT, CA (JULY 9) BUSINESS WIRE - Sensor Control Corp. (NASDAQ:SNCO), a manufacturer and marketer of sensor instrumentation for industrial customers, announced Monday that it has decided to write off substantially all of its investment in Presto-Tek Corp.

The anticipated write-off of approximately $1.3 million before taxes will be reflected in results for the fiscal year ended June 30.

''While this write-off will result in a substantial non-recurring charge to fiscal 1990 earnings, we expect to report profitable results from Sensor Control's continuing operations for the fourth quarter and fiscal 1990 and to end the year with approximately $3 million in working capital, no debt, and shareholders' equity of approximately $2.75 per share,'' said president James B. Hawkins.

For the nine months ended March 31, Sensor reported net earnings of $499,825, or 23 cents per share, on revenues of $4,783,847 compared to net earnings of $399,391, or 18 cents per share, on revenues of $3,363,827 for the first nine months of fiscal 1989.

Hawkins explained that the write-off is the result of Presto-Tek's continued poor operating performance subsequent to Sensor Control's acquisition of its 45 percent equity interest in November 1989, which led Sensor's management and board of directors to thoroughly reassess Presto-Tek's business prospects and the value of its assets.

''We are evaluating a number of options with respect to Sensor's investment in Presto-Tek, including our legal position in light of the representations made by Presto-Tek both before and after our investment was put in place,'' Hawkins said.

Sensor Control's products include pressure sensors, a broad range of non-contact infrared temperature measurement devices, high-speed non-contact metal thickness gauges and associated data acquisition equipment.

NEW YORK (JULY 9) BUSINESS WIRE - Harris & Harris Group is pleased to announce that Frank Kinnett has agreed to join the company effective Sept. 1, 1990 as president and chief executive officer of its newly established division, Harris & Harris Insurance Services.

This division will encompass all of the group's current and prospective insurance activities, including the group's two existing insurance brokerage subsidiaries, Harris & Harris of Kentucky and Harris & Harris of Georgia, which accounted for $4.5 million or 46 percent, of the Group's total revenues in 1989. Previously, Harris & Harris Group had founded Re Capital Corp., a property and casualty reinsurer. Harris & Harris sold its interest in Re Capital to John Deere Insurance Co. in 1989.

Kinnett, 49, has been chairman since 1984 of Kinnett & Boyd Inc., an Atlanta-based advisory firm specializing in mergers and acquisitions of insurance agencies and companies. Until August of 1984, he was chairman of The London Agency Inc., a major insurance subsidiary of the Crum & Forster subsidiary of Xerox. Kinnett & Boyd acted as investment bankers

for Harris & Harris Group in the acquisition of Harris & Harris of Kentucky and as advisor to Harris & Harris Group in establishing Harris & Harris of Georgia.

In addition to his responsibilities with respect to the company's existing insurance brokerage operations, Kinnett will spearhead the group's acquisition activities in the insurance field and its development of new insurance products including possible new products for the agricultural market.

On April 12, 1990, the group acquired 50 percent of Ag Services of America Inc., an Iowa-based agricultural services company which generated $21 million in revenues in its most recent fiscal year. Ag Services provides farmers with financing and agricultural inputs, including, as agent, Federal multi-peril crop insurance.

These steps are subject to final approval by the companies board of directors.

WOODBURY, NY (JULY 9) BUSINESS WIRE - Comverse Technology Inc. (NASDAQ:CMVT) announced the receipt on an order from a Western European customer for its Audio Disk system, a special purpose digital audio recording system for defense applications.

The order calls for the shipment of several systems over the next year with an aggregate price of approximately $1.6 million.

Kobi Alexander, president and chairman of the board, stated that, ''This purchase order is the first major order for our defense products outside of Israel and is significant not only because of its size but also because it represents the first success for our defense system marketing efforts in Western Europe.''

Carmel Vernia, managing director of Comverse's Israel subsidiary, Efrat Future Technology Ltd., added that ''Comverse has recently increased the marketing efforts for its defense products both in Western Europe and North America. This order marks the initial success of those efforts and confirms our belief in the considerable potential for these products in the world markets.''

Comverse Technology, located in Woodbury, develops, manufactures and markets high performance computer systems for commercial and defense

communications applications, including integrated multi-media message management systems marketed under the name of TRILOGUE.

DALLAS (JULY 9) BUSINESS WIRE - American Medical Holdings Inc. (ASE, London and Zurich Stock Exchanges: AMI) and its subsidiary, American Medical International Inc., announced Monday that AMI had completed the sale of its Swiss and Greek hospital companies for total proceeds of approximately $176.7 million.

''To date we have generated over $600 million from asset sales at prices that have significantly exceeded our original estimates and in a time frame considerably ahead of schedule,'' commented Harry J. Gray, chairman and chief executive officer.

''We have achieved over 60 percent of our commitment to realize $1 billion in asset sales by Oct. 24, 1991.''

AMI's Swiss operations, which consist of four hospitals in Zurich, Aarau, Bern and Lausanne, were sold to Klinik Hirslanden AG.

The aggregate purchase price was approximately Sfr 250 million with financing provided by Union Bank of Switzerland. AMI's hospital in Athens Greece was purchased by Arvoly AG for $15.1 million.

AMI, which founded the investor-owned hospital industry in 1960, currently operates 54 hospitals, including 46 acute care hospitals and 6 psychiatric hospitals in the United States and 2 hospitals in Spain.

TRENTON, N.J. (JULY 9) BUSINESS WIRE - Versus Technology, Inc. (NASDAQ:VSTI) Monday announced the receipt of orders for VerSuS equipment to support New England Telephone Company's expansion of the PULSENET Alert Transport Service in Massachusetts.

These orders represent the first of New England Telephone's planned expansion programs for its Derived Channel network which utilizes VerSuS

equipment.

Shipments of VerSuS microscanners and scanners will begin in late June, with final product for this phase scheduled for shipment in late August. The deployment of this equipment by New England Telephone will expand the availability of PULSENET Alert Transport Service from 66 central switching centers to over 100 central switching centers in the greater Boston area and in Eastern Massachusetts. There are currently seven alarm agencies connected to the PULSENET network.

New England Telephone Co. and New York Telephone Co. comprise NYNEX, the fourth largest telecommunications company in the United States. To date, VerSuS scanner equipment for Alarm Reporting has been installed in 89 New York Telephone central offices and 66 New England Telephone central offices.

Donald M. Hooton, President of Versus Technology, Inc., commented, ''This order for the second phase of New England Telephone's PULSENET Alert Transport Service deployment, is commencing prior to the completion of the initial phase. As such, we believe it represents New England Telephone's commitment to the long term application of VerSuS' Derived Channel Network.''

Hooton noted, ''Total orders to date for Versus Alarm Reporting equipment from NYNEX now approximate $5.2 million. We expect to be the continuing provider of Derived Channel equipment to NYNEX as that company further expands its PULSENET Alert Transport Service.''

Versus Technology, Inc. designs, manufactures and markets data transport networks that allow telephone companies to offer such new services as automatic meter reading, energy management and alarm reporting.

These services can be carried over existing telephone lines without interrupting other uses of the line. Versus is the world leader in this innovative technology, with networks deployed on three continents (North America, Europe and Australia) and over 50 major cities worldwide. Versus equipment is used by more than 150,000 end users who are connected to networks providing automatic meter reading or alarm transport services.

Versus is teamed with industry leaders and some of the world's largest utility meter manufacturers, telephone equipment makers and alarm equipment suppliers, as well as major telephone companies on these three continents.

CINCINNATI (JULY 9) BUSINESS WIRE - MATRIXX Marketing Inc., the marketing services subsidiary of Cincinnati Bell Inc, today announced the creation of a new division of MATRIXX services effective July 1, 1990.

The new division, MATRIXX Marketing - Research Division, will initially be comprised of resources and personnel from ADI Research Inc., a Cincinnati-based firm acquired by MATRIXX in April of this year. The ADI name is being dropped in the creation of the Research Division, which will offer clients a broad range of marketing and consulting services.

The new division will be headed by Michael L. Dean, Ph.D., as President. Dean was formerly the President of ADI.

With this announcement, MATRIXX Marketing now consists of three divisions. In addition to the Research Division, there is the Consumer Division, headquartered in Ogden, Utah, and the Business Division located in Cincinnati.

Combined, these divisions represent the largest third party, full service U.S. operation dedicated to professional telemarketing and related marketing services.

MATRIXX Marketing President and CEO David J. Lahey said, ''The addition of the Research Division better positions MATRIXX Marketing to become a leader in integrated marketing services, adding full-service custom marketing research to our established telemarketing and other related operations.''

Dean founded the ADI firm in 1976. He was an undergraduate at the University of Michigan, earning M.B.A. and Ph.D. degrees in marketing from Ohio State. Formerly, he held a full professorship in marketing at the University of Cincinnati.

MATRIXX Marketing Inc., headquartered in Cincinnati, operates as a marketing services subsidiary of Cincinnati Bell Inc., providing an expanded range of traditional and innovative telephone-related marketing applications.

MATRIXX Marketing businesses include fulfillment, database management, direct mail capabilities, business-to-business and business-to-consumer telemarketing, as well as marketing research. Major customers include leading corporations in consumer products, telecommunications,

pharmaceuticals, and financial services.

WILMINGTON, MA (JULY 9) BUSINESS WIRE - Dynamics Research Corp. announced Monday that revenues for the second quarter of 1990 were $20,637,000, up 2 percent, and net income was $626,000 or $.13 per share, up 2 percent from the comparable quarter in 1989.

For the 24 weeks ended June 16, 1990, revenues were $40,861,000 and net income was $1,235,000 or $.25 per share, both up 2 percent from the comparable 1989 period.

Albert Rand, president and chief executive officer said, ''We are pleased to report a slight increase in both revenues and net income for the quarter and for the first half of 1990. The increase, although modest, attests to the strength of our core businesses. Our funded backlog at approximately $50 million remains strong as we intensify our efforts to capture more business in the markets we serve.'' Since the inception of the stock repurchase program announced in December 1989, the company has acquired 245,100 shares or 4 percent of its common stock then outstanding.

Dynamics Research Corp. provides a wide range of specialized technical services to the Department of Defense and also manufactures components for industrial measurement and control.

#90190b0719 07/09/1990 ~Business Wire

NEW YORK (JULY 9) BUSINESS WIRE - Lazare Kaplan International Inc. Monday reported gross sales for the fiscal year ended May 31 of $109,747,000.

This compares with sales of $80,532,000 in the previous year, an increase of 36 percent. Revenue from the sales of polished diamonds increased 29 percent during fiscal 1990. Rough diamond sales increased 47 percent during the year.

Higher gross sales of polished stones were primarily due to the continued success in selling the ideal cut Lazare Diamond.

In the fourth quarter ended May 31 gross sales totaled $34,337,000 compared to $27,999,000 in fiscal 1989, an increase of 23 percent. Net income of $5,268,000 increased 90 percent for the fiscal year ended May 31 compared to net income of $2,768,000 last year.

Primary earnings per share for fiscal 1990 was $1.65 compared to 88 cents a year ago. On a fully diluted basis, assuming the conversion of the company's senior convertible debentures, earnings per share for 1990 was $1.07 compared to 63 cents during 1989.

For the fourth quarter ended May 31, income was $2,352,000, or 74 cents per share (43 cents on a fully diluted basis) compared to $2,277,000, or 72 cents per share (43 cents on a fully diluted basis) last year. The increased income in these periods reflects the increased sales volume during 1990.

During its 1990 fiscal year, the company introduced the ''Lazare Diamond Jewelry Collection.'' This line of platinum and 18 karat gold jewelry is designed to emphasize the ideal cut of each Lazare Diamond. According to Leon Tempelsman, president of Lazare Kaplan, ''Even in its initial stage this new venture has proved successful and the company is experiencing significant jewelry reorders on a regular basis.''

Lazare Kaplan International Inc. (AMEX:LKI) sells its diamonds and jewelry products through a worldwide distribution network. The company is noted for its ideal cut diamonds which it markets internationally under the brand name, Lazare Diamonds.

EAST HAMPTON, NY (JULY 9) BUSINESS WIRE - Richard Barrie Fragrances Inc. (NASDAQ: RBFI; PAC EXCHANGE: RBF), manufacturer of the MISHA women's fragrance line under license from Mikhail Baryshnikov, reported Monday that it will begin shipping two new products in mid-September.

The two new additions to the current six item line are MISHA Body Creme in a 6.25 oz. black glass jar, for $55 retail, and MISHA Body Lotion, packaged in a 5.5 oz. plastic bottle with a pump, retailing at $35.

The company has begun to ship initial orders to Army and Air Force Exchanges and Navy and Veterans Administration outlets. These orders

include two items in the fragrance line for introduction to 120 Army and Air Force Exchanges in the United States and overseas. For the 1990 holiday season, the company hopes to expand distribution to a total of 240 Army and Air Force Exchanges and an as yet undetermined number of Navy and Veterans Administration outlets.

Over three million scented bill inserts and remittance envelopes will be mailed to consumers during the second half of 1990 by several important department store chains. Additionally, MISHA will be advertised in department store holiday catalogs in November and December, with a total circulation of nine million.

The men's fragrance line is in creative development and still on target for a Spring 1991 consumer launch. The men's line, to be called ''Baryshnikov for Men'', is eagerly awaited by retailers all around the country.

DALLAS (JULY 9) BUSINESS WIRE - Fina Oil and Chemical Co. (AMEX:APIA) plans to install two refitted posted concrete barges, one to be used as a production platform, as part of a $5 million project to revitalize Pass Wilson field in the eastern portion of Louisiana's Grand Caillou Bay in Terrebonne Parish near Houma.

Production from the field, which had dwindled to 50 b/d of oil, is expected to increase to about 1,200 b/d of oil after the platform comes on stream in August.

Fina bought the two barges from ENGICON Inc., and is refitting them in Houma as a production platform and living quarters platform. ENGICON also is providing selected production/auxiliary equipment packages.

Pass Wilson field was initially developed in the late 1950s and early 1960s.

The company drilled three wells earlier this year in an attempt to prove up additional reserves. Two of the wells have been completed.

Pass Wilson previously had been produced through a pile platform at the south end of the field. The new production facilities are being installed at the north end of the field.

The location of the new production facilities shortens the length of

flowlines from existing wells, thereby reducing the back pressure and allowing non-producing wells to resume production at commercial rates, said Nash.

Production design capacity of the new facilities is 1,200 b/d of oil, two MMcfd of natural gas, and 15,000 b/d of water. Only associated gas production currently is sold. The remainder is either used for fuel or recirculated through the gas lift system.

The production facilities are being designed for gas lift at a future date. Production will be barged from the site. The posted barge will have 5,000 bbl of storage capacity. Once the field is depleted, the barges can be refloated for similar use elsewhere.

Fina is the main operating subsidiary of American Petrofina Inc. (AMEX:APIA), engaged in crude oil and natural gas exploration, production, and marketing; petroleum products refining, supply and transportation, and marketing; and chemicals manufacturing and marketing.

BELTSVILLE, MD (JULY 9) BUSINESS WIRE - John Hanson Savings Bank, F.S.B., announced that the Office of Thrift Supervision (OTS) has approved its Capital Restoration Plan.

Jack Pollock, president of the bank said, ''We have been working very closely with the OTS for the past several months and are very pleased with the resulting approval of our capital plan. We believe this affirms the soundness of our business strategy to return to a traditional, retail banking philosophy placing emphasis on our branch network and relationship banking.''

Among conditions set forth in the capital plan, John Hanson will require a capital infusion of $10 million by Dec. 31. The bank has retained Legg Mason Wood Walker Inc., as its financial advisor, to assist in the satisfaction of the capital requirements of the approved plan.

According to Pollack, ''We are not out of the woods yet. We must attract the necessary capital, recover from problem assets, and control our operating expenses. In the meantime, we are continuing to review all lines of business to ensure the most efficient use of our capital as well as to make John Hanson as profitable as possible.

''The acceptance of our capital plan is a very positive first step for the bank. We are very aware of the amount of work ahead of us.''

John Hanson Savings Bank, F.S.B., has 15 branch offices and is headquartered in Beltsville. The bank's stock is traded on the National Association of Securities Dealers' Automated Quotation (NASDAQ) National Market System under the symbol ''JHSL''.

BOSTON (JULY 9) BUSINESS WIRE - Codex Corp. will preview the 9800 Series Access Module at the DECWORLD '90 exhibition Monday.

This new feature will allow the Codex 9800 Series Network Management System to interface to Digital Equipment Corp.'s Enterprise Management Architecture (EMA). Codex, one of the original EMA partner, currently has one of the largest installed bases of integrated network mangement systems in the industry.

The Codex 9800 Series is an OSI-based wide area network management system. The 9800 provides integrated network management for multiple elements of the wide area network domain, including T1/E1 switches, statiscal multiplexers, X.25 packet switching equipment, DSU/CSUs, modems and T1/Lan Internetworking devices.

Raymond Moore, Codex vice president of network management, said, ''Codex has traditionally provided superior management of the physical network. We also have a strong network management commitment to OSI standards and open architected systems, as evidenced by our participation in EMA and our ability to interface with the three primary enterprise management systems.''

Codex first introduced the 9800 Series in March of 1987. This April, Codex introduced Release 3 of the system, which included 9800View, a biodirectional link to IBM's NetView. This June, Codex also announced a link between the 9800 and AT&T's Accumaster Integrator. Codex will provide integrated wide area network management with links to IBM's

Netview, Digital's EMA, and AT&T's UNMA enterprise management systems.

Under the EMA program, the 9800 will pass integrated information from the physical network through the Access Module to the DECmcc Management Station. The Configuration Function Module will allow the DECmcc to configure Codex devices managed by the 9800. The DECmcc will use the Alarms Function Module to its full extent for the broad range of devices managed by the 9800. This will allow integrated access to technologies on the wide area network and superior integrated management of the physical network.

Codex Corp., a subsidiary of Motorola Inc. is a leading supplier of network products and integrated network solutions. Offerings include network management systems, T1/E1 switches, X.25 networks, multiplexers, DSU/CSUs, modems, LAN internetworking devices, and professional services.

NEW YORK (JULY 9) BUSINESS WIRE - Coach Leatherware Monday announced that it had commenced litigation against AnnTaylor for selling handbags which copy Coach's best known and recognized styles.

The lawsuit, which also seeks damages, charges that AnnTaylor and its manufacturer, Laura Leather Goods Ltd., intentionally copied the well known design features of several of Coach's most popular styles in order to confuse and deceive potential purchasers. The lawsuit charges that the designs in question are being sold in suburban malls and other shopping areas where genuine Coach products are sold through Coach stores or through Coach shops in better department stores.

According to Lew Frankfort, president of Coach, ''It is clear from looking at these AnnTaylor products that the intention was to make customers believe they were Coach. Imitation may be the highest form of flattery, but these products are more than imitation, they are direct knock-offs. I am frankly surprised that a company of the caliber of AnnTaylor would involve itself in this kind of infringement.''

The Coach lawsuit, which is presently pending in the U.S. District Court for the Southern District of New York, included a second retail defendant which subsequently entered into a Consent Judgement agreeing to discontinue sale of the Coach knock-offs.

COLLEGE PARK, GA (JULY 9) BUSINESS WIRE - Atlantic Southeast Airlines Inc. (NASDAQ/NMS:ASAI) flew 38.6 million revenue passenger miles during June 1990, a 1.8 percent increase over the same period last year, according to John W. Beiser, a senior vice president for the Atlanta-based airline.

ASA's load factor was 54.8 percent compared with 56.5 percent

during June 1989. Available seat miles increased to 70.4 million from 67.2 million, for a 4.8 percent increase. The company enplaned 181,656 passengers during June, a 1.0 percent decrease from the previous year.

On a year-to-date basis, ASA carried 1,000,862 passengers compared with 949,684 during 1989, a 5.4 percent increase. Revenue passenger miles totaled 213.0 million compared with 193.5 million, for a 10.1 percent increase. Available seat miles increased 10.4 percent from 376.9 million to 416.0 million. The load factor on a year-to-date basis was 51.2 percent compared with 51.4 percent during the previous year.

Atlantic Southeast Airlines Inc. is Atlanta's largest regional air carrier and now offers service to 15 cities from a second hub in Dallas/Fort Worth, Texas.

SAN FRANCISCO (JULY 9) BUSINESS WIRE - Charles P. Dorr, 38, has been promoted to vice president and manager in the Trust and Investment Management Group for the The Bank of California.

The Trust and Investment Management Group, with assets under administration of more than $23 billion, is the fourth largest trust institution in the state.

Dorr joined The Bank of California in 1981 and has been employed as an audit officer, assistant vice president in Human Resources and Trust officer. He has a bachelor of arts degree from the University of California at Los Angeles and a California State Teaching Credential from California State University, Hayward.

Dorr is a member of the Western Pension Conference and the San Francisco Opera Association.

Born in Stockton, Calif., he lives in San Francisco.

The Bank of California, the sixth largest in the state, was the first incorporated banking institution in the west. The 125-year-old organization has $7.9 billion in assets and offices in three states -- California, Washington and Oregon.

STAMFORD, CT (JULY 9) BUSINESS WIRE - Pitney Bowes Inc. announced Monday that, based on the company's current forecasts, Pitney Bowes now expects its second-quarter 1990 net income to be slightly lower than that reported for the second quarter of 1989.

For the second quarter of 1989, Pitney Bowes reported income of $61.8 million, or 78 cents per share.

Chairman and President George B. Harvey said, ''Our forecasts indicate that we should see overall revenue growth in this year's second quarter of about 12 percent, with good increases in our mailing and shipping businesses and our internal leasing businesses. In addition, Pitney Bowes Management Services, our mailroom and reprographics management business, is growing well.

''However, our net income is weaker than expected because of continuing weak performance in our operations in Australia and Germany; because of lower net income at Monarch Marking Systems due to soft retail market

conditions; and because of higher-than-anticipated costs of reorganizing our copier business.''

Harvey said also that, ''Because of these issues, the company is more cautious in its outlook for the balance of the year and does not expect to meet analysts' estimates for full-year 1990 net income. The company does expect to report 1990 net income that is higher than that reported for 1989.''

Harvey concluded, ''We believe that corrective actions being taken in the areas previously mentioned and our anticipated new product introductions will get us back on track in 1991 to meet our net income growth objectives.''

Pitney Bowes is a $2.9 billion multinational manufacturing and marketing company which provides mailing, shipping, copying, dictating and facsimile systems; item identification and tracking systems and supplies; mailroom; reprographics and related management services; and product financing.

NEW YORK (JULY 9) BUSINESS WIRE - Technical and business professionals now have at their command the power and performance of the industry's most advanced family of workstations and servers for UNIX computing environments -- the IBM RISC System/6000 running IBM's AIX Version 3 operating system.

Customers shipments of the RISC System/6000 family began in May. More than 650 software programs from 350 companies will be available worldwide by the end of the quarter, providing users with the solutions they need to address everything from computer aided design to insurance agency management.

''The RISC System/6000 with AIX gives our customers industry- standard UNIX capability with superior technology and impressive price/performance benefits that will help them solve their business problems,'' said Jeff Mason, director of Advanced Workstations and AIX Systems for IBM's U.S. Marketing & Services organization.

''Initial market response continues to be very positive from both technical and commercial users. To date, we have already shipped our customers approximately 2,000 systems, and we are ramping our manufacturing capacity to meet the strong demand reflected in our 1990

orders. We also have more than 4,500 additional systems installed at IBM Business Partner and internal locations.

''Software developers have shown enthusiasm for the product line as well '' said Mason. ''We are pleased to have such a large number of software industry leaders supporting us in responding to the needs of our customers.''

Later this year, IBM plans to ship the three remaining members of the family. The POWERservers 540 and 930 will be available in July and August with the supergraphics POWERstation 730 available in November.

#90190c0006 07/09/1990 ~Comtex
HOLLYWOOD (JULY 9) UPI - Vincent Price, veteran of dozens of classic horror films, says the horror of contemporary horror movies is that they are truly horrible.

He shakes his head in bewildered chagrin at the series of ''Nightmare on Elm Streets,'' ''Friday the 13ths'' and ''Halloweens.''

''With all their blood and violence, slasher pictures are a different genre from the wonderful Edgar Allen Poe films we used to make for Roger Corman,'' Price said, relaxing in his hilltop home above the Sunset Strip.

''Poe was brilliantly subtle and Corman understood that the less violence depicted the more audience imagination took over, making the terror much greater.''

Price was in a mood to discuss his films. He is the subject of a Los Angeles Cinematheque reprospective of his movies, ''A Weekend With Vincent Price'' at the Directors Guild theater July 13-15 where 10 of his 115 pictures will be screened.

Price, moreover, will be on hand to discuss his work and answer questions from the audience after the screenings.

Among the offerings: ''Laura'' with Gene Tierney and Dana Andrews; ''Dragonwyck,'' his first gothic drama, with Joseph L. Mankiewicz making his directorial debut; the comedy ''Champagne for Caesar'' with Ronald Colman, and ''House of Wax,'' which launched Price into horror pictures.

''The Tingler'' also will be shown. It was one of his most bizarre films. Director William Castle planned to wire theater seats with low-voltage current sending genuine tingles up the spines of audiences. It didn't work.

''I haven't seen some of those films in years,'' Price said. ''I helped choose the pictures for the retrospective to make it representive of my work. I didn't want it to be all one kind of picture.

''I tried to find a print of 'The Raven,' which was one of Jack Nicholson's first pictures, but I couldn't get my hands on it.

''Not included is my own first film in 1938, 'Service DeLuxe,' with a wonderful cast of Charlie Ruggles, Constance Bennett, Helen Broderick and Mischa Auer.

''In the past 52 years I've worked with a great many of the giants of Hollywood - and some of the midgets. Most of the films were wonderful and some of them were not so good.

''I often worked with a group of character actors of star quality - Boris Karloff, Peter Lorre, John Carradine, Basil Rathbone, Sidney Greenstreet and others.

''I'll never forget when Carradine and I worked together for the last time in England. Someone commented that I had made a lot of pictures. I said, 'Yes, more than a hundred.' Carradine said, 'I've done 450.'

''All of us were brought here for talkies from the stage because we enunciated so clearly. Then Marlon Brando arrived with his mumbles and changed everything. The only way to survive was to go into costume pictures and thrillers.

''In period pictures it was all right to have the dialogue understood. Other performers who acted in bravura style had to leave the business altogether. Many did retire at that time.

''Most of the survivors became character actors, who have a longer career span than leading men anyway.''

Price, tall, slender and elegant, his gray hair swept up in a wave, is still working. His most recent film is ''Edward Scissorhands,'' a fairy tale directed by Tim Burton, who did ''Batman'' last year.

''I play a good guy in this one,'' Price said. ''But when I give lectures on tour I'm most often asked how I feel about being type-cast as a villain or in horror films. My answer is simple, all actors are type-cast.

''The surest way to attain stardom is type casting. John Wayne and Gary Cooper were both type-cast as themselves. Even Brando eventually played Brando in all his pictures. Unless you have that sort of identification, you don't have an audience - or a career.

''Ronnie Colman was debonair and played every role exactly the same way. Cary Grant was always the best actor in the business because he played himself so superbly.

''Their pictures never cost much more than $1 million or $2 million. Today producers spend $30 million without batting an eye. A single huge box-office hit can earn more money - 'Batman' for instance - than all of Spencer Tracy's films put together.

''Now I suppose the biggest stars in Hollywood are the special effects men. But one lovely thing about motion pictures is that fads come and go and there is always something new around the corner.''

#90190c0014 07/09/1990 ~Comtex

WASHINGTON (JULY 9) UPI - Visitors to the nation's capital have a rare opportunity to learn about a topic that is often excluded from history books and overlooked in the media - how women fostered social and political change in America.

''From Parlor to Politics: Women and Reform in America 1890-1925'' at the National Museum of American History highlights some of the major accomplishments of women during what was known as the Progressive Era, a name that derived from legislation on a number of social reform issues.

''We have focused on activities that politicized women and brought them into public life,'' said curator Edith Mayo. ''Since women could not vote at the national level until 1920, these groups formed national networks that acted as alternative political parties for women.''

On display are more than 700 objects and 275 photographs illustrating the temperance movement, suffrage, education, the home economics movement, public health, labor reform, social work and peace activism.

''If Jane Fonda and Gloria Steinem are significant figures, then Francis Perkins and Jane Addams are heroes of a different sort,'' said museum director Roger Kennedy. ''They didn't get that fast jolt of publicity, but they changed the face of their country.

''They did what they did. This country is immeasurably better for it and

it would not have gotten where it is with men alone.''

A portion of the 4,500-square-foot exhibit recreates Chicago's famous Hull House settlement, established by Addams in 1889 as a community center for social and political action.

Facilities included a day-care nursery, a gymnasium, a community kitchen and a boarding club for young working women. In addition to services and cultural opportunities for the largely immigrant population of the neighborhood, Hull House also offered college-level courses and job skills classes.

Addams worked with labor and other reform groups for the first juvenile court laws, tenement house regulation and the eight-hour working day. A supporter of women's suffrage, she was chairman at the 1915 International Congress of Women. Also on display is Addams' Nobel Peace Prize, awarded to her in 1921.

Perkins, the first woman Cabinet member - she was appointed secretary of labor in 1933 by President Franklin Roosevelt - had been involved with several groups investigating consumer affairs and industrial safety, and had lobbied for maximum work-hour regulations for women.

Millions of women, from different class and ethnic backgrounds, became involved in reform to address the social ills facing the nation at the turn of the century. The problems resulted from rapid industrial expansion millions of immigrants arriving in the United States and rigid racial barriers.

Also on display are artifacts depicting the significant contributions of black women, including several settlement houses that offered day care, job training and education, such as the Calhoun Colored School and the National Training School for Women and Girls run by educator Nannie Helen Burroughs.

Items depicting the suffrage movement include a red shawl worn by Susan B. Anthony.

The exhibition demonstrates how family values shaped women's views of society and politics and shows how their roles as guardians of the home, family and community were transformed into mandate that empowered them to enter public life.

In the exhibition, said Kennedy, ''We are observing a very peculiar point of fission in American culture, in which the subject of female endeavor altering a society could produce disquiet in a male-dominant culture.

''Before they could vote, they changed a nation. Before it was genteel to

acknowledge ugly conditions, they forced reform. This is an exhibition about heroic persistance, about sustained endeavor by courageous people over long periods, not about sound bites and spasms of conspicuous virtue.''

WASHINGTON (JULY 9) COMTEX - The 8-K report filed at the SEC shows on June 25, 1990 Transtech Industries Inc. filed suit in the U.S. District Court of Camden, New Jersey.

The suit was filed against approximately 400 defendants who the company believes are responsible for the clean-up costs of the Kin-Buc landfill located in Edison, NJ. The lawsuit seeks contributions from the defendants under the Comprehensive Environmental Responsibility Liability and Compensation Act (CERCLA).

Under CERCLA, potentially responsible parties in environmental clean-up actions are permitted to seek contribution from other responsible parties. Transtech states it believes it will ultimately recover a portion of the remediation costs.

#90190c0077 07/09/1990 ~Comtex

WASHINGTON (JULY 9) COMTEX - Medenta Corp. filed a registration statement with the SEC in which it proposes to offer 1 million units. Each unit consists of three shares of common stock and three Class A warrants.

The estimated initial public offering price is $6.00 per unit.

D.H. Blair & Co. is underwriting the offering.

Medenta is engaged in the research and development of disposable products for quick and convenient testing of body fluids to discover the existence of periodontal disease and to uncover the use of drug abuse without the need to send specimens to a laboratory.

The company is a development stage, wholly-owned subsidiary of TechniMed Corp., which 950,000 restricted shares of Medenta's common stock. TechniMed's holding of common stock will constitute 24 percent of the shares of common stock outstanding after completion of this offering.

Medenta's executive office is located at 4987 N.W. 23rd Ave., Fort Lauderdale, FL 33309 and its telephone number is (305) 485-8443.

STATE OF WISCONSIN INVESTMENT BOARD OF MADISON, WI OWNS 1,725,000 SHARES (9.90%) OF HARLEY DAVIDSON INC (TICKER: HDI) OF MILWAUKEE, WI.

ANNOUNCEMENT:

No other significant information was included.

PURPOSE:

Increase in holdings.

-30- 450
#90190c0196 07/09/1990 ~Comtex
SCHEDULE 13D

SEC - AMENDMENT NUMBER: 19

ANNOUNCEMENT:

On July 6, 1990, the Delaware Chancery Court found that Centaur Partners received and delivered consents representing a majority of National Intergroup (TICKER: NII) shares in Centaur's consent solicitation.

The court's ruling will enable Centaur to proceed with its appeal to the Delaware Supreme Court that consent of only a majority of the outstanding shares is necessary to expand National Intergroup's board to 15 members.

JAKARTA (JULY 9) - OPEC Secretary General Subroto said here Monday that Kuwait agreed at a meeting in Algiers last week that efforts to improve

weak oil prices took priority over any quota increase demands.

Industry sources here said that Kuwait and the United Arab Emirates (UAE) were two of the 13 members of the Organization of Petroleum Exporting Countries (OPEC) which continued to produce oil above their agreed quotas.

"The important thing is the understanding of Kuwait that (improving) prices holds priority over demands for quota increases," Mr. Subroto told journalists after accompanying Indonesian Mines and Energy Minister Ginanjar Kartasasmita to meet President Suharto.

Mr. Subroto was referring to the results of the July 5 meeting in Algiers between chairman of the Organization of Petroleum Exporting Countries (OPEC) Sadek Boussena, Mr. Ginanjar and Kuwaiti Oil Minister Rashid al-Omary.

He said the meeting was "very constructive to efforts to pave the way towards the OPEC conference on July 25."

Mr. Ginanjar also quoted Mr. al-Omary as having agreed that talks over quotas could go smoothly only if prices had become stronger, and that Kuwait has pledged to return its oil production to its alloted quota level.

OPEC has agreed to limit its members' total output to 22 million barrels a day for the first half of 1990.

Mr. Ginanjar said that Indonesia was of the opinion that as long as prices had not returned to the OPEC reference price of 18 dollars a barrel, "it is impossible to talk about quotas."

Mr. Ginanjar said that this would also be Indonesia's stance at the scheduled meeting of OPEC ministers in Geneva on July 25, adding that several OPEC members were still demanding larger quotas. He did not elaborate.

Mr. Subroto expressed his conviction that oil prices had reached their turning point and would now improve again. He said prices reached a low of 13.8 dollars a barrel in the third week of June but had improved to 14.19 dollars a barrel the following week.

However, Mr. Ginanjar said he was worried "prices in July would stand at less than in June because the market still had excess production from the previous months."

#90190d4260 07/09/1990 ~French/German News Agency

HONG KONG (JULY 9) - China is poised to benefit from large foreign

remittances as it takes advantage of Hong Kong's scheme to import more foreign workers, Chinese and labour sources here said.

The Chinese official Outlook Weekly said in its latest overseas edition that "China's vast pool of labour resources fullfilled not only the need of the country, but also overseas" needs.

China's labour is more competitive than that offered by India, Pakistan, the Philippines and South Korea, it added.

And if China increases its exports of foreign workers from the current 70,000 to 500,000 a year, it could earn foreign remittances amounting to one billion U.S. dollars, it said.

Since 1987 China has gradually increased the number of manpower agencies here, anticipating that Hong Kong would relax its previously strict policy on foreign workers, Chinese sources said.

In May last year, Hong Kong relaxed its restrictions for the first time by allowing 3,000 foreign workers to enter the colony.

This year the government eased its policy further and allowed in 14,700 workers, including those needed to build a new airport and port, a move strongly opposed by labour groups who claimed it might hurt wage increases for local workers.

So far only 1,800 of the previous quota have been approved, of which 90 per cent are from China -- mainly from neighbouring Guangdong and Fujian provinces.

Chinese sources said there are some 15 Chinese-funded manpower firms here offering skilled technicians, domestic helpers and other workers on a contract system.

While labour unions here claim there is no shortage of labour, the Federation of Hong Kong Industries said in a recent survey that 68 per cent of Hong Kong manufacturers are suffering from a labour shortage.

"Traditional Asian countries, such as the Philippines and Korea, have no match compared with China's vast cheap manpower," one labour union official said, adding that China is in a position to become Asia's biggest exporter of labour.

#90190d4490 07/09/1990 ~French/German News Agency

MANILA (JULY 9) - President Corazon Aquino said Monday that Philippine investment laws were being reviewed to make the country more attractive to

foreign businessmen.

"We have long been aware of the concerns of foreign investors insofar as the business climate here is concerned," she said in a news conference.

She said she met European investors during her visit to West Germany and France last year and they told her they wanted Manila at least to "equal the incentives being offered" by its Southeast Asian neighbors.

The head of the American Chamber of Commerce here, Mark Blacker, warned Manila last week that several proposed laws, as well as security and infrastructure problems, were scaring off new foreign investment.

He stressed that the Philippines still held economic potential, but criticized "perceived anti-multinational company bills in Congress, extended public debates after major investment projects have been approved and bureaucratic inertia".

Mrs. Aquino said she had been assured by a supporter in the Senate, Vicente Paterno, that his committee was reviewing the country's existing laws and that he had prepared a series of measures "that will amend or change these laws which are no longer relevant to the present business climate."

#90190d4690 07/09/1990 ~French/German News Agency

ADELAIDE, Australia (JULY 9) - Australian Prime Minister Bob Hawke on Monday called for his ruling Labor party to review its anti-privatisation stance despite vocal opposition to any change from within the party.

Mr. Hawke was backing earlier comments by Treasurer Paul Keating that the party should reconsider its privatisation policy, especially in regard to the government-owned international airline Qantas.

"There is a case for the government running things ... but airlines I think is not one of them," Mr. Hawke said, speaking on radio here.

"It's a little bit strange I think that ... a political party believes that there is some particular virtue in the government owning and running particular enterprises," he said.

Left-wing elements of the party slammed the call to review the policy and said they would not budge on the issue.

"We have this tendency to believe that we can waste our resources by doing things that can be just as well done by the private sector," Mr. Hawke said. "We (the party) has got to face up to these things. We've got to talk it through pretty stringently."

A statement issued at the weekend by union and Labor left-wing leaders warned that any change to the policy outlawing privatisation would create fatal party divisions.

The group was concerned "that the government is on the threshold of making a decision on communications and aviation that are in direct conflict with party policy," the statement said.

A spokesman for Qantas said Monday that the airline had no comment on the resurgence of the privatisation debate.

Last week Qantas Chief Executive John Ward warned the airline might revise expansion plans after its latest target borrowing program was slashed by 630 million dollars (477 million U.S.) to 470 million dollars (373 million U.S.).

"It is disturbing that a company that has been continually denied access to equity funds now finds that its access to debt funds is being limited," Mr. Ward said.

#90190d4710 07/09/1990 ~French/German News Agency

JOHANNESBURG (JULY 9) - French construction company Dumez Afrique is way behind schedule on a mammoth Lesotho water project and may have to be bailed out by South African giant LTA, a newspaper reported here Monday.

The Lesotho Highlands Development Authority (LHDA) has said Dumez Afrique would not be able to fulfill its contract to complete the 60 million rand (22.9 dollars) second stage of the northern access road to the Lesotho Highlands Water Project by February 1991, the Business Day reported.

The northern access road serves as a vital link to the 1.7 billion (648.85 million dollars) Katse Dam and three access tunnels which are the main components of the project.

LTA had completed its 120 million rand (45.8 million dollars), 60-kilometre (35 miles) section and the Malibamatso bridge in record time against harsh terrain, according to the newspaper.

LTA Construction managing director Brian Hackney denied that his company would be bailing out Dumez Afrique. He said that LTA had offered to help, but the offer was rejected by Dumez Afrique.

Business Day quoted unidentified sources as saying Dumez Afrique's problems stemmed from the use of old and outdated equipment not suitable for the harsh mountain conditions in Lesotho.

#90190d4790 07/09/1990 ~French/German News Agency
LONDON (JULY 9) - The number of businesses going bankrupt in the first half of this year in England and Wales was the highest in a decade, according to a study published here Monday.

Some 11,600 companies went bankrupt in the first half of this year, 30 per cent more than in the same period last year and the highest in 10 years, the study by Dun and Bradstreet said.

Small businesses were the worst affected, particularly in the retail and building sectors.

But the businessman's organisation, the Confederation of British Industry, said that a high number of bankruptcies indicated a more competitive and healthier economy, and one in which more new businesses would be set up.

It said however that British interest rates, currently at 15 percent, were a full percentage point too high and were causing unnecessary damage to the economy.

-30- 1026
#90190d5120 07/09/1990 ~French/German News Agency
MOSCOW (JULY 9) - The economic situation in the Soviet Union has become so bad that Moscow is now openly accepting the need for Western aid to achieve reforms, although conservatives among the leadership may find this hard to swallow.

Soviet television on Monday revealed that President Mikhail Gorbachev had sent a letter to his U.S. counterpart George Bush calling for technical assistance and loans from the leading industrialised countries ahead of the annual summit of the Group of Seven opening in Houston, Texas, the same day.

The White House said that the letter had been sent to summit host Mr. Bush on Wednesday, and that it outlined the economic steps President Gorbachev had taken and asked the G-7 to consider providing technical economic assistance and credit that could help his economic reform efforts.

The leaders of the seven countries - the United States, Canada, Japan, Britain, Italy, France, and West Germany - plus the European Economic Community, are expected to devote considerable time to discussing aid to the Soviet Union, a topic on which they are divided.

Monday's edition of the Communist Party newspaper Pravda played up the

differences of opinion within the G-7 over whether aid should be given to Moscow.

The United States, Japan and Britain had shown a "negative" approach to the issue, while West Germany, France and the European Economic Community "are already ready to offer us aid to achieve perestroika," it said.

It questioned whether the Houston summit would "bear fruit" or whether it would not simply "confine itself to blah-blah."

The main Soviet television news on Sunday evening had shown film of queues outside Soviet stores interspersed with pictures of G-7 leaders, while a commentator said that the "capitalist" world was planning to offer economic aid during the transition to a market economy.

#90190d5200 07/09/1990 ~French/German News Agency

ADDIS ABABA (JULY 9) - Ethiopian President Mengistu Haile Mariam appealed on Monday for peace in eastern Africa, beset by civil war and ethnic strife.

Lieutenant-Colonel Mengistu, opening a meeting of the leaders of six African countries on the sidelines of the Organisation of African Unity (OAU) annual summit opening here later Monday, said African nations should follow the lead of the two superpowers and move towards detente.

Ethiopia's embattled government is threatened by two major rebel groups controlling large areas in the north.

Sudan has been wracked by seven years of civil war and Somalia's beleaguered President Siad Barre seems powerless to recover control of rebel-held northern Somalia.

Regional tensions have been heightened by Ethiopia's support for Sudanese rebels, while Ethiopian rebels receive supplies through Sudan.

Col Mengistu appealed for an end to such support. "It is no secret to anyone that foreign forces, which have been clandestinely fomenting strife to gradually weaken and ultimately dismember Ethiopia, are exacerbating our internal problems," he said.

"There are similar problems in other neighbouring countries."

Mr. Mengistu was addressing the leaders of the five other members ofthe Inter-Governmental Authority on Drought and Development (IGADD) -- Kenyan President Daniel arap Moi, President Yoweri Museveni of Uganda, Sudanese President Omar el Beshir, President Hassan Gouled Aptidon of Djibouti and

Somali Prime Minister Ali Samater.

Col. Mengistu called the meeting at the presidential palace in a bid to launch a regional peace initiative to bring stability to the war-torn Horn of Africa.

He urged the leaders to open negotiations to settle "internal conflicts (which) have the tendency to spill over into neighbouring countries."

The Ethiopian president, who has forsaken his revolutionary battledress for a sober business suit in keeping with his recently announced economic liberalisation programme, called for another IGADD summit to pave the way for a peace conference.

#90190d5340 07/09/1990 ~French/German News Agency

BELGRADE (JULY 9) - Ethnic Albanians in the autonomous province of Kosovo observed a one-hour strike Monday to protest Serbia's decision to dissolve the Kosovo parliament.

Serbia's move came as a response to Albanian members of parliament declaring the autonomous province independent of Belgrade last week.

On Sunday, independent unions urged members to strike for an hour each day to protest the sanction ordered Thursday by the government of Serbia to which Kosovo is officially attached.

In Pristina, the provincial capital, journalists and other employees of the Kosovo broadcasting service, gathered Monday outside radio and television headquarters from where several hundred set off to march to the city centre.

Police used batons to turn back the demonstrators who had been joined in the meantime by strikers from the Bank of Kosovo and government offices, according to a journalist interviewed by phone from Belgrade.

For the first time since Thursday, the Albanian language daily Rilindja failed to appear Monday. Tanjug news agency said the paper had been seized because its contents were judged to be "inflammatory". The staff of the paper has refused to recognise a new editor appointed by the Serbian authorities.

Serbia has taken control of the media in Kosovo in an apparent bid to stifle the nationalist aspirations of the Albanian majority in the province.

-30- 1583
#90190d5490 07/09/1990 ~French/German News Agency
NOUMEA (JULY 9) - Management at Societe le Nickel on Monday rejected workers' demands for a bonus as a 22-day strike at New Caledonia's main nickel producer threatened to continue indefinitely.

The miners union USOENC on Saturday called for a bonus package of 55 million francs (9.9 million dollars) for its 2,000 workers.

Company officials termed the demand "indecent and totally unacceptable" and said they would not renew contact with the union "as long as the demands formulated stay where they are today."

USOENC meanwhile called for the indefinite continuation of the strike during a general meeting on Monday.

The two sides remain divided over profit-sharing premiums.

The union wants them calculated on a basis of profits of 1.8 billion francs (327 million dollars) rather than on the 950 million francs (173 million dollars) stipulated in a November 1989 agreement between management and unions.

The company says that each worker has received an average of 25,575 francs (4,650 dollars) as a result of the 1989 deal.

The labor dispute led to the laying-off Monday of 60 of the 160 technical staff at Entrepose, one of the nickel company's subcontractors, which estimated that another 1,000 jobs at other firms were also threatened by the strike.

-30- 1473
#90190d5510 07/09/1990 ~French/German News Agency
BEIJING (JULY 9) - Industrial production has recovered somewhat from last year and is growing moderately, but many Chinese firms are in the red and face enormous financial problems, the China News Service (CNS) reported Monday.

Production fell off sharply last year under China's austerity program but grew an average of 2.2 percent per month during the first six months of this year, the agency said, citing the state bureau of statistics.

In another economic development, the eastern port of Shanghai exported goods worth a record 2.59 billion dollars in the first half of this year, the People's Daily reported Monday.

China's main industrial center broke previous records with an increase in

exports of 24 percent over the January-to-June period in 1989, the paper said.

Nationwide, production figures were improving but the economic picture as a whole was gloomy.

CNS said 23 provinces or municipalities recorded an increase in industrial production including Jiangsu, Fujian and Guangdong, while provinces or regions dominated by heavy industry, such as Zhejiang, Sichuan and Shaanxi saw their industrial production drop.

Thirty-four per cent of Chinese firms are in the red. In Liaoning in the northeast and in Hainan in the south, more than half of the companies are running a deficit.

Even in Guangdong province, one of China's most dynamic, 39 percent of the firms are in the red.

Stocks meanwhile are piling up. For laminated steel, they represent the equivalent of seven months of production, and for coal, 30 percent of the production of the first five months of the year.

According to the energy ministry, coal production stood at 509 million tonnes, surpassing the goal for the first six months by 40 million tonnes.

Petroleum stocks reached 7.5 million tonnes, with storage areas at saturation point.

#90190d5540 07/09/1990 ~French/German News Agency

HANOI (JULY 9) - Fierce debate during Vietnam's recent National Assembly session indicates that deputies are divided over the scope of economic reform in a country facing major problems in the sector, analysts believe.

The major differences prompted Prime Minister Do Muoi to present a report June 28 in which he warned assembly members that Vietnam was facing critical economic problems, according to a Vietnamese source.

His report had followed one by State Planning Chairman Phan Van Kai that painted a rosier picture of the socio-economic situation in the first six months of the year, triggering a rash of criticism.

The two-week parliamentary summer session ended June 30 with delegates passing several laws on the economy, including amendments to the foreign investment code.

It also passed an important maritime law that will allow Vietnamese to form

internal shipping companies and, according to commercial experts, provide a platform for economic expansion.

But a major draft law on agricultural taxation was rejected because it failed to differentiate between land and output and hence could hamper efforts to encourage higher productivity.

A number of other tax laws, including one on consumer goods such as alcohol and cigarettes, were approved in one of the few countries which has not implemented taxation on personal income and where book-keeping and bill systems are rudimentary.

A senior Vietnamese economist said their had been "very fierce dispute between deputies," especially on the changes in foreign investment law.

He added that discussions had been "critical," "frank" and "constructive" indicating that delegates in the 439-member assembly were "seriously concerned" about the development of economic reforms.

CANBERRA (JULY 9) - Australia's preliminary budget surplus for 1989-90 was 8.05 billion dollars (6.4 billion U.S.) compared to the budget forecast of 9.12 billion dollars (7.24 billion U.S.), Treasurer Paul Keating said Monday.

Mr. Keating said in a statement that this would be the third consecutive budget surplus and was still higher than last year's surplus of 5.9 billion dollars (4.7 billion U.S.) for the year ended June 30, 1989.

"The preliminary budget outcome was affected by a number of factors, including the failure of the senate to pass provisional tax legislation which deferred more than 400 million dollars (318 million U.S.) in revenue to 1990-91.

"The surplus has been achieved by consistently restraining the growth in outlays," he said.

The budget surplus had been used to help repay both domestic and overseas government debt, he said.

"The ratio of net Commonwealth (government) debt to gross domestic product (GDP) has fallen some four percentage points, from around 17 percent at June 30, 1989, to around 13 percent at June 30, 1990."

The preliminary outcome for outlays was 87 billion dollars (69 billion U.S.) or 23.4 percent of estimated gross domestic product (GDP) compared

to the 1988-89 outcome of 24.4 percent, Mr. Keating said.

The preliminary outcome for revenue collections was 95 billion dollars (75 billion U.S.) or 25.5 percent of estimated GDP compared with the 1988-89 outcome of 26.1 percent.

#90190d5680 07/09/1990 ~French/German News Agency

LONDON (JULY 9) - The seasonal summer fall in shipping rates showed signs of coming to an end on world freights markets this past week.

The Baltic International Freight Futures Exchange (BIFFEX)'s Baltic Freight Index (BFI) ended the week down 22 points at 1,067 points.

But on Friday the BFI ended more than four weeks of consecutive daily declines with a two-point gain, largely as a result of unconfirmed rumours that a 52,000 ton grain cargo had been fixed at 17 dollars per tonne on the U.S. Gulf to Japan route.

The suggestions lent support to the index value on the route, which closed off its worst level of the week at 16.742 dollars against 16.875 dollars at the end of the previous week.

Traders said that there were signs of a more optimistic trend ahead of the weekend, and brokers added that shipowners were now refusing to accept lower rates after months of seeing their returns slide.

But there was concern that a further downturn could be triggered unless fresh chartering activity, particularly from the Soviet Union, was forthcoming.

Meanwhile the index value on the important U.S. Gulf to Europe route slid below an important psychological support point, falling through the eight dollar per ton mark from 8.117 dollars at the end of the previous week to 7.858.

#90190d5870 07/09/1990 ~French/German News Agency

LONDON (JULY 9) - British wholesale prices rose 0.2 percent in June over the May level, and 6.2 percent over the same month last year, according to non-seasonally adjusted provisional figures released here Monday.

Wholesale prices rose a revised 0.6 percent in May over the April level and 6.3 percent on a year on year basis, against earlier estimates of increases of 0.5 and 6.2 percent.

Raw material and energy prices for industry were down 1.3 percent in June over the May level on a seasonally adjusted basis, and down 1.3 percent on a year on year basis.

The figures released Monday were slightly better than market forecasts of a month on month increase of 0.3 percent in wholesale prices, with raw materials and energy costs down 1.2 percent.

They suggest an easing of inflationary pressure in production which should slow down the rise in retail prices in the coming months despite a likely firming of oil prices.

The news helped an already firm pound, and saw state funds gain a quarter of a point in places on the stock exchange.

The Treasury however sounded a note of caution, warning that the monthly figures were irregular and subject to revision.

The easing in raw materials and energy costs was welcome, but monetary policy would have to remain tight to contain and reduce inflation, a Treasury spokesman said.

HONG KONG (JULY 9) - Hong Kong will not seek to extend its six-month exemption from an international ban on ivory trading when the measure runs out next week, a government spokesman said Monday.

The spokesman said the six-month period to allow ivory traders to sell off their existing stockpiles would definitely not be extended when it expires July 17.

The stockpile is estimated to be worth about 145 million U.S. dollars.

Hong Kong was granted the exemption by the Convention on International Trade in Endangered Species (CITES) when the ban took effect in January.

Last October the CITES countries, including Britain, voted by 76 votes to 11 to ban all trade in ivory in order to conserve the world's fast disappearing elephant herds.

#90190d6070 07/09/1990 ~French/German News Agency
BERLIN (JULY 9) - Some 500 East German metalworkers held a protest meeting in East Berlin on Monday to call for guarantees that their jobs would not be lost as the transition to a market economy begins to bite.

The meeting was called by the East German IG Metall union as negotiations between unions and employters in the sector in the Berlin-Brandenburg region were due to begin.

The union is demanding a guarantee that their jobs will be secure for two years, training to prepare metalworkers for other careers, a 400 Deutsche mark (235 dollars) pay increase and a reduction in the working week from 43.45 hours to 40 hours.

The employers are offering a wage rise of 15 Deutsche marks (90 dollars).

Some 120,000 metalworkers in the region staged brief work stoppages on Friday, the most widely followed such protest in East Germany in decades.

The stoppages will resume if the wage negotiations fail, a union spokesman told journalists.

A large number of East Berlin taxi drivers staged their own protest outside the town hall Monday, complaining that the new tariffs applied since the implementation of German monetary union at the beginning of the month were driving away custom.

The drivers complained that East Berliners could not afford to pay the flag charge of 3.4 marks (two dollars) plus 1.69 marks (one dollar) per kilometer (0.6 miles) introduced to bring their fares in line with those in West Germany.

They said their average daily takings had plunged from 115 marks to 70 marks since the new rates took effect.

#90190d6110 07/09/1990 ~French/German News Agency
COLOMBO (JULY 9) - The Sri Lankan government would seek the assistance of world bodies like the Commonwealth and the Non-aligned movement to act as observers at any peace talks with Tamil rebels, a senior minister said Monday.

But the Liberation Tigers of Tamil Eelam (LTTE) would have to lay down arms as a precondition for resuming peace talks with Colombo, the Minister of State for Defence Ranjan Wijeratne said.

"The good offices of the international community would be sought from various countries as observers for example, SAARC (South Asian Association for Regional Cooperation), Commonweath, Non aligned (movement)" a Foreign Ministry release quoted him as saying.

Mr. Wijeratne was commenting on President Ranasinghe Premadasa's remarks on Sunday in which he said he was ready to resume talks with the LTTE but only with international participation.

"It is only with the involvement of the international community in a manner acceptable to us that the dialogue can recommence," Mr. Premadasa told a meeting of senior government officials in northwestern Puttalam.

#90190d6220 07/09/1990 ~French/German News Agency

MANAMA (JULY 9) - The tunnel disaster last week near the Moslem holy city of Mecca in Saudi Arabia was the result of a power cut that plunged the tunnel into darkness, a Bahraini survivor said Monday.

The man, who declined to be named after his return here, said the power outage "spread panic among the thousands of pilgrims who quickly suffocated or were trampled underfoot in the rush to find an exit in total darkness."

At least 1,426 Moslem pilgrims died in the tragedy at Mina, according to Saudi authorities.

The Bahraini, who was pinned down in the overcrowded tunnel for about an hour before he was rescued, said: "All of a sudden, the two rows of phosphorescent lights along the tunnel's vault went out. It plunged us in darkness."

"It was terrifying. We were suffocating in the dark," said the man, in his forties. "We saw nothing at all. We didn't know how to exit the tunnel. We only heard the howling of the injured who were trampled."

"I didn't understand what was happening. I couldn't move. I didn't even know which way to turn and was struggling against the bodies of the injured and dead," he added.

The accident happened when thousands of people converged from opposite sides of the tunnel, using the two main entrances at either end of the kilometer-long (0.6 mile) and 20-meter-wide (20-yard) passageway.

Saudi Interior Minister Prince Nayef ibn Abd al-Aziz has said traffic congestion across a bridge leading to the tunnel which was packed with

50,000 pilgrims caused seven pilgrims to fall and had a domino effect.

Doctors operating in Saudi hospitals and witnesses said the victims suffocated or were trampled to death, apparently when the air-conditioning system failed and sent temperatures in the tunnel to infernal levels.

The Bahraini survivor said the power failure cut off both electricity and ventilation in the whole tunnel.

He said the pilgrims at first thought there was an attack, but that they heard no explosion.

In Iran, the daily Teheran Times charged Monday that the incident was not an accident but a "pogrom," and it slammed the Organization of the Islamic Conference (OIC) for failing to condemn the Saudi authorities.

Pilgrim quotas were approved by the OIC after the 1987 pilgrimage, when more than 400 people, mostly Iranians, were killed in unrest that followed a political demonstration by Iranians pilgrims.

Another English-language daily, Kayhan International, quoted Lebanese, Turkish and Malaysian survivors as saying the stampede resulted from an attack by Saudi security forces on a group of pilgrims shouting "Allah Akbar" (God is great).

The power was immediately shut off, the tunnel entrances closed and tear gas used, the paper charged.

Jomhoori Islami newspaper close to Islamic hardliners in Iran also said poison gas and automatic weapons were used against panic-stricken pilgrims.

#90190d6260 07/09/1990 ~French/German News Agency
EFRAT, Occupied West Bank (JULY 9) - Israel, hoping to head off international condemnation, is steering clear of building new settlements in the occupied territories but construction is booming in the Jewish communities already there.

"Supply is not enough to meet demand," said Dalia Gamliel, a municipal secretary at Efrat settlement in the West Bank. "There's not enough space for all the Soviet immigrants who would like to live here with us."

Bulldozers and tractors are working day and night to flatten rocky hills for the construction of hundreds of apartments and homes at settlements around the West Bank and Gaza Strip.

The government has attractive offers for newly-married couples and

demobilized soldiers looking for a home in the territories.

A three-room apartment in the West Bank settlement of Ariel costs around 55,000 dollars for an Israeli, who is entitled to a loan covering 90 percent of the cost price.

An identical property in Jerusalem would cost at least 120,000 dollars, with a maximum 75 percent loan.

Building your own house works out even cheaper. Abraham moved to Efrat from Tiberias in northern Israel and is using low-paid Palestinian labourers to built his new home.

The hilltop constructions in the area will be the future homes of "our cousins," he said, referring to the Soviet Jewish immigrants in Israel, who are expected to number 250,000 this year.

The Israeli government, in the face of international pressure, has vowed that it would not settle the immigrants in the occupied territories, but stressed they were free to settle where they wished.

Arab countries have voiced fears they would settle in the territories, where the Palestine Liberation Organisation wants to establish an independent state, and that they would drive out the local Palestinian residents.

#90190d6280 07/09/1990 ~French/German News Agency

ISLAMABAD (JULY 9) - Pakistan Prime Minister Benazir Bhutto Tuesday launches a new diplomatic drive to ensure the Organisation of Islamic Conference's (OIC) support for the Kashmiri struggle against India, officials here said.

Foreign Secretary Tanvir Ahmed Khan said that while Ms. Bhutto sets out on a a five-day tour to Iraq, Kuwait, Morocco, Algeria and Bahrain, top Pakistani diplomats will be visiting countries in Africa, the Far East and Europe later this month.

The purpose will be to promote a "correct perspective" on the Kashmir issue ahead of the 45-nation OIC foreign ministers meeting in Cairo July 31 to August 4, he said.

India, he charged, had mounted a "disinformation campaign" in Arab and Islamic countries to create divisions, for example by saying that Iraq, an adversary of Iran which backs the Kashmiri separatist cause, was not supporting Pakistan on the issue.

Similar moves had been made in regard to Bahrain, Algeria and the Palestinian leader Yasser Arafat, he added without elaborating.

Pakistan's relations with Algeria were warm under Ms. Bhutto's late father Zulfikar Ali Bhutto but after his death in 1979 the two Islamic countries differed over the Soviet intervention in Afghanistan.

Mr. Khan said Ms. Bhutto's "plan is to revitalise these relations."

It was the right time to counter India's moves, he said, adding that Pakistan wanted the Islamic world's vocal support for the Kashmiri Moslem campaign against Indian rule through a strong OIC resolution.

India and Pakistan have fought two of their three wars since independence from Britain in 1947 over Kashmir.

Islambad wants a plebiscite, as proposed by the United Nations in 1949, to determine the future of India's only Moslem majority state.

New Delhi, for its part, wants the issue settled through direct talks.

The Moslem militant campaign in Indian-ruled Kashmir has cost more than 700 lives so far this year and brought the two countries to the brink of war.

India alleges that Pakistan arms and trains the militants while Pakistan denies the charges and accuses New Delhi of repression in the disputed state.

Ms. Bhutto's advisor on foreign affairs, Iqbal Akhund will leave shortly for Nigeria and Senegal, Mr. Khan said, adding that Pakistan's ambassador to Britain, Shahryar Khan, will visit Cameroon, Siera Leone, Benin and Gabon.

Ahmad Kamal, Pakistan's envoy to the European Economic Community will visit Guinea, Guinea-Bissau, Mauritania and Mali.

Another senior diplomat Riffat Mehdi, High Commissioner in Harare, will carry a letter from the prime minister to Somalia, Djibouti, Comoros, Uganda, Sudan, Chad and Niger, he said.

Ms. Bhutto will also send a minister to the Maldives while another minister will go to Indonesia, Malaysia and Brunei as her special emissary, he added.

"The visits will serve positively in portraying Pakistan's principled stand on Kashmir," Mr. Khan said, adding they would also help promote Pakistan's security and regional peace.

He said the prime minister will send another emissary to Washington soon after foreign secretary level talks with India on the Kashmir issue which are scheduled to be held in Islamabad July 18-19.

Ms. Bhutto visited eight Middle Eastern and north African countries on a similar diplomatic mission over Kashmir in May.

Asked if Pakistan was worried that Kashmir was being ignored, Mr. Khan said India had tried to put the issue under the carpet "but failed."

India also could not sell the idea that the uprising in Kashmir was an "act of a small number of fundamentalists," he said, adding that international concern over the problem was growing with the upsurge in violence.

Mr. Khan said Moscow had not used force to settle its problems with the Baltic states, opting for talks, but India had given the security forces in Kashmir sweeping powers.

This showed that New Delhi saw the Kashmiris as "enemies," he said, charging that the situation in the state was the result of "massive repression and the unrivalled denial of human rights."

#90190d6330 07/09/1990 ~French/German News Agency

RIO DE JANEIRO (JULY 9) - Robbers broke into the Brazil central bank on Sunday and stole the equivalent of 24 million dollars in the biggest bank robbery in Brazil's history, officials disclosed Monday.

A gang of 15 robbers overpowered guards at a branch of the central bank in the northern city of Salvador and escaped with 1.4 billion cruzeiros in banknotes.

The robbers spent 10 hours inside the bank, loading 25 sacks of money onto a stolen truck, which they used to escape. The bank is located less than 100 metres from a national police barracks.

The central bank Monday released the serial numbers of the notes, making it difficult for the robbers to place the banknotes in circulation.

The money was kept in the central bank as a liquidity reserve for use in the regional banking system.

#90190d6340 07/09/1990 ~French/German News Agency

PARIS (JULY 9) - Despite growing efforts by officials and support groups, the law of silence still tends to reign over the practice of excision of

young girls in France's immigrant African community.

Though illegal here, excision clearly continues, although the courts have hesitated on coming down hard on an age-old tradition among communities that are caught between two cultures.

The belief still holds in parts of Africa and the Middle East that excision, which generaly involves removing the clitoris and sometimes the small labia, "purifies" the woman.

The issue was thrown into the public eye again recently when a father from Mali was taken to court after having his two-year-old daughter excised.

In proposing a new immigration charter last May, Prime Minister Michel Rocard urged that foreigners who practice excision be expelled. But the court fell far short of this once again in the case of the Malian man, giving him instead a five-year suspended sentence.

Health workers, however, are starting to join vioces to counteract the silence. With public awareness challenged over other taboos, such as incest, why should this one go unmentioned, they argue.

"We are receiving more and more calls from teachers seeking advice" over how to handle the issue, according to one worker at a telephone hotline for abused child cases.

A teacher described the case of one of her students, five-year-old Coumba.

"The little girl kept crying, she was suffering, she could not walk straight. Her parents had told her to say nothing, but she told us someone 'cut' her and afterwards there was a party," the teacher said.

Experts believe the operation has been carried out on some 85 to 100 million of the world's women today. There are no specific figures for France, but it is generally thought that thousands of young girls have been excised here.

Social workers who deal with African communities are caught in the middle. They say that "everyone is aware that it is illegal" but the communities "refuse to denounce" the women who practice the trade.

Practicioners, often referred to as "matrones" (matrons) are currently paid between 150 and 200 france (26 to 35 dollars) for each operation.

Health workers say is carried out in circumstances that are often neither medically sound nor sanitary, with help from the family, who hold the girl down to keep her from thrashing in pain.

Hemorrhaging, infections, shock, and tetanus are among the possible medical complications.

"The suffering makes some families renounce the idea of excision", but the "matrones" tend to make the rounds to check up on girls known not to have been excised, one social worker said.

Reticent, often uneducated families give in to warnings that "your daughter will never find anyone to marry her, she is not clean", or even, "she will never be able to have children" or "will never remain faithful".

In 1984, a report by the French ministry of women's rights said that awareness had been growing for 10 years -- thanks mostly to African women's groups -- that contrary to a widespread belief, excision was not advocated by Islamic law.

But professionals are still split over whether to use repression or education to counter the practice.

Linda Weil-Curiel, a lawyer active in the fight against excision, said "in Africa, feminists were waiting for France to set a example to help advance people's attitudes".

"But no prison term has yet been handed down in France, and as long as there are none, the law will not work," she said.

But other professionals working with the African communities disagree. Many insist that the initiative must come from within the communities to free themselves from such customs. "Their voice holds more weight than the voices of Europeans," they said.

#90190d6430 07/09/1990 ~French/German News Agency

KABUL (JULY 9) - The chief justice and many other senior judges who are members of the Afghan ruling party have lost their posts in line with the country's new constitution, a government spokesman said here Monday.

Nizamuddin Tehzib, a member of the Hezb Watan or Homeland Party (formerly the People's Democratic Party of Afghanistan), was relieved of his duties as Afghanistan's chief justice, the spokesman said.

Officials had earlier identified Mr. Tehzib as attorney general.

Government spokesman Humayun Mukammel said the move was in line the new constitution which bars party members from the judiciary and which was approved by a Loya Jirga or grand national assembly in May.

A presidential decree removing Mr. Tehzib from his post was signed Sunday but he continued to be a member of the Watan central council, Mr. Mukammel said.

He said many other judges had lost their jobs following the adoption of the new constitution which seeks to establish the independence of the judiciary from the party and introduce a multi-party system in war-torn Afghanistan.

Mr. Mukammel said the other judges who lost their jobs were not important enough to be named, but could not give an exact figure.

The move came before a scheduled meeting in Paris between U.S. Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze at which Afghanistan, and the possibility of general elections in an effort to end the war, are to be discussed.

DAR ES SALAAM (JULY 9) - Tanzania's 14th International Trade Fair which ended here Sunday night enabled the country to conclude business worth 1.2 billion shillings (6.2 million U.S.dollars), it was announced Monday.

A statement issued by the state-owned Board of External Trade (BET), which organized the 10-day trade show, said that of the 6.2 million dollars, 3.2 million were export orders to Tanzanian firms.

It said the remaining transactions were for imports and sales conducted between local firms.

According to sources, Tanzanian goods which secured foreign markets included locally-assembled tractors, milling machines, sisal twine-ropes, fish products, electric transformers, fluorescent tubes and bulbs and wooden furniture.

Import orders were for motor vehicles, sewing machines, solar collectors, incubators, air compressors and chemicals.

This year's trade exhbition, which was officially opened by Zimbabwe President Robert Mugabe last Monday, attracted 12 foreign countries and 150 local private and public firms.

Foreign participants were China, Cuba, West Germany, Italy, Kenya, North Korea, Malawi, Mozambique, Palestine, Sweden, Zambia and Zimbabwe.

#90190d6460 07/09/1990 ~French/German News Agency

PARIS (JULY 9) - Air traffic could be disrupted over the July 14 holiday weekend by a strike threatened by ground staff of the two main French airlines, Air France and Air Inter.

The national aviation mechanics union (SNMSAC) of Air France announced Monday that it has issued a strike warning for Thursday, July 12 at 2000 GMT until Saturday, July 14 at 0430 GMT.

A strike warning by AIr Inter ground crew has also been announced for Friday, July 13.

The Air France strike action revolves around work schedules and changes in job classifications, the mechanics union said.

The strike action could cause delays and "possibly" some flight cancellations, the SNMSAC said. Negotiations were expected later Monday.

Air France was forced to cancel many flights last week by a three-day strike by air traffic controllers at Athis-Mons, the largest air traffic control center in France, and by a one-day strike by ground staff strike at Paris-Roissy airport.

#90190d6500 07/09/1990 ~French/German News Agency

TOKYO (JULY 9) - A Japanese consortium and West German firm Siemens AG have agreed to share information on super-conducting power generators, one of the Japanese firms said here Monday.

The deal provides for the partners' research teams to meet about once a year to exchange information about their work on super-conductivity and refrigeration systems, said the source at Kansai Electric Power Co.

Researchers are seeking to reduce, even eliminate energy losses in the alternators of electric power plants, whether thermal or nuclear, which now runs at up to 40 percent, experts said.

The Japanese research consortium groups Kansai, Osaka University, Mitsubishi Electric Corp., Mitshubishi Heavy Industries Ltd., and Sumitomo Electric Ind. Ltd.

They work together under the aegis of the Ministry of International Trade and Commerce and in 1994 expect to start trials on a generator using the new technology with a capacity of 70,000 kilowatts.

#90190d6520 07/09/1990 ~French/German News Agency

KUWAIT (JULY 9) - Iranian Foreign Minister Ali Akbar Velayati arrived here Monday for a two-day visit, becoming the most senior Iranian official to visit Kuwait since the 1979 Islamic revolution.

Mr. Velayati said on arrival that his visit was part of efforts to improve relations between Iran and Kuwait as well as other Gulf states.

The Iranian foreign minister was to deliver a message to Kuwait's emir, Sheikh Jaber al-Ahmad al-Jaber al-Sabah, from Iran's President Ali Akbar Hashemi Rafsanjani.

Asked about a possible meeting between Mr. Rafsanjani and Iraqi President Saddam Hussein, Mr. Velayati said experts from both countries were trying to reach common ground before scheduling a summit.

Iran and Iraq were adversaries in the eight-year Gulf war, which ended with a U.N.-monitored cease-fire in August 1988. But efforts to secure a formal peace settlement have so far been deadlocked.

Before leaving Teheran, Mr. Velayati said, "I think this trip will pave the way for further cooperation on the basis of political understanding between the two countries."

He said he would also explore plans to increase economic, commercial, cultural and scientific cooperation.

Relations between Kuwait and Teheran have improved since the truce in the Gulf conflict, during which Iran charged Kuwait with siding with Baghdad and threatened reprisals.

Kuwait accused Iran during the war of launching attacks against its territory and tankers, charges which Iran denied.

Relations improved further last October when Hussein Sadeghi was accredited as Iran's new ambassador to Kuwait. His predecessor was recalled to Teheran only months after the Gulf conflict broke out in September 1980.

In a further sign of warmer ties, Kuwait's ruler cancelled the traditional celebrations for a recent Moslem feast after the June 21 earthquake in northwest Iran that killed at least 35,000 people.

Kuwait sent four planeloads of food, medicine and medical equipment to help the survivors.

#90190d6650 07/09/1990 ~French/German News Agency
BRUSSELS (JULY 9) - The International Federation of Journalists protested

here Monday about the Kenya Government's treatment of journalists during the past few weeks' mounting agitation for the restoration of multi-party politics.

IFJ secretary-general Aidan White said the federation, which says it represents more than 175,000 journalists worldwide, was "shocked by the continuous attacks against our colleagues in Kenya".

He cited police interrogation of local reporters and editors and harassment of foreign correspondents, with seizure of notebooks and tape recordings.

In a letter to President Daniel arap Moi, who rejects any relaxation of the one-party rule he had enshrined in the constitution in 1982, Mr. White wrote: "Journalists have a duty to report the truth to the public. If your government does not like what is reported, prove that it is not true instead of attacking and threatening our colleagues".

#90190d6760 07/09/1990 ~French/German News Agency

FRANKFURT (JULY 9) - Thousands of football fans turned central Frankfurt into a sea of black, red and gold German flags Monday as they welcomed home the world champion West German side.

The entire squad beamed, danced and took turns to hold the golden trophy and wave it from the balcony of the ''Roemerberg'' city hall to the delirious crowd below.

Earlier, a motorcade headed by an open convertible bearing team chief Franz Beckenbauer and captain Lothar Matthaeus clutching the World Cup slowly threaded its way to the city hall.

There, an official reception was being held to hail the return of the side which won the World Cup for a third time Sunday evening in a 1-0 defeat of Argentina.

Huge banners fluttered greetings to the returning footballers as victory chants went up from the estimated 20,000 crowd lining the motorcade route and square in front of the city hall.

The national side's specially laid-on air force plane touched down at Frankfurt airport earlier 90 minutes late after what had been a night of celebration and revelry for the German side in Rome.

On board, Matthaeus - the World Cup at his side - said: ''We're all dog tired after the long celebration, but we'll make it through the Frankfurt reception.''

The night had seen Beckenbauer - who overslept and almost missed Monday morning's flight - hand over the office of team chief to Berti Vogts, his former team mate in the 1970s West German side.

Then, in a very German gesture, Beckenbauer made a speech to the whole squad in which he offered the familiar ''thou'' form of address to everyone.

''This team confirmed every trust I put in them,'' Beckenbauer said later. ''Now I'm happy.''

#90190d6830 07/09/1990 ~French/German News Agency

JOHANNESBURG (JULY 9) - Forty-two years of apartheid will make "discrimination in reverse" justified in a new South Africa, the country's top judge, Mr. Chief Justice Michael Corbett said in an article Monday.

In the publication put out by the South African Institute of Race Relations he recommended that an affirmative action clause needed to be written into a future Bill of Rights for the country to "rectify past inequalitites and discriminations".

He conceded that affirmative action constituted "discrimination in reverse", and added that it was "clearly a policy to be pursued with tact and circumspection".

The South African Law Commission, which is looking into the question of a Bill of Rights for South Africa, believed affirmative action would permit "the legislature to make laws granting a group which had been discriminated against in the past, temporary advantages with the object of achieving equality".

The United States, India, Canada, Zimbabwe, Malaysia and Namibia had all used positive discrimination to open up equality of opportunity, the judge added.

"I have no doubt that the policy is justifiable -- past inequalities and discriminations cannot be denied -- and that a South African Bill of Rights should be so drawn as to permit of it, within reasonable limits," he wrote.

The judge also recommended that "a goodly portion of wealth" created in a free market system "must be ploughed back into society".

Wealth was needed in "the upliftment of communities, in the creation as far as possible of minimum standards of living, in education, in housing, in the creation of recreational facilities and, in general, in redressing the social imbalances inherited from the past".

Mr. Chief Justice Corbett added that South Africa needed an accelerated free market system and not socialism.

Recent evidence from Eastern Europe showed that under socialist systems "the rich have become poor and the poor, poorer".

"Only by means of the free market system can the economy grow sufficiently to create jobs needed to provide our burgeoning population with employment, economic securiy, and domestic stability," he said.

NEW DELHI (JULY 9) - Twenty-two people were killed and nearly 100 houses gutted in a series of fires that swept through India's troubled state of Kashmir, reports said Monday.

Indian news agencies said the incidents occured Sunday in areas in and around Srinagar city, capital of the northern state.

Four people were burned to death and more than 1,000 rendered homeless when a fire broke out Sunday in two villages in Badgam district after an exchange of fire between the Kashmiri Moslem militants and security forces.

The United News of India (Uni) said officials recovered four bodies, including one with bullet wounds, during fire control operations. The news agency said the cause of the fire was under investigation.

Meanwhile, Uni reported a women's college and three hotels were torched in Srinagar city. There was no immediate report of loss of life as all the hotels were unoccupied.

RAMATUELLE, FRANCE (JULY 9) - French singer and movie star Johnny Hallyday married the 19-year-old daughter of a rocker friend from the 1960s here Monday.

It was the third marriage for the 47-year-old Hallyday, a blue-eyed, blond star who began his career in the 1950s as the French answer to Elvis Presley.

After introducing rock 'n roll to France in 1959, Hallyday later made the twist a popular dance in the country and has since made numerous top-selling records, movies, and television series.

The star's bride, Adeline Blondieau, is the daughter of his longtime friend and fellow musician Long Chris.

Present at the wedding here, near Saint Tropez on the French Riviera, were a throng of journalists and about 3,000 fans who crowded around Ramatuelle's city hall to greet the couple as they emerged.

In a cortege of Rolls Royce automobiles, the couple made their way to Saint Tropez for an intimate party at the home of their friend, singer Regine.

More than 500 people were invited Monday night for a lavish party given by the newlyweds at Chateau Messardiere, one of the poshest mansions along the Riviera.

Hallyday, whose son singer David Hallyday is older than his new bride, is a staple of France's gossip pages because of his long string of young girlfriends.

His previous wives are actress Nathalie Baye and singer Sylvie Vartan, the mother of David Hallyday, who recently had a hit song on the U.S. pop charts.

Hallyday was born Jean-Philippe Smet in Paris in 1943, the son of the classical danser Leon Smet and Huguette Clerc.

#90190d6940 07/09/1990 ~French/German News Agency

PARIS (JULY 9) - More than half of French people say they never drink wine, the first time ever that the level of people saying "non" to one of the country's traditional products has topped the 50 percent level.

And apparently other alcoholic attractions are not to blame - according to the survey published Monday by the national association for the wine profession, people are turning to water to accompany their meals, with beer consumption also on the fall.

Things have been going from bad to worse since 1980, when the annual survey found that 38.7 percent of the French never drank wine, rising to 45.1 per

cent abstainers in 1985 and crossing the 50 percent threshold this year, with 50.7 percent saying they never touch a drop.

As if this was not bad news enough for the producers, the remaining half of the population that likes the odd glass is drinking less.

Only 18.5 percent drink at least some wine every day, according to the 1990 survey, against 25.9 percent in 1985 and 32.5 percent a decade ago.

Men still drink more than women, with 28.1 percent of men saying they take wine every day against 10.9 percent of women.

Wine consumption in France has been falling steadily in the past decade, and in the eight months to April was down 2.2 percent on the same period in the previous season.

DAR ES SALAAM (JULY 9) - The Commonwealth Development Corporation (CDC) will pump 55.7 million U.S. dollars into the ailing Kagera sugar factory to alleviate Tanzania's sugar crisis.

According to a minister of state in the President's office, Paul Bomani, rehabilitation will include the purchase of new farm machinery and irrigation equipment.

The sugar factory, with a capacity of 60,000 tons, was bombed by Ugandan troops during the 1978 war and is now producing a mere 2,000 tons a year.

CDC plans to rehabilitate three other factories at Mtibwa, Kilombero and Moshi in eastern and northern Tanzania at a cost of 103.1 million U.S. dollars, with 37.6 million dollars of this coming from the Netherlands in the form of loans.

It is hoped that rehabilitation of the four state-owned sugar plants will raise Tanzania's sugar production to 450,000 tons.

National production is currently below the 100,000 ton mark, leaving a shortfall of 350,000 tons which cannot be off-set due to Tanzania's severe foreign exchange constraints.

The acute sugar shortage has inflated the black market price to 350 Tanzanian shillings (1.8 U.S. dollars) a kilogramme (2.2 pounds) while the monthly minimum wage stands at 13.8 U.S. dollars.

MOSCOW (JULY 9) - Soviet interior ministry troops were reinforced along the troubled border between Kirgizia and Uzbekistan as ethnic violence threatened to erupt again in the Central Asian republics, according to Soviet news reports Monday.

The situation was ''extremely'' tense in the area around the Kirgizi border city Osch after a young Usbeki man was killed in a fight with Kirgizis.

The latest troops were despatched late Sunday after the 20-year-old man was killed Saturday in the town Jalalabad, according to the government newspaper Izvestia and the news agency Interfax.

Interior ministry troops sealed off all roads into Jalalabad after thousands of Usbekis marched there Saturday demanding punishment for the killers.

Ethnic fighting along on both sides of the border in June claimed more than 200 lives.

PARIS (JULY 9) - ''Typically French'' will never mean the same again after a survey here found only half the French drink wine with their meals.

The ''cultural revolution'' was turned up in a survey commissioned by vintners from Onivins. The slide has been sharp since ten years ago, when 62 per cent of the French said they were wine-drinkers.

Wine is not cheap, but less than one per cent of abstainers said they found it too dear. A quarter said they did not drink on health grounds. Three quarters said they just did not like the taste.

Wine buffs are not converting to the favourite drink of the northern Frenchman, beer, either. Most are drinking mineral water.

The survey by the institutes Inra and Inao was conducted on 4,000 persons and published July 9.

#90190d7250 07/09/1990 ~French/German News Agency
FRANKFURT, West Germany (JULY 9) - West Germany is to change its system of issuing state loans to an auction system similar to that used in many other countries, the Bundesbank said Monday.

The move should "make federal loans even more attractive," the West German

central bank said in a statement.

Under the current system a three-party committee comprising representatives of government, the Bundesbank and the bank consortium charged with selling the issue to the public meet to decide the interest rate and issue price of federal loans.

This means that the banks have a strong influence on the final decision, a situation which has come under criticism for some time.

"It is effectively rather as if the consumer set the price of what he was buying," one observer said.

The banks in the consortium buy most of the issue and then place it with their customers, reaping a risk premium in the form of commission at 1.25 per cent of the total nominal value of the issue.

Under the auction system, which better reflects market conditions and gives the banks less direct influence, each bank makes an offer to the government indicating under what conditions it would buy the loan.

The issuing authority then sets the final conditions for the loan on the basis of the total offer, a system which has been in use for years in many countries, including the United States.

But for the moment only a certain proportion of any issue will be put out to bidding, with the rest issued under the previous system. The Bundesbank did not indicate what proportion would go to bidding.

The new rules cover not only federal government loans, but also those from the federal postal system and the railways.

RIYADH (JULY 9) - Oil ministers of the five Gulf Arab states in OPEC are to meet Tuesday in the western Saudi city of Jeddah to discuss efforts to check the slide in market prices, an informed Saudi source said Monday.

The Saudi, Iraqi, Kuwaiti, Qatari and United Arab Emirates (UAE) ministers are seeking to draw up a "common strategy to support OPEC policies aimed at stabilizing the oil market," the source said.

The meeting follows recent visits by Saudi Oil Minister Hisham Nazer to the other four countries and comes ahead of an Organisation of Petroleum Exporting Countries ministerial conference in Geneva on July 25.

The five Gulf states supply almost 60 percent of OPEC's total output.

In Jakarta, OPEC Secretary General Subroto said Monday that Kuwait agreed at a meeting in Algiers last week that efforts to improve weak oil prices took priority over demands to increase quotas.

Industry sources have said Kuwait and the UAE were producing oil above their OPEC quotas agreed in May.

Mr. Subroto said he believed oil prices had reached their turning point and would now improve again.

He said prices reached a low of 13.8 dollars a barrel in the third week of June but had improved to 14.19 dollars a barrel the following week, compared to the OPEC reference price of 18 dollars a barrel.

#90190d7340 07/09/1990 ~French/German News Agency

PARIS (JULY 9) - Zairean President Mobutu Sese Seko said Monday he was against an international inquiry into an alleged massacre at Lubumbashi university in May "because the request has come from the Belgians."

In a French television interview, Marshal Mobutu insisted: "I have nothing to hide, absolutely nothing. You can send 100, 150, 200 inquiry missions, that would mean absolutely nothing to me.

"But since this request comes from the Belgians, do you see me submitting to the will of the Belgians? I am not at their service.

"There will be no international inquiry commission at Lubumbashi since this request comes from the Belgians -- that is all."

The Zairean authorities maintain one student was killed during campus disturbances, but the Belgian press reported 50 deaths and Amnesty International more than 150 when crack security troops invaded the campus at night after students had apparently demonstrated for more democracy.

#90190d7460 07/09/1990 ~French/German News Agency

BUENOS AIRES (JULY 9) - Argentina reacted Monday with deep disappointment to their World Cup final defeat against West Germany, reserving their wrath for Mexican referee Edgardo Codesal Mendez.

Although there were few denials that West Germany deserved their 1-0 win in Rome on Sunday evening, Codesal was criticised for awarding Germany a penalty and for sending off two Argentine players.

Argentine President Carlos Menem said Codesal was a ''disaster''. He said further damage to football would be prevented if the referee, a doctor by profession, now devoted all his time to his practice.

In an interview with the daily newspaper Sur, Argentine captain Diego Maradona was quoted as saying the referee was a ''son of a whore'' who had been frightened of displeasing ''his patron''.

Asked whether he was referring to Joao Havelange, president of Fifa, the sport's world governing body, Maradona was quoted as saying: ''It is not necessary to say who I mean because all the world knows. It was clear that Codesal did not want extra-time or a penalty shoot-out. He wanted to make the Italians and his patron happy.''

Press and television reports were highly critical of Codesal's decision to award West Germany a penalty in the 84th minute which Andreas Brehme converted to give West Germany their winning goal.

The West German team ''did not need to win like this'', said one television reporter.

#90190d7680 07/09/1990 ~French/German News Agency

MOSCOW (JULY 9) - Soviet communist leaders Monday welcomed the idea of western aid for their country's ailing Soviet economy, though conservatives made it clear they wanted no political strings attached.

As the leaders of the seven most industrialized nations meet in Houston, Texas, to discuss how western economic aid might help bolster Mikhail Gorbachev's reform programme, communist leaders attending the party congress here said they agreed such aid would be useful.

Mr. Gorbachev has written to U.S. President George Bush ahead of the G-7 summit, a White House spokesman said. He added however that Mr. Gorbachev had made no "specific request" in his message to the leaders of the United States, Canada, France, Britain, West Germany, Italy and Japan.

A member of Mr. Gorbachev's personal staff, Georgi Shakhnazarov, Monday the president's letter contained "no concrete request for aid".

Speaking to journalists here, Mr. Shakhnazarov said: "It's very good they (G-7) are considering some kind of aid, but of course it's up to them to consider what form this will take".

The best kind of help would be technological, for light industry, and training, he suggested.

Politburo conservative hardliner Yegor Ligachev for his part welcomed the idea of credit to help the ailing economy, but only if no strings were attached.

"If the West says that we must move to a free economy or private property, then these conditions we do not need," he told journalists.

Another conservative, Russian first party secretary Ivan Polozkov, said "if today we're in a difficult economic situation, I think that aid would not hinder" us.

Prime Minister Nikolai Ryzkhov told journalists for his part that aid was needed "because we are now moving to new economic structures".

Genrikh Borovik, a Soviet television commentator and congress delegate, said that failure by the West to provide aid could lead to "a very serious

situation" in the country. "Any instability in the Soviet Union would be a disaster", he said.

Soviet coalminers meanwhile were preparing for a one-day strike later this week to back demands for reforms and the resignation of the government.

At the congress, delegates Monday adopted a number of articles from a draft document on party rules.

The delegates, who are to elect a general-secretary, expected to be Mr. Gorbachev, and a new deputy party leader, will also vote for a new central committee, the party's permanent assembly.

But it will be the central committee which elects the politburo, the party's executive, rather than delegates from congress as was originally planned.

At least half the members of the 12-man politburo have announced they will not be standing again, while Mr. Gorbachev has said he planned to expand the body's membership to include all 15 republican first party secretaries.

Mr. Ligachev, a Gorbachev rival, has complained that the politburo, formerly the ruling body for both party and state, has lost much of its importance.

Delegates at congress also adopted a resolution opposing depolitization of the armed forces and retention of the principle of democratic centralism, whereby the grassroots have to toe the party line.

#90190d7980 07/09/1990 ~French/German News Agency

BEIRUT (JULY 9) - The leader of a pro-Syrian Shiite Moslem group urged Iran here Monday to withdraw its Revolutionary Guards from Lebanon, blaming them for the bloodshed between Shiite rivals in southern Lebanon.

"It's time ... to stop the massacres," Amal leader Nabih Berri told a press conference, referring to the 18 months of fighting in south Lebanon between his group and a rival Shiite militia, the Iranian-backed Hezbollah.

"We urge Iran to withdraw the Pasdaran (Revolutionary Guards) who are in Lebanon and who receive their orders, via the Iranian ambassador in Damascus, from Ali Akbar Mohtashemi," Mr. Berri said.

Mr. Mohtashemi, a former Iranian interior minister, is seen as a leader of Islamic hardliners in Teheran.

The Amal leader hailed what he called the sincere efforts of Iranian

President Ali Akbar Hashemi Rafsanjani and Syrian officials to find a settlement to the inter-Shiite fighting.

"Those who tried to assassinate President Rafsanjani are the same people who are trying to assassinate southern Lebanon," he said.

A British weekly newspaper, The Independent on Sunday, reported in its latest edition that the president had escaped two assassination bids in the past two months.

Fighting between the secular Amal and Moslem fundamentalist Hezbollah in southern Lebanon and Beirut has killed almost 800 people since April 1988, despite several accords sponsored by Syria and Iran.

Hundreds of Revolutionary Guards have been posted in Lebanon's eastern Bekaa Valley since 1982.

#90190d8000 07/09/1990 ~French/German News Agency

WASHINGTON (JULY 9) - The State Department Monday condemned a weekend announcement by Salvadoran rebels that they would launch a new series of attacks on El Salvador's right-wing government.

Saturday, the leftist Farabundo Marti National Liberation Front (FMLN) said it would increase its military operations as part of an "offensive for peace" against the U.S.-backed government of Salvadoran President Alfredo Cristiani.

"Cynicism and illogic underpin this appalling announcement. We condemn it unequivocally," said State Department spokesman Richard Boucher.

"There is no explanation or excuse for returning to violence now," he said.

Mr. Boucher emphasized that five Central American presidents had called for an end to attacks which threaten Salvadoran civilians. He added that the FMLN had promised U.N. Secretary General Javier Perez de Cuellar to end all fighting that affects the civilian population.

He said the resumption of such rebel violence "would be the ultimate show of bad faith and could well destroy the ongoing negotiations" being conducted under U.N. aegis between the rebels and representatives of Mr. Christiani.

"We call on all parties to the negotiations to approach them with seriousness of purpose," Mr. Boucher said.

"Peace requires an end to the bloodshed, not more violence, as the FMLN

appears to believe," said the spokesman.

#90190d8030 07/09/1990 ~French/German News Agency
ANKARA (JULY 9) - A Turkish minister of state who visited Saudi Arabia after last week's tunnel disaster near the holy city of Mecca called Monday for "serious organization" of the annual Moslem pilgrimage.

Cemil Cicek, reporting that 331 Turks were killed in the July 2 disaster, also said explanations from Saudi authorities that the tragedy was the work of providence were "not sufficient" for Turkey.

Turkey "will defend the rights of its pilgrims all the way," he said, adding that a list of demands had been presented to Saudi authorities. "But I am not optimistic on the recovery of objects lost by the Turkish pilgrims," he said.

Calling for "serious organisation" of the pilgrimage, Mr. Cicek said 521 bodies had still not been identified and added that six Turks were still in Saudi hospitals.

At least 1,426 Moslem pilgrims died when a stampede broke out in the tunnel at Mina, near the western Saudi city of Mecca, according to Saudi authorities.

Indonesia has said 562 of its nationals were killed, while the Turkish news agency Anatolia had previously reported the death of 447 Turks.

Saudi Interior Minister Prince Nayef ibn Abd al-Aziz has said traffic congestion across a bridge leading to the tunnel which was packed with 50,000 pilgrims caused seven pilgrims to fall and had a domino effect.

In Bahrain, a pilgrim returning home from Mecca said Monday that a power cut plunged the tunnel into darkness and left it without ventilation, causing the panic. He declined to be named.

#90190d8050 07/09/1990 ~French/German News Agency
MOSCOW (JULY 9) - Miners at a pit in Donbass in the Ukraine have decided to scrap the communist party cell attached to their mine, Tass news agency reported on Monday.

The miners at the Kalinin pit, which is part of the Donestkugol complex, voted by a majority to "depoliticise" the mine. Their decision means the cell will have to move its office and will no longer have any say in ideology or staffing policy.

A spokesman for the workers council, quoted by Tass, said "We have no demands to make from the communist leaders or party organisations. The miners just don't want politics to come into their work environment any more. They have also decided not to provide offices for new parties."

The "depoliticisation" of public life is one of the main points of friction at the ongoing 28th Communist Party Congress in Moscow. The most heated debates have been with regard to the army.

Miners at Donetsk have said they will observe a strike on Wednesday to protest over the failure to meet the demands they put forward during their strike in summer last year.

-30- 1273

#90190d8180 07/09/1990 ~French/German News Agency

SOFIA (JULY 9) - The ruling Socialist Party (BSP) refused Monday to give in to anti-government pressure for the resignation of ex-communists in the government after a successful protest campaign forced former president Petur Mladenov to resign.

"The major problems facing the country must be resolved through the parliamentary process -- that is our response," a statement by the BSP said.

The few hundred students and professors who have been demonstrating in central Sofia for a week decided to continue their protest until Wednesday a day after the inaugural session of parliament which was elected last month.

The tension was perceptible Monday night in the area between the presidential offices and the BSP headquarters where the demonstrators were gathered. Government supporters were hissed when they expressed their support for the regime.

BSP supporters were expected to assemble elsewhere in Sofia Monday night.

The protestors are demanding the removal of all members of the government with links to the former communist regime of Todor Zhivkov, who was ousted last November.

The BSP, formerly the Communist Party, won an absolute majority in last month's elections, thanks largely to support in rural areas. The protesters claim to have wide support in the capital and other cities in Bulgaria.

The chief opposition party, the Union of Democratic Forces (UDF), has promised to support the protestors' demands in parliament. The Agrarian

Party, a former ally of the communists, has agreed that their demands must be discussed when parliament sits.

There was some confusion about the parliamentary agenda, notably whether deputies would immediately resume debates once the assembly opens Tuesday. Parliament must elect a successor to Mr. Mladenov, who was Mr. Zhivkov's foreign minister for 18 years.

The protestors have demanded that Mr. Mladenov's successor not be a former member of the Communist Party. Mr. Mladenov was forced to stand down after the opposition aired on television a videotape showing him ordering tanks to be sent in to crush an anti-communist uprising last December.

The protestors have backed off on their demand that a trial for Mr. Zhivkov be set before Tuesday.

Mr. Zhivkov's preliminary hearing is to end next week, and a court has announced that charges against him will not be drawn up for at least a month.

PARIS (JULY 9) - Testut, a subsidiary of the Bernard Tapie Finance group, plans to take over the French commercial weight-scale maker Lutrana, reliable sources said Monday.

The price of the Lutrana takeover was not disclosed. Lutrana reported turnover of 170 million francs (30.3 million dollars) last year. Testut reported turnover of 221 million francs (39.5 million dollars) in 1989.

The sources said that Testut and Lutrana were likely to be integrated with Trayvou, a firm acquired in 1987 by Mr. Tapie, who announced over the weekend he had purchased 80 percent of the West German sporting goods

giant Adidas.

Testut earns 45 percent of its sales through commercial weight-scale manufacturing under the Testut and Leonard brand names.

LIMA (JULY 9) - Victor Polay, one of Peru's leading guerrilla chiefs, and 60 other members of the leftist-nationalist revolutionary group Movimiento Revolucionario Tupac Amaru (Mrta) escaped in a jail break from a high-security prison here Monday.

Government sources said the breakout was discovered in the morning. An inquiry was being held to discover whether jail staff helped the prisoners escape.

Polay, 39, who is also known under the alias Commander Rolando, is regarded as the leader of the Mrta which was formed in 1982 and takes its name from an Indian rebel leader Tupac Amaru who was executed by Spanish colonial rulers in the 18th century.

In 1987 Polay led an Mrta guerrilla force which occupied parts of the eastern Peruvian jungle region near the river Alto Huallaga.

He was arrested in February last year after checking into a luxury hotel with a young woman in the mountain town of Huancayao, some 200 kilometres east of Lima.

#90190d8690 07/09/1990 ~French/German News Agency
PESHAWAR, PAKISTAN (JULY 9) - Tension prevails in Afghanistan's eastern Kunar province after recent clashes between rival resistance factions left at least 21 people dead and 50 injured, a fundamentalist faction said here Monday.

The infighting involved the Jamaat Uddawa al-quran Wal Sunnah, a Saudi Arabian-backed group led by Jamil ur Rahman, and rebels belonging to parties of the Pakistan-based resistance government, the Hezb-i-Islami said.

The Hezb-i-Islami party headed by Gulbuddin Hekmatyar, which is outside the fold of the resistance government, said the people of Kunar province bordering Pakistan were "extremely worried" over the situation.

It said Mr. Rahman was trying to establish "totalitarian authority" in the province following controversial elections there in March.

"This attempt is being strongly opposed by other mujahedeen parties," the Hezb-i-Islami said.

Mr. Rahman's party claimed to have won the March elections, but the Hezb-i-Islami said both factions secured the same number of votes.

The Hekmatyar group said "Rahman's lust for power has aggravated the situation" but other mujahedeen factions were determined to prevent further internecine conflict.

Meanwhile, reports from other resistance sources said tension was also running high in Jaji district of eastern Paktia province.

They said Abdul Rasul Sayyaf, the fundamentalist prime minister of the resistance government, went to the area in a bid to avert further infighting.

The sources did not know the reasons for the tension.

Monday's reports come at a time when intense consultations are still under way between different groups of the resistance to find ways of ending the 12-year-old conflict in Afghanistan.

#90190e0001 07/09/1990 ~Latin America New Agency

MANILA (JULY 9) EFE - Army intelligence officers have uncovered a new coup plot against President Corazon Aquino by an alliance of loyalists to former Philippine ruler Ferdinand Marcos and dissident military factions, Manila newspapers reported Monday.

The intelligence sources warned that the rebels would strike this month, and said the plot had been planned shortly before former first lady Imelda Marcos was aquitted of fraud charges in the United States.

Aquino last week said she would not yet allow Imelda Marcos to return to be tried in the Philippines, fearing her presence could inspire loyalists to the old regime to rise up.

Marcos was found not guilty last week of conspiring to reinvest millions of dollars of embezzled government funds in real estate, art and jewellery.

Her husband Ferdinand Marcos died in Hawaii last year, following his ouster from the Philippines in the 1986 revolution led by Aquino.

Corazon weathered a sixth coup attempt last December, in which more than 100 people were killed and some 700 others were wounded.

While some of the coup leaders have been arrested, principle figures such as Col. "Gringo" Honasan and Gen. Jose Maria Zumel are still at large.

Meanwhile, a group of soldiers this weekend swore over Manila's tomb of the unknown soldier defend the Philippines from further military insurrection.

A spokesmen for the soldiers said similar groups were being formed at barracks throughout the country to keep a check on dissident factions.

BEIJING (JULY 9) EFE - At least 33 people have died in severe floods sweeping across parts of northern and southeastern China last week, officials said Monday.

Twenty-seven of the deaths occurred in the northern province of Shaanxi, where the worst flooding in 20 years was reported on the Hanjiang River.

More than 10,000 homes, 70,000 hectares of crops, 17 hydro- electrical stations and 41 bridges were reported destroyed.

In southern Guangzhou, at least six people died in floods which destroyed some 5,000 homes.

Meanwhile in southeastern Sichuan, the rate of flow along the Yangtse River was measured at 12,900 cubic meters per second, a level which experts said only occurred about once each century.

SEVILLE (JULY 9) EFE - Fourteen rare species of European wildlife have found their last main refuge in the southern Spanish region of Andalusia, environment officials reported Sunday.

The endangered species of birds, mammals and fish are holding their own, and some are even increasing in number, the Andalusian Environmental Agency said.

The black stork population is stable with around 10 pairs living in the mountains of the Sierra Morena, while the imperial eagle numbers around 27 pairs of which 17 nest in the Donana National Park south of Seville.

The biggest danger to the eagle, considered to be Europe's most threatened bird of prey, are electricity cables which account for about half their

premature deaths.

Of the estimated 1,000 Spanish lynxes still surviving 60 per cent are to be found in Andalusia, where various programs are being carried out to increase their numbers, including the stamping out of poaching and measures to improve their hunting grounds.

Like most animals of prey, the lynx's main threat comes from human hunters armed with snares and lassoes, while many others are run down by motor cars.

Two unusual species of fish -- the farte and the samaruc -- are surviving in the region's Guadalquivir river, despite the threats of pollution and competition from stronger species, the agency said.

Andalusia is also the home to most of europe's remaining monk seals, as well as several varieties of ducks.

JOHANNESBURG (JULY 9) EFE - The South African police said Monday they had arrested nine white extremists for their role in a wave of bombings in the capital over the past 10 days.

Law and Order Minister Adriaan Vlok said that in rounding up the suspects, police had found large quantities of explosives and munitions, including 141 detonators and a number of grenades.

The White Liberation Army Sunday claimed responsibility for the Friday bombing of a bus station in Johannesburg used mainly by blacks, which injured 27 people.

The previously unknown extreme right-wing organization sent a note by fax to The Citizen daily and the South African news agency Sapa calling Vlok a "traitor".

The note also said that the leader of the military wing of the anti-apartheid African National Congress, Chris Hani, was on their "death list".

A synagogue, liberal politicians and an anti-apartheid newspaper have also been the targets of bombs in the last 10 days.

President F.W. de Klerk's reforms on South Africa's white-minority rule, including the February release of black leader Nelson Mandela and the legalization of all political parties, have been met with a backlash by white extremists.

#90190e0025 07/09/1990 ~Latin America New Agency
MANILA (JULY 9) EFE - The Philippine Army Monday released 45 officers who were jailed for participating in a bloody coup attempt last December against President Corazon Aquino, officials said.

An Armed Forces commission investigating the uprising found no evidence directly linking the officers to the coup's preparation and determined they were just following orders during the revolt.

The officers, who included a colonel, a lieutenant colonel, two commanders seven captains and 34 lieutenants, swore allegiance to the constitution before being sent back to their respective units.

More than 100 people died and 700 were injured in the attempted overthrow, the sixth against Aquino's government since she took office in 1986.

The leaders of the December coup, including Col. Gregorio +Gringo+ Honasan and Gen. Jose Maria Zumel, are still at large.

Meanwhile Monday, Manila newspapers reported that Army intelligence had uncovered a new coup plot against Aquino by an alliance of loyalists to former Philippine ruler Ferdinand Marcos and dissident military factions.

The intelligence sources warned that the rebels would strike this month and included members of a clandestine Army reformist group headed by Honasan.

JERUSALEM (JULY 9) EFE - In an effort to end the 30-month-old Palestinian uprising in the Occupied Territories, Israel has hinted at allowing Palestinians deported for nationalist activities to take part in peace talks, the Tel Aviv daily Yedioth Aharonoth reported Monday.

The inclusion of deported Palestinians in negotiations is fundamental to the peace plan proposed by U.S. Secretary of State James Baker, an element up to now refused by the right-wing government of Yitzhak Shamir.

Yedioth Aharonoth said that Israel's change of position should open the way for renewed peace talks when Israeli Foreign Minister David Levy meets Baker in Paris for talks scheduled July 18 or 19.

Before Shamir's previous government fell on Mar. 15, his May 1989 peace plan looked set to begin talks with Palestinians in the Occupied

Territories.

Although the plan rejected direct representation of the Palestinians of the West Bank and Gaza Strip by the Palestine Liberation Organization (PLO), Israel called for the Palestinians to elect representatives to negotiate on autonomy and a settlement.

But Levy has said that it will stand firm in not allowing Arabs from East Jerusalem, occupied by Israel in 1980, to take part in negotiations, because "Jerusalem is the eternal and indivisable capital of Israel, and not negotiable".

Italian Foreign Minister Giulio Andreotti has invited Levy to Rome at the end of this month for talks on the conflict with the Foreign Ministers of Ireland and Luxemburg.

MOSCOW (JULY 9) EFE - Soviet authorities have foiled the latest in a wave of hijack attempts of Aeroflot airliners in less than a month, Moscow Radio's Interfax reported Monday.

An air pirate on Saturday threatened to blow up the jet with 46 passengers aboard unless he was flown to Brussels, the ninth such hijack incident in the last few weeks.

The attempt occurred as the Antonov 24 airliner flew between the Byelorussian republic capital of Minsk and the city of Vitebsk, in the same Soviet republic.

The pilot managed to land the plane in Vitebsk, where the hijacker was arrested by police.

Investigators later said they failed to find any explosives aboard the aircraft.

It was the third attempt police have foiled during the recent wave of skyjackings.

Six other hijackers, acting separately, succeeded in commandeering Aeroflot airliners to either Finland or Sweden.

HUELVA, SPAIN (JULY 9) EFE - A Spanish court has sentenced a 28-year-old woman to eight years in jail and fined her dlrs one million for giving

cocaine to her infant son to stop him from crying, judicial officials said Monday.

Maria Duarte was found guilty by a court in the southern city of Huelva of dipping her eight-month-old baby's dummy in cocaine last August in a bid to make him stop crying and fall asleep, judicial sources said.

During the trial, Duarte said that her child had been crying all the previous day and night as he was suffering from a hernia in the groin.

After adminstering the drug, Duarte took the baby to hospital, where tests later carried out showed the presence of cocaine in his blood.

Doctors said that the narcotics could have killed the infant.

VIENNA (JULY 9) EFE - The beleaguered Albanian leadership Monday "retired" two ministers dealing with economic affairs and reassigned two others, in the second cabinet reshuffle in three days, the Albanian official news agency ATA reported.

The ATA report, monitored in Vienna, said that Foodstuff Industry Minister Jovan Bardhi and Light Industry Minister Vito Kapo had been retired and replaced by Ylii Bufi and Bashkim Sykal.

The reshuffles came as thousands of Albanians were holed up in foreign embassies awaiting passports and exit visas to leave the hardline Marxist country.

The Ministers of Home Trade and Public Services, Osman Murati and Xhemal Tafaj, respectively, have been reassigned, said the report, although it was not immediately known to what posts.

Pajtim Ajazi is to be the new Commerce Minister, while former Interior Minister Simon Stefani is to become chairman of the State Control Commission System, said ATA.

The economic reshuffle comes three days after Stefani and Defense Minister Xheli Gjoni were sacked from their posts and replaced by Hekuran Isai and Kiquo Mustaqui, both supporters of Communist President Ramiz Alia.

#90190e0043 07/09/1990 ~Latin America New Agency

ABIDJAN (JULY 9) EFE - Liberia's National Patriotic Front (NPF) rebels are to attend peace talks in the Ivory Coast capital aimed at ending

Liberia's six-month-old civil war, despite the guerrillas' refusal to agree to the mediators' conditions, the Ivory Coast daily newspaper Fraternite Matin reported Monday.

The Economic Community of West African States (ECOWAS), which is to mediate at the talks Tuesday, has suggested that the formation of a new government in Liberia should be carried out on the condition that it not be headed by rebel leader and former cabinet minister Charles Taylor.

NPF chief delegate to the peace talks, Tom Woewiyu, told Freternite Matin, "It is unrealistic to try to form a government which excludes Charles Taylor."

Delegations from the Liberian Council of Churches and the Organization of African Unity (OAU), are also to mediate the talks between the rebels and the Liberian government.

Woewiyu criticized ECOWAS and the OAU for not having intervened earlier in the conflict in which thousands of people have been killed.

"Now they want to impose a solution on us," Woewiyu said, and added that he had the impression that the mediating organizations were "trying to protect a moribund tyranny."

The NPF began its insurgency last December after President Samuel Doe, in power since 1980, ordered the slaughter of members of the Gio and Mano tribes in the aftermath of an aborted coup.

The Gio and Mano have rushed to join Taylor's forces, which are expected to oust Doe in a final push on the Liberian capital of Monrovia should the talks fail.

During the first round of talks in neighboring Sierra Leone in mid-June, the NPF demanded Doe's resignation and departure from Liberia and the formation of a transition government which would hold elections in six months.

But the Sierra Leone talks were postponed indefinitely as the rebels failed to show up for the second round, claiming that the government did not have the credibility to negotiate.

Last week, in an apparent act of desperation, Doe reiterated his offer to form a government of national unity with the NPF, which rejected the offer.

The NPF has a force estimated at between 5,000 and 14,000 men and claims it controls 90 percent of the country with the support of 99 percent of the population.

#90190h0010 07/09/1990 ~Chinese News Agency
WASHINGTON (JULY 9) XINHUA - THE RICHARD NIXON'S PRESIDENTIAL LIBRARY, THE MOST COMPLETE SOURCE OF MATERIALS ABOUT THE FORMER U.S. PRESIDENT AND HIS LIFE AND POLITICAL CAREER, IS SCHEDULED TO OPEN TO THE PUBLIC LATE THIS MONTH.

THE WHITE HOUSE HAS ANNOUNCED THAT PRESIDENT BUSH WILL ATTEND THE LIBRARY DEDICATION IN YORBA LINDA, CALIFORNIA, ON JULY 19, ALMOST 16 YEARS AFTER NIXON RESIGNED THE PRESIDENCY IN THE WAKE OF THE WATERGATE SCANDALS.

FORMER PRESIDENTS RONALD REAGAN AND GERALD FORD ALSO WILL ATTEND THE CEREMONY. FORMER PRESIDENT JIMMY CARTER WAS INVITED, BUT SAID HE HAD ANOTHER ENGAGEMENT.

ACCORDING TO A LIBRARY'S SPOKESMAN, ONLY THE EXHIBIT PORTION OF THE LIBRARY, ALONG WITH THE RESTORED HOME IN WHICH NIXON WAS BORN IN 1913, WILL BE IMMEDIATELY OPEN. THE ARCHIVES PORTION, CONTAINING PRE- AND POST-PRESIDENTIAL NIXON PAPERS AND COPIES OF WHITE HOUSE DOCUMENTS, IS SCHEDULED TO OPEN SOMETIME NEXT YEAR.

HUGH HEWITT, THE LIBRARY'S DIRECTOR, SAID TODAY THAT EVERY DOCUMENT OF ANY IMPORTANCE, INCLUDING MANY RELATING TO WATERGATE, WILL BE IN THE LIBRARY. BUT HE ACKNOWLEDGED THAT BOB WOODWARD, WHO, TOGETHER WITH HIS FELLOW REPORTER CARL BERNSTEIN AT THE WASHINGTON POST, UNCOVERED THE WATERGATE SCANDALS IN 1972, PROBABLY WOULDN'T BE ALLOWED TO STUDY THE DOCUMENTS.

NIXON RESIGNED FROM OFFICE ON AUGUST 8, 1974, AFTER THE HOUSE JUDICIARY COMMITTEE HAD VOTED TO IMPEACH HIM ON GROUNDS THAT INCLUDED A COVER-UP OF WHITE HOUSE INVOLVEMENT IN A BREAK-IN AT DEMOCRATIC PARTY HEADQUARTERS IN THE WATERGATE OFFICE BUILDING IN THE NATION'S CAPITAL.

UNLIKE OTHER PRESIDENTIAL LIBRARIES, THE NIXON LIBRARY WILL BE OPERATED BY THE PRIVATE FOUNDATION THAT RAISED MONEY TO BUILD IT. THE EIGHT OTHER LIBRARIES ARE RUN BY THE NATIONAL ARCHIVES AS THE REAGAN LIBRARY WILL BE AFTER IT OPENS NEXT YEAR IN SIMI VALLEY, CALIFORNIA.

ALSO UNLIKE THE OTHER LIBRARIES, THE NIXON LIBRARY WILL NOT CONTAIN ORIGINAL WHITE HOUSE DOCUMENTS. THEY ARE STORED IN A NATIONAL ARCHIVES BUILDING IN ALEXANDRA, VIRGINIA, WHERE THEY ARE BEING PROCESSED AND MADE PUBLIC.

IT WAS CONGRESS THAT GAVE CONTROL OF NIXON'S 40 MILLION PAGES OF PRESIDENTIAL PAPERS TO THE ARCHIVES IN 1974. NIXON CHALLENGED THE ACT'S CONSTITUTIONALITY, BUT IT WAS UPHELD IN 1977 BY THE SUPREME COURT.

TOKYO (JULY 9) KYODO - MITSUBISHI TRUST AND BANKING CORP. SAID MONDAY IT HAS AGREED WITH CHICAGO RESEARCH AND TRADING (CRT) OF THE UNITED STATES TO SET UP A JOINT VENTURE IN CHICAGO FOR OPTIONS TRADING.

UNDER THE ACCORD, CRT, THE WORLD'S LARGEST OPTIONS TRADER AND INTEREST RATE FUTURES ARBITRAGER, WILL TRANSFER MOST OF ITS MAIN OPERATIONS TO THE NEW FIRM, ALLOWING MITSUBISHI TO PARTICIPATE IN THE OPTIONS BUSINESS, MITSUBISHI OFFICIALS SAID.

THE JOINT VENTURE WILL ALSO TAKE OVER CRT'S EUROPEAN SUBSIDIARY AND TAKE CONTROL OF A CRT SUBSIDIARY AUTHORIZED TO TRADE IN TREASURY SECURITIES DIRECTLY WITH THE FEDERAL RESERVE BANK OF NEW YORK, THEY SAID.

THE EQUALLY OWNED NEW FIRM IS TO BE KNOWN AS CRT MTBC CAPITAL MARKETS GROUP LTD. AND CAPITALIZED AT 150 MILLION DOLLARS. THE TWO PARTNERS ARE NOW AWAITING APPROVAL OF THEIR RESPECTIVE GOVERNMENTS, THE OFFICIALS SAID.

''THE DEAL HAS THE ADVANTAGE OF ALLOWING US TO TAKE PART IN THE U.S. SECURITIES BUSINESS IN THE FUTURE,'' SAID A SENIOR MITSUBISHI OFFICIAL.

#90190k0059 07/09/1990 ~Japanese News Agency

TOKYO (JULY 9) KYODO - JAPAN'S STEEL INDUSTRY WILL BENEFIT SIGNIFICANTLY FROM THE INCREASE IN THE COUNTRY'S PUBLIC WORKS SPENDING AGREED AT THE JAPAN-U.S. STRUCTURAL IMPEDIMENTS INITIATIVE (SII) TALKS, AIMED AT REMOVING BARRIERS TO TRADE AND INVESTMENT, AN INDUSTRY SOURCE PREDICTED MONDAY.

THE SOURCE ESTIMATED DEMAND FOR CRUDE STEEL IN THE FISCAL 1990-1995 PERIOD WOULD BE BOOSTED BY 3.74 MILLION METRIC TONS IN RESPONSE TO THE JAPANESE PLEDGE AT THE SII MEETING OF A TOTAL 430 TRILLION YEN IN INVESTMENT IN PUBLIC WORKS PROJECTS OVER THE NEXT 10 YEARS.

THE MARKED RISE IN DEMAND, WHICH IS EQUIVALENT TO ABOUT 30 PERCENT OF THE TOTAL 11 MILLION TONS OF CRUDE STEEL FOR FISCAL 1989, WILL ALSO CONTRIBUTE TO SUSTAINING THE COUNTRY'S CRUDE STEEL OUTPUT LEVEL OF 100 MILLION TONS A YEAR FOR SOME TIME, THE SOURCE SAID.

ACCORDING TO THE SOURCE, EXPANDED PUBLIC WORKS SPENDING OVER THE NEXT FIVE-YEAR PERIOD IS PROJECTED TO CREATE SOME 2.403 MILLION TONS IN DEMAND

DIRECTLY CONNECTED WITH THE PUBLIC WORKS PLANS INVOLVING GENERAL CONSTRUCTION, CIVIL ENGINEERING, AND MACHINE TOOL SECTORS.

OTHER INDUSTRY SECTORS, ALSO LURED BY INCREASED PUBLIC WORKS SPENDING, ARE EXPECTED TO INCREASE THEIR STEEL DEMAND BY AN ADDITIONAL 1.34 MILLION TONS IN FIVE YEARS, THE SOURCE PREDICTED.

THE INCREASE IS EQUAL TO AN ESTIMATED ANNUAL RISE IN DEMAND OF 5-7 PERCENT WHICH THE SOURCE DESCRIBED AS A CONSIDERABLY HIGH RATE OF GROWTH IN VIEW OF VIRTUALLY ZERO GROWTH IN RECENT YEARS.

#90190k0072 07/09/1990 ~Japanese News Agency

TOKYO (JULY 9) KYODO - REVENUES RECEIVED IN PREMIUMS BY JAPAN'S 25 LIFE INSURANCE COMPANIES GREW 6.3 PERCENT IN FISCAL 1989 FROM THE PREVIOUS YEAR THE SLOWEST GROWTH IN THE POSTWAR PERIOD, A LIFE INSURERS' GROUP SAID MONDAY.

IN THE FISCAL YEAR THAT ENDED MARCH 31, INSURANCE PREMIUMS, THE EQUIVALENT OF SALES BY GENERAL CORPORATIONS, TOTALED 28,040.2 BILLION YEN, THE LIFE INSURANCE ASSOCIATION OF JAPAN SAID.

ASSOCIATION OFFICIALS TRACED THE SLOWER GROWTH CHIEFLY TO SLUGGISH SALES OF SINGLE-PREMIUM ENDOWMENT POLICIES, WHICH HAVE LOST THEIR APPEAL AS HIGH-YIELDING INSURANCE PRODUCTS.

THE ASSOCIATION DID NOT DISCLOSE FIGURES FOR SUCH ENDOWMENT POLICIES, HOWEVER.

LIFE INSURANCE POLICIES SIGNED DURING THE YEAR JUMPED 28.4 PERCENT TO 522,988 BILLION YEN, ACCOUNTING FOR 54.7 PERCENT OF TOTAL INDIVIDUAL INSURANCE POLICIES CONTRACTED IN THE PERIOD, THE ASSOCIATION SAID.

IT WAS THE FIRST TIME THAT THE PROPORTION OF LIFE INSURANCE POLICIES IN OVERALL INDIVIDUAL INSURANCE POLICIES SIGNED BY LIFE INSURANCE COMPANIES HAS TOPPED THE 50 PERCENT LEVEL, ASSOCIATION OFFICIALS SAID.

VARIABLE LIFE INSURANCE POLICIES -- INVESTMENT-ORIENTED LIFE INSURANCE POLICIES WHOSE RETURNS ARE LINKED TO AN UNDERLYING PORTFOLIO OF SECURITIES -- POSTED A ROBUST 38.8 PERCENT INCREASE, TOTALING 10,427.1 BILLION YEN.

ON THE INVESTMENT SIDE, RETURNS ON ASSETS HELD BY THE INSURANCE COMPANIES SHOWED HEALTHY GROWTH, RISING 30.6 PERCENT TO 10,304.9 BILLION YEN, DESPITE THE SHARP DECLINE IN STOCK PRICES EARLY THIS YEAR.

MEANWHILE, PROCEEDS PAID ON SINGLE-PREMIUM ENDOWMENT POLICIES GREW SWIFTLY REPRESENTING 53.5 PERCENT OF TOTAL INSURANCE PROCEEDS PAID DURING THE

YEAR AND EXCEEDING FOR THE FIRST TIME DEATH BENEFITS PAID ON LIFE INSURANCE POLICIES.

LONDON (JULY 9) KYODO - SANYO OIL CO., A MEDIUM-SIZED JAPANESE OIL COMPANY, PLANS TO BUILD A 50 MILLION POUND GOLF COURSE AND RESORT IN A FORMER ESTATE OF A ROLLS-ROYCE FOUNDER IN THE SUBURBS OF MONMOUTH, WALES, INFORMED SOURCES SAID MONDAY.

THE RESORT DEVELOPMENT PLAN, SUBMITTED LAST THURSDAY TO LOCAL AUTHORITIES, INCLUDES THE CONSTRUCTION OF A CLUBHOUSE COMPLEX AND AN 18-HOLE GOLF COURSE IN ADDITION TO THE EXISTING 18-HOLE COURSE.

SANYO ALSO PLANS TO BUILD A 130-BEDROOM HOTEL AND 100 CONDOMINIUMS ON THE 3.3 MILLION SQUARE METER SITE OF THE FORMER COUNTRY HOME OF CHARLES ROLLS, ONE OF THE FOUNDERS OF ROLLS-ROYCE LTD.

SANYO'S BRITISH SUBSIDIARY, THE ROLLS OF MONMOUTH CO., WILL MANAGE THE FACILITIES, THE SOURCES SAID.

SANYO OIL, WHICH HAS MORE THAN 20 YEARS OF EXPERIENCE IN RESORT DEVELOPMENT, PURCHASED THE ESTATE AND HOUSES IN SEPTEMBER 1988. IT EXPECTS THE PROJECT TO CREATE MORE THAN 200 NEW JOBS IN THE AREA, THEY SAID.

THE JAPANESE OIL CONCERN ALSO FILED A SEPARATE APPLICATION TO BUILD 80 EXECUTIVE HOMES NEXT TO THE GOLF COURSE. THE HOMES, EXPECTED TO SELL FOR SOME 450,000 POUNDS EACH, ARE BEING BUILT TO ENSURE CONTINUAL USE OF THE SPORTS FACILITIES.

TOKYO (JULY 9) KYODO - NEC CORP. ANNOUNCED MONDAY THAT USER PROGRAMS OF SOME OF ITS PERSONAL COMPUTER (PC), PC-9800 SERIES HAVE BEEN INFECTED BY COMPUTER VIRUSES.

THE COMPANY IS NOW OFFERING SOFTWARE FOR DIAGNOSING AND SOLVING SUCH PROBLEMS. OWNERS OF THE COMPUTER ARE ALSO BEING INFORMED OF FIRMS THAT CAN PROVIDE PROTECTION AGAINST THE HIGH-TECH DISEASE.

NEC SAID A JAPANESE PC COMMUNICATION NETWORK OFFERS A "PUBLIC DOMAIN" SOFTWARE THAT VACCINATES THEIR COMPUTER PROGRAMS AGAINST PROGRAM VIRUSES.

NEC OFFICIALS SAID THAT WHEN THE DATE OF DECEMBER 25 COMES UP ON THE CALENDAR OF AN INFECTED COMPUTER "A MERRY CHRISTMAS TO YOU" MESSAGE WILL APPEAR ON THE SCREEN IF THE PROGRAM SIZE IS 30,720 BYTES OR LESS.

IF THE PROGRAM SIZE IS 30,721 BYTES OR MORE, THE PROGRAM WILL BE DESTROYED BY THE VIRUS, THEY SAID.

#90190k0079 07/09/1990 ~Japanese News Agency

NEW YORK (JULY 9) KYODO - JAPANESE COMPANIES, KEEPING STEP WITH THEIR U.S. COUNTERPARTS, RANKED HIGH ON FORTUNE MAGAZINE'S ANNUAL LIST OF THE WORLD'S 500 BIG CORPORATIONS, THE U.S. MAGAZINE SAID MONDAY.

THE LIST, BASED ON SALES IN 1989, ENCOMPASSED 111 JAPANESE FIRMS, MAKING THE JAPANESE PRESENCE SECOND AFTER THE UNITED STATES, WHICH HAD 167 COMPANIES LISTED.

BRITAIN CAME THIRD WITH 43 COMPANIES, FOLLOWED BY WEST GERMANY WITH 32, FRANCE WITH 29, AND SWEDEN WITH 15.

THE TOP EIGHT COMPANIES KEPT THEIR POSITIONS LAST YEAR, WITH GENERAL MOTORS CORP. GRABBING THE TOP SPOT WITH SALES OF 126,974.3 MILLION DOLLARS.

TOYOTA MOTOR CORP. CAME FIRST AMONG THE JAPANESE, CAPTURING SIXTH RANK WITH SALES OF 60,443.6 MILLION DOLLARS.

HITACHI LTD. MADE A MARKED JUMP TO NINTH FROM 12TH LAST YEAR, MAKING IT THE ONLY OTHER JAPANESE IN THE TOP 10. AMONG OTHER JAPANESE FIRMS AMONG THE BIG 500, MATSUSHITA ELECTRIC INDUSTRIAL CO. CAME 12TH, WHILE NISSAN MOTOR CO. RANKED 17TH.

SONY CORP. ROSE TO 57TH FROM 90TH IN A RISE AIDED BY ITS PURCHASE OF CBS RECORDS INC. IN 1988. BUOYED BY ITS BUYOUT OF FIRESTONE TIRE AND RUBBER CO. IN 1988, BRIDGESTONE CORP. CAME 84TH. BRIDGESTONE WAS NOT IN THE TOP 100 COMPANIES LAST YEAR.

MEASURED BY SALES, THE U.S. FIRMS ACCOUNTED FOR 37 PERCENT OF GLOBAL SALES FOLLOWED BY THE JAPANESE WITH 20 PERCENT AND BRITAIN WITH 7 PERCENT.

BUT IN TERMS OF PROFITS, BRITAIN CAME SECOND WITH 12 PERCENT AFTER THE U.S., AT 40 PERCENT, OUTPACING THE JAPANESE WITH 11.7 PERCENT.

THE GLOBAL 500 LIST WILL BE PUBLISHED IN FORTUNE'S JULY 30 ISSUE FOR SALE ON JULY 16.

FOLLOWING ARE THE TOP 10 COMPANIES IN FORTUNE'S GLOBAL 500 LIST.

SALES IN MILLIONS OF DOLLARS

1.	GENERAL MOTORS	U.S.	126,974.3
2.	FORD MOTOR	U.S.	96,932.6
3.	EXXON	U.S.	86,656.0
4.	ROYAL DUTCH/SHELL	BRITAIN/NETHERLANDS	85,527.9
5.	INTERNATIONAL BUSINESS MACHINES	U.S.	63,438.0
6.	TOYOTA MOTOR	JAPAN	60,443.6
7.	GENERAL ELECTRIC	U.S.	55,264.0
8.	MOBIL	U.S.	50,976.0
9.	HITACHI	JAPAN	50,894.0
10.	BRITISH PETROLEUM	BRITAIN	49,484.4

#90190k0080 07/09/1990 ~Japanese News Agency

OSAKA (JULY 9) KYODO - TANABE SEIYAKU CO. AND OMRON CORP. SAID MONDAY THEY HAVE AGREED TO COOPERATE IN DEVELOPING AND MARKETING MEDICAL EQUIPMENT, MARKING THE FIRST WIDE-RANGING TIE-UP BETWEEN A MAJOR DRUG FIRM AND AN ELECTRONICS COMPANY.

UNDER THE FIVE-YEAR AGREEMENT, THE TWO PARTNERS WILL JOINTLY DEVELOP HEALTH AND MEDICAL EQUIPMENT SUCH AS MEASUREMENT TOOLS AND LABOR-SAVING HEALTH-CARE DEVICES BY TAKING ADVANTAGE OF MARKET INFORMATION COLLECTED BY TANABE'S DRUG SALESMEN, ACCORDING TO A JOINT PRESS RELEASE.

TANABE, A LEADING PHARMACEUTICAL COMPANY, HAS BEEN PLANNING TO ADVANCE INTO THE MEDICAL EQUIPMENT MARKET FOR SOME TIME IN A BID TO DIVERSIFY ITS BUSINESS.

OMRON, A TOP MAKER OF CONTROL COMPONENTS, HAS BEEN TRYING TO EXPAND ITS SALES OF HEALTH AND MEDICAL EQUIPMENT, NOW ROUGHLY 8 PERCENT OF ITS BUSINESS.

AN OFFICIAL AT TANABE SAID HIS COMPANY INTENDS TO ACHIEVE ANNUAL SALES OF MORE THAN 10 BILLION YEN FROM NEW PRODUCTS WITHIN TWO TO THREE YEARS AND IS CONSIDERING SETTING UP A NEW DIVISION TO HANDLE MEDICAL EQUIPMENT IN THE FUTURE.

#90190k0084 07/09/1990 ~Japanese News Agency

TOKYO (JULY 9) KYODO - THE ASIA-PACIFIC ECONOMIC COOPERATION (APEC) GROUP OF 12 NATIONS, WHICH INCLUDES JAPAN AND THE UNITED STATES, HAVE AGREED TO ESTABLISH A TELEPORT NETWORK AMONG THEM, JAPANESE OFFICIALS SAID MONDAY.

THE AGREEMENT WAS MADE AT A RECENT MEETING OF APEC TELECOMMUNICATION EXPERTS IN SINGAPORE, POSTS AND TELECOMMUNICATIONS MINISTRY OFFICIALS SAID.

THEY SAID JAPAN WOULD BE IN CHARGE OF ESTABLISHING THE TELEPORT NETWORK. THE EXPERTS ALSO AGREED TO UNIFY THE PROTOCOLS ON ELECTRONIC DATA INTERCHANGE AND REACHED A CONSENSUS ON THREE OTHER ITEMS.

THE AGREEMENT IS SUBJECT TO APPROVAL AT THE NEXT APEC MINISTERIAL MEETING IN SINGAPORE IN LATE JULY, THE OFFICIALS SAID.

THE MINISTRY WILL SET UP A COMMITTEE IN AUGUST TO STUDY WHAT TYPE OF TELEPORT NETWORK SHOULD BE ESTABLISHED AMONG APEC DEVELOPING COUNTRIES, THE OFFICIALS SAID.

A TELEPORT CONSISTS OF A TELECOMMUNICATIONS FACILITY WHICH PROVIDES ACCESS TO SATELLITES, MICROWAVE, OR FIBER-OPTIC NETWORKS SERVING INDIVIDUAL LOCATIONS OR ENTIRE REGIONS, AS WELL AS TO TELEPHONE CARRIERS.

THE TELEPORT'S CUSTOMERS ENJOY SINGLE-SOURCE, SHARED ACCESS TO TELECOM FACILITIES WITHOUT INCURRING ENORMOUS CONSTRUCTION COSTS.

#90190m0001 07/09/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 9) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

IN THE NEWS:

The Nikkei average rises 93.16 to 32,538.28. ... The FT 100 is up 2.7 to 2342.7. ... Following West Germany's World Cup victory, the DAX index is down 2.22 at 1930.58. ... U.S. tobacco stocks trade lower in London following a Barron's article about the decline in smoking. ... BRITISH AIRWAYS PLC says it will buy up to $6.9 billion worth of airplanes from BOEING in the biggest single order ever placed by the airline ... RENAULT has launched a bid to buy MACK TRUCKS INC. ... SHEARSON LEHMAN HUTTON has agreed to pay a record $500,000 fine to the NEW YORK STOCK EXCHANGE to settle allegations that it violated exchange rules in 1986. ... Minutes show that FEDERAL RESERVE policymakers voted 10-1 at their May meeting to keep interest rates steady in a bid to keep inflation under control. ... BERNARD TAPIE, a French entrepreneur, politician and soccer team owner, has agreed to buy an 80 percent stake in ADIDAS A.G., the West German company that is the world's largest maker of sporting goods.

WHAT'S AHEAD:

The FEDERAL RESERVE reports May consumer installment credit figures later today. ... The RESOLUTION FUNDING CORP., the agency paying for the S&L cleanup, will sell $5 billion in 30-year bonds on Tuesday and the TREASURY offers a record $8 billion in seven-year notes on Wednesday. ... The June

producer price index comes out Friday from the LABOR DEPARTMENT and the COMMERCE DEPARTMENT reports on retail sales. ... The COMMUNICATIONS WORKERS OF AMERICA says AT&T will announce the layoff up to 3,000 people on Tuesday. ... "The New York Times" quotes government and industry officials as saying IBM is in negotiations to license its most advanced memory-chip technology to MOTOROLA. ... The Times also reports this morning that DONALD TRUMP is set to announce later today that he has signed France's largest retailer to a 25-year lease in Trump Tower in a multi-million-dollar deal that will strengthen his real estate and gambling empire.

FROM THE BULLS:

RICK JARUSIEWICZ of PAINEWEBBER believes the stock market is in a base-building phase that eventually will propel the Dow to 3100 - perhaps not this summer "but before anything worthy of the name of a correction can happen." ("Barron's", 7/9)

FROM THE BEARS:

WALTER STONE of KANON BLOCH CARRE & CO., a Boston-based mutual fund research firm, believes declining market volume means buying interest is waning. "You have to have daily volume of over 200 million shares to confirm that we're in a continuation of the bull market," he says. Without such volume, he foresees a two-year bear market in which the Dow could skid to 1000. His current portfolio recommendation has a mix that includes zero stocks. MERRILL LYNCH's ROBERT FARRELL agrees that "volume is not bullish right now." And while not necessarily agreeing with Stone's prediction, Farrell says Stone "is not a hollow guy." (WSJ, 7/9)

JAMES SOLLOWAY, chief economist for ARGUS RESEARCH CORP., believes the stock market "will probably be dragged lower" in the weeks ahead because "there isn't much going for it in the next month." He does not see interest rates declining and believes corporate profits will be weak. ("The Washington Post", 7/8)

STOCK MARKET:

"The stock market appears to be trendless, although there is a bias to the upside," says JAY HOHMANN, head futures trader with DONALDSON LUFKIN JENRETTE SECURITIES. ("Investor's Daily", 7/9)

"We're participating" in the stock market, says TIMOTHY CLARK of AVATAR ASSOCIATES. But because of declining volume, he says, "We've got our eyes on the exits here a little more than we usually do." (WSJ, 7/9)

"The employment numbers showed that the economy still has spunk and the stock market was saying [Friday] it can live without an immediate drop in

interest rates," says JACK SOLOMON of BEAR STEARNS & CO. "The buying appeared to be focused on consumer-nondurable stocks like the foods, which should have reliable earnings." ("Investor's Daily", 7/9)

"I remain keen on the emerging growth area," says HOWARD COLHOUN. "On the big market, I think we are still going to go to 3,000 [on the Dow] which is not that far away. But I look for a turnover in the market. I am much more cautious at that point. So, I am on the warning side. We are very close to what I think will be the top for this year." ("Wall Street Week" 7/6)

JOHN VAN POZNAK of PRUDENTIAL-BACHE looks for wild gyrations in the stock market, but does not expect the Dow to decline below 2850 or rise above 2950 for at least another month. ("Barron's", 7/9)

"It's been very much a large capitalization oriented, growth stock market " says MARTIN SASS of M.D. SASS INVESTORS. I think the market's going to broaden out from the top tier stocks ... to some of the more neglected, undervalued, growth companies that have lagged behind this market." (FNN "Marketwrap", 7/6)

"We might see [the stock market] move up to 3000 on the Dow, although we're not totally sure about that," says DAVID MARSHALL of MMS INTERNATIONAL. He predicts a narrow trading range over the next several weeks because of worries about interest rates and the economy. "It's a question of whether the economy is going to turn down before interest rates turn down, and I think that's going to be the key" to the stock market, says Marshall. (FNN "World Business Update", 7/9)

"Volume was extraordinarily light and breadth was poor," says HUGH JOHNSON chief economist at FIRST ALBANY CORP. "This is not particularly inspiring. The market was not as good as the 25-point rise in the Dow." (UPI, 7/6)

The Japanese stock market should benefit from continuing strength in the yen says JASPER KOLL, chief economist for S.G. WARBURG SECURITIES who sees the yen at 140 against the dollar by year's end. But he cautions, "As interest rates in Japan are going to stay at a very high level, the impetus [for stocks] is limited." (CNN "Business Morning", 7/9)

STOCK TIPS:

MACEO SLOAN has been buying utility stocks because he thinks they will do "very, very well with falling interest rates, and I still think they are going to come down." His favorites: SOUTHERN CALIFORNIA EDISON, DUKE POWER and PACIFIC GAS AND ELECTRIC. HOWARD

COLHOUN also likes PACIFIC GAS AND ELECTRIC and DUKE POWER. ("Wall Street

Week", 7/6)

RUSSELL THOMPSON of the $1.75 billion UNITED INCOME FUND, says CATERPILLAR INC. is positioned to profit dramatically from "a unique time in history" when world markets are opening up and the focus domestically is on rebuilding the infrastructure and cleaning up the environment. He sees the company returning profits of as much as $8 a share by 1992. (Barron's 7/9)

ALAN GAINES of the New York energy research firm GAINES, BERLAND INC., says KERR-McGEE is "the most exciting energy story on Wall Street." Gaines is not pitching the stock as a takeover candidate, despite long-standing rumors of such a development. Rather he sees a major restructuring within six months and tells DAN DORFMAN of "USA Today" that "even if nothing happens, you're looking at a superb operating story." He sees a 40-to-50 percent gain in share price if there is a restructuring and at least a 25 percent gain a year from now, even without restructuring. ("USA Today", 7/9)

E-SYSTEMS INC., is featured this morning in the "Market Place" column in "The New York Times." The stock is in the doldrums, even though the maker of sophisticated military electronics seems likely to escape defense cuts and continue to prosper, the article says. PETER ASERITIS, an analyst at FIRST BOSTON CORPORATION, says the company's Egrett-1 light surveillance airplane has a good future in verifying troop withdrawals and other military cutbacks by NATO and Warsaw Pact nations. LIO BREGMAN, an analyst at OPPENHEIMER & CO., says, "When the dust settles around the world, there will be reasonable spending for the type of things that E-Systems is doing. It's a very effective way of maintaining a level of security with fewer troops, tanks and airplanes." (NYT, 7/9)

WASTE MANAGEMENT INC. and BROWNING-FERRIS INDUSTRIES INC., are described in "The Washington Post" Sunday edition as being "better- equipped than most of their competitors [in the waste management industry] to comply with increasingly strict environmental regulations" because of "their huge size and deep pockets." DEAN WITTER REYNOLDS analyst RICHARD ROSSI says: "With the federal regulations getting more and more strict about protecting groundwater supplies and how to handle solid waste, the fragmented industry is consolidating very rapidly. Money talks." ("The Washington Post", 7/8)

"Money Magazine's" small investor survey shows money still pouring into mutual funds specializing in overseas stocks. "There's more enthusiasm in the market than there should be," says senior reporter JORDAN GOODMAN, who notes that fund premiums to the underlying stocks have run as high as 70%. Despite the favorable impact of a weakening dollar, most premiums have narrowed dramatically, Goodman says. "People who were buying the GERMANY FUND in December have not looked too good, so far." (CNN "Business

Morning", 7/9)

-30- 9661
#90190m0002 07/09/1990 ~Market Consensus Surveys
FALLS CHURCH, VA (JULY 9) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

SUSAN HERING, a senior economist at SALOMON BROTHERS, says Friday's unemployment report "failed to deliver the conclusive evidence of further economic deterioration necessary to precipitate easier money policy. ... A soft landing [by the economy] will stay the Federal Reserve's hand for now but the bias of policy likely has shifted toward ease." ("Investor's Daily", 7/9)

"The employment numbers are those of a dull economy," says NEIL SOSS, chief economist at the FIRST BOSTON CORPORATION. "They don't much change expectations on an eventual easing of Fed policy. But they do mean that a move won't happen overnight." (NYT, 7/9)

"The bottom line is that the Fed won't ease on the basis of the [employment] numbers," says LEONARD SANTOW of GRIGGS & SANTOW. "Taken as a package, they show no reason to ease." ("Investor's Daily", 7/9)

"The Fed is in a quandary now," according to ALLEN SINAI of BOSTON CO. He says the signals coming from the jobs numbers give the Fed conflicting messages. "From the job creation side, it's a clear case for the Fed to ease. But with unemployment so low, it's a very tough call," says Sinai. ("Washington Post", 7/7)

The Fed would not mind seeing a lower dollar because "they're concerned about the trade implications of the weak yen ... and they're probably even more worried about a strong dollar," says DAVID MARSHALL of MMS INTERNATIONAL. "I think they want the U.S. dollar to move lower right here, and probably won't fight it at all." (FNN "World Business Update", 7/9)

"The unemployment rate is the most visible of statistics and the one politicians like to wave in front of Fed officials when they are trying to pressure them to ease," says WARD McCARTHY of STONE & McCARTHY RESEARCH ASSOCIATES. He said Friday's report gives FED CHAIRMAN ALAN GREENSPAN "ammunition to keep pressure on the politicians to get a budget-cutting deal by holding out the carrot of lower [interest] rates." ("Investor's Daily", 7/9)

"We think that if there was the possibility of the Fed easing right away, it was eliminated based on the continued economic momentum that the jobs data expressed," says economist WILLIAM SULLIVAN of DEAN WITTER REYNOLDS INC. (Reuters, 7/6)

JOHN CONNOLLY of DEAN WITTER REYNOLDS says hopes of a Fed easing were dashed by Friday's employment numbers. "There was some hope that the Fed would have adopted an asymmetrical policy to ease and that a weak employment number would have pushed them into cutting the Fed Funds rate a quarter of a point. That doesn't appear possible given the mixed signals we have from this report." (CNBC "Business View", 7/6)

"It's time to stop expecting short-term rates to fall and just go back to collecting income" from interest payments, says MICHAEL SPENCER of ONE FEDERAL ASSET MANAGEMENT. He says the best way to make money in the third quarter will be to go for yield, since he doubts the market will move enough to significantly raise prices. "This is the third time this year that we thought the Fed would ease, and short-term rates would fall, and it didn't happen," laments Spencer. (WSJ, 7/9)

JOHN DESSAUER says the dollar is drifting down because "investors around the world ... are looking forward to lower interest rates [in the United States] and secondly, they find a lot of opportunity in places like Europe. ... It doesn't bother me, as long as it doesn't go too far, of course." ("Wall Street Week", 7/6)

The bond market's tumble on employment figures is "kind of a knee- jerk reaction," says PHILIP RETTEW of MERRILL LYNCH. He says traders who follow the economic figures closely "have obviously stepped in and done some selling. Now it remains to be seen whether there's any follow through next week." (CNBC "Market Wrap-Up", 7/6)

"I'm really concerned. I think that the Federal Reserve is more trapped now than ever," says AFM INVESTMENTS' chief market strategist, PETER GRANDICH. Lower rates from the Fed would hurt the bond market because foreign investors would be likely to look elsewhere. That situation comes "at a time when we have more needs for capital." Grandich says the Fed may try some "window dressing," but will not lower rates significantly. (CNBC "Market Wrap-Up", 7/6)

The stock market ignored the jobs report, although ... the bond market sold off a bit," says MARTIN SASS of M.D. SASS INVESTORS. He predicts the employment figures will mean "interest rates will come down further later this year," which will help buoy the stock market. (FNN "Marketwrap", 7/6)

The upward revision in May's employment numbers on Friday was "a big change," according to DAVID JONES of AUBREY G. LANSTON. "We have kind of a neutral market effect: June coming in a little softer, May being

revised up a little bit." But, these numbers "were not enough to jar them [the Fed] out of what has been a stable policy stance, really since last December," says Jones. (FNN "Marketwrap", 7/6)

"Bonds took a big hit today [Friday] because everyone was a little bit disappointed in the number of new jobs that were created in this economy," says MACEO SLOAN. "I think that's a buying opportunity because I still think the general, overall interest rate cycle is on its way down and before the end of the year we are going to see the long bond somewhere around 8 percent." ("Wall Street Week", 7/6)

DONALD FINE, chief market analyst at CHASE MANHATTAN BANK, says a 10-basis-point increase in long-term bond yields Friday "was not a back- up that was caused by people who thought the employment numbers were strong. Rates backed up because the numbers were not as weak as people had hoped they might be." (NYT, 7/9)

"It's going to be a dreadfully slow summer," says CHARLES LIEBERMAN, director of financial-markets research at MANUFACTURERS HANOVER SECURITIES CORP. He says if bond-market players "had any sense they'd all go away on long vacations." (WSJ, 7/9)

"Investors are looking forward to lower U.S. interest rates, but the question is whether the easing will be carried over to Japan," says KAZUHIRO MAEKAWA, head of the Japanese equity department of BARCLAYS de ZOETE WEDD. ("Investor's Daily", 7/9)

"The economy still seems to be doing all right, so the bond market is getting a bit rich, a bit expensive," says JOHN SILVIA of KEMPER FINANCIAL SERVICES. But he adds the "numbers were disappointing to the [stock] market." (Reuters, 7/6)

"Rates aren't going anywhere," says SUNG WON SOHN, senior vice president at NORWEST CORP. "This is what we call a hiatus and it might continue through the summer." (WSJ, 7/9)

THE ECONOMY:

Columnist JOHN CRUDELE notes that it's time again for "guess those earnings" and writes that Wall Street strategists are looking for second-quarter profits to be up 11 percent over the first-quarter, while analysts covered by the INSTITUTIONAL BROKERS ESTIMATE SYSTEM of LYNCH JONES & RYAN are looking for a 16 percent increase. ARGUS RESEARCH CORP. looks for a 1.25 percent increase and JOHN WILLIAMS, a private economist with AMERICAN BUSINESS ECONOMETRICS, believes profits will decline 5.5 percent. At the other end, PRUDENTIAL- BACHE's CLAUDIA MOTT predicts profits of smaller capitalization companies will soar 25 percent. ("The Washington Post", 7/8)

"One of the important things to look at is the role of interest rates in determining corporate profits," says LAWRENCE LINDSEY, special assistant to PRESIDENT BUSH. "What we've seen is interest payments taking a bigger and bigger share of the capital income of corporations. I think that's the main thing driving the corporate profit rate down." ("Wall Street Week", 7/6)

SAM KAHAN, chief economist at FUJI SECURITIES CORP. in Chicago, says the low jobless rate is not being accompanied by some of the classic signs of tight labor markets, such as steadily rising wages. "Normally a low unemployment rate would raise fears of inflation, but people are realizing that the linkage between inflation and unemployment is not feeding through " he says. ("Investor's Daily", 7/9)

"The [unemployment] data, again, was very mixed," says BRIAN FABBRI of MIDLAND MONTAGU. "And it seems to suggest the economy still continues to grow, albeit at very, very slow rates." (FNN "Marketwrap", 7/6)

IN WASHINGTON:

LAWRENCE LINDSEY, special assistant to PRESIDENT BUSH, declines to comment on whether the administration is sending up a trial balloon on the possibility of a tax on securities transactions. "The president has made clear that everything should be on the table [in budget deficit reduction talks]," says Lindsey. "It's also obvious that we are in the midst of some very delicate negotiations. For those negotiations to succeed, I think it's best that we leave it to the negotiators in the negotiating room and I'm going to beg off answering questions about the details." On a related matter, however, he expressed optimism that the White House will get its wish for a capital gains tax reduction. ("Wall Street Week," 7/6)

JAMES CREBER, a partner at MILLER TABAK HIRSH & CO., says a tax on stock transactions would be "an attempt to slow down program trading or make it expensive." JAMES CLOONAN, president of the AMERICAN ASSOCIATION OF INDIVIDUAL INVESTORS, says "most individual investors probably will think [the tax] is a reasonable trade-off" to decrease index arbitrage. ("USA Today", 7/9)

#90190p2512 07/09/1990 ~PR Newswire

ATLANTA (JULY 9) PR NEWSWIRE - Crisis Management International Inc. (CMI) the Atlanta-based firm that provides crisis intervention for companies worldwide, has expanded its services to include three psychological treatment facilities in Atlanta.

The CMI Counseling Centers assist survivors of traumatic incidents, and

other stress-related difficulties.

CMI has worked with more than 125 companies, offering crisis preparedness, response, and post traumatic recovery programs for employees and families. "Providing psychological services for corporate clients is the next logical step after work-place trauma intervention," said J. Dwight Foulk, vice president - operations.

In addition to post traumatic stress treatment, the Centers offer outpatient counseling and treatment for depression, marital and family problems, and substance abuse.

CMI Counseling Centers advocate an early intervention philosophy, including a short-term, assessment-oriented approach to treatment. Comprehensive evaluations for traumatized individuals are provided.

"Early intervention is the key," Foulk said. "Through early intervention, individuals, businesses and insurance companies see a reduction in escalating treatment and rehabilitation costs. The Centers work closely with insurance companies as well as businesses."

A CMI Counseling Center in the Northlake/Tucker section serves Atlanta's northeast metropolitan area. The south metro area is served by a Center in the Shannon/Union City community. (Center addresses are: LaVista Perimeter Office Park, 2191 Northlake Parkway, Tucker, Ga., and Shannon Trail, 6325 Shannon Parkway, Union City, Ga.)

A northwest Atlanta location in the Lenox/Sandy Springs area is being finalized.

CONTACT: Dwight Foulk of Crisis Management International, 404-841-3400.

#90190p2520 07/09/1990 ~PR Newswire

PASADENA, CA (JULY 9) PR NEWSWIRE - Conversion Industries Inc. (AMEX: CVD) today announced that it will make an offer to acquire up to 450,000 common shares and 1,331,595 Class B convertible preferred shares of International Colin Energy Corp. (TSE: KCN) (previously know as Colin Energy Corp.). Conversion presently owns 52 percent of International Colin's outstanding common shares and 35 percent of the outstanding Class B convertible preferred shares.

The offer will be on a share exchange basis of one common share of Conversion for one common share of International Colin and one Class A convertible preferred share of Conversion for three Class B convertible preferred shares of International Colin. The Conversion preferred shares will be a new issue entitling the holders to 8 percent cumulative annual

dividends, payable quarterly. They are convertible, at the holder's option, to common shares on the basis of one common share for each Class A share. Under American Stock Exchange rules, the Conversion Class A convertible preferred shares cannot be converted into Conversion common shares prior to obtaining shareholder approval. The company will be requesting shareholder approval at its next annual general meeting scheduled for May 1991.

International Colin recently completed a share consolidation of one new common share for each three old common shares. Their Class B convertible preferred shares were not consolidated. International Colin shares closed July 4, 1990, at $3.60 Canadian and Conversion shares closed July 3, 1990, at $3.87 U.S.

If the offer is 100 percent successful, it will result in Conversion owning approximately 66 percent of International Colin's outstanding common stock and 100 percent of its Class B convertible preferred shares. If more than the 450,000 common shares of International Colin are tendered they will be accepted on a pro-rata basis.

Conversion acquired its initial ownership interest in International Colin in late 1988. In addition to representing an attractive investment, the company's equity interest in International Colin provides a vehicle for developing natural gas reserves. Ownership of natural gas reserves provides a consistent fuel supply that enhances the development of natural gas fired cogeneration projects.

Conversion Industries Inc. is a fully integrated power production company.

WEST CHESTER, PA. (JULY 9) PR NEWSWIRE - Roy F. Weston Inc. (NASDAQ: WSTNA) (Weston) has been awarded its fifth and largest U.S. Air Force contract since 1980 to provide environmental services at hazardous and toxic waste sites on Air Force bases throughout the country.

This latest contract is one of several Weston has won from the Department of Defense (DoD) which has recently set the correction of department environmental problems as a priority. "Weston views this latest contract as an indicator of DoD satisfaction with our services to assist them in solving environmental problems. We believe that with the realignment of Eastern Europe, more DoD funds will be directed to the environmental agenda and that we will enjoy a strong position in this expanding market," said Weston Executive Vice President Thomas J. Tuffey.

Since 1980, Weston has received four similar contracts from the U.S. Army, including a recently awarded $15 million contract to provide environmental services to support the Army in its mandated closure of various military bases. Weston has also received numerous contracts from the U.S. Army Corps of Engineers and the U.S. Navy.

The five-year $50 million Air Force contract will include site characterization and risk assessments; remedial investigations; concept design and feasibility studies; sample analyses; data management and modeling; pilot studies and waste removal; quality assurance and health and safety plans. Weston's four previous Air Force contracts, one of which is still active, totaled approximately $27 million. The company has worked on more than 75 projects at more than 25 Air Force facilities across the country.

According to Weston Vice President and Project Director Katherine A. Sheedy, P.G., the project will utilize personnel and facility support from the company's national network of offices and whenever possible, the project will be managed from one of Weston's regional offices.

Weston is a recognized leader in the environmental industry, providing full-service consulting and engineering, remediation, facility construction and operations, technical information management, analytical laboratory services, and major program management.

BEVERLY HILLS, CA (JULY 9) PR NEWSWIRE - Cannon Pictures Inc. (NASDAQ: CNPI) today announced that its board of directors has taken certain actions to realign its management structure and to change certain of its senior executive officers and directors.

In connection with this management restructuring, Cannon's relationship with Ovidio Assonitis, former chairman, chief executive officer and a director of Cannon, and William Immerman, former vice chairman and a director of Cannon, was severed. In addition, Danny Dimbort, was appointed as a director of Cannon. Dimbort has extensive experience in motion picture distribution activities. Ramiro Colomina, chief financial officer and a director of Cannon, stated: "We are delighted that Mr. Dimbort has agreed to join us as a director. We are excited at the prospect of receiving his assistance in guiding the company in a positive direction. Trihoof Investments B.V., which had commenced a tender offer for Cannon's shares, apparently is unable to complete the tender offer and the company needs to position itself in the best possible manner while questions related to Cannon's future are addressed."

Cannon Pictures Inc. is primarily engaged in the financing, production, worldwide distribution and exhibition of motion pictures for the theatrical market. The company also distributes motion pictures for exhibition on free and pay television and in home video markets.

NEW YORK (JULY 9) PR NEWSWIRE - Forstmann Little & Co. announced today that FLGI Acquisition Corp., a corporation formed by Forstmann Little, is today commencing a tender offer for all outstanding shares of common stock of General Instrument Corp. (NYSE: GRL) at a price of $44.50 per share in cash. The tender offer will expire at midnight, New York City time, on Monday, Aug. 13, 1990, unless extended. On July 2, 1990, Forstmann Little announced that FLGI Acquisition Corp. has entered into a merger agreement with General Instrument, which provided for the making of the tender offer.

The tender offer is fully financed and is not subject to a financing condition. The offer is subject to, among other things, the purchase by

FLGI Acquisition of at least a majority of the outstanding shares of General Instrument on a fully diluted basis.

General Instrument, together with its subsidiaries is a diversified international company in the electronics industry. General Instrument's primary business strategies are directed toward communications systems and components through three industry segments: Broadband Communications, Data Systems and Component Products.

Forstmann Little and Co. is a private investment firm. Lazard Freres & Co. and Goldman, Sachs & Co. will act as dealer managers for the tender offer.

D.F. King & Co. Inc. will act as the information agent.

STERLING, VA. (JULY 9) PR NEWSWIRE - Star Technologies, Inc. (NASDAQ: STRRC) today announced the availability of the STAR 910/VP, the first SPARC(tm) supercomputing network compute server for the Sun Microsystems(tm) workstation environment. The STAR 910/VP combines a high-performance 40 MHz SPARC scalar processor and a 160 MFLO PS vector processor to provide Sun network workstation users with supercomputing power for many scientific and engineering applications.

Available for product shipment in September, the STAR 910/VP is compatible with Sun Microsystems' SPARe?r(tm) products, providing more than 20 times the compute performance of the Sun SPARCserver 490, Sun's high-end network compute server. This makes the STAR 910/VP the most powerful SPARC compute server available today for workgroup or departmental computing.

The STAR 910/VP is based on the SPARC Scalable Processor ARChitecture microprocessor, open standard RISC architecture from Sun. With a broad and growing installed base of SPARCstation(tm) users and more than 2,000 SPARCware solutions, SPARC is becoming the de facto workstation microprocessor architecture. When attached to a network, the STAR 910/VP gives these SPARCstation users unprecedented computational power to address new and demanding applications in design automation and engineering, seismic processing, computational chemistry, and signal and image processing.

The STAR 910/VP runs StarOS, an implementation of SunOS(tm), the technical workstation industry's leading UNIX(R) operating system developed by Sun Microsystems. In addition, the STAR 910/VP is SPARC compatible, providing support for the extensive suite of more than 2,000 application

programs that have been ported to SPAR C-based systems. As an active member of SPARC International, Star Technologies is committed to open systems computing and to the control and development of SPARC RISC as an open standard architecture. The company will submit the STAR 910/ VP to SPARC International for compliance testing in accord with the SPARC compliance definition (SCD1.0) in the near future.

Star Technologies, Inc. is a leading manufacturer of high- performance computing products, including compute servers, array processors and real-time image generators. Star products offer clear price/performance advantages over supercomputers and standalone graphics workstations for many high-performance applications in signal and image processing, simulation and training, computational chemistry and advanced scientific research, and design automation. Star is headquartered at 515 Shaw Rd., Sterling, Va. 22170.

NEW YORK (JULY 10) PR NEWSWIRE - Actor Mel Gibson, father of six, said, "I won't let the kids watch 'Lethal Weapon' or its sequel because of the violence..."

Gibson stated in the current (August) issue of Redbook, "I show them a lot of Disney films -- old Hitchcock movies like 'North by Northwest,' and all those black-and-white classics like 'Oliver Twist' and 'David Copperfield.' And they really get into Shirley Temple films!"

Gibson said that his wife Robyn and their children (ages 8 months to 9 years) -- who are being raised "as country kids" on his cattle ranch in Victoria, Australia -- "keep me sane. They have no illusions about me, and they will always be my top priority....I'd be lost without them. That's why I always want my family with me, even when I'm filming. What's it all for if I'm away from them for a year? I can't forget I have a wife and kids."

The actor, 34, revealed he had a difficult time dealing with the pressures of the film business until he was 30 and developed "a positive mind-set."

Gibson recalled in Redbook, "When I was a little kid, my old man taught me the Ten Commandments. After he was through reciting them, he said, 'Now I'm going to tell you the eleventh commandment: 'Thou shalt not kid thyself.' Now I know what my father meant."

NORWALK, CT (JULY 9) PR NEWSWIRE - Leon C. Hirsch, chairman of United States Surgical Corporation (NYSE: USS), announced today that, "The Food and Drug Administration (FDA) has granted the company permission to market synthetic absorbable and nylon sutures under the 510(k) process." The FDA had previously granted USSC permission to market catgut and steel sutures.

Additionally, the FDA approved the company's petitions for reclassification of polypropylene and Dacron sutures, effective immediately, with 510(k) clearance expected shortly. USSC also expects reclassification and permission to market silk sutures shortly. The company plans to enter the $1.2 billion suture segment of the wound closure market with a complete suture line by the first quarter of 1991.

In a related matter, the FDA denied the reconsideration petition filed by Johnson & Johnson's Ethicon division regarding the FDA's decision to reclassify synthetic absorbable sutures. In a letter to Ethicon, Inc., John C. Villforth, director of the FDA's Center for Devices and Radiological Health, stated that, "Ethicon's view is simply wrong and at odds with the regulation's definition of valid scientific evidence." Reclassification from a Class III to a Class II medical device reduces the statutory process from several years to within as little as 90 days.

United States Surgical Corporation is the world's largest manufacturer and marketer of surgical staplers.

PLUMSTEADVILLE, PA. (JULY 9) PR NEWSWIRE - Global Environmental Corp. (NASDAQ: GLEN), a full-service environmental and bulk solids material-handling company, announced today that its Rage subsidiary received a contract totaling $1.3 million to design, supply and install a total automated conveying system to handle fertilizer for a Virginia-based company. The installation should be complete by the end of calendar year 1990.

Rage has also received a contract from a major airbag manufacturer to supply a totally automated system that will convey a chemical material that is used to energize automobile airbags. The system will be designed to meet all environmental emission requirements. The order has an approximate value of $300,000.

Global Environmental Corp., headquartered in Plumsteadville, provides engineering, manufacturing, installation and testing of environmental

systems, including bulk solids air conveying systems for industrial plants. The company has three wholly owned subsidiaries: Danzer Metal Works, Hagerstown, Md.; Texcon Inc., an engineering firm located in Greenville, S.C.; and Rage, Inc., a pneumatic conveying company located in Plumsteadville.

#90190p2557 07/09/1990 ~PR Newswire

COSTA MESA, CALIF. (JULY 9) PR NEWSWIRE - SPI Pharmaceuticals Inc. (AMEX: SPI) today reported that net income and sales in the second quarter were at the highest level of any second quarter in the company's history.

Net income rose to a record $4 million, or 32 cents a share, for the quarter ended May 31, 1990, from $3.8 million, or 31 cents a share, in the last year's second quarter. Sales rose to a record $32 million from $30.3 million in the same quarter a year ago.

The company said second quarter sales performance benefited from strong growth in its international operations, particularly Mexico and Spain.

In Mexico, where SPI is one of the largest pharmaceutical companies, sales growth was particularly strong, increasing 30 percent over last year's second quarter. Espaven, an anti- flatulent, registered strong sales growth in the quarter, rising 60 percent, as did the antibiotic Anapenil, which recorded a 61 percent growth in sales.

Sales growth in Spain, which was ahead 17 percent in the quarter, benefited from strong performance of Ranuber, an anti-ulcer medication, which was ahead 39 percent, and Calcitonina, an anti- osteoperosis compound, which increased 44 percent.

Efficiencies created by moving operations to a new facility in Spain earlier than originally planned, offset by related inventory and other expenses, benefited second quarter 1990 earnings with a gain of $960,000; second quarter earnings in 1989 also benefited from a one-time gain for the fulfillment of a licensing agreement.

SPI Pharmaceuticals Inc. manufactures, distributes and sells prescription and non-prescription pharmaceutical products, primarily in the U.S., Canada, Mexico and Europe. It is listed on the American Stock Exchange.

LOS ANGELES (JULY 9) PR NEWSWIRE - The board of directors of Western Waste Industries (NASDAQ: WWIN) has declared a two-for-one stock split of the corporation's common stock.

Kosti Shirvanian, chairman and president of Western Waste Industries, said the stock split, which will result in the issuance of one additional share for every share of Western Waste common stock, is payable on July 31, 1990 to shareholders of record as of July 18, 1990.

"This action by the board of directors reflects our confidence in Western Waste's long-term prospects and a sharing of that optimism with our shareholders," Shirvanian said.

As of March 31, 1990, Western Waste had approximately 6.5 million shares outstanding.

Western Waste Industries provides solid waste services, including commercial, industrial and residential collection, landfill and transfer station operations. The company has operations in California, Texas, Arkansas, Florida, Colorado, Louisiana and Arizona.

ATLANTA (JULY 9) PR NEWSWIRE - Telecom-USA, Inc. (NYSE: TTT) and Rochester Telephone Corp. (NYSE: RTC) announced today that the sale of Southland Telephone Co. to Rochester Telephone has been completed. The two companies announced they had signed a letter of intent for the transaction on March 23, 1990.

Southland, based in Atmore, Ala., is one of the largest independent telephone companies in Alabama, serving about 9,000 access lines in that state and another 3,000 access lines in Florida in an area located about 20 miles north of Pensacola.

Southland also has a 20 percent interest in two cellular Rural Service Areas in Alabama, which serve the Montgomery to Mobile corridor.

Under the terms of the agreement, Rochester Tel acquired Southland for approximately $37.1 million in cash. As previously announced, Jeff McGehee will continue as president and chief operating officer of Southland.

Rochester Tel's principal operating territory is a six-county area in Western-Central New York State. It now operates a total of 25 other telephone companies in nine states. When all pending acquisitions are completed, including Monroeville Telephone Company (Alabama), whose territory adjoins that of Southland Telephone Company, Rochester Tel will serve more than 680,000 access lines in 12 states.

Rochester Tel also owns three unregulated subsidiaries: RCI Long Distance a regional long distance Carrier; Rotelcom Network Systems, which provides competitive telecommunications equipment and services; and Rochester Tel Mobile Communications, which manages its Rochester cellular operation.

Telecom-USA, headquartered in Atlanta, is the nation's fourth largest long distance firm. The company is publicly traded on the New York Stock Exchange under the symbol "TTT."

On April 9, Telecom-USA announced a definitive agreement to merge with MCI Communications Corp., the country's second largest long distance firm. The merger is subject to certain regulatory approvals.

#90190p2561 07/09/1990 ~PR Newswire

AUSTIN, TX (JULY 9) PR NEWSWIRE - The Austin Independent School District (AISD) announced today that, as part of its ongoing Project A+ initiative with IBM Corporation, IBM will provide $4.4 million worth of computer hardware and educational software to AISD for classroom use. The grant will be used in three elementary schools to increase achievement levels for all students.

The grant is the largest to date made by IBM to a single school district. It will be used at the Andrews, Langford and Patton elementary schools in response to a proposal developed by two of the Project A+ momentum teams. All AISD elementary schools were eligible to compete for the grant, and 40 submitted proposals.

"We are very pleased and encouraged by this major contribution from IBM. This is yet another example of concrete action being taken by the momentum teams of Project A+," said Dr. Gonzalo Garza, AISD interim superintendent. "The cooperative effort embodied in this venture is a perfect example of the kind of results we all hoped for when Project A+ was started. We are proud to be joining IBM in this bold step."

"Equipping these schools with the latest in technology, as well as

learning and instructional management systems, is one of the key steps in making AISD a world-class school district," said Jerry Carlson, IBM Entry Systems Division vice president and Austin site general manager. "This grant is a result of IBM's partnership with AISD and reflects our mutual interest in raising student achievement levels."

Project A+ was started in 1989 by AISD and IBM to marshal community resources to ensure a quality educational environment. The partnership's goal is to build a model school system by the year 2000.

While the IBM grant will benefit all students in the selected schools, including high achievers, it has special advantages for at-risk students. These students have several traits which put them at greater risk of dropping out as they reach junior high and high school.

At-risk students typically are older than the norm for their grade level and have difficulty in reading and math. With the grant, additional attention given to students in grades 1-5 will help more students complete school.

In addition, average achievers and high achievers will benefit from courseware that challenges their skills. Programs such as "Writing to Read" and other courseware give children exciting, colorful, interesting technology that holds their interest and lets them work at their own pace.

CONTACT: Jeff Prescott of AISD, (512) 451-0683, or Lynn Denton of IBM Corporation, (512) 823-7418.

LONG BEACH, CALIF. (JULY 9) PR NEWSWIRE - AFSA Data Corp., the student loan processing subsidiary of Fleet/Norstar Financial Group, (NYSE: FNG) has established an office of the chairman, it was announced today by Richard E. Kipper, chairman and chief executive officer.

Office of the chairman executives are Kipper, Douglas A. Leafstedt, who joins AFSA Data as vice chairman and chief operating officer, and Steven E. Snyder, president.

Kipper said the management restructuring is intended to eliminate "certain routine day-to-day activities for Steve Snyder and me so that we can devote more of our time to spearheading corporate expansion and meeting the challenges of the rapidly changing student loan business."

Leafstedt will be responsible for AFSA's Guaranteed Student Loan (GSL) Division, with operations in Long Beach and in Utica, N.Y., as well as the company's data processing and administrative support departments.

In addition to working with Kipper to address broader corporate issues, Snyder will have responsibility for AFSA's Campus Based Division, the Costa Mesa Service Center, Inc., while also overseeing the sales, marketing and client relations department.

"I believe this new management structure is an exciting and positive development for our company and one that will enhance AFSA's future growth and success," Kipper said.

Fleet/Norstar Financial Group is a diversified national financial services company listed on the New York Stock Exchange. Fleet/Norstar has approximately 1,000 offices in 40 states. Its lines of business include commercial and consumer banking, mortgage banking, consumer finance, asset-based lending, trust banking, student loan processing, and investment banking.

#90190p2570 07/09/1990 ~PR Newswire

BOSTON (JULY 9) PR NEWSWIRE - The Tennessee Valley Authority has selected Stone & Webster Engineering Corporation to upgrade a 550-megawatt unit at its Widows Creek Fossil Plant near Stevenson, Ala.

Stone & Webster will provide engineering, design, procurement, and construction services for the $31.5 million program, which will convert and improve the operation of the unit's pollution control system.

Stone & Webster will start engineering work immediately and begin the construction phase in April 1991. All improvements are scheduled for completion during a planned outage in late 1991.

The company will retrofit a portion of the unit's scrubber, a pollution control system that uses limestone to remove the sulfur dioxide generated during the burning of coal.

The new equipment pulls air through the scrubber instead of pushing it through the system. In doing so, it will improve the efficiency and extend the life of the overall pollution control system. The improved system also will meet the requirements of the proposed national Clean Air Act.

Stone & Webster's Boston and Chattanooga offices will execute the work. Stone & Webster Engineering Corporation, a subsidiary of Stone & Webster, Incorporated (NYSE: SW) of New York City, engineers and constructs electric power, oil/gas processing, petrochemical, chemical, industrial

and civil works facilities around the world.

With headquarters in Boston, Stone & Webster has full-service offices in New York, Chicago, Houston, Denver, Fort Lauderdale, and Cherry Hill, N.J., and maintains south regional offices in Decatur, Ala., Chattanooga and Oak Ridge, Tenn., and Aiken, S.C.

CONTACT: Martin Reynolds of Stone & Webster, (617) 589-1905.

#90190p2573 07/09/1990 ~PR Newswire

MILAN, ITALY (JULY 9) PR NEWSWIRE - The Ferruzzi Group subsidiary Montedison S.p.A. (NYSE: MNT) said today that, as part of its strategy to focus on specialized applications, it has acquired Hercules Incorporated's (NYSE: HPC) 50 percent interest in their equally-owned Moplefan joint venture. Moplefan is a leading European producer of polypropylene staple, yarn and film. The agreement, which has already been signed, gives Montedison 100 percent ownership of Moplefan.

Full control of Moplefan will allow Montedison to attain important strategic objectives. Montedison will now be able to give stronger emphasis to the development of this sector, utilizing Moplefan's current production facilities in Terni, Italy (staple, yarn and film), in Liege, Belgium (film) and in Brantham, England (film). Also, Montedison will now be able to integrate the company, with its advanced production technology, into the overall global materials structure of the Montedison Group.

Montedison will be able to achieve significant production, technological and research synergies through the collaboration of Moplefan with Himont in the polypropylene field, with JMont in the household paper sector and with Novamont in the area of chemicals from renewable sources.

Moplefan's expansion outside of Europe was initiated in April of last year when the company signed an agreement with Kolon Industries Inc. of Seoul, Korea for the establishment of an equally owned venture in South Korea for the production and marketing of polypropylene staple. The Korean plant, with annual production capacity of 12,000 tons, is expected to come on-stream in January 1991.

Moplefan currently has total production capacity of 120,000 tons per year. Over the past three years, the company has invested 100 billion lire in acquisitions and in the expansion and optimization of its existing production facilities.

Moplefan's 1989 sales revenues were approximately 320 billion lire. The company employs 1,750.

Moplefan has two well-known trademarks: Meraklon (yarn and staple) and Moplefan (film). A wide range of products, including hygienic and sanitary products, carpets, carpet tiles, outdoor carpeting and furniture, sportswear and underwear are made from Meraklon fibers. Moplefan film is used in packaging for food, clothing and consumer goods.

The Ferruzzi Group is a leading international industrial system which operates in the chemical, pharmaceutical and energy sectors through Montedison and in the agro-industrial sector through Eridania, with an aggregate turnover of approximately $40 billion.

NEW YORK (JULY 9) PR NEWSWIRE - National Health Laboratories Incorporated (NASDAQ-NMS: NHLI) announced today that it filed a registration statement with the Securities and Exchange Commission relating to a secondary domestic and international public offering of approximately 13 million shares of its common stock.

Substantially all of such shares are being offered by Revlon Health Care Group, Inc., which presently owns 94 million shares. The common stock is traded on the NASDAQ National Market System and its last sales price on July 6, 1990, was $14.50 per share. In addition, the company announced that it had declared a special dividend of $1.52 per share of common stock to holders of record at the close of business on July 19, 1990. Such dividend will be payable July 24, 1990.

Lehman Brothers will be the lead manager for the domestic offering with the First Boston Corporation and Lazard Freres & Co. as co- managers. Credit Suisse First Boston Limited will be the lead manager for the international offering with Lazard Brothers & Co., Limited and Lehman Brothers International as co-managers.

National Health Laboratories is one of the leading clinical laboratory companies in the United States with a network of major laboratories throughout the country.

NEW YORK (JULY 9) PR NEWSWIRE - Douglas M. Garber, president of The Theme Factory Inc. (OTC), a Philadelphia-based producer of special events and

theme parties and manufacturer of props and displays for retail and hospitality customers, and Orested Guerrini, president of Co-gno-scen-ti Ltd., announced today the signing of a letter of intent for The Theme Factory Inc. to acquire Co-gno-scen-ti Ltd. of Brooklyn, N.Y.

The terms of the agreement provide for The Theme Factory Inc. to acquire Co-gno-scen-ti Ltd. through a tax-free exchange of securities.

Co-gno-scen-ti Ltd. is a manufacturer of fiberglass display items for retail and hospitality clients. The company recently completed a large order of fiberglass urns for the Taj Mahal Hotel and Casino in Atlantic City, N.J. They also supplied the new Mirage Hotel and Casino in Las Vegas, with several items for its recent opening. The company has supplied display products for department stores which include Bloomindale's, Macy's John Wanamaker and others.

The company will continue to operate under the Co-gno-scen-ti name as a wholly owned subsidiary of The Theme Factory.

The Theme Factory Inc. said it plans to expand the Co-gno-scen-ti product line to include items used in the production of special events, theme parties, displays and exhibits.

#90190p2584 07/09/1990 ~PR Newswire

MINNEAPOLIS (JULY 9) PR NEWSWIRE - Derata Corporation, pioneer developer in insulin pressure injection (needle-free) for diabetics announces the introduction of its all new "Tender Touch" injector device for diabetic patients. With models available for both adults and children the "Tender Touch" insulin injector has a number of major advantages over conventional hypodermic needle insulin administration.

First and foremost, the use by diabetics is virtually painless since there is no longer any need to use a needle for penetrating the skin in order to inject insulin. Secondly, there is far less skin tissue breakdown when administering insulin with "Tender Touch." Thirdly, the "Tender Touch" takes all of the guess work out of measuring the exact amount of insulin that one needs to take.

Still another major advantage is that with the new injector, it takes less than one third of a second to administer insulin compared to four to seven seconds with a conventional hypodermic needle. In addition, fear from infection due to dirty needles is completely eliminated as well as the worry and concern about needle disposal ... And, with Derata

Corporation's new device, an even distribution of insulin is obtained at the point of injection.

Derata Corporation is the world's pioneer developer of needle-free insulin injection systems. Founded in 1979, the Minneapolis firm has developed a unique technique for injecting insulin based on a minute column of pressurized insulin spray rather than by the use of needles. Kenneth Dunlap, founder of the firm, stated: "when I developed our first needle free injector, it was based on the premise that conventional hypodermic needle use by diabetics caused unnecessary pain and anxiety. It is indeed gratifying to know that thousands of diabetics, including my own son, no longer need to have these worries.

"Now, with the introduction of 'Tender Touch' we have a revolutionary new model, which is lightweight, easy-to-use, and virtually pain free. Its small compact size and streamlined appearance makes it very convenient to carry in one's pocket or purse." Dunlap went on to say, "it gives me a great deal of satisfaction to see the tremendous excitement our newest generation of needle free insulin injection devices has brought to the diabetes community. To see the expression on the faces of users is a fantastic personal reward for me."

DAYTON, OH (JULY 9) PR NEWSWIRE - Mead Data Central, Inc. and Star Data Systems, Inc. announced today an agreement to combine Star Data Systems with Dataline, Inc., strengthening the ability of the combined companies to serve the Canadian financial information market.

Under the agreement, Star Data Systems of Markham, Ontario, acquired all the issued and outstanding shares of Dataline of Toronto, a Mead Data Central subsidiary. In exchange, Mead Data Central received 15.1 million preferred shares of Star Data Systems, representing 36 percent of fully diluted equity. The agreement involved only a transfer of shares. The agreement is effective immediately, and there will be no interruption in customer commitments.

"We are excited by the opportunity to join forces with a high-caliber company such as Star Data Systems," said Jack W. Simpson, president of Mead Data Central. "This arrangement benefits both parties and best serves the interests of all our customers."

"We're delighted to join forces with the other technological leader in the Canadian marketplace," said Michael Grenier, president of Star Data Systems. "We plan to use the technology of both companies to build a

strong, profitable and diversified information organization."

Dataline provides services to the Canadian financial community. Its principal product is Canquote(TM), a real-time equity, bond, commodity, option, and mutual funds quote service. In addition, customers are provided with access to real-time news reports and a variety of financial databases.

Dataline also provides cash management services to major Canadian banks. The firm has sales offices in Montreal, Vancouver, Calgary, Halifax, Toronto, and London, England.

Dataline was acquired by Mead Data Central in late 1987. In December 1989, a gateway was developed to deliver real-time equity, bond and mutual fund information to the more than 230,000 users of Mead Data Central's LEXIS(R) and NEXIS(R) services. This gateway will continue under the agreement announced today.

Star Data Systems is the provider of Starquote(R), a service that delivers real-time stock, commodity, option, bond and fund information to customers concentrated mainly in Canada, but located throughout North America. Today's agreement is not expected to have any material impact on Mead Data Central's financial results for the year.

Mead Data Central is a wholly-owned subsidiary of the Mead Corporation (NYSE: MEA), a leader in forest products. Both companies have headquarters in Dayton, Ohio.

CONTACT: James M. Joseph of Mead Data Central, (513) 865-6958, or Karen Girling of Star Data Systems, (416) 362-8000.

AUSTIN, TEXAS (JULY 9) PR NEWSWIRE - Scientific Measurement Systems, Inc. (SMS) (NASDAQ: SCMS) today reported net earnings of $126,000, or 1 cent a share, on revenues of $1,729,000 for its third quarter which ended April 30.

In the year-earlier period, the maker of advanced X-ray quality inspection equipment had net earnings of $104,000, or 1 cent a share, on revenue of $2,163,000.

For the first nine months of the current fiscal year, SMS has posted profits of $272,000, or 2 cents a share, on revenue of $5,245,000. In the same period in 1989, the company earned $480,000 on $4,418,000 million in revenue.

During the third quarter, SMS delivered its first system to a Japanese buyer and received an order from the Swiss Federal Laboratory for Materials Testing and Research (EMPA) of Dubendorf, Switzerland. EMPA is the official materials testing organization of the Swiss federal government.

PARAMUS, N.J. (JULY 9) PR NEWSWIRE - St. Joseph's Hospital in Savannah, Ga., announced it has become the sixth hospital nationwide to offer pre-hospital, medical emergency treatment using the MDphone System from MEDphone Corporation (NASDAQ: MPHO), Paramus.

St. Joseph's Hospital, with a nationally recognized cardiology department, will be the only institution to offer this service in the three-county region of Hilton Head, S.C., Beaufort, S.C., and Savannah.

With the MDphone System, a trained medical professional at St. Joseph's will be able to diagnose and treat medical emergency patients via the system's portable "briefcase," before they are brought to the hospital, according to S. Eric Wachtel, president of MEDphone Corp.

This "briefcase" is a sophisticated device which will automatically dial and telephonically link the site of a medical emergency with St. Joseph's Emergency Room, MDphone base-station, in seconds. From there, a trained, medical professional will assess the patient's condition by verbally communicating with those at the site. The MDphone System will also allow the doctor or nurse to monitor, from the hospital, the patient's electrocardiogram (heartbeat and pattern) and to implement the most appropriate action within a matter of minutes.

If the patient were to be suffering a heart attack, the MDphone System would enable the attending St. Joseph's clinician to remotely defibrillate (electrically shock) the victim's heart.

A major emphasis of the program will be to lease portable units to corporate subscribers.

"We feel the MDphone will extend our hospital's capabilities into the community and integrate well into our overall system of cardiac care," stated Dr. J. Kent Cresy, director of emergency medicine at St. Joseph's Hospital and the medical coordinator for the program.

MEDphone Corporation's headquarters are located at the Atrium, Suite 2, Route 4 East, Paramus, N.J., 07652; phone: 201-843-6644.

PHILADELPHIA (JULY 9) PR NEWSWIRE - Consolidated Rail Corp. (Conrail) (NYSE: CRR) is investing almost $1.2 million to upgrade sections of its Cleveland Line, which links Cleveland and Alliance, Ohio.

The project, which began in May and is scheduled to be completed this summer, is part of Conrail's capital program for 1990. The work includes the surfacing (raising and smoothing) of almost 60 miles of supporting railbed.

Commodities carried by trains using the Cleveland Line include auto parts and finished vehicles, coal, steel, grain, miscellaneous freight, and chemicals. In addition, highway trailers and marine containers, carrying a wide variety of consumer products, are transported on the line by

Conrail's high-speed, high priority Trailvan intermodal trains.

"Conrail's capital program ensures safe, reliable and customer- responsive service," said James A. Hagen, Conrail's chairman, president and chief executive officer. "Projects such as this will provide a sound track structure essential to Conrail's ability to compete in the transportation marketplace."

BETHLEHEM, PA. (JULY 9) PR NEWSWIRE - Bethlehem Steel Corporation (NYSE: BS) announced today that it has selected two Pennsylvania firms to provide the mechanical and electrical equipment and furnaces for new sheet coating lines and at its Burns harbor, Ind., and Sparrows Point, Md., steel plants.

In connection with the pending contract awards, Walter F. Williams, Bethlehem's chairman and chief executive officer, said the company's board of directors has authorized capital appropriations of about $300 million for the construction of these two hot-dip coating lines. These new facilities are part of Bethlehem's capital improvement program to add substantially to its sheet coating capabilities at the two plants.

Davy McKee Corporation, Pittsburgh, has signed a letter of intent to design, manufacture and deliver the mechanical and electrical equipment for the two lines. A second letter of intent calls for Drever Company, Huntington Valley, Pa., to design, build and install the two furnaces, one each for Burns Harbor and Sparrows Point. Electrical equipment for both lines will be furnished by Reliance Electric Company, Cleveland, as a supplier to Davy McKee.

Financing for the two lines will be provided primarily by a consortium of leading Japanese trading companies.

Williams said the two new hot-dip coating lines will supply customers with the highest quality sheet products available for the growing automotive and non-automotive coated sheet markets.

The Burns Harbor line will consist of a state-of-the-art 72-inch line capable of producing 450,000 tons of hot-dip galvanized and galvannealed products per year. Bethlehem said that the new facility, together with existing electrogalvanizing capacity, will strengthen its already strong competitive position in coated sheet products for the automotive market.

FORT WORTH, TX (JULY 9) PR NEWSWIRE - Tandy Corporation (NYSE: TAN) announced today that its board of directors has approved the formation of the Tandy Employees Stock Ownership Plan and trust ("TESOP") and the issuance and sale of approximately $100 million of its new Series B TESOP convertible preferred stock to the TESOP. The Series B preferred stock will be convertible into Tandy common stock at a price to be determined.

The TESOP will issue $100 million of TESOP Notes, payment of which will be guaranteed by Tandy. The TESOP will use the proceeds from the sale of the notes to purchase the Series B preferred stock and will retire the notes through the dividends payable on the Series B preferred stock and contributions made by Tandy.

The company intends to use the proceeds it receives from the sale of the Series B preferred stock to purchase shares of its outstanding common stock in the open market.

Employer contributions previously made to Tandy's Deferred Salary and Investment Plan, a 401(k) plan, in the future will be made to the TESOP. Employees will continue to invest five percent of their wages in the Deferred Salary and Investment Plan in order to receive the employer contributions in the TESOP.

The company considers the formation of the TESOP a significant method to further support its long-standing programs to encourage employee stock ownership.

NEW YORK (JULY 9) PR NEWSWIRE - Sir Gordon White, chairman of Hanson Industries, the U.S. arm of Hanson PLC (NYSE: HAN), announced today that Hanson has sold its Baltimore Spice business unit to an affiliate of Fuchs Gewuerze GmbH for approximately $23.9 million in cash.

Hanson Industries will retain the retail Old Bay Seasonings business, which is not included in the sale. Baltimore Spice will continue to manufacture the Old Bay product line for Hanson. Old Bay is a premier consumer brand name in seafood seasonings in the mid-Atlantic region.

Sir Gordon said, "While this is an excellent transaction for Hanson, we are also confident that Fuchs's leadership position in the spice business

in Europe will help create a bright future for Baltimore Spice."

For the fiscal year ended Sept. 30, 1989, Baltimore Spice recorded an operating loss of approximately $1 million on sales of $53 million. Net asset value is approximately $23.9 million.

Baltimore Spice, Inc., headquartered in Garrison, Md., has plants in Maryland, North Dakota and Nevada. Established in 1939, Baltimore Spice has grown from a modest grinder of a few imported spices to be a major producer of spices and custom blended seasonings for industrial uses.

Hanson acquired Baltimore Spice in 1986 as part of its $930 million acquisition of SCM Corporation. This brings to $1.6 billion the total proceeds Hanson has realized from the sale of SCM assets.

Fuchs Gewuerze GmbH, headquartered in Germany, is the second largest spice and seasoning manufacturer and retailer in Europe. The 40-year- old company is an acknowledged innovative leader in the spice industry with manufacturing plants in Europe and South America.

Hanson PLC is a British-American industrial management corporation. In the U.S., Hanson Industries' operations include SCM Chemicals, Peabody Holding Company, Jacuzzi Whirlpool Bath and Spa Products, Grove Crane, Ames Tools, Universal Gym, Endicott Johnson and Frye Footwear, Hanson Lighting Group, Kaiser Cement, Weber Aircraft, Farberware Cookware, and Gold Fields Mining among others.

In the United Kingdom, Hanson's holdings include Imperial Tobacco, Ever Ready Batteries, ARC Aggregates, London Brick, Butterley Brick, and Smith Meters.

ATLANTA (JULY 9) PR NEWSWIRE - As part of an ongoing move to increase the automated distribution of its product line, American Express Vacations today announced it has signed a contract with World ComNet, distributors of the Tourinc automated tour booking database.

The agreement calls for American Express Vacations products to become available through Tourinc, allowing travel agents to make automated tour reservations.

"This agreement continues our move to make the American Express Vacations product line available through as many channels as possible," said Rigsby B. Barnes, vice president, American Express Vacations. "We found

Tourinc's broad distribution base a plus, and were impressed by the number of other wholesalers participating."

Tourinc, which has 118 participating tour operators, is currently available to System One travel agents. In addition, World ComNet also has a contract with Covia for distribution through Apollo, with plans to initiate other contracts for additional distribution outlets in the near future.

American Express Vacations is a unit of American Express Travel Related Services Company, Inc., a family of travel, financial, insurance, and communications businesses, and a wholly owned subsidiary of the American Express Company.

Headquartered in Irvine, Calif., World ComNet, Inc. is a subsidiary of WCN Investment Corp.

HOUSTON (JULY 9) PR NEWSWIRE - NaTec Resources, Inc. (NASDAQ: NATC) today announced the signing of a letter of intent to purchase AER*X, a division of RMT, Inc. a full-service environmental consulting and engineering firm. Terms were not disclosed.

AER*X is the nation's only company specializing in emission credit trading and also provides services in air permitting, air toxic issues, rule

development, and control technology assessments.

The Washington-based company will become a wholly owned subsidiary of NaTec Resources, Inc. with the objective of helping companies reduce compliance costs and realize substantial financial gains through air emissions credit trading and brokering.

"The acquisition of AER*X, the country's only emissions trading firm, is part of NaTec's strategic plan to become the leading environmental company serving the clean air market," said Socrates Christopher, chairman and chief executive officer of NaTec.

John Palmisano, president of AER*X and a former EPA official, observed, "The emission credit trading market is projected to be in excess of $250 million on an annual basis by 1995."

NaTec is committed to the control of pollutants commonly associated with acid rain. The company provides consulting engineering, injection system installation, operations and maintenance services, and processed sorbent supply. Primary markets are utility, industrial power generation, pulp and paper, refining, and municipal solid waste.

BUFFALO, NY (JULY 9) PR NEWSWIRE - Barrister Information Systems Corporation (AMEX: BIS) today announced it has successfully completed an exchange of all its outstanding 1989 13 percent Subordinated Convertible Debentures due Sept. 30, 1999 in the principal amount of $2,320,000 and $57,000 of its outstanding 1984 12 percent Subordinated Convertible Debentures due Sept. 30, 1991 for a new 13 percent Subordinated Convertible Debenture due June 30, 2000. As a result of the exchange the company has realized $794,410 in additional working capital as a private placement.

The aggregate principal amount of the new debentures outstanding after the exchange is $3,171,410 and the aggregate principal amount outstanding for the 1984 debenture has been reduced to $550,000 from $607,000.

As a condition to participation in the exchange, each participating debenture holder made an additional investment equal to thirty-three percent (33 percent) of the principal amount of their respective outstanding debentures surrendered as part of the exchange.

The new debentures received by a debenture holder participating in the exchange may be converted into common stock of the company at a price of

$1.00 per share until June 30, 1995 and, thereafter, at $4.00 per share until June 30, 2000. The new debentures may be redeemed by the company after June 30, 1995 and will be repaid in five equal installments beginning June 30, 1996. The company filed a Schedule 13E-4 on June 2, 1990 in connection with the exchange.

Henry P. Semmelhack, president of Barrister, said that the exchange enabled the company to raise additional funds which would be used primarily for working capital.

Semmelhack also stated that included among those debenture holders participating in the exchange and private placement were certain of the company's officers and directors who invested $310,300 of the total proceeds realized.

#90190p2619 07/09/1990 ~PR Newswire

NEW YORK (JULY 9) PR NEWSWIRE - The Centaur Partners Group today sent the following letter to all stockholders of National Intergroup, Inc. (NYSE: NII):

After seven straight years of losses from continuing operations and what we regard as a history of many broken promises to shareholders, the board of National Intergroup has rejected Centaur's plan which we believe will "most likely" deliver more than $28 per share to stockholders. Instead, the board has outlined a restructuring program which it claims will maximize stockholder value.

The board has left us in the dark about the specific details. They have not estimated how much stockholders will receive under NII's announced dividend or buy-back program or what the restructuring program is worth to stockholders.

We have no confidence that the board will keep its promises this time to deliver value to stockholders. We believe that stockholders should consider the company's recent promises in light of its past actions. Its history is filled with what we believe are examples of broken promises, bad judgment and disregard for stockholders.

In May 1985, when Leucadia waged a proxy contest to replace the NII directors, the board promised "(to make) a substantial portion of any sale proceeds (from the sale of certain NII businesses) available to stockholders through a stock repurchase program or other means." In December 1985, NII sold First Nationwide Financial Corp. for $401 million.

None of the proceeds from this sale were ever made available to stockholders through any means. Not only that, but NII's stock price has fallen by 35 percent since the closing of the First Nationwide sale (through June 28, 1990).

As the largest stockholder in the company, our interests are the same as all other stockholders. Remember -- the board in aggregate owns less than 1 percent of the shares. Why is the board so afraid of meaningful stockholder representation? Why is the board planning to spend approximately $5.5 million of the company's funds to resist meaningful stockholder representation?

Based on the board's history of many broken promises to stockholders, we don't trust its recent promises to deliver value this time. Elect our slate of nominees to insure that stockholders have meaningful representation on the board.

If you have any questions about giving your proxy or require assistance, please contact: Georgeson & Company Inc., 800-223-2064.

#90190p2620 07/09/1990 ~PR Newswire

LOS ANGELES (JULY 9) PR NEWSWIRE - Frederick's of Hollywood Inc. (AMEX: FHO) today reported a 20 percent increase in both sales and earnings for the third fiscal quarter ended June 2, 1990.

Net earnings for the third quarter of the current fiscal year advanced to $731,000, equal to $.13 per share, from $607,000, or $.11 per share, last year. Sales rose to $24,230,000 from $20,093,000 a year ago.

For the nine months ended June 2, 1990, net earnings increased 40 percent to $3,176,000, equal to $.56 per share, from $2,266,000, or $.41 per share last year. Sales rose to $74,506,000 from $60,807,000 for the year-to-date period of the prior fiscal year.

Earnings per share amounts have been adjusted to reflect two 3-for-2 stock splits distributed Sept. 27, 1989 and June 15, 1990.

George W. Townson, chairman and chief executive officer, said the Frederick's of Hollywood retail stores posted the most appreciable gains over the corresponding prior year period. He noted that during the third quarter, the company opened eight new Frederick's stores, and one was closed. On a comparable store basis, sale for the Frederick's stores advanced 10 percent. Overall sales growth for the store network was 19

percent.

Townson said the mail order subsidiary posted a 25 percent sales increase during the third quarter, due primarily to a greater number of catalogs mailed.

"Operating results for the quarter were better than originally expected," said Townson. "Expenses associated with the move of our mail order subsidiary amounted to less than $100,000, which was lower than anticipated. In addition, retail sales strengthened toward the latter part of the quarter," Townson added.

At the close of the third quarter, the company operated 171 specialty apparel stores in 36 states and a mail-order division that serves customers in all 50 states.

BASKING RIDGE, NJ (JULY 9) PR NEWSWIRE - AT&T (NYSE: T) will offer special low rates on calls to France from a dozen U.S. metropolitan areas

for a three-day celebration of Bastille Day from July 13 to July 15.

Bastille Day is meant to celebrate the liberty and equality of the French people, which began with the French Revolution. Bastille Day is observed in France in commemoration of the July 14, 1789, destruction of the Bastille, a prison where many of the French revolutionaries were incarcerated. Its celebration is similar to the U.S. Independence Day on July 4.

France is the sixth most frequently called country from the United States, according to The World's Telephones, a statistical annual published by AT&T.

From July 13 to July 15, a 10-minute, direct-dialed call to France will cost $7 from 12 U.S. metropolitan areas. Area codes in the promotion are: New York (201, 212, 718, 914, and 516); Los Angeles (213, 818, 714); San Francisco (415, 408); Washington (202, 301, 703); Philadelphia (609, 215); Miami (305, 407); Boston (508, 617, 413); San Diego (619), Hartford (203), Atlanta (404), and Minneapolis (612).

The Bastille Day rates reflect a 38 percent savings over standard rates. Customers of the AT&T Reach Out(R) World plan will pay 62 cents per minute for each of the first 10 minutes and 59 cents per minute for each additional minute.

This is the fourth year AT&T has offered a Bastille Day calling discount. In the past year, AT&T has also offered similar discounts on calls to the United Kingdom on Remembrance Day, to Canada on Canada Day and Canadian Thanksgiving, to the Philippines on Philippines Independence Day, to Japan on Respect for Elders Day, to Australia on Australia Day, to Ireland on St. Patrick's Day, and to all 167 direct- dialed countries on Valentine's Day.

NEW YORK (JULY 9) PR NEWSWIRE - Mizlou Communications Company, Inc. (NASDAQ: MZLUL, MZLU), today announced that it has called for redemption on July 26, 1990 (the redemption date) all of its outstanding Class A redeemable common stock purchase warrants (NASDAQ: MZLUW), at the redemption price of $0.05 per warrant. Each warrant entitles the holder to purchase one share of common stock for $1.00 per share. Until 5 p.m., New York time on the redemption date, a warrant holder may exercise his Class A warrants for common stock, sell his Class A warrants in the

over-the-counter market or submit his warrants to the warrant agent for redemption. In connection with the warrant call, the company has entered into a standby purchase arrangement with PaineWebber Incorporated and Commonwealth Associates, pursuant to which they have agreed, subject to certain conditions, to purchase at $0.90 per share such number of shares of common stock as would be issuable on the exercise of the Class A warrants which are not exercised by the warrant holders before the close of business on the redemption date.

In addition, the company has engaged PaineWebber Incorporated to assist it in obtaining additional financing for operations of Mizlou's Sports News Network (SNN), the nation's first and only 24 hour, seven- day-a-week basic cable sports news and information service.

NEWPORT NEWS, VA (JULY 9) PR NEWSWIRE - The Flight International Group, Inc. today successfully cleared a significant hurdle in its restructuring effort by reaching an agreement to settle three consolidated securities class-action lawsuits pending against the company. The lawsuits, which were filed in Atlanta, alleged that Flight International's financial statements for fiscal 1988 and 1989 were inaccurate.

The settlement calls for Flight International to contribute 340,000 shares of its common stock to be distributed to those who purchased Flight International common stock between June 21, 1988 and Sept. 29, 1989. The overall settlement, including Flight's contribution of 340,000 shares, is valued at approximately $5.25 million.

Flight's recently appointed Vice President and General Counsel, Jeanne Huber said, "When our new management team first became involved with Flight International in April, 1990, it was obvious that the pending class - action law suits were a major obstacle to the company's ability to move forward. This agreement is the first major step in our attempt to successfully restructure Flight International."

Prior to the settlement becoming final, a definitive settlement agreement must be prepared and approved by Judge Jack T. Camp of the U.S. District Court in Atlanta. The approval process is expected to take approximately 90-120 days.

The Flight International Group, Inc. is a leader in aviation services with interests in government and military contracts as well as commercial flight operations.

#90190p2637 07/09/1990 ~PR Newswire

DALLAS (JULY 9) PR NEWSWIRE - Herbert D. Kelleher, chairman of the board and president of Southwest Airlines Co. (NYSE: LUV), announced today that the company flew 883.3 million revenue passenger miles (RPMs) in June 1990 a 1.4 percent increase over the 870.9 million RPMs flown in June of last year. Available seat miles (ASMs) increased 8.6 percent to 1,383.3 million from the June 1989 level of 1,273.5 million ASMs. The load factor for the month was 63.9 percent, down 4.5 points from last year's unseasonably high load factor of 68.4 percent.

For the second quarter of 1990, Southwest flew 2,558.6 million RPMs compared with 2,403.6 million RPMs recorded for the same period in 1989, an increase of 6.4 percent. Available seat miles increased 9 percent to 4,109.7 million from the 1989 second-quarter level of 3,771.2 million. The 1990 second quarter load factor was 62.3 percent compared to 63.7 percent for the same period last year.

The company indicated that the 68.4 percent load factor for June 1989 and the 63.7 percent load factor for the second quarter of 1989 were the highest such figures reported by Southwest since 1985. However, the 883.3 million RPMs reported for June 1990 are second only to August 1989. The second-quarter traffic performance continues the strong traffic results registered in first quarter 1990. Southwest placed an additional four aircraft in service during the second quarter, while introducing new service in Burbank, Calif.

For the first six months of 1990, Southwest flew 4,883.8 million RPMs compared with the 4,615.8 million RPMs recorded for the same period in 1989. Available seat miles increased 11.2 percent to 7,961.6 million from the year-to-date 1989 level of 7,157.3 million. The year-to-date load factor was 61.3 percent compared to 64.5 percent for the same period last year.

NEW YORK (JULY 9) PR NEWSWIRE - Merrill Lynch & Co., Inc. (NYSE: MER) today said that Courtney F. Jones, formerly executive vice president, chief financial officer and a member of the board of directors, has announced he will leave the firm by the end of 1990 to pursue other career opportunities.

Jones, most recently a managing director in the Investment Banking Division, will remain at Merrill Lynch for the next several months to complete his current assignments and to assist in other strategic and operational matters.

"Courtney's association with Merrill Lynch over the past five years has been an extremely productive one," said Chairman and CEO William A. Schreyer and President and COO Daniel P. Tully. "While we're sorry to see him go, we understand his desire at this particular point in his career to seek new professional challenges, and we wish him every success in his new endeavors."

Commenting on his decision, Jones said: "In order to continue the career progress I've enjoyed in the past, I must pursue new professional challenges that will permit me to best use the financial and strategic management skills that I've developed at Merrill Lynch, and before that, at General Motors. As many companies in a variety of different industries enter the 1990s facing the need to refine their operational and financial

strategies to be more globally competitive, I look forward to exploring various opportunities to extend my career horizons."

As chief financial officer for four years, Jones led Merrill Lynch's effort to establish and implement sophisticated new financial management and control processes which contributed significantly to the firm's performance and to its long-term prospects. As a member of the executive committee and board of directors, he was instrumental in formulating the firm's global operating strategies. Most recently, he has had senior responsibilities for providing strategic advice to selected major corporate clients of Merrill Lynch's global Investment Banking Division.

During a 23-year career at General Motors, he gained wide experience in a variety of operational and financial positions, both domestically and internationally, including four years as GM's treasurer and secretary to the finance committee of the GM board of directors. He played a key role in GM's acquisition of several major companies -- including Electronic Data Systems Corporation and the Hughes Aircraft Company -- in connection with which he was instrumental in developing an innovative new class of equity security which pays dividends based solely on the acquired company's operations.

PHOENIX, AZ (JULY 9) PR NEWSWIRE - Honeywell's (NYSE: HON) Industrial Automation and Control Division today has added 44,000 square feet, nine classrooms and 31 new Phoenix-area professional and service jobs with the opening of its expanded training facilities at 2820 W. Kelton Lane, the former Southwest Gas facility. The announcement is part of a long-term plan to establish and maintain Honeywell's customer facilities as the paragon of the control industry. The various markets served by the division include refining and bulk chemicals, fine chemicals, pharmaceuticals, food and consumer goods, pulp and paper, power generation and metals.

Honeywell's Automation College coordinates the worldwide planning, development and implementation of training courses on Industrial Automation and Control Division products. In addition to Phoenix, training centers are located in the United States in Houston; Fort Washington and York, Pa., and worldwide in Australia, Belgium, Canada, Japan, Mexico and Venezuela.

The new center will attract additional Honeywell customers and increase spending dollars in the Phoenix area by nearly 66 percent. In 1989, for

example, nearly 3,000 students visited Honeywell's Automation College at division headquarters. During that 12-month period, students stayed an average of eight days and spent nearly $3.5 million in local Phoenix hotels, shops and restaurants. In 1990, more than 5,000 students are expected to visit the training facilities and spend more than $6 million.

The 60 different classes available at the new training center are designed to teach Honeywell customers how to install and implement the company's automation and control systems. Many customers are engineers, operators or maintenance engineers from pulp and paper mills or refineries who have recently purchased Honeywell equipment and require training to successfully install and operate their systems. Other customers include students taking refresher or advanced courses. Many bring their spouses and family during their average eight-day visit.

Training is provided by more than 50 Honeywell instructors, all of whom receive extensive training on the division products and applications. Classes operate under a recently implemented "FlexTraining(TM)" philosophy which allows students to work at their own pace and interact individually with course instructors as they progress through the course modules. Coursework is divided between self-paced study periods and hands-on experience in the lab, where a complete range of Honeywell products from TDC 3000 distributed control systems to smaller systems such as the 620 Logic Controller are available for student use.

Honeywell is a global controls company that provides products, systems and services for homes and buildings, industry, and aviation and space. The company had 1989 sales of $6.1 billion.

DALLAS (JULY 9) PR NEWSWIRE - Texas Instruments Incorporated (NYSE: TXN) today filed actions against five semiconductor manufacturers who are packaging, importing and selling integrated circuits using a TI- patented process without having licenses under TI patents.

TI filed a patent infringement lawsuit in Federal District Court in Dallas against Analog Devices, Inc. of Norwood, Mass.; Cypress Semiconductor Corporation of San Jose, Calif.; Integrated Device Technology, Inc. of Santa Clara, Calif.; LSI Logic Corporation of Milpitas, Calif.; and VLSI Technology, Inc. of San Jose, Calif. These five manufacturers are infringing TI patents that cover an integrated circuit packaging process known as plastic encapsulation.

TI also filed a complaint with the International Trade Commission (ITC)

against the same manufacturers for importing and selling plastic encapsulated integrated circuits in the United States without a license under TI's patent. The complaint was filed under Section 337 of the Tariff Act of 1930.

These actions reflect TI's continuing concern with appropriate protection of intellectual property in the United States and abroad.

The lawsuit in Federal District Court also includes a claim for past damages for unlicensed use of another TI patent related to plastic encapsulation. Two other TI patents, which disclose a type of cache tag chip and a circuit and procedure for testing programmable logic chips, are being asserted against VLSI Technology and Cypress Semiconductor, respectively.

Texas Instruments Incorporated, headquartered in Dallas, is a high-technology company with sales and manufacturing operations in more than 30 countries. TI develops, manufactures and markets semiconductors, defense electronics systems, software productivity tools, computer systems industrial automation and control systems, electrical controls, metallurgical materials, and consumer electronics products.

EL PASO, TX (JULY 9) PR NEWSWIRE - Property Trust of America (NYSE: PTR) announced today that it has closed and received commitments for $16 million of long term first mortgage debt which will primarily be used to reduce short term debt by $14.2 million.

The new financings will allow the Trust to continue to pursue its strategy of selective developments, principally multi-family housing projects, in under-served southwestern growth markets.

The Trust's latest two development projects, the 180-unit Spring Park Apartments in El Paso and the 160-unit Park Place Apartments in Las Cruces N.M. are nearing full completion and are leasing up ahead of schedule and rent projections.

Teachers Insurance and Annuity Association agreed to provide $8 million secured by the two projects subject to a number of conditions, one of which is the achievement of a minimum gross annual income level.

The Trust noted that 89 percent of the two projects are leased or pre-leased at rentals in excess of projections, which already exceeds the minimum gross income requirement of the Teachers commitment.

Hence, the Trust believes that the mortgages will be able to be closed during the third quarter. The fixed rate loans bear interest at 10.125 percent and mature in ten years.

In addition, on June 28, 1990, the Trust closed an $8 million first mortgage financing with Sumitomo Bank of California by pledging its leasehold interest in the 338-room Holiday Inn at Fisherman's Wharf. The loan bears interest at the bank's prime rate plus one and matures in ten years.

Also, the Trust entered into a hedge contract with Continental Bank, Chicago which placed a 24 month, 12 percent interest rate cap on $8 million of prime rate floating debt.

In March, 1990 the Trust had purchased its 50 percent partner's interest in the leasehold at a cash price of approximately $6.2 million, which was funded from the Trust's revolving lines of credit. Property Trust of America now owns a 100 percent leasehold interest in the San Francisco hotel.

Upon completion of both financings, the Trust's revolving lines of credit will have in excess of $9.6 million of borrowing capacity to utilize in the acquisition or development of income-producing projects.

Property Trust of America is a real investment trust with equity investments in real estate properties in key growth areas in the southwestern United States.

#90190p2648 07/09/1990 ~PR Newswire

SAN ANTONIO, TX (JULY 9) PR NEWSWIRE - Valero Natural Gas Partners, L.P. (NYSE: VLP) today reported second quarter net income of $5.3 million, or $.27 per limited partner unit, compared to $1.2 million, or $.05 per limited partner unit, reported for the second quarter 1989. The partnership's net income for the first six months of 1990 was $10.7 million, or $.54 per limited partner unit, compared to net income during the first half of 1989 of $5.8 million, or $.29 per limited partner unit.

Second quarter operating income of $19.3 million was 34 percent higher than the $14.4 million reported for 1989's second quarter. For the first six months of 1990, operating income is up 20 percent to $39.2 million from $32.6 million during the same period last year.

Natural gas pipeline operating income for the second quarter 1990 was $16.8 million, 50 percent higher than last year's second quarter operating income of $11.2 million. Both gas sales and transportation volumes for the second quarter were higher than those of last year's second quarter to increase consolidated throughput by 10 percent.

While natural gas prices on the spot market have been soft throughout 1990 Valero's pipeline operations have benefited from increased sales under term contracts particularly to power generation customers whose gas demand has been higher because of the hot weather experienced in Texas in the second quarter. Sales under term agreements increased by about 18 percent for this year's second quarter compared to last year's. Transportation fees were relatively unchanged compared to last year.

Natural gas liquids (NGL) operating income for the second quarter 1990 was lower than that of last year's, $2.5 million compared to $3.2 million, respectively. NGL operating income for the first half of this year is more than double that of last year's first six months, $7.5 million compared to $3.6 million, respectively. Demand for NGLs should increase with the completion of new petrochemical facilities scheduled for later this year, which, combined with current low NGL inventories, should increase NGL prices.

Valero Natural Gas Partners, L.P. owns a 7,100-mile intrastate network of natural gas transmission and gathering lines throughout Texas and in Oklahoma, purchases and sells natural gas to distribution companies, electric utilities, other pipelines and industrial customers throughout the U.S., and provides gas transportation services to third parties. The partnership also owns 11 gas processing facilities and markets natural gas liquids to refineries, petrochemical plants and domestic fuel distributors.

#90190p2656 07/09/1990 ~PR Newswire

ATHLONE, IRELAND (JULY 9) PR NEWSWIRE - Elan Corporation, plc (AMEX: ELN) said it has been cleared by the United States FDA to produce its new hypertensive agent, Verelan, at its main facility in Athlone, adding to existing production in Gainesville, Ga.

The expanded manufacturing program is in response to Lederle Laboratories' announcement last week that two units of American Home Products - Wyeth-Ayerst and the A.H. Robins Company - are joining it as co-U.S. marketers of the new blood pressure drug.

"Lederle, Wyeth-Ayerst, and A.H. Robins are three of America's finest pharmaceutical organizations," said Donald E. Panoz, Elan's chairman and CEO, "and their combined efforts should accelerate market penetration of this important new product."

Verelan was developed and patented by Elan as an advanced, once-daily formulation of verapamil, the most widely prescribed calcium channel blocker for hypertension. The company received marketing approval for the drug from the U.S. FDA on May 29 and named Lederle as the exclusive U.S. licensee.

Panoz said, "Elan's strategy to fully develop products before licensing has resulted in its manufacturing facilities producing corporate profits and we will continue to invest in this area of our business based on the

needs of our licensees and our direct sales force."

Verelan is a special, pellet-filled capsule which provides smooth, consistent absorption and 24-hour blood pressure control. Unlike traditional long-acting verapamil formulations, Verelan can be taken with or without meals. Traditional formulations must be taken with food to achieve the desired absorption profile.

Elan Corporation, plc, specializes in the healthcare field of advanced reformulation and drug delivery, with emphasis on improved drug absorption and utilization. It operates research and manufacturing facilities in Athlone; Enschede, Netherlands; Gainesville; Cambridge, Mass.; and Brea, Calif.

#90190p2659 07/09/1990 ~PR Newswire

LOS ANGELES (JULY 9) PR NEWSWIRE - The state of California's highest award for a new product by a major industry was presented today to ARCO (NYSE: ARC) for its development of EC-1 Regular, the nation's first reformulated gasoline to control emissions from cars and trucks.

Gov. George Deukmejian established the New Product Award six years ago to recognize the men, women and organizations that contribute to California's advanced technology. The annual competition is conducted by the

California Society of Professional Engineers (CSPE).

Accepting the award at CSPE's annual meeting in San Luis Obispo, William S. Dickinson, manager of ARCO Products Engineering and Technology Center, said, "Winning the battle against air pollution is going to take everyone's best efforts. EC-1 is the product of creative minds working together to find immediate practical ways to improve air quality."

EC-1 is an unleaded gasoline designed for pre-1975 cars and pre- 1980 trucks without catalytic converters that otherwise use leaded gasoline. Such vehicles make up 15 percent of the cars and trucks in Southern California but account for more than 30 percent of the area's vehicular air pollution.

In developing EC-1, ARCO's team of engineers created a blend that is lower in sulfur, benzene, aromatics and vapor pressure than conventional regular gasoline, resulting in lower emissions of carbon monoxide and chemical components that cause smog. MTBE, an octane enhancer, is added so that EC-1 retains the same octane level as ARCO's regular leaded gasoline.

Tests show that if all current users of leaded gasoline in Southern California switched to EC-1, about 350 tons of pollutants would be removed from the air each day.

Awards candidates were evalutated by state government and private individuals who served on the New Product Award Committee of the California Society of Professional Engineers.

This is the latest of several awards for EC-1. On June 8, 1990, the South Coast Air Quality Management District presented ARCO with its highest award for advancement in air pollution technology.

#90190p2667 07/09/1990 ~PR Newswire

GOLDEN, CO (JULY 9) PR NEWSWIRE - Peter H. Coors, president of Coors Brewing Co. and chairman of the Beer Institute, announced today that the brewing industry has begun a comprehensive advertising and grassroots campaign to fight a potential increase in beer excise taxes.

A major component of the campaign is a full-page newspaper advertisement appearing today in 65 hometown papers of Congressional participants in the budget summit negotiations. The ad urges policy makers to give middle-income Americans a fair break. It shows a woman's hand wearing a diamond bracelet and holding a can of beer.

"Riddle: What's the difference between a diamond bracelet and a can of beer?" asks the ad's headline. The answer: "You pay more excise tax on the beer."

The copy explains that Congress repealed excise taxes on luxury items like jewelry, furs and perfumes more than 20 years ago. Beer, however, continues to be taxed at three times the rate of most other consumer products, and the amount of taxes on a can of beer exceeds the combined costs of its ingredients and labor to brew the beer. The ad encourages consumers to call a toll-free number (800-33-TAXES) to send an anti-tax message to members of Congress.

"The members of the brewing industry are concerned about the budget deficit, but no solution should place an unfair burden on working Americans," said Coors. "There always seems to be a temptation to look to taxes which can be hidden in the price of consumer goods as an easy way out of a revenue crunch, but we're urging Congress to remember who ultimately pays these tax bills and not to sacrifice fairness to political expediency."

He noted that excise taxes on beer eat up three times as much of the income of a worker earning $10,000 to $20,000 per year as they take from someone earning more than $50,000 per year. "Adding $4 or $5 to the price of a case of beer is unfair to many of our customers," Coors said.

In May, Coors was named chairman of the Beer Institute, a trade association representing the brewing industry and its suppliers. At that time, he called for the members to develop a positive campaign to address issues of public perception about the brewing industry and its products. Specific proposals are currently under consideration.

HOUSTON (JULY 9) PR NEWSWIRE - Tenneco Inc. (NYSE: TGT) announced today that its Albright & Wilson Ltd. division has entered into an agreement for EKA Nobel of Sweden to acquire Albright & Wilson's worldwide paper chemicals and associated resins business, effective June 29.

The total price for the acquisition is $100 million, including the loan capital of the companies whose shares are being acquired by EKA Nobel.

"This sale is a strategic move to focus our efforts in Albright & Wilson on its core business -- surfactants, phosphates and other phosphorus compounds and pulp chemicals such as sodium chlorate -- and a growing range of allied specialty businesses," said J.L. Ketelsen, chief executive officer of Tenneco. "This sale of operations which are not closely tied to A&W's other businesses will free resources to pursue those strategic goals.

The operations being sold by Albright & Wilson include manufacturing plants in the UK, Sweden, The Netherlands, France, Spain, North America, Australia and New Zealand. These plants manufacture chemicals for the paper industry, principally rosin-based and synthetic sizes plus a range of auxiliary products.

The business accounted for seven percent of the total sales of Albright & Wilson in 1989. The chemical operations of EKA Nobel, which is part of the Nobel Industries Sweden group, already include paper chemicals, principally in Europe, North America and Japan.

The operations being divested are distinct from Albright & Wilson Americas' business in sodium chlorate and chlorine dioxide generating systems, which are supplied to paper pulp mills as an environmentally-preferred method of pulp-bleaching. Albright & Wilson is a world-leader with this business, which is the focus of major investment to meet rapidly growing demand.

Tenneco Inc. is a Houston-based diversified company with major business interests in natural gas pipelines, farm and construction equipment, shipbuilding, automotive parts, packaging, chemicals and minerals. Albright & Wilson, a unit of Tenneco, is a UK-based chemical manufacturer with worldwide operations.

NEW YORK (JULY 9) PR NEWSWIRE - The American Stock Exchange announced that the contingent value rights (CVRs) of Rhone-Poulenc S.A. of Courbevoie, France, began trading on a "when issued" basis today. As one of the world's leading pharmaceutical and chemical companies, Rhone-Poulenc researches, develops, produces and markets pharmaceuticals, fibers and polymers, specialty chemical products, intermediate organic and inorganic products, and agricultural chemicals.

Trading under ticker symbol RCV.WI, the contingent value rights opened on 20,000 rights at 15.

The CVRs are being issued in connection with Rhone-Poulenc's acquisition of a controlling interest in Rorer Group Inc. of Fort Washington, Pa.

Contingent value rights are a unique financing instrument and provide the opportunity for shareholders to benefit when their company enters into a business combination with another entity. Contingent value rights represent the new majority owner's confidence in the new entity and the ability of the new entity's stock to reach a particular market price at a specified point in time.

Rhone-Poulenc and Rorer Group are expected to complete the merger of their pharmaceutical businesses on July 31, with Rhone-Poulenc transferring its human pharmaceutical business to Rorer Group, thereby substantially increasing the Rorer Group's size. Rorer Group develops, manufactures and markets prescription and over-the-counter pharmaceuticals, both domestically and abroad.

The CVRs are expected to be distributed this month to Rorer Group common stockholders on the basis of one CVR for each Rorer Group share not owned by Rhone-Poulenc. Rorer Group will formally change its name to Rhone-Poulenc Rorer Inc., at the time of the distribution.

With a solid reputation and proven ability to oversee the listing and trading of equities, options and a variety of derivative products, the American Stock Exchange is the preferred marketplace on which to list contingent value rights.

The exchange presently trades two other CVR-type investment vehicles. Eli Lilly and Company began trading contingent payment units (CPUs) under ticker symbol HYU on March 19, 1986, and The Dow Chemical Company

commenced trading contingent value rights (CVRs) under ticker symbol DVR on Nov. 7, 1989.

ST. PAUL, MN (JULY 9) PR NEWSWIRE - Northwest Airlines passenger traffic grew 7.2 percent last month compared with June 1989, NWA Inc., Northwest's parent, said today.

Northwest flew 4.82 billion revenue passenger miles in June, up 7.2 percent from the 4.49 billion revenue passenger miles flown in June 1989. Capacity was up 7.6 percent to 6.67 billion available seat miles in June from 6.2 billion a year earlier. Load factor declined 0.2 points to 72.2 percent.

The airline's cargo ton miles increased 2.1 percent to 154.4 million from 151.2 million a year earlier.

"Over the first half of 1990, Northwest's traffic has grown 16.1 percent, outpacing all of the other eight largest U.S. airlines," said A.B. Magary, Northwest executive vice president of marketing.

For the first six months of 1990, Northwest flew 24.64 billion revenue passenger miles, an increase of 16.1 percent over the 21.23 billion flown in the first six months of 1989. Available seat miles were up 14.7 percent to 37.73 billion from 32.88 billion in 1989. Load factor for the six-month period increased 0.7 points to 65.3 percent from 64.6 percent. Cargo ton miles were up 0.3 percent to 888.4 million from 886.1 million.

ATLANTA (JULY 9) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) has requested authority to add three new international routes -- Atlanta to Manchester, England, Atlanta to Madrid and Barcelona, and Orlando to Mexico City.

In applications filed today with the U. S. Department of Transportation, Delta asks approval to begin flights between Orlando and Mexico City on February 1, 1991. Service to Madrid, Barcelona and Manchester would begin later in 1991.

"These new services reflect Delta's commitment to international growth," said Whit Hawkins, Delta's senior vice president for marketing. "We presently fly to 27 international cities and already have requests pending for new authority to Berlin, Hong Kong, Leningrad, Milan, Moscow, Nagoya, Rome, and Tbilisi. Thus, with deliveries of more than 60 new international aircraft now underway, our international gateways throughout the nation can certainly expect to benefit from the economic impact brought by these additional flights."

Delta plans to operate service from Atlanta to Manchester, Madrid and Barcelona on a daily basis, using new technology Boeing 767-332ER aircraft with 218 seats. The planned daily service between Orlando to Mexico City will be operated with Boeing 757 equipment.

Delta recently accepted delivery of its first 767-332ER and now has three of these jets in its fleet, with another 22 on order or option. Delta expects to receive its first McDonnell Douglas MD-11, a long-range tri-jet this fall. A total of 44 MD-11s are on order or option.

A major world airline, Delta currently serves 177 cities worldwide, including 27 international destinations -- nine in Europe as well as four cities along the Pacific Rim. In Atlanta -- Delta's primary European gateway -- Delta has 428 flights a day.

#90190p2685 07/09/1990 ~PR Newswire

CHICAGO (JULY 9) PR NEWSWIRE - Sears, Roebuck and Co. and CBS Sports are making coverage of this year's DieHard 500 at Talladega, Ala., accessible to 280,000 Americans who are hearing-impaired by sponsoring closed-captioned coverage of the race on Sunday, July 29.

The DieHard 500 at Talladega is the last super speedway event of the year, with 40 drivers competing for more than $650,000 and Winston Cup points.

CBS Sports will carry the 500-mile race live July 29 starting at noon CDT. This is the first time the DieHard 500 network coverage has been closed-captioned.

"Sears is excited to support the closed-captioned coverage of the DieHard 500," said Roger A. Detter, national marketing manager, automotive, Sears Merchandise Group. "Besides making television accessible to the hearing-impaired, closed-captions help teach English as a second language and help fight illiteracy," he said.

The DieHard 500 will be closed-captioned while in progress, a process called "real-time captioning." Because the coverage is live, stenocaptioners type the commentary in shorthand on a special keyboard.

A computer translates the shorthand into English and the data is then fed to the CBS Network. The audience receives the closed-captions with only a few seconds delay.

A hearing-impaired person who owns a decoder sees printed subtitles at the bottom of the television screen, enabling the viewer to follow dialogue and sound effects.

Sears was the first retailer to offer the decoder to the public 10 years ago. Sears Telecaption 4000, available through the Sears catalog, generates on-screen subtitles and easily connects to any television set.

"We're very grateful to Sears for providing this valuable support to the deaf community," said Annette Posell of the Caption Center, the not-for-profit agency producing the captions for the DieHard 500. "Unless you have a hearing disability, you don't realize how cut off people are when they can't hear what's being said on TV."

Closed-captioned programming was introduced in 1980 with 16 hours of programming a week. Today, almost all prime-time television shows and more than 450 hours of sports programming on CBS are closed-captioned.

PLYMOUTH, MICH. (JULY 9) PR NEWSWIRE - Highland Superstores, Inc. (NASDAQ: HIGH) reported June 1990 sales of $68.3 million, down 2 percent from June 1989 sales of $69.7 million.

Sales for June 1990 exclude sales from the Shreveport, La., and Milwaukee markets, from which the company recently exited.

Additionally, the company noted that the sales decline was principally attributable to significantly lower sales of air conditioners. Exclusive of air conditioner sales, June 1990 sales increased 5 percent over June 1990 sales. Comparable store sales declined 5 percent for the month of June 1990 and increased 1 percent for the same period exclusive of air conditioner sales.

Highland Superstores, Inc. headquartered in Plymouth (Detroit) is one of the largest volume speciality retailers of consumer electronics and appliances in the United States. The company currently operates 91 retail stores in Michigan, Ohio, Indiana, Illinois, Minnesota, Massachusetts, Rhode Island, New Hampshire, New York and Texas, including two new stores which opened near the end of June 1990 in New England.

WASHINGTON (JULY 9) PR NEWSWIRE - Burson-Marsteller, the leading international public relations and counselling firm, has established a joint venture in Hungary in partnership with Skala Communications, a company jointly owned by Skala Cooperative, the largest Hungarian retailer and Hungarian Credit Bank, the second largest bank in Hungary, according to Larry Snoddon, president of B-M Europe.

The office will be managed by Dr. Istvan Gyorgy Matko, a graduate of the University of Law, Szeged, and the Institute for Economics of MUOSZ (Association of Hungarian Journalists) in Budapest. Dr. Matko recently worked for the Council of Ministers of the Hungarian Republic and previously was founder and chief editor of a publication for managers.

Chairman will be Dr. Ildiko Takacs, formerly head of advertising and publicity at Skala Coop. She has a degree from the College of Foreign Trade and an advanced degree in advertising.

They will be joined by three other professionals and also be able to draw on the resources of Skala Communications which has a staff of 85. The Hungarian staff will go through periods of training at B-M's London and Frankfurt offices.

Burson-Marsteller is also part of a joint venture in Moscow managed by a Russian speaking executive transferred from their U.S. Operations. They

have offices in Frankfurt, Munich, Hamburg and Vienna and will open in Berlin and Bonn in the near future.

According to Snodden: "These moves will strengthen our ability to serve clients in Eastern Europe. Western companies entering these markets will need broad communications counsel and executional support. The key areas, we believe, will be in media, government and community relations, employee communications and motivation, as well as helping business establish relationships with distributors and suppliers."

Burson-Marsteller has a worldwide staff of 2,400 people in 52 offices in 29 countries. In Europe it employs nearly 800 people in 20 offices in 13 countries.

PITTSBURGH (JULY 9) PR NEWSWIRE - National Intergroup Inc. (NYSE: NII) (NII) announced today that it has reached a settlement of certain litigation relating to NII's pending tender offer for all outstanding Cumulative Convertible Preference Units representing limited partnership interests of Permian Partners, L.P.

NII commenced the tender offer on May 24, 1990, at an original price of $3.75 per Preference Unit, in cash, subject to reduction on a per unit basis to reflect any distributions on the Preference Units subsequent to May 18, 1990, and prior to the consummation of the offer, other than the regular quarterly distribution for the quarter ended March 31, 1990 (which was paid on May 31, 1990). The tender offer is conditioned on, among other things, a majority of the publicly-held Preference Units being validly tendered and not withdrawn and the adoption of an amendment to Permian's Partnership Agreement that would permit NII, upon acquiring a majority of the publicly-held Preference Units pursuant to the tender offer to purchase all remaining Preference Units at a price equal to the purchase price paid under the tender offer (the "minority acquisition").

Subject to approval of the settlement by the Delaware Court of Chancery, and the resolution of any appeals therefrom, NII has agreed to increase the purchase price under the offer to $3.85 per Preference Unit, and not to reduce the price to reflect the regular quarterly distribution of $0.2875 per Preference Unit for the quarter ended June 30, 1990 (payable on Aug. 31, 1990). If the settlement is approved, NII will also afford Unitholders the right to participate, subject to certain conditions, in the net proceeds (as defined in the following term sheet), if any, allocable to the Preference Units acquired by NII in excess of the cash portion of the purchase price paid pursuant to the tender offer in the

event of a sale of the Partnership to a third party within a specified period of time after consummation of the offer and the minority acquisition. The specific terms of the participation are set forth in the following term sheet and the forgoing is qualified in its entirety by reference to the term sheet.

The parties intend to request the Delaware Court to schedule a hearing as promptly as practicable for the purpose of considering the settlement. NII has the right to terminate the settlement agreement if the amendment to Permian's Partnership Agreement (which is a condition of the tender offer) is not adopted by the hearing date. The settlement will not affect or release certain other claims in the litigation relating to the initial public offering of the Preference Units in June 1987.

A spokesman for NII stated, "We are obviously very pleased with this settlement, which we trust will enable us to proceed with a transaction that we believe is in the best interests of NII, Permian and the Unitholders."

The offer is currently scheduled to expire at midnight on July 11, 1990. NII currently intends to extend the offer from time to time pending final outcome of the settlement.

As of the close of business on July 6, 1990, approximately 1,990,747 Preference Units, representing approximately 12.6 percent of the publicly-held Preference Units, had been tendered and not withdrawn under the offer.

STAMFORD, CT (JULY 9) PR NEWSWIRE - General Signal Corporation (NYSE: GSX) announced today that it has agreed to sell its Ultratech Stepper unit to an employee group. The company has canceled previously announced plans to merge Ultratech with the company's GCA Stepper operation. C. Woodrow Rea, a general partner in the San Francisco-based venture capital firm of New Enterprise Associates (NEA), and a former president of Ultratech during the early 1980s, heads the employee group.

Under the arrangement, General Signal will retain a minority interest in the new venture and will also provide significant financing alongside NEA. Terms of the sale were not disclosed.

Commenting on the announcement, Peter A. Laing, senior vice president of General Signal, said: "The employee group's recent proposal to purchase Ultratech was a more attractive alternative to the risks associated with

the plan to merge the West Coast-based Ultratech into our East Coast-based GCA Stepper operation. This transaction will allow General Signal to focus its research and marketing efforts on today's much larger worldwide market for reduction steppers based on GCA's technology."

General Signal Corporation, with 1989 sales of $1.92 billion, is a leading manufacturer of equipment and systems for the process control, electrical, semiconductor, telecommunications and transportation industries. The common stock of the company is traded on the New York and Pacific stock exchanges.

ENCINO, CALIF. (JULY 9) PR NEWSWIRE - Lincoln Bancorp (NASDAQ: LCNB), the holding company for Lincoln National Bank, today reported a 13.2 percent increase in net income for the quarter ended June 30, 1990 to $1.8 million from $1.6 million in the 1989 second quarter. Earnings per share were $0.40 for the most recent quarter versus $0.35 in the 1989 period representing a 14.3 percent gain.

According to John J. Keating, president and chief executive officer "Lincoln's earnings continue to grow at a healthy pace from quarter to quarter due to superior rate of growth in earning assets". Interest-earning assets reached a record level of $427.1 million at June 30, 1990 up from $283.9 million from the year ago period.

For the first half of 1990, Lincoln earned $3.4 million compared with $3.0 million for the similar period in 1989. On a per share basis, Lincoln earned $0.75 for the six months ending June, 30 1990 versus $0.67 for the comparable 1989 period. Earnings per share figures have been adjusted to reflect a 6-for-5 stock split paid on May 15, 1990 and a 20 percent stock dividend distributed on May 19, 1989.

For the 1990 second quarter, Lincoln's annualized returns on assets and equity were 1.56 percent and 22.26 percent, respectively. At June 30, 1990 shareholders' equity totaled $33.6 million, representing a 20.9 percent increase from June 30, 1989. Book value per share increased from $6.98 at June 30, 1989 to $8.21 at June 30, 1990.

The growth in earnings was due primarily to a 26 percent increase in net interest income for the quarter ended June 30, 1990, to $8.3 million from $6.6 million in the year-ago quarter. For the first six months of 1990, net interest income was $15.5 million, 20.8 percent higher than the $12.8 million reported for the first half of 1989. Non- interest income, excluding gains from securities transactions almost doubled to $1.1 million in the second quarter, up from $589 thousand during the same period one year ago. Net interest margin, after provision for loan losses for the second quarter of 1990 was 8.02 percent down from 8.97 percent for the year ago quarter. This decline is reflective of a lower overall interest rate environment within the economy.

Lincoln's deposits totaled $496.2 million as of June 30, 1990, up from $365.8 million a year ago. Keating said, "We are very pleased with this growth in deposits which was accompanied by a 33 percent increase in demand deposits from June 30, 1989 to June 30, 1990".

Lincoln Bancorp, which reached record assets of $532.7 million at June 30, 1990, through its subsidiary, Lincoln National Bank, offers a full range of banking and financial services at its offices in Encino and Beverly Hills. As an independent financial services institution, it specializes in middle-market lending to companies in Southern California.

BUDAPEST (JULY 9) PR NEWSWIRE - Burson-Marsteller, the international public relations and counseling firm, and Skala Communications have formed a joint venture operation here -- Burson- Marsteller Hungary Kft. Skala Communications is jointly owned by Skala Cooperative, the largest Hungarian retailer, and Hungarian Credit Bank, the second-largest bank in Hungary.

The announcement was made today by Larry Snoddon, president Burson-Marsteller/Europe.

The new operation is Burson-Marsteller's second in Eastern Europe. The firm is also part of a joint venture in Moscow, managed by a Russian-speaking executive transferred from its U.S. operations. B-M also has offices in Frankfurt, Munich, Hamburg and Vienna, and will soon open in Berlin and Bonn.

Burson-Marsteller Hungary will be managed by Dr. Istvan Gyorgy Matko, a graduate of the University of Law, Szeged, and the Institute for Economics of MUOSZ (Association of Hungarian Journalists) in Budapest. Matko recently worked for the Council of Ministers of the Hungarian Republic and previously was founder and chief editor of a publication for managers.

Dr. Ildiko Takacs will serve as chairman of the new operation. Takacs was formerly head of advertising and publicity at Skala Co-op. She has a degree from the College of Foreign Trade and an advanced degree in advertising.

They will be joined by three other professionals and also be able to draw on the resources of Skala Communications, which has a staff of 85. The Hungarian staff will go through periods of training at Burson-Marsteller's London and Frankfurt offices.

Burson-Marsteller has a worldwide staff of 2,400 people in 60 offices in 28 countries. In Europe, it employs nearly 800 people in 20 offices in 13 countries.

#90190p2721 07/09/1990 ~PR Newswire

WASHINGTON (JULY 9) PR NEWSWIRE - The Air Line Pilots Association issued the following statement today in reaction to the declaration of an impasse in the Eastern Airlines pilot contract negotiations and the company's rejection of arbitration:

The Eastern Airlines pilots' Master Executive Council voted unanimously today to send out a strike ballot after contract talks broke off in the early hours of Monday morning. Events of the past 24 hours confirm what Eastern pilots have suspected for some time now. The company simply is not interested in addressing the pilots' concerns in the negotiating process and is more intent on seeking ways to bust its unions.

"For us it was a major disappointment. When Martin Shugrue took over as trustee of Eastern, he said that labor peace was essential to Eastern's

survival. Apparently that was just a stalling tactic, because what we're seeing is simply a continuation of the Lorenzo approach to labor relations. Nevertheless, the Eastern pilots stand ready to continue negotiations with the company throughout the 30-day cooling off period," said Capt. Jack Suchocki, chairman of the Eastern Master Executive Council's negotiating committee.

While the contract terms being offered by the company were onerous at best pilots also could not understand the company's insistence that union litigation directed at Continental Airlines Holdings Inc. (formerly Texas Air Corp.) be dropped as a condition of reaching a labor agreement at Eastern, or why Eastern has been slow to move on claims against Continental Holdings for improper transfers of Eastern assets prior to the bankruptcy. Union litigation against Continental Holdings has no bearing on Eastern, and the asset transfer claims could net Eastern tens or even hundreds of millions of dollars in badly needed cash.

The Eastern pilots regret the turn of events that has led to the declaration of an impasse and the beginning of a 30-day cooling-off period. (Please note that ALPA accepted the proffer of arbitration; but the company refused.) Eastern has consistently closed off all avenues that might have led to a resolution of the situation. Eastern's pilots now find themselves with only one option left, which unfortunately is the one that presumably will lead to the pilots striking the company in 30 days.

PARAMOUNT, CA (JULY 9) PR NEWSWIRE - Albert N. Greenfield, chairman of the board of directors, and James H. Cheney, president and chief executive officer of Mechanics National Bank, announced today that the bank has commenced a public offering of common stock and convertible subordinated debentures.

The bank is offering up to 166,667 shares of common stock at $12.00 per share and up to $3,000,000 of Convertible Subordinated Debentures. Each Debenture has a face value of $1,000 and a coupon rate of 9.25 percent per annum. The Debentures, which have a 15-year term, will be convertible into Common Stock at any time on or before maturity at a conversion price of $15.00 per share.

The net proceeds received from the sale of these securities will provide the bank with additional capital. As of March 31, 1990, the bank's primary capital was 8.11 percent of total assets and exceeds all regulatory capital requirements. Nevertheless, it is the desire of the

board of directors and management to raise additional capital to facilitate continued growth of the bank.

At March 31, 1990, the bank had total consolidated assets of $211.6 million, deposits of $192.6 million, and shareholders' equity of $15.6 million. The annualized return on average assets was 1.82 percent and the annualized return on average shareholders' equity was 23.59 percent for the three months ended March 31, 1990.

The bank is a national banking association, insured by the FDIC and headquartered in Paramount. It has 10 branches in Los Angeles, Orange, Riverside and San Bernardino Counties. Mechanics National commenced operations over 25 years ago, and currently serves its community by lending primarily to individuals and small and medium sized businesses.

Questions about the Offering can be answered and copies of the Mechanics National Bank Offering Circular can be acquired by a calling our Sales Center at 213-529-2800 or 800-662-6028. Ask to speak to a broker about Mechanics National Bank.

This announcement is neither an offer to sell nor a solicitation of an offer to buy common stock or debentures, the offer is made only through the offering circular.

These securities are not deposits and are not insured by the Federal Deposit Insurance Corp. The debentures are subordinate to the claims of depositors and other creditors as more fully described in the offering circular.

#90190p2724 07/09/1990 ~PR Newswire

PAOLI, PA. (JULY 9) PR NEWSWIRE - Ametek Inc. (NYSE: AME) announced today that it had reached an agreement to purchase the closely held Ciaramella-OEP Group, a leading European manufacturer of electric motors located near Milan, Italy.

In the transaction expected to be completed later this month, Ametek said it would acquire the business consisting of two manufacturing firms, Elettromotori Ciaramella S.r.l., producer of a wide range of appliance and special purpose motors marketed worldwide, and Officine Electromeccaniche Padane spa (OEP), a manufacturer of vacuum cleaner motors, with combined sales this year of more than 82 billion lira or about U.S. $68 million.

From its founding as a small business in 1960, Ciaramella, together with OEP, has grown to become one of Europe's leading independent electric

motor manufacturers, producing about 6 million motors per year under the direction of Vittorino Fogagnolo and Giovanni Scirea. Scirea will continue as managing director of the operations and Fogagnolo will be a consultant for Ametek, according to Walter E. Blankley, president and chief executive officer of Ametek. "Customers worldwide will benefit as we combine the capabilities of Ciaramella-OEP Group with Ametek's 75-year-old Lamb Electric motor business," Blankley said. "With the depth of engineering and economy of scale, we have the opportunity to develop the market's most technologically advanced and cost-competitive motor designs."

The Ciaramella-OEP Group is headquartered on 10 acres in Robecco S/N west of Milan, where Ciaramella's 110,000-square-foot manufacturing plant is located. OEP's 60,000-square-foot plant is on 11 acres in Crema, south of the city. The combined operations are highly automated and employ about 400 people, according to Ametek.

Ciaramella has developed a family of fractional horsepower series universal, induction and permanent magnet motors designed for original equipment manufacturers in Europe and the United States. OEP's vacuum motors are designed into upright and canister vacuum cleaners marketed throughout Europe. These product lines will complement and expand Ametek's established motor lines produced at its four Lamb Electric plants in the United States and its majority-owned Elettromotori Crema (EMC) operation, also near Milan. EMC builds vacuum cleaner motors, primarily for the rapidly expanding European appliance industry, while Lamb Electric produces a broad line of motor designs for manufacturers of vacuum appliances, photocopiers and computer peripherals plus other highly engineered equipment produced in the United States and 40 other countries worldwide, Blankley said.

Ametek, a Fortune 500 industrial manufacturer with sales last year of $588 million, has been listed on the New York Stock Exchange since 1930.

SAN DIEGO (JULY 9) PR NEWSWIRE - Mail Boxes Etc. (MBE) (NASDAQ: MAIL), announced today that it has signed a Letter of Intent to enter into an agreement to sell to United Parcel Service (UPS) 400,000 shares of its common stock for an all cash price of $25.25 per share ($10.1 million), and 400,000 warrants, each exercisable into one share of MBE common stock, for an all cash price of $1.168 million. The warrants will be exercisable over a three-year period at prices ranging from $27 to $38.88 per share.

If the warrants are fully exercised, UPS would acquire approximately a

17.4 percent equity interest in MBE. The agreement would also allow UPS to increase its equity interest in MBE to 35 percent after one year.

A designee of UPS would be added to MBE's Board of Directors. Subject to certain events, UPS wob?e restricted from increasing its equity position in MBE to more than 35 percent for a period of five years.

The Leo?f Intent is subject to the parties executing a definitive agreement and the completion of a due diligence investigation by UPS, which will begin immediately. Kidder, Peabody & Co. is acting as MBE's financial advisor in the negotiation of this financing.

"This agreement would provide MBE with the capital needed to finance the continued rapid development of its world wide network of business support centers," said Tony DeSio, MBE's co-founder, vice chairman and CEO. MBE has approximately 1,200 franchised outlets operating in the USA and has been adding new outlets at the rate of almost one per day for the past year.

Recently, the company has sold Master Licenses to franchise its concept in Canada and Japan, and has entered into a joint venture in Mexico. In addition, the company is holding discussions with potential master licensees in Europe and elsewhere.

MBE has been rated as the tenth fastest growing franchise in the USA by Entrepreneur magazine (January 1990 issue); ranked 70th among the best managed companies out of the 5,000 NASDAQ companies (OTC Review, May 1990 issue); and was rated the 42nd "Best Small Company" in America by Forbes magazine (November 13, 1989 issue).

SANTA CLARA, CA (JULY 9) PR NEWSWIRE - Networked Picture Systems Inc. (NASDAQ: NPSI), a supplier of electronic design and prepress systems to the professional color printing industry, today announced the departure of Ted Cooper, the company's vice president of software development. Dr. Frank Greene, president of NPS, indicated that Cooper may continue with the company in a consulting role for an unspecified period. This change is related to the organization changes announced by the company last month.

Dr. Greene also expressed regret over the recent loss of Gordon Crouse, the company's vice president of systems integration. Crouse died last week following a brief illness.

Joseph Hanf has assumed the management roles formerly occupied by Cooper

and Crouse.

Networked Picture Systems Inc. is located at 2953 Bunker Hill Lane, Suite 202, Santa Clara, California 95054. Telephone 408-748-1677. FAX 408-727-7068.

CLEVELAND (JULY 9) PR NEWSWIRE - The M.A. Hanna Company (NYSE/MSE: MAH) announced today that Vice President and Comptroller Garth W. Henry has been appointed to the newly created position of vice president of marine services and special projects, while Assistant Comptroller Thomas E. Lindsey has been promoted to comptroller.

Henry, in his new position, will report to Martin D. Walker, chairman and chief executive officer, and will oversee a variety of special operating and administrative projects, as well as Hanna's Marine Services Division. He joined Hanna in 1975 as director of internal audit after serving on the audit staff of Ernst & Young, a public accounting firm. He was named assistant comptroller in 1981, assistant to the chairman in 1983 and comptroller in 1985. Henry was elected a vice president in 1987.

A resident of Cleveland, Henry holds bachelor's and master's degrees in business administration from Case Western Reserve University and attended the Massachusetts Institute of Technology Advanced Management Course. He is a certified public accountant.

As comptroller, Thomas E. Lindsey will report to Vice President, Finance, and Chief Financial Officer Ronald G. Fountain. Lindsey joined Hanna as assistant comptroller in 1987. Prior to joining Hanna, he spent 15 years with Ernst & Young, rising to the rank of senior manager.

A native of Warren, Pennsylvania, Lindsey is a certified public accountant and holds a bachelor's degree from Thiel College, Greenville, Pennsylvania.

M. A. Hanna Company is a leading international formulated polymers company and also has natural resources interests.

AUSTIN, TEXAS (JULY 9) PR NEWSWIRE - Grant Dove, chairman and CEO of the Microelectronics and Computer Technology Corp. (MCC), today introduced Dr. Craig Fields as the consortium's new president, chief technical officer and chief operating officer. Dove said the appointment of Fields, former director of the Defense Advanced Research Projects Agency (DARPA), "signals the start of a smooth transition to the next generation of leadership for MCC."

In addition, Dove said, "In 1991, it is my intention to nominate Craig as the CEO, which will allow me to transition to a less than full-time role as chairman of the board."

"I am delighted to accept this challenging new position," Fields stated. "MCC has proven that competitors in industry can collaborate on high-risk applied research, providing significant competitive advantages to the participating companies. I look forward to getting more familiar with MCC's research agenda as well as the process of technology transfer to the member companies," he said.

As president, CTO and COO, Fields will be responsible for MCC's research programs, corporate planning and marketing, exploratory initiatives and human resources. He will concentrate his initial efforts on internal research processes and member company relations. As chairman and CEO, Dove will spend more of his time on external and strategic issues as well as government activities.

Dove said that Fields' strengths in visualizing research needs, managing research and transferring technology will serve him well at MCC. "Many of our original research programs are starting to mature and bear fruit. Craig will help us to establish and implement our new vision and priorities for the next seven to 10 years," Dove explained.

MCC is a cooperative research venture conducting long-range research in

microelectronics and computer technology. Its research programs include Advanced Computing Technology, Software Technology, Computer Aided Design, Packaging/Interconnect, and a new Computer Physics Laboratory which conducts the consortium's research in superconductivity and optics in computing.

PAOLI, PA (JULY 9) PR NEWSWIRE - Ametek Inc. (NYSE: AME) announced today that it had reached an agreement to purchase the closely held Ciaramella-OEP Group a leading European manufacturer of electric motors located near Milan, Italy.

In the transaction expected to be completed later this month, Ametek said it would acquire the business consisting of two manufacturing firms, Elettromotori Ciaramella S.r.l., producer of a wide range of appliance and special purpose motors marketed worldwide, and Officine Electromeccaniche Padane spa (OEP), a manufacturer of vacuum cleaner motors, with combined sales this year of more than 82 billion lira or about U.S. $68 million.

From its founding as a small business in 1960, Ciaramella, together with OEP, has grown to become one of Europe's leading independent electric motor manufacturers, producing about 6 million motors per year under the direction of Vittorino Fogagnolo and Giovanni Scirea. Scirea will continue as managing director of the operations and Fogagnolo will be a consultant for Ametek, according to Walter E. Blankley, president and chief executive officer of Ametek. "Customers worldwide will benefit as we combine the capabilities of Ciaramella-OEP Group with Ametek's 75-year-old Lamb Electric motor business," Blankley said. "With the depth of engineering and economy of scale, we have the opportunity to develop the market's most technologically advanced and cost-competitive motor designs."

The Ciaramella-OEP Group is headquartered on 10 acres in Robecco S/N west of Milan, where Ciaramella's 110,000-square-foot manufacturing plant is located. OEP's 60,000-square-foot plant is on 11 acres in Crema, south of the city. The combined operations are highly automated and employ about 400 people, according to Ametek.

Ciaramella has developed a family of fractional horsepower series universal, induction and permanent magnet motors designed for original equipment manufacturers in Europe and the United States. OEP's vacuum motors are designed into upright and canister vacuum cleaners marketed throughout Europe. These product lines will complement and expand Ametek's established motor lines produced at its four Lamb Electric plants

in the United States and its majority-owned Elettromotori Crema (EMC) operation, also near Milan. EMC builds vacuum cleaner motors, primarily for the rapidly expanding European appliance industry, while Lamb Electric produces a broad line of motor designs for manufacturers of vacuum appliances, photocopiers and computer peripherals plus other highly engineered equipment produced in the United States and 40 other countries worldwide, Blankley said.

"The OEP product line will help to position Ametek as a leading supplier to every level of the European market for vacuum cleaner motors," Blankley said. "The combined research and development capabilities will assure our customers access to the leading-edge of vacuum motor technology while they will benefit from the economies of scale inherent with this acquisition.

"Ciaramella offers Ametek entirely new opportunities in markets where we have not previously participated," Blankley added, "supplying motors for hand-held and countertop appliances, lawn and garden equipment, vending machines and other equipment built by manufacturers around the world."

Ametek, a Fortune 500 industrial manufacturer with sales last year of $588 million, has been listed on the New York Stock Exchange since 1930.

PROVIDENCE, RI (JULY 9) PR NEWSWIRE - Richard A. Watson has been appointed a group vice president of Textron and John D. Lemery has been named to succeed him as president of Textron Investment Management Company Inc., B.F. Dolan, Textron's chairman and chief executive officer announced today. These promotions were effective July 1.

Watson, 45, will oversee Textron's financial services divisions as group vice president. These divisions, with 1989 revenues of nearly $2.2 billion include Avco Financial Services, Textron Financial Corporation, Avco Insurance Services/Balboa Life and Casualty, the Paul Revere Insurance Group and Textron Investment Management Company. He has been president of Textron Investment Management Company since April of 1985. He replaces Maurice G. Wilkins, Jr., who has been serving temporarily as a group vice president in addition to executive vice president, corporate development. Wilkins will retain his executive vice president duties in corporate development.

Lemery, 40, has been senior vice president, investments of Textron Investment Management Company since November 1985. He joined the company in April of 1983 as an investment manager. The company, a wholly owned subsidiary of Textron is a registered investment advisor managing in

excess of $5 billion in insurance and pension assets for Textron.

Watson joined Textron in 1975 as an investment manager, was named assistant treasurer-investments in 1976, an assistant vice president in 1981, vice president and president of Textron Investment Management Company in 1985.

He previously worked at The Paul Revere Life Insurance Company. He is an undergraduate of the University of Akron and has an MBA from Clark University, and is a chartered financial analyst.

Lemery joined Textron from Barlcays American/Business Credit and previously worked for Travelers Insurance Company and Texaco Inc. He is a graduate of St. Bonaventure University and has an MBA from the University of Connecticut, and is also a chartered financial analyst.

Textron is a multi-industry company with operations focused in three business sectors -- Aerospace Technology, Commercial Products and Financial Services.

NEW YORK (JULY 9) PR NEWSWIRE - Omnicorp Limited (NASDAQ: OMNI) announced that Rockwood Holdings plc, a United Kingdom corporation, which through its subsidiaries is the controlling stockholder of Omnicorp Limited, had on July 6, 1990 entered into an administrative receivership under English law. The receivership is expected to result in a liquidation of Rockwood.

In addition, on July 6, 1990 The Royal Bank of Canada demanded payment of Cdn. $4,268,012 plus interest by Rockwood International Freight Inc. (RIFI), a wholly owned subsidiary of Omnicorp. The bank also declared RIFI in default under a security agreement made by RIFI in favor of the bank. RIFI's indebtedness to the bank had been guaranteed by Rockwood and RIFI will be unable to make the demanded payment with its own resources. Omnicorp stated that it is not yet able to determine the full effect on its operations and solvency of the Rockwood receivership and the bank demand for payment by RIFI. It expects clarification within the next few days following discussions among, itself, RIFI, the bank and Rockwood.

WHITE PLAINS, N.Y. (JULY 9) PR NEWSWIRE - NYNEX today announced that it is using an expert system in 40 maintenance centers to improve the handling of customer service problems, reduce the workload and lower operational costs. The expert system, called the Maintenance Administrator Expert (MAX), diagnoses problems with residential and small-business telephone service. MAX is designed to increase the accuracy of technician dispatches by providing an expert interpretation of the data on the trouble reports it screens.

Members of the Expert Systems Group at NYNEX Science and Technology Center developed MAX using Inference Corporation's expert system building tool, ART (the Automated Reasoning Tool(TM)), on a SUN Microsystems 3/260 computer.

James Euchner, manager of Expert Systems at NYNEX, said, "Expert Systems are ideal for an application like this. By capturing the expertise of one of our best testers, we were able to improve the overall accuracy of dispatches on routine troubles and free maintenance center staff for customer contact and more in-depth testing. The crafts people dispatched to the field are able to be more productive, and customers get better service. Everyone wins."

NYNEX The NYNEX Corporation (NYSE: NYN) is a leader in the information industry, providing information and communications systems to a diverse base of customers nationwide and internationally. The company has revenue of more than $13 billion and assets of more than $25 billion. Through New England Telephone and New York Telephone, NYNEX delivers quality telecommunications services to the Northeastern United States. Other NYNEX companies offer cellular mobile telephone service, market information systems and products, publish directories and purchase equipment and services. NYNEX companies also provide computer software, lease financing, real estate consulting and development, as well as international marketing services.

#90190p2749 07/09/1990 ~PR Newswire

CAYMAN ISLANDS, BRITISH WEST INDIES (JULY 9) PR NEWSWIRE - The Scandinavia Company, Inc. (AMEX: SCF) announced today that it has decided to participate in the tender offer, commenced on July 4, 1990, to purchase the outstanding stock of The Bricom Group Limited, an English commercial services company which provides specialized business services to commerce, industry and government. Scandinavia Company's decision to participate in the transaction is subject to the creation of the structure for its participation which is accepted to the company's board of directors.

The tender offer for Bricom was announced on June 29, 1990 by PK English Trust Company Limited on behalf of the offerors, an investor group led by Gamlestaden AB, a Swedish financial services company traded on the Stockholm Stock Exchange, which includes Yggdrasil AB and the management of Bricom. The tender offer is for all of the outstanding A ordinary, B ordinary and redeemable preference shares of Bricom, as well as the shares of Bricom subject to outstanding stock purchase warrants and stock options and has a total value of approximately 198.5 million pounds sterling, or approximately $354 million at the exchange rate of $1.785 per British pound as of July 6, 1990. In addition, the purchasing group will refinance approximately 135 million pounds ($241 million) of Bricom debt.

It is anticipated that Scandinavia Company's participation in this transaction would be approximately $48 million plus its pro rata share of the costs of the transaction, estimated to be approximately $5 million. In addition, the company would be required to guarantee on a joint and several basis with the other participants a portion of the debt financing for the transaction. For its contribution, it is anticipated that Scandinavia Company would own approximately 33 percent of the equity of the acquisition company and would have ultimate voting control of that company. Scandinavia company, together with the other participants, would be represented on the board of directors and in the management of the acquisition company.

Nordbanken Group of Sweden, the parent of English Trust, has agreed, subject to the satisfaction of certain conditions, to provide senior debt financing for the transaction.

DALLAS (JULY 9) PR NEWSWIRE - Metro Airlines Inc. (NASDAQ: MAIR) today announced that June 1990 traffic set an all-time record for the company. Metro flew 59.5 million revenue passenger miles during the month, a 38.2 percent increase from 43.0 million in June 1989. A revenue passenger mile is the equivalent of flying one paying passenger one mile.

Monthly passenger boardings for June 1990 surpassed 300,000 for the first time in Metro's history. Boardings totaled 312,044, up 38.7 percent from 224,972 in June 1989. For the most recent month, Metro had 97.0 million available seat miles, compared to 73.2 million in 1989, for a 32.6 percent increase. Load factor, or percentage of seats filled by paying passengers, increased to 61.3 percent, up 2.5 percentage points from 58.8 percent in June 1989.

For the first six months of 1990, Metro flew 302.8 million revenue passenger miles, a 43.0 percent increase from 211.7 million a year ago. The airline had 560.3 million available seat miles for the first six months of 1990, compared to 417.2 million a year ago, an increase of 34.3 percent. Load factor for the first six months of 1990 increased 3.3 percentage points to 54.0 percent from 50.7 percent last year. Passenger boardings for the period were 1,612,095, a 43.3 percent increase from 1,125,010 a year ago.

Metro Airlines Inc., one of the nation's largest regional airlines, operates over 100 aircraft serving 72 cities in the southwestern and eastern United States and the Caribbean. Metro operates as American Eagle from its Dallas/Fort Worth hub, as Eastern Metro Express at the Atlanta and San Juan hubs, and as Trans World Express in the northeast.

CINCINNATI (JULY 9) PR NEWSWIRE - Great American Communications Company (NASDAQ: GACC) announced today that it has extended the expiration date of its offer to purchase all the outstanding 13-1/4 percent senior extendable reset notes issued by its subsidiary GACC Holding Company. The offer will now expire at 5 p.m. Eastern Daylight Time on July 19, 1990.

Great American also announced that it is providing withdrawal rights to the holders of approximately $7 million principal amount of reset notes who have already tendered reset notes in the offer. Such holders may withdraw any tendered reset notes at any time until 5 p.m. Eastern Daylight Time on July 13, 1990. Any reset notes already tendered and not withdrawn will be paid for on July 16, 1990.

The modifications to the offer, including the extension of the offer and the grant of withdrawal rights, are further described in a supplement to Great American's offer to purchase which is being sent to the holders of reset notes. Great American said the modifications to the offer are being made to assure compliance with rules and regulations of the Securities and Exchange Commission.

Shearson Lehman Hutton Inc. is advising Great American with respect to the offer and is serving as dealer manager for the offer.

Great American and its subsidiaries own and operate five network affiliated television stations, and 12 FM and six AM radio stations in the top 50 markets. Through Hanna-Barbera, it is involved in animated film

and video production, distribution and marketing worldwide. GACC owns approximately 46 percent (on a fully diluted basis) of Spelling Entertainment Inc.

American Financial Corporation owns 65 percent of Great American's 35.2 million outstanding shares. Great American's common stock trades in the over-the-counter market under the symbol GACC.

CHICAGO (JULY 9) PR NEWSWIRE - International Clearing Systems, Inc. (ICSI) announced today that Larry V. Recknagel has been named president. George S. Hender, the former president, has been named vice chairman. Recknagel was formerly executive vice president and chief operating officer. He retains the latter title.

ICSI, a wholly owned subsidiary of the Options Clearing Corp. (OCC), provides consulting, systems design, software, and facilities management services to the international banking community.

In recent years ICSI has been active in the development of new netting and

clearing systems for emerging clearing houses in the international foreign exchange markets. As a result of its research, ICSI has proposed the creation of an international confederation of regional clearing houses to perform multilateral netting of foreign exchange contracts. Importantly, this model includes real-time risk analysis and management systems to supplement the banking industry's current credit analysis practices.

During 1989, ICSI provided extensive consulting services to banks in Canada and the United States in their efforts to draft clearing house design documents. The documents describe key policies necessary to operate clearing houses for banks trading foreign exchange.

ICSI is currently conducting a follow-up study which involves the collection of actual trading information from major U.S. and Canadian banks to create a data base with which to evaluate certain features of the clearing houses designed by the banks. The current study is scheduled to be completed by the end of this year.

Foreign exchange clearing houses could begin start-up operations as early as 1991. ICSI proposes to license operating software to the clearing houses and to provide facilities management and consulting services after start-up.

Recknagel joined OCC in 1985 as first vice president of business development in which capacity he has played an important role in establishing policy on banking issues. Prior to coming to OCC, he was with Continental Bank as a senior credit officer in its securities and commodities lending division.

STAMFORD, CT (JULY 9) PR NEWSWIRE - The Xerox Corporation (NYSE: XRX) board of directors today declared dividends on the company's common stock and three issues of its preferred stock.

The dividends, which remained unchanged from previous quarterly payments, are payable on October 1 to shareholders of record September 7.

Payments will be 75 cents a share on the common stock, 92.1875 cents a share on the $3.6875 10-year sinking fund preferred and $1.03125 a share on the $4.125 20-year sinking fund preferred. Payment on the series B convertible preferred, which was issued in July 1989 in connection with the formation of a Xerox employee stock ownership plan (ESOP), will be

$1.5625 a share.

The common stock dividend is the 171st consecutive quarterly disbursement declared by Xerox.

LONG BEACH, CA (JULY 9) PR NEWSWIRE - P.T. Garuda Indonesia, having secured approval from the Government of the Republic of Indonesia, recently signed a purchase agreement for an additional three firm orders and an option for one McDonnell Douglas (NYSE: MD) MD-11 aircraft. The intent to order these additional MD-11s was previously announced in November 1989.

Garuda Indonesia now has 12 total commitments for MD-11s, nine of which are firm orders.

Moehamad Soeparno, president of Garuda Indonesia, said the new aircraft, scheduled for deliveries in 1995 and 1996, "are a major element in our future fleet expansion strategies."

In February 1989, the airline announced orders for six firm and two optional MD-11s for delivery beginning in 1991. The new tri-jets will be used for non-stop service to the United States, Europe and the Pacific Rim according to Garuda Indonesia officials.

The MD-11s built for Garuda Indonesia will feature a spacious three-class seating configuration, designed to carry 300 passengers.

Four MD-11s are currently participating in a joint FAA/JAA certification flight test program. First delivery is expected to take place in the fourth quarter of 1990, immediately following certification.

The McDonnell Douglas MD-11 is a long-range, wide-cabin jetliner, capable of carrying 323 passengers and baggage for 8,039 (12,938 km) statute miles non-stop.

As of June 1, 1990, McDonnell Douglas had received 371 orders and other commitments for its newest tri-jet.

HOUSTON (JULY 9) PR NEWSWIRE - Continental Airlines today reported that in June it flew 3.4 billion revenue passenger miles (RPMs) and 5.5 billion available seat miles (ASMs) for a load factor of 62.2 percent. This compares to a 67.0 percent load factor in June 1989, when traffic was significantly inflated by a national marketing program that allowed children to fly for one dollar when accompanied by a parent.

Year-to-date, Continental's load factor is 59.4 percent, which is 0.4 points ahead of the 1989 level. In the January-June period, Continental flew 18.6 billion RPMs and 31.4 billion ASMs.

CONTINENTAL AIRLINES
Preliminary Systemwide Traffic Results

JUNE	1990	1989	Change
RPMs (000)	3,398,564	3,646,531	- 6.8 percent
ASMs (000)	5,467,759	5,440,757	+ 0.5 percent
Load Factor	62.2 percent	67.0 percent	- 4.8 points

YEAR-TO-DATE	1990	1989	Change

CAMBRIDGE, MA (JULY 9) PR NEWSWIRE - Biogen, Inc. (NASDAQ: BGEN) today reported record revenues and continued profitability for the second quarter of 1990.

For the three months ended June 30, the company reported record revenues of $14,332,000 resulting in net income of $1,617,000 or 1 cent per share following dividend payments on its preferred stock. For the second quarter last year, the company reported a net loss of $212,000, or (1 cent) per share based on revenue of $8,939,000.

For the first six months of calendar 1990, revenues increased 67 percent to $28,475,000 and net income amounted to 2 cents per share vs. a loss of (1 cent) per share in 1989.

Research and development expenses in the quarter amounted to $9,534,000, a 50 percent increase over last year. For the first six months, R&D increased 42 percent to $17,541,000.

Sales of hepatitis B vaccines and diagnostics and alpha interferon by Biogen's licensees continued to expand at a rapid pace.

A hirugen related peptide, with broad potential uses in cardiovascular indications, entered human clinical trials in the first week of June. This product candidate progressed from the lab to the clinic in only two years. While early results are encouraging, as with any new drug candidate, Biogen remains cautiously optimistic.

This is the fourth Biogen drug candidate currently in human clinical trials. Receptin(tm) recombinant soluble CD4 has been in testing in AIDS patients since October of 1988. Beta interferon and gamma interferon trials continue in Europe.

Also during the quarter an important patent relating to the transgenic production of human proteins in animals was licensed to companies specializing in this field. Biogen's research in this emerging industry has led to technology that could be an important source of future revenue. Biogen's patent is the first granted in the U.S. in this area.

Jim Vincent, chairman and CEO of Biogen, commented, "The second quarter events are another benchmark that indicates that our research, clinical and financial progress continues. We continue to expand our rapidly growing and highly productive research efforts while maintaining a healthy financial profile. The beginning of clinical trials with our fourth potential human drug is exciting and brings us a step closer to our goal of becoming an operating pharmaceutical company."

Biogen is a leading biotechnology company principally engaged in developing genetically engineered pharmaceuticals.

PITTSBURGH (JULY 9) PR NEWSWIRE - Building on a model pioneered by Blue Cross of Western Pennsylvania, Independence Blue Cross of Philadelphia and Pennsylvania Blue Shield have established a program to provide free primary health care to children of working poor families, it was announced today.

Known as the Caring Program for Children, the new Blue Cross and Blue Shield program has a goal of serving 3,000 southeastern Pennsylvania children during its first year beginning September 1990.

The program will be financed through a combination of corporate and private funds. Blue Cross and Blue Shield will match all contributions and

absorb the administrative costs of a newly established foundation that will solicit and receive funds to support the program.

The Philadelphia-area initiative replicates the Caring Program for Children that Blue Cross of Western Pennsylvania and Pennsylvania Blue Shield began in 1985.

In western Pennsylvania, the program provides primary health care benefits to children from working poor and unemployed families -- at no cost to the participating families. Covered services include preventive care, immunizations, doctor office visits when a child is sick, emergency medical and accident care, outpatient diagnostic tests and outpatient surgery. The program has helped more than 14,000 western Pennsylvania children.

Dolores S. Wilden, vice president, community affairs, Blue Cross of Western Pennsylvania and member of the board of directors of the Western Pennsylvania Caring Foundation, supported the new program for children in southeastern Pennsylvania: "I am encouraged that the people of southeastern Pennsylvania are committed to addressing the health care needs of children whose families earn too much money to qualify for Medicaid assistance but not enough to afford private health care coverage."

Blue Cross of Western Pennsylvania has been working with Blue Cross and Blue Shield plans in other states to improve access to health care for needy children across the country. Plans in 11 states have launched their versions of the Caring Program. Three other states will begin similar programs by the end of 1990.

HENDERSON, N.C. (JULY 9) PR NEWSWIRE - John H. McElroy, former vice president of sales and marketing for Rose's Stores, Inc. (NASDAQ: RSTO), was named today as the retail discounter's new senior vice president and chief merchandise officer, according to J.A. Roberts, Jr., executive vice president, chief corporate affairs officer.

Mr. McElroy replaces Anthony J. Cincotta, whose resignation from Rose's becomes effective July 11. Mr. Cincotta resigned to pursue other business interests.

Following 13 years' experience with W.T. Grant Company, Mr. McElroy joined Rose's in 1976 as a field merchandise supervisor. He was promoted to sales promotion manager in 1977, and sales manager in 1980. He was

promoted to vice president of sales and marketing in 1984.

Mr. McElroy is a native of Marshall, N.C., and is a graduate of the University of North Carolina, Chapel Hill. He and his wife, Jeannette, have two adult children.

Rose's Stores, Inc., is listed on the NASDAQ System for over-the- counter securities. Voting stock has the symbol "RSTO" and the non- voting Class B stock has the symbol "RSTOB." The public company reported annual sales in the fiscal 1989 of $1.5 billion.

#90190p2808 07/09/1990 ~PR Newswire

ST. LOUIS (JULY 9) PR NEWSWIRE - INTERCO Inc. (NYSE: ISS) reported results for the first quarter ended May 31, 1990.

Operating earnings of the four core companies were satisfactory. Footwear earnings were up over last year and are expected to continue that trend throughout the year. Earnings of the furniture segment were down, but in light of the softness in the industry, the results were as anticipated. Richard B. Loynd, chairman of the board, commented that in recent weeks there had been some improvement in furniture orders. This could be an indication that the industry may be seeing the upturn that experts have been predicting.

Loynd stressed, "We remain confident that for the full year operating earnings of our core companies will be ahead of fiscal 1990."

INTERCO's results from continuing operations for the first quarter of fiscal 1991 reflect only its core companies -- Broyhill Furniture Industries Inc.; The Lane Company Inc.; Converse Inc.; and The Florsheim Shoe Co.

For the first quarter sales from continuing operations were $357.9 million compared with $468.7 million a year ago. The year- earlier figures, however, include Ethan Allen Inc., sold in the second quarter of fiscal 1990, and Senack Shoes Inc., the majority of which was also sold in the second quarter. In last year's first quarter core business sales were $354.8 million.

Earnings from continuing operations, after corporate expense but before interest expense, asset dispositions and income taxes, were $19.8 million, compared with $38.2 million. The year-ago results include a profit contribution of $12.4 million from Ethan Allen and Senack. Core companies' earnings before corporate expense were $23.8 million, compared with $28.7 million a year ago.

The net loss from continuing operations declined to $34.1 million, or $1.46 a share (including preferred dividend requirements of 60 cents a

share), from $41.4 million, or $1.54 a share last year (including preferred dividend requirements of 51 cents a share), as the company benefited from lower interest expense. Including discontinued operations, INTERCO reported a net loss of $41.3 million, or $1.64 a share, versus a net loss of $31.6 million, or $1.29 a share a year ago.

As previously announced, INTERCO is in negotiations with its bank group regarding an amended bank credit agreement. Loynd also reported that INTERCO has been meeting with representatives of its debentureholders to discuss the company's proposed exchange offer aimed at reducing interest expense substantially. "The initial talks have been constructive," Loynd observed.

"The stakeholders recognize that INTERCO has four strong core companies with substantial earnings potential," he continued. "As we have consistently pointed out, the company's problems are not linked to operations, but to the fact that INTERCO has too much debt. Because of this, we are hopeful that we can restructure the balance sheet and then concentrate on building shareholder value over the longer term."

NEW YORK (JULY 9) PR NEWSWIRE - The Greater New York Savings Bank (NASDAQ: GRTR) announced today that its board of directors voted a dividend of 12 cents per common share. It is the eleventh consecutive quarterly dividend since the bank converted from mutual to stock ownership on June 24, 1987. The dividend is payable on Sept. 1, 1990 to stockholders of record at the close of business on Aug. 11, 1990.

Charles J. Ohlig, chairman and chief executive officer of The Greater, stated: "The consistency of our dividends despite the continued uncertainty of the economic environment reflects The Greater's strong capital position."

The Greater New York Savings Bank is an FDIC-insured, New York- chartered stock savings bank with assets of $3.0 billion, deposits of $2.2 billion and total stockholders' equity of $213 million, or 7.03 percent of total assets, at March 31, 1990. Nine of its 13 banking offices are located in Brooklyn, where The Greater was originally chartered in 1897, and its four other offices are located in Manhattan, Queens, Nassau and Suffolk counties. The shares are traded on the over- the-counter market under the symbol "GRTR."

#90190p2810 07/09/1990 ~PR Newswire
BOSTON (JULY 9) PR NEWSWIRE - In a major press conference to more than 200 journalists from nearly 20 countries, Digital Equipment Corporation (NYSE: DEC) announced significant new products for all the critical elements of the emerging client/server market, including software, hardware, networking and management capabilities. With today's introduction, all based on Network Application Support (NAS), Digital is offering the most comprehensive program for the client/server computing model, far beyond what is offered by any other vendor today.

"In the '90s, people want to use computers in a much more effective way," said Kenneth Olsen, president, Digital Equipment Corporation. "Users want to sit at the desktop of their choice. They want the flexibility to quickly access information in any database on the network, use the right application to get their work done, and share the work they do with anyone else who needs it. IS managers need to efficiently manage this broad-ranging computer environment, deploying the right level of computing resources where needed, while protecting existing computer investments." All these capabilities are what is now known as "commercial-strength" client/server computing.

According to industry observers, the client/server market is exploding as users continue to demand more capabilities than PC LANs alone can provide.

It is expected to grow to over $100 billion in five years as the client/server style spreads from the office to the lab, to the factory, to transaction processing.

Today's announcement, along with Digital's current leadership capabilities intercepts this growing user demand, and uniquely provides customers with the flexibility and cost effectiveness of commercial strength client/server computing they want in the '90s.

"Digital's client/server strategy offers the functionality of complex, multivendor networks with the simplicity of a single system," said William R. Demmer, vice president, VMS Systems and Servers. "IBM's server strategy centers on mainframes. Digital offers both lower cost commercial strength servers and mainframes, with better cost effectiveness because they work together with users' current computer investments," Demmer observed.

The VAX 4000 Model 300, the newest member of Digital's server family, is a desk-side computer based on an eight-VUP VAX processor. It also features three dedicated 10-MIPS RISC processors that perform very high capacity

disk I/O and Ethernet network traffic tasks, dramatically improving performance and off-loading the CPU. "The VAX 4000 was designed from the ground up, with unique I/O and high availability, to handle the most demanding client/server workloads," Demmer noted.

In addition to its leadership client/server capabilities, the VAX 4000 is ideal for distributed production applications running in branch offices, departments, factories, distribution functions, and research and development laboratories.

The new VAX 4000 system will be offered in server, timesharing, realtime, and dual-host configurations. Complete system prices start at $75,410 for the VAXserver 4000 and $106,850 for the timesharing version.

Digital Equipment Corporation, headquartered in Maynard, Massachusetts, is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

NEWTOWN SQUARE, PA (JULY 9) PR NEWSWIRE - ARCO Chemical (NYSE: RCM) today notified its customers that the company will begin allocating the supply of some of its products as a result of the explosion and fire that occurred at the company's Channelview, Texas, plant on Thursday, July 5.

In placing customers on allocation, the company exercised its contracted

right of "force majeure" to establish an equitable distribution of available product.

Production at the Channelview facility was shut down following the accident, which killed seventeen people. Because damage to the Channelview plant was confined to the area providing utilities to the plant, the company expects to be able to restart the plant in phases over the next several months. Investigations of the accident have been instituted and are ongoing, including one by the Occupational Safety and Health Administration (OSHA).

The company believes it has sufficient property damage, business interruption and general liability insurance to mitigate the financial impact of this tragic accident.

Memorial services for the victims will be held on Friday, July 13, at 4:30 p.m. and 6:30 p.m. in Channelview. A memorial fund is being established for victims of the accident.

CHARLOTTE, NC (JULY 9) PR NEWSWIRE - Duke Power (NYSE: DUK) announced its customers used electricity at a record pace today, reaching a record peak of 13,771 megawatts at 4 p.m.

"We have been able to meet our customers' needs through a combination of our own generating stations and purchases from neighboring utilities," said E.O. Ferrell, vice president -- operating department.

The previous peak of 13,618 megawatts was set on August 18, 1988.

BOISE, ID (JULY 9) PR NEWSWIRE - Morrison Knudsen Corp. (MK) (NYSE: MRN) today announced it has been selected as the construction subcontractor to complete work on a chemical destruction facility at the Tooele Army Depot in Utah. Construction value is estimated at $70 million.

The selection of MK to complete the Tooele Army Depot Chemical Disposal Facility was made by EG&G Defense Materials Inc.

"Selection of MK to build this advanced chemical weapons incinerator complements the company's expanding environmental business by using sophisticated technology to solve chemical waste problems," said William Agee, chairman and chief executive officer of MK.

Work is under way on completion of the incinerator. The facility is designed to destruct defense chemicals, including nerve gas, stored at the depot.

Completion of the project is scheduled for March, 1992.

EG&G Defense Materials Inc., overseeing the work for the Army, said the selection of MK to complete the job was based upon experience and successful completion of other complex government work, among other factors.

LOS ANGELES (JULY 9) PR NEWSWIRE - Security Pacific Bank N.A., the interstate credit card subsidiary of Security Pacific Corporation (NYSE: SPC), announced today that it has become one of the first banks in the

nation to offer its Visa cardholders the option of using their Visa cards as telephone calling cards.

Through an agreement with MCI Communications Corporation (NASDAQ: MCIC), Security Pacific Visa cardholders can now charge phone calls from any touchtone telephone in the United States to their Visa credit card at some of the lowest rates available.

Security Pacific bankcard customers can now also begin charging MCI's PrimeTime home phone service on their Visa cards. PrimeTime allows customers to make long distance calls at substantial savings during the hours when most residential calls are made.

"Security Pacific Visa cardholders won't be needing other credit cards to make phone calls," said William L. Capps, president and chief executive officer of Security Pacific Bank, N.A, "and they can consolidate their bill paying by adding PrimeTime home billing service to their accounts, both at some of the most competitive rates being offered today.

"Security Pacific continues to offer its bankcard holders the most innovative credit card products and services available in the financial services industry," says Capps. "With these latest enhancements to our program, we are proud to expand on Security Pacific's reputation as the most convenient bank in the west."

Security Pacific Visa cardholders will be receiving further information concerning this service through direct mail and in their monthly statements.

MCI is the world's second largest long distance company. Headquartered in Washington, D.C., it provides a full range of global telecommunications services, including voice, data, telex and electronic message services to businesses, consumers and government agencies.

Security Pacific Corporation, with assets of $86 billion, is the fifth largest bank holding company in the nation. It operates banks in six western states, including California, Arizona, Nevada, Washington, Oregon and Alaska, which serve more than five million households.

#90190p2848 07/09/1990 ~PR Newswire

ROCKY MOUNT, NC (JULY 9) PR NEWSWIRE - The Planters Corp. (NASDAQ: PNBT) today reported second quarter net income of $3 million, a 4.7 percent increase from the $2.8 million earned in the second quarter of 1989. Earnings per share rose to 42 cents from 41 cents per share in the same

period last year.

Net income for the first six months increased 3.2 percent to $5.7 million from $5.5 million in the second quarter of 1989. Earnings per share increased to 81 cents compared to 79 cents in the comparable period last year.

"Overall, it was a very good quarter for us in the current economic environment," said Planters Chairman J. Richard Futrell Jr. "Our net interest margin improved from last quarter, and we did an outstanding job in controlling non merger-related expenses.

"Our proposed merger with Peoples Bancorporation continues to progress well, but we are starting to feel the effects of the significant expenses required to complete a merger of this size. These expenditures will accelerate through the rest of the year which will affect our short-term earnings. Long-term, however, the investments we are making now -- combined with savings from the merger -- will make Centura Banks a very profitable investment for our shareholders."

Net charge-offs for the quarter were .31 percent of average loans, and nonperforming assets were 1.13 percent of total loans and foreclosed property.

"Our asset quality remains strong by industry standards," Futrell said. "The increases in charge-offs and nonperforming assets are a result of market conditions -- not of the way we make loans. A bank cannot be immune to the conditions in its markets. The economy in general has slowed down, which is affecting a number of businesses. Our lending philosophy continues to emphasize prudent, quality assets. We are cautious in the loans we make and have adequate reserves for any potential losses."

For the quarter, return on assets was 1.01 percent and return on shareholders' equity was 14.27 percent.

At June 30, 1990, total assets were $1.2 billion, a 13.4 percent increase from one year ago. Deposits rose 15.5 percent, and loans rose 15.8 percent. Shareholders' equity increased 9.7 percent to $84.4 million.

The Planters Corp. and Peoples Bancorporation have agreed to merge to form Centura Banks Inc., which -- on approval -- would have total assets of more than $2.5 billion.

#90190p2859 07/09/1990 ~PR Newswire

CHICAGO (JULY 9) PR NEWSWIRE - FNW Bancorp today announced record earnings for the second quarter 1990. The company's strong results were driven by a 12.0 percent increase in loans, which raised earning assets by 10.1 percent, and a 45 percent decrease in the provision for loan loss. The quality of the company's loan portfolio -- considered one of the strongest in the Midwest and the country -- dominates the holding company's performance, as it has for the past five years.

Net income for the quarter increased to $3.95 million, or $.57 per share, compared with $3.54 million, or $.51 per share, in the same period 1989 -- an increase of 11.7 percent. In addition, the company strengthened its primary capital ratio to 7.93 percent during the quarter from 7.64 percent last year. The company's $3.95 million in net income during the quarter just ended produced a return on average assets of 1.22 percent and a return on shareholders' equity of 18.08 percent. Book value climbed 15.1

percent to $13.05 per share during the second quarter, up from $11.34 a year ago.

For the six-month period just ended, net income amounted to $7.64 million, up 16.0 percent from the $6.59 million reported in the first six months of 1989. Comparing year-to-year performance ratios for the six-month periods: the company reported an ROA of 1.21 percent and ROE of 17.89 percent in 1990. For the same period 1989, ROA amounted to 1.16 percent and ROE measured 17.78 percent.

"The strength of our results stand in stark contrast to the 14 percent general decline in bank profits reported nationally by the FDIC (Federal Deposit Insurance Corp.) and other regulators in the first quarter of this year," commented Harold R. Pehike, president and chief executive officer of the eight-bank holding company.

"Much of the industry's current performance problem stems from the huge provisions for potential loan loss needed to cover non- performing loans, particularly in real estate. Commercial/non- residential real estate development and construction are where the biggest problems currently lie. These types of loans are not problems for FNW. During the last 12 months we have not had to make provision for possible loan loss in our real estate portfolio.

"We also enjoy being positioned in strong, diverse markets. Our suburban Chicago locations continue to enjoy diversified, high quality loan demand and deposit growth -- another contrast to what is being reported elsewhere in the country. Further, we have also made a conservative assessment of future demand and find little likelihood that there will be any contraction in these markets," Pehlke added.

Solid Performance Ratios

A number of independent sources have indicated that FNW Bancorp has one of the best quality loan portfolios in the eight-state region surrounding Chicago. This becomes readily apparent in three key ratios: on a consolidated basis at May 31, 1990, the company's non performing assets ratio stood at 0.6 percent; net charge-offs year-to date, as a percent of total loans, amounted to less than 0.1 percent, less than one fourth of what they were last year, and reserve for loan losses was almost two times potential problem loans.

"Perhaps even more importantly, we do not foresee any changes in portfolio quality in the measureable future," Pehlke emphasized.

"As a group of community banks, we have long known that long-term relationships are more valuable than short-term deals. With our close community ties, we know our customers and their needs. This knowledge makes for good lending," he continued.

When measured against the latest national loan performance averages (the latest quarterly figures available are for March 31, 1990), it is easy to see why FNW's loan quality is ranked among the best. The national non-performing assets ratio stands at 2.35 percent (loans and leases more than 90 days past due plus Other Real Estate Owned divided by total assets); net charge-offs measure 1.29 percent of total loans and leases outstanding; and reserves to cover potential loan loss measures 81.67 percent of all problem loans.

In commenting on other performance ratios, Pehlke indicated that the current economic environment has put some pressure on interest margins. The company's current net margin is holding steady at 4.57 percent -- down slightly from last year's 4.63 percent. This six basis point decline in net margin is not expected to materially affect the holding company's performance. Year-to-date results are on target with the company's 1990 business plan.

CAPITAL GROWTH

During this period of strong profits, the company added substantially to its capital strength. FNW Bancorp's primary capital stood at 7.93 percent of total assets compared to 7.64 percent a year ago.

For the comparable quarters in each of the two years; total assets increase 10.5 percent to $1.33 billion in 1990 from $1.20 billion in 1989; total deposits rose 10.7 percent to $1.18 billion from $1.07 billion, 1990 over 1989; and total loans grew to $800 million in 1990, up from $714 million in 1989.

FNW Bancorp is a $1.3 billion multi-bank holding and equipment leasing company operating in selected markets in northeastern Illinois with 15 locations in the high growth areas of Cook, Kane, Lake and DuPage Counties.

#90190p2866 07/09/1990 ~PR Newswire

MIAMI (JULY 9) PR NEWSWIRE - The Eastern Pilots Association issued the following statement today in reaction to the declaration of an impasse in the Eastern Airlines pilot contract negotiations and the ALPA threat to strike the company in thirty days:

Captain Tom Cooper of the Eastern Pilots Association stated that his organization is now supported by 1,700 of the 1,800 working pilots of Eastern Airlines.

Cooper scoffed at ALPA's claim that it was going to send out a strike ballot claiming that ALPA is a defunct union on the Eastern property and does not represent the working pilots of Eastern Airlines.

ALPA is deceiving the public by stating that there is labor unrest at Eastern. Labor relations between the working pilots and Eastern is better today than it ever has been.

With the present cohesiveness of the working pilots and the continuting existence of the Eastern Pilots Association, labor peace will continue to exist at Eastern. ALPA is simply running a public relations smoke screen by which that organization hides their desire to destroy the carrier and the personal lives of the 18,000 employees who have valiantly worked for the last 15 months to save Eastern.

Cooper went on to say that the concerns of ALPA are not the concerns of the working pilots of Eastern Airlines. The general public should not be misled by what has become ALPA's personal agenda.

The strike vote, if taken, will be participated in only by those pilots who walked out in March 1988 and have never returned from strike and are presently in a "no work" category.

Cooper said that the labor relations between the working pilots of Eastern Airlines and the company has never been better. The working pilots, who have demonstrated overwhelmingly that they wish to have the Eastern Pilots Association represent them, have no intention of honoring any strike called by ALPA against the company. It is the Eastern Pilots Association's intention to rebuild Eastern Airlines to the preeminence it once enjoyed.

#90190u0084 07/09/1990 ~United Press International

WASHINGTON (JULY 9) UPI - With the Census Bureau reporting that it has surveyed all but 1 percent of the estimated 106 million households in the United States, analysts are already beginning to wonder what the numbers will show.

Official figures on the once-a-decade national head count will not be available until the end of the year, when they are formally presented - as required by the Constitution - to the president for purposes of redistricting the House of Representatives.

But even before they began counting on April 1, Census Day, demographers at the Census Bureau had some idea of what to expect.

They expect, for example, that the national population will come in right around 250 million people, up from 226,545,805 people in 1980, and growing about 1 percent a year.

The census also is expected to show the population is getting older, that the average household and family sizes are continuing to decline, that the nation's racial and ethnic mix is changing, and that the movement from the Frostbelt to the Sunbelt is continuing but at a slower rate.

But what is not known, according to census officials, is whether particular regions, states, metropolitan areas, cities, counties and even neighborhoods are changing in the same way as national trends.

What the national trends - as well as the specific regional to neighborhood findings - show have implications for political policy makers and business leaders as they contemplate the future.

For example, the 1990 census is expected to show an increase of about 23 percent in the number of people age 65 and older, bringing the size of that group to 31.4 million people, compared with 25.5 million in the 1980 count. That growth has policy and economic implications for the nation's health care system, among other issues.

Census demographers also expect the size of the average family to continue to decline, from 3.29 people in 1980 to 3.15 people in 1990. That figure reflects the lower birth rate in the past two decades compared with the 1950s and 1960s, delayed marriage and an increased proportion of people living alone in most adult age groups.

The United States, always a land of immigrants, continues to be so, but the new census figures will demonstrate how the mix is changing, especially reflecting an increase in the numbers of immigrants from Latin America and Asia.

Bureau staffers, for example, believe the new census will show the Hispanic population making up about 8.2 percent of the expected 250 million people, compared with 6.5 percent in 1980. Since 1980, the Hispanic population has increased by 39 percent, or about 5.6 million people. In 1989, census officials estimated its size at 20.1 million people.

The 1990 census also is expected to confirm that the Asian and Pacific Island population is the fastest growing racial group from a percentage view, totaling less than 2 percent of the population in 1980 but now expected to be nearly 3 percent.

Blacks, who made up 11.8 percent of the population in 1980, are expected to represent about 12.4 percent of the total in 1990, with slightly more than 30 million people.

Marketers and business planners also will look carefully at how the regional distribution of the population has changed.

According to Census studies, while the overall population will show about a 10 percent increase, the growth by regions will be uneven, with the West and South continuing to grow faster than the Northeast and Midwest although at a slower rate.

For example, census demographers are predicting the 1990 figures will show the population in the South has grown about 15 percent since 1980, compared with a 20 percent growth between 1970 and 1980. The West's growth rate is projected to be about 20 percent in the 1980s, compared with 24 percent in the 1970s.

Meanwhile, the population growth of the Northeast during the 1980s is

expected to show close to a 4 percent increase, compared with only a 0.2 percent rise from 1970 to 1980. The Midwest's growth, in contrast, is expected to show only about a 2 percent population increase between 1980 and 1990. Its 1970s rate was 4 percent.

(JULY 9) UPI - Lawmakers in the Louisiana legislature Sunday passed what could become the nation's most restrictive anti-abortion law. The state House quickly adopted a compromise bill pieced together by abortion foes in the Senate. The legislation O-K'd by the House came about after the Senate was UNable to over-ride Governor Buddy Roemer's veto of a more restrictive bill Friday. There's NO word if Roemer will approve the revised bill.

The Houston Economic Summit gets underway Monday between the leaders of the world's major industrial powers. President Bush said at a pre-summit barbecue he hosted Sunday that he and his counterparts are united in working... in his words... ''for peace, for harmony in this exciting world.'' It remains to be seen if peace and harmony will reign at the negotiating table as the leaders discuss the contentious issue of financial aid to Moscow.

A survey released Sunday says more than three-fourths of all Americans believe discrimination occurs in the workplace. 78 percent of people questioned in a random phone poll said they think some, most or all ''employers practice some form of discrimination in... hiring or promotion practices.''

A poll released Sunday indicates the majority of young Americans would rather forego the pressures associated with the rat race. People aged 18 to 29 are more likely to opt for careers in the public service sector than on Wall Street. Nearly six out of 10 say they will switch jobs until they find complete satisfaction in their work.

(JULY 9) UPI - Controversial rappers 2-Live Crew took the stage Sunday at an Austin, Texas, club... one night after their refusal to perform in Dallas triggered a chair-breaking melee among fans. Sunday's performance came before a less than half-full auditorium and featured NONE of the courtroom maneuvering needed to ensure the Dallas show could proceed despite the opposition of city authorities.

New York officials say they will NOT release the identity of a pilot whose remains were retrieved during the weekend until they notify his family.

Authorities say the UNidentified Canadian flier went down in a remote area of the Andirondack region six years ago. His plane was found by a hiker Thursday in dense woods in upstate New York.

#90190u0144 07/09/1990 ~United Press International

NEW YORK (JULY 9) UPI - The Pentagon is moving forward with a plan to purchase a $4 billion electronic radar-jamming device, despite the fact the technology has failed critical flight tests, a published report said Monday.

The controversial technology, the Airborne Self-Protection Jammer, has generated debate in the Pentagon and is expected to test the leadership of Defense Secretary Dick Cheney, The New York Times reported.

Whether Cheney proceeds with the purchase of the system, which failed crucial flight tests on the fighter planes it is supposed to protect, is expected to test the secretary's determination to reverse the Pentagon's tradition of buying weaponry that has not been perfected technologically, the Times said.

To date, the Defense Department has already spent $1 billion on the jamming device, whose purpose is to distinguish between types of incoming

radar, identify signals threatening to the aircraft, and release jamming signals to confound enemy planes.

The system is already five years behind schedule and engineers still have not produced a workable prototype, the Times said.

Under Cheney's leadership, the Pentagon last summer passed guidelines mandating that major projects pass strict performance tests before purchase. The guidelines were written after an embarassing incident in 1985 in which the Pentagon spent $2 billion on an anti-aircraft gun that failed to pass key tests, the newspaper said.

Last summer Cheney also approved the cancellation of the jammer project.

However, within days intense lobbying by the Navy, which argued that cancellation of the system would make 1,000 warplanes vulnerable to attack persuaded the Pentagon to reverse the decision.

Production contracts for the first 100 devices were awarded last fall, the Times said.

Deputy Defense Secretary Donald Atwood has promised Congress the department will not spend any more funds on the jammer until all production tests are met.

Controversy surrounding the jamming device also highlights the frantic attempts of weapons manufacturers to obtain Pentagon contracts in an era of diminishing defense spending, the Times said.

LOS ANGELES (JULY 9) UPI - NAACP director Benjamin Hooks called Sunday night for an end to what he termed a campaign of harassment and selective prosecution of prominent black politicians, including Washington, D.C., Mayor Marion Barry.

Hooks in his keynote address at the opening of the NAACP's 81st national convention also called for passage of a new civil rights bill in Congress and a renewed commitment by prosperous blacks to help the less fortunate under siege in drug- and gang-riddled communities.

While his speech was met with repeated rounds of applause from about 5,000 people at the Los Angeles Convention Center, guest speaker Oprah Winfrey drew an even more rousing reception.

More than 200 people pressed forward to snap the daytime talk show host's photograph, many calling out ''Oprah'' as security guards held them back

and urged the crowd to return to their seats.

Even Hooks warmly praised Winfrey as the ''queen of daytime TV'' as he and the other special guests on the front dais hugged the actress and posed for photographs.

''I am one black woman, but I've been around for a long time,'' Winfrey said. ''The drums of Africa still beat in my heart. They will not let me rest until every black boy and every black girl has their chance to prove their worth.''

With readings from black poet Maya Angelou, novelist Alice Walker, playwright Langston Hughes and the Bible, Winfrey recalled the struggle of blacks during the last two centuries and joined Hooks in calling for a renewed commitment to the helping fellow blacks overcome the scourge of drugs, gangs and crime.

Hooks, who has run the nation's oldest civil rights organization since 1977, meanwhile, cited Barry's drug trial and a long list of investigations of other black leaders, including Los Angeles Mayor Tom Bradley, New York Mayor David Dinkins and Rep. William Gray, D-Pa., as evidence of a ''vicious assault'' by prosecutors.

''At no time since Reconstruction has there been a comparable period of incessant harassment of black elected officials,'' Hooks said.

''Something is wrong with the system,'' Hooks said, ''when millions of dollars are spent and over 70 FBI agents assigned to trail and monitor'' Barry, while Justice Department officials complain there are insufficient resources to throroughly investigate the savings and loan scandal.

''That's why I say it is not enough to mouth pious platitudes about law and order if laws apply only to the black and the poor. We are insisting, and we will continue to insist, that the policy of convenient and selective prosecution of black leaders in this country cease,'' Hooks said.

While Barry was seen in a government videotape taking cocaine, Hooks suggested the mayor was entrapped by a government sting and was in the hotel room with his former lover for ''something other than smoking dope.''

The NAACP last held a convention in Los Angeles in 1966, less than a year after the August 1965 Watts riots, which left 34 people dead, 1,032 injured and $40 million in property damage.

The world has ''experienced cataclysmic changes'' since then and thousands of black politicians including Bradley, Dinkins and Virginia Gov. Douglas Wilder - who will receive the NAACP's 1990 Spingarn Award Thursday - have risen to prominence, Hooks said.

Despite the victories, ''the struggle continues,'' he said, repeating the theme of both the 1989 and 1990 conventions.

The civil rights leader asked the thousands of people attending the five-day convention to spread the message that a renewed commitment is needed to help the millions of blacks still trapped in ghettos and impoverishnent.

''While significant changes have been made for many of our people, there remains a significant segment of black America that is inextricably mired in a socio-economic morass,'' Hooks said.

Even with segments of the black community rising into the upper and middle class, too many others suffer from drug abuse, high teen-pregnancy rates, crime, decaying families, inadequate education and few job opportunities, he said.

To fail to help less fortunate blacks, he said, would be like ''spitting on the graves'' of the black leaders who carried on the civil rights struggle in the past.

If the blacks who have fled to suburbia allow their counterparts in the inner city to languish, he said, ''history will record us as the first generation that left black America worse off than we found it.''

Hooks said he regarded the proposed Civil Rights Act, which the Senate is to begin debating later this year, as a ''critical legislative imperative that will restore certain rights that were kidnapped and taken hostage by the conservative majority on the current U.S. Supreme Court.''

(JULY 9) UPI - Pro-abortion advocates expressed disgust and rage following political manuevering by anti-abortion lawmakers in the Louisiana legislature Sunday. Just when it appeared abortion foes had lost a major battle in their bid to over-ride a veto of the nation's strongest anti-abortion measure, they re-vamped the legislation and attached it to an UNrelated bill. The new measure passed both chambers and now goes to Governor Buddy Roemer.

Formal talks begin Monday in Houston between the world's major economic powers. President Bush is hosting the get-together of his counterparts from Britain, France, West Germany, Italy, Japan and Canada. The group will survey the global situation and issues such as the environment and trade. But perhaps the most potentially divisive issue is that of financial aid to Moscow, a notion which the Bush administration opposes.

N-Double-A-C-P Director Benjamin Hooks says it's time for the government to quit paying lip service to the notion of justice for all. In the keynote address to the 81st national convention of the nation's oldest civil rights group, Hooks said federal authorities are engaged in- quote- ''incessant harassment of black elected officials.'' Hooks also told the Los Angeles crowd that Congress should pass a new civil rights bill.

Initial reports from Maine's Lowell Cove sounded dismal. A rare humpback whale was seen in the cove and feared trapped by fishing nets. However, further investigation revealed the endangered mammal was NOT snared in the cove's 500-foot barrier net. Instead, he was using the net to harbor his meals. Officials say their only fear for the whale is that curious people will sail too close to the sea creature.

#90190u0222 07/09/1990 ~United Press International

(JULY 9) UPI - A senior lawmaker in Singapore Sunday predicted his country's decision to normalize ties with Beijing will lead to full diplomatic relations with China. The legislator said he also expects his country's initiative to lead to expanded trade links with Beijing. Singapore leaders have unanimously welcomed the announcement of normalized ties, which takes effect August 8th.

A new book penned by the head of the American Institute for Preventive Medicine seems to answer the age-old question of why some men wear such ugly ties. In his book, ''A Year of Health Hints,'' Don Powell says research conducted at Cornell University indicates vision problems can occur when a necktie is knotted tightly. Evidently, the tie cuts the flow of blood to the brain. There's NO word if too-tight ties affect decision-making abilities.

#90190u0225 07/09/1990 ~United Press International

LOS ANGELES (JULY 9) UPI - The first trial in the notorious McMartin Pre-School child molestation case lasted nearly three years, but the re-trial lasted just over three months before going to the jury.

The jury was scheduled to receive its instructions on the law Monday, then retire to begin deliberating the fate of Raymond Buckey, the former teachers' aide who is the sole remaining defendant in what was once the biggest molestation case in U.S. history.

At the first trial, the longest and costliest in this country at $13 million, Buckey, 32, and his mother, Peggy McMartin Buckey, 63, were acquitted in January of 52 molestation counts. Buckey is being re-tried on

eight charges on which the first jury could not agree.

If convicted Buckey could be sentenced to up to 22 years in prison. The five years he spent in jail unable to make bail would be subtracted. Five co-defendants and hundreds of charges were dropped for a lack of evidence before the first trial, which involved 11 children.

Buckey's second trial, which began April 10, involves only three children.

In their closing arguments, prosecutors portrayed Buckey as a long-time molester who went to work without underwear. They said the case comes down to a matter of credibility: who does the jury believe, the three girls he is accused of molesting or Buckey, who has steadfastly denied ever molesting anybody.

The defense maintained all along that the alleged victims were the products of a kind of mass hysteria and their stories of molestation grew out of sessions they had with therapists whose questioning tactics were given as the reason most jurors in the first trial could not find enough evidence to convict.

Many of the first jurors said they believed that some of the children had been molested, but said the state failed to prove that they were molested at the preschool or by the Buckeys.

The prosecutors mocked Buckey's contention that the girls were brainwashed while the defense scoffed at the state's medical evidence, saying it was unreliable and that the investigation had been botched from the beginning.

The family-run school, once a highly respected institution in the suburban city of Manhattan Beach, was recently razed.

#90190u0233 07/09/1990 ~United Press International

CAPE CANAVERAL, FL (JULY 9) UPI - Weekend tests found signs of leaks in fuel line fittings taken from the shuttle Columbia in critical work to resolve a problem that has grounded NASA's shuttle fleet, officials said.

Engineers at a Rockwell International test facility in Downey, Calif., filled Columbia's suspect 17-inch-wide fuel line ''disconnect'' fitting with supercold liquid hydrogen Saturday to duplicate a leak that grounded the veteran spaceplane May 30.

Using a variety of sensors, engineers hoped to be able to pinpoint the cause of the elusive leak in order to make repairs and resume shuttle flights.

''Tests did show some leakage, but the significance of what was observed cannot be determined until more testing is done and analysis of the data is completed,'' NASA spokesman Mark Hess said Sunday.

Top NASA managers planned to discuss the results of the California tests at a news conference Monday in Washington.

The disconnect assembly, situated where the shuttle's 17-inch primary fuel line and a smaller 4-inch line enter the belly of the orbiter, allows the ship's external tank to be jettisoned after the shuttle reaches orbit.

Both halves of Columbia's disconnect assembly were removed and flown to Downey for laboratory tests and analysis.

NASA measures leak rates in ''standard cubic inches per minute,'' or SCIMs. Hess said the tests Saturday showed a leak rate of 1,000 SCIMs around the 17-inch fuel line, 13 SCIMs around the 4-inch line and around 2,700 SCIMs when fuel was pumped through both pipes at the same time.

But some leakage is always present and Hess said additional tests were ordered Sunday to determine if the observed leakage matched that detected the night before Columbia's planned May 30 liftoff.

Back at the Kennedy Space Center, meanwhile, technicians geared up to pump liquid hydrogen into the shuttle Atlantis's external tank Friday or Saturday to isolate a similar leak that forced NASA to ground its shuttle fleet.

Engineers plan to use special ''baggies'' around Atlantis's 17-inch disconnect fitting to enable them to isolate the source of the leak without having to remove the hardware for another round of California tests.

Even so, Atlantis ultimately will have to be hauled back to NASA's rocket assembly building and removed from its external tank for repairs.

NASA originally hoped to launch Columbia and Atlantis before the high-priority launch of the shuttle Discovery on Oct. 5 to carry the European Ulysses solar probe into space.

Given the progress of the leak investigation, however, it appears likely NASA will be unable to launch more than one flight before Discovery's mission.

#90190u0237 07/09/1990 ~United Press International

BACOLOD, Philippines (JULY 9) UPI - Communist guerrillas raided a village

in the central island of Negros, killing a policeman and his cousin and kidnapping four others, the military said Monday.

The rebel attack Sunday occurred after officials suspended military operations against guerrillas of the New People's Army on the island to allow civilian negotiators to secure the release of two kidnapped foreigners.

Peace Corps volunteer Timothy Swanson, 26, of Cheyenne, Wyo., was kidnapped in his village of Patag June 13. Fumio Mizuno, 36, training director of the Organization for Industrial, Spiritual and Cultural Advancement in Tokyo was abducted May 29.

The 19,000-member NPA said Swanson and Mizuno would be freed within the month.

About 40 guerrillas of the communist NPA swooped down Sunday in the village of Castellano and set up a checkpoint on the main highway, said Brig. Gen. Raymundo Jarque, Negros military commander.

A guerrilla group went to the house of police patrolman Joseph Medina and killed him and his female cousin, Jarque said.

At the checkpoint, the guerrillas kidnapped Tranquilino Carmona Jr., 19-year-old son of the mayor of nearby San Carlos city, businessmen Wellington Uy and Joel Tan and another civilian, Lester Lumanog, Jarque said.

The guerrillas were joined by local bandits in Negros, 300 miles south of Manila, Jarque said. Troops were pursuing the guerrillas, who were also reported to have robbed passengers on several passing buses, Jarque said.

U.S. officials said they discovered the kidnapping of Swanson while enforcing an order June 27 withdrawing 261 Peace Corps volunteers from the Philippines amid NPA threats they would kill or kidnap them.

The NPA, which has been leading a 21-year rebellion, has been blamed for the slayings of 10 Americans since October 1987.

The guerrillas have vowed to kill more Americans unless the United States dismantles its six military bases in the Philippines.

#90190u0245 07/09/1990 ~United Press International

(JULY 9) UPI - Before the league's top players converge on Wrigley Field to share the spotlight in Tuesday's mid-summer classic, several stars tuned up Sunday by turning in classic, all-star performances.

Frank Viola continued his season of near-invicinciblity, posting his league-leading 13th victory against Atlanta while first-time all-star Barry Bonds paced the Pittsburgh Pirates' victory over the Los Angeles Dodgers with three RBI. Meanwhile, Kevin Mitchell continued his assult on National League pitching by belting his 20th and 21st home runs of the year in San Francisco'sdouble-header sweep of Chicago,.

Just an average day for the NL's best.

Viola, 13-3, who allowed just one run and seven hits over 7 2-3 innings in New York's 2-1 victory, received hitless relief from fellow All-Star John Franco. Franco, who shares the league lead in saves (17) with Cincinnati's Randy Myers, helped the Mets to their 17th victory in 19 games.

''The three days off will be nice,'' Viola said, ''but the thing we have to do is come back with the mental attitude that we ended first half with.

Bonds, batting .340, is one of the big reasons Pittsburgh sits a half-game atop the eastern division and a season-high 17 games over .500 at 49-32. It is the fifth time in their history that the Pirates have held first place at the All-Star break, and all four previous times they captured the pennant. However, they aren't listening to history.

''We've got 162 games,'' said Bonds, who went 2 for 4. ''Eighty-one don't mean anything.''

Bonds singled in a run in a three-run first inning, then doubled home two more in a three-run fifth for 62 RBI this season.

Mitchell posted three RBI as San Francisco's clubbed the Cubs 5-3 and 10-4. He belted a two-run homer to highlight a four-run first inning in the first game and smacked a solo shot in the nightcap.

''I just told myself I had to be more aggressive, and I got back up on (closer to) the plate where I was last year,'' said Mitchell. ''I just knew I had to come out here today and make somebody pay.''

Tuesday, the American League pitchers will be footing the bill.

Elsewhere in the National League, Philadelphia clipped Cincinnati 4-3, Houston topped Monteal 5-3, New York edged Atlanta 2-1, San Francisco swept Chicago 5-3 in the first game and 10-4 in the nightcap, Pittsburgh pounded Los Angeles 7-2 and St. Louis slugged San Diego 4-1.

In the AL it was: Minnesota 6, New York 3; Seattle 6, Toronto 3; Detroit 10, Kansas City 7; Baltimore 8, Chicago 6 in 11 innings; Milwaukee 20, California 7; Oakland 8, Cleveland 3 and Texas 4, Boston 3 in 11 innings.

-- AROUND THE NL --

Phillies 4, Reds 3

At Philadelphia, John Kruk singled in Randy Ready in the seventh to help Philadelphia snap a four-game losing streak. Kruk's two-out single off Norm Charlton, 6-3, made a winner of Darrel Akerfelds, who allowed one hit over three scoreless innings to improve to 3-0.

Astros 5, Expos 3

At Montreal, pinch-hitter Terry Puhl hit a two-run double to highlight a three-run seventh inning, helping Houston snap a seven-game losing streak with only their second win in their last 22 road games. Mark Portugal, 3-8 earned the victory and Dave Smith pitched two scoreless inning to earn his 16th save. Dennis Martinez, 6-7, allowed four runs and eight hits in seven innings.

Mets 2, Braves 1

At Atlanta, Frank Viola notched his 13th victory, matching Oakland's Bob Welch for the major-league lead in wins. Viola, 13-3, allowed seven hits over 7 2-3 innings while John Franco notched his 17th save. Marty Clary dropped to 1-5.

Giants 5, Cubs 3 (1st game)

At San Francisco, Kevin Mitchell belted a two-run home run in a four-run first inning. Mitchell belted a pitch from Jeff Pico, 4-2, for his 20th homer. Rookie Trevor Wilson, 6-0, allowed three runs and seven hits over 5 2-3 innings and Jeff Brantley notched his 13th save.

Giants 10, Cubs 4 (2nd game)

Gary Carter smashed a three-run homer to cap a five-run third and Kevin Mitchell added three RBI. Carter has hit safely seven straight times over the two games. Rookie John Burkett, 9-2, yielded eight hits and three runs in seven innings and Mike Bielecki fell to 3-8.

Pirates 7, Dodgers 2

At Los Angeles, Barry Bonds and Jeff King drove in three runs apiece to support Doug Drabek's six-hit ball over seven innings to keep Pittsburgh in first place by a half-game. Drabek, 9-4, won for the first time in six starts since June 6. Terry Wells, 0-1, took the loss in his second big-league game.

Cardinals 4, Padres 1

At San Diego, Bob Tewksbury allowed three hits over 8 1-3 innings and Willie McGee doubled home two runs, sending the slumping Padres to their 10th lost in the last 12 games. Tewksbury, 4-1, gave up singles in the second, third and fourth and Lee Smith earned his 12th save. Ed Whitson, 6-6, pitched eight innings in defeat.

#90190u0289 07/09/1990 ~United Press International

SAN FRANCISCO (JULY 9) UPI - A disciplinary panel of the Lutheran Church was weighing possible expulsion of two congregations for defying unwritten church rules by ordaining three homosexual members as ministers.

Lyle Miller, bishop of the Sierra Pacific Synod, spent much of Sunday's second day of the hearing testifying on fine points of church policy in a formal procedure resembling a court trial.

Miller's voice choked briefly as he explained why he chose not to allow homosexual Jeff Johnson, 27, to seek a call from a Lutheran congregation in 1988.

''I was torn by what I felt was right as a bishop of a church and how I loved that guy,'' Miller said.

The bishop said Johnson was a longtime family friend, but he had to follow established church procedure. He said procedure for gay seminary graduates was to ''recommend for call'' only those who would agree not to enter homosexual relationships as ministers. Johnson refused to make such a promise.

The Sierra Pacific Synod is one of 65 administrative districts of the Evangelical Lutheran Church of America covering Northern California and Northern Nevada.

The ELCA was formed three years ago in a merger of three Lutheran groups, and is the largest of about a dozen Lutheran churches in the United States. Some of the procedural questions raised Sunday were complicated by the fact that the new church is still operating on temporary rules.

First United and St. Francis Lutheran of San Francisco are charged with breaking church rules by ordaining Johnson and an openly lesbian couple as ministers on Jan. 20. The couple, Phyllis Zillhart, 32, and Ruth Frost, 42 were recruited to join a gay and lesbian ministry in San Francisco after Johnson's case had generated controversy for more than a year.

The ''counsel for the accuser,'' attorney Robert Broby, tried to

demonstrate that Miller was defending church unity when he refused to recommend Johnson for a call, and later when he told the congregations not to ordain the three as ministers.

Miller said the congregations should have given the church time to consider changing its policy before they went ahead with unauthorized ordinations.

Defense lawyer Richard D. Warren set out to show that Miller and other church leaders applied custom, not written policy, to Johnson's case. He tried to show Miller acted inconsistently by taking no action against ordained ministers he knew were homosexual and had partners.

Warren cross-examined Miller at length on whether Johnson actually violated any written rule - even though the main defense argument hinges on the broader question of whether church procedure should change. Testimony from dissident worshipers Saturday emphasized this ''necessity defense.''

Johnson testified he had come up against an unwritten rule: Gay seminary graduates were recommended for call if they agreed not to draw attention to their sexual preference. Johnson said it would be dishonest to enter such a ''gentlemen's agreement.''

Denied the chance to lead a congregation, Johnson said he helped form a group in the Bay Area called the Lutheran Lesbian and Gay Steering Committee, dedicated to aiding the worship of gay and lesbian Lutherans.

Johnson said the group decided its ministry ''needed to be unapologetically lesbian and gay,'' meaning its ministers should be openly gay and lesbian. The January ordinations, he said, emerged from that decision.

A 12-member committee of the 5.3 million-member ELCA conducted the hearing the first ever of Lutheran Church members as well as pastors.

''It's very encouraging that the discipline committee has been willing to hear the breadth of our testimony,'' said Frost, adding that the congregations had feared the committee would limit the debate to whether or not rules had been broken.

No immediate decision was expected at the hearing's end Monday. The panel said it would issue a written ruling later in which it could expel, censure or temporarily suspend the two churches from the national body.

''In our Lutheran tradition, when a congregation calls a pastor, it is the visible sign of the work of the Holy Spirit and it is, in fact, the Holy Spirit who calls and thus ordains through the congregation,'' the Rev. John Frykman, 58, pastor of First United, said in a prepared statement.

He said the 104-year-old First United purposely chose Johnson as its assistant pastor to expose what it considers the wrongness of the Lutheran Church's ban against homosexuals as ministers.

#90190u0292 07/09/1990 ~United Press International

KAKAVIA, GREECE (JULY 9) UPI - Albanians are braving automatic weapons fire and electrified barbed wire to flee their troubled country and cross the border into Greece, Greek guards and witnesses said.

Thousands of refugees have reportedly sought shelter in foreign embassies in the Albanian capital of Tirana and refuse to come out despite promises from the Communist government that they will be allowed to leave the country.

As the crisis entered its second week Sunday, Albanian Communist Party leader Ramiz Alia, who advocates cautious reform, announced a shuffling in the ruling politburo that is believed to have strengthened the hand of the party's moderate wing, news reports from Tirana said.

Greeks along the 80-mile border Greece shares with Albania, one of the most closed societies in the world, said Albania has tightened security along the frontier in an effort to stop refugees from crossing the last stretch of Iron Curtain.

A Greek border guard officer, who spoke on the condition of anonymity, said as many as five or six Albanians cross the border near Kakavia each day, usually with Albanian troops firing in pursuit.

''The sound of firing is getting more and more frequent,'' the officer said. ''Almost every day there are shots. We see increased activity among the Albanian guards, and their discipline looks tighter.''

The officer said Albanian guards have even shot escapees on Greek territory, a charge other witnesses confirm.

To deter the refugees, Albanian soldiers are reportedly shooting escapees on sight and leaving the bodies of the victims to decay in the hot Balkan sun.

According to reports in Ioanina, Greece, a provincial capital near the border, the Albanian authorities ''let them rot'' policy has caused unrest in several border towns as villagers try to recover and bury their dead.

Metropolitan Sebastianos, Greek Orthodox archbishop of Konitsa, said he has received reports that the villagers of Matsali, an ethnic Greek town in Albania near the border, rioted when authorities tried to keep them

from recovering and burying locals shot while trying to flee.

''After a struggle they got the bodies back,'' the archbishop said.

One Albanian who made it across the border said all four people in a family who attempted to escape before him were caught by Albanian guards. The two men in the group were shot, the woman imprisoned and the child given up for adoption, he said.

''The people tried to get back the bodies and bury them, but the soldiers stopped them,'' said the Albanian, who asked not to be identified out of fear of reprisal against his family.

From the Greek border post at Kakavia, the sole crossing point in the rugged mountains that stretch along the Greek-Albanian border, visitors can look across a no-man's land to a faded red flag emblazoned with Albania's two-headed eagle.

About 20 yards inside Albania, an electrified chain link fence topped with barbed wire keeps Albanians inside the small Balkan state, Europe's last bastion of Stalinism.

Albanian guards, 1950's Kalashnikov rifles slung over their shoulders, kept watch recently as villagers moved donkey carts to and from a customs house.

''Most of the people who try, make it over,'' said a man identified only as Tassos, 25, an Albanian field hand who escaped two weeks ago. ''Maybe two get over for every one who gets shot.''

Tassos, now living in a hostel in Ioanina with other escaped Albanians, said he and three others cut through the barbed wire one night with pliers wrapped in cloth to keep the metal from reflecting light.

Sparks from the electrified wire alerted the guards, but the four managed to dash across 500 yards of no-man's land and into Greece.

Tassos, who is unmarried, said he did not even tell his parents he was leaving.

''There are many bad tongues in our village,'' he said.

Asked why he risked death to flee to Greece, Tassos said there was no food or freedom in Albania and he only managed to earn about $1 a day there.

''We'd rather die than live in Albania,'' he said.

#90190u0316 07/09/1990 ~United Press International

WASHINGTON (JULY 9) UPI - Lawyers for Mayor Marion Barry said they were searching in the Virgin Islands for a potential witness who could hurt the credibility of a man who testified he used crack cocaine with the mayor.

The witness, Albert Benjamin, 55, a retired Army enlisted man who lives in a remote part of St. Thomas, told a grand jury he saw no cocaine during a cruise he took with Barry in 1986, The Washington Post, quoting soures, reported Monday.

Barry's lawyers hope Benjamin can hurt the credibility of former city worker Charles Lewis, who has testified he used drugs with Barry on the cruise and in a city hotel, but Benjamin does not seem interested in testifying.

''He could be the one to establish the reasonable doubt that we need to obtain an acquittal on the felony counts,'' said defense lawyer Robert Mance.

Mance referred to the three felony perjury counts against Barry, which are the only charges in the 14-count indictment that carry an almost certain prison sentence. The other counts include misdemeanor drug possession charges and others.

To find Benjamin, Mance has hired a lawyer and private investigator in the Virgin Islands, but the effort remained unsuccessful.

The trial was scheduled to resume Monday with a street-level drug dealer who said she sold cocaine to Barry 25 times over a three-month period in 1988, twice at a city government office, continuing her testimony.

Lydia Pearson testified Friday she delivered cocaine to Barry at a city building where Barry has an office.

On one trip to the Frank D. Reeves Municipal Center, Pearson also gave Barry a District of Columbia government employment form, and later was hired by the city's Department of Public Housing, she said.

Also Friday, FBI forensic toxicology expert Thomas Lynch testified Barry had a ''tremendous amount'' of cocaine in his urine Jan. 18, the night he was arrested in an FBI sting operation, and the urine also showed traces of recent marijuana use.

Barry was videotaped smoking crack the night of his arrest at the Vista International Hotel. He is on trial on 14 perjury and cocaine charges, and faces up to 26 years in prison and $1.85 million in fines if convicted.

Barry's lawyers claim he was entrapped by the FBI.

#90190u0317 07/09/1990 ~United Press International

LOS ANGELES (JULY 9) UPI - NAACP Director Benjamin Hooks joined TV celebrity Oprah Winfrey at the opening session of the NAACP's 81st national convention, calling on the nation's blacks to free themselves of the scourge of crime, drugs and despair.

With 5,000 people filling a Convention Center hall at the first public session of the five-day convention Sunday night, Hooks brought the crowd repeatedly to its feet as he proclaimed in his keynote address that blacks ''must take responsibility for our own lives.''

''We must say to America we are not going to wallow in self pity and blame someone else because we are drunk on the opium of apathy and indifference '' Hooks said. ''We are at war and the stakes are high - the salvation of black culture as we know it.''

Hooks also called for a nationwide campaign by blacks to urge Congress and President Bush to approve the proposed civil rights bill, which he called ''a critical legislative imperative'' to restore rights ''kidnapped'' by the conservative majority on the current U.S. Supreme Court.''

Winfrey's initial appearance in the hall, meanwhile, sparked a surge by more than 200 people who pressed forward toward the front dais to snap her photograph, with many calling out ''Oprah'' as the security guards urged them back to their seats.

Her speech, like the address by the NAACP director, was filled with references to the power of religion and she frequently asked the crowd to accept the ''higher calling'' of Jesus Christ.

But she also called on black people - rich and poor - to help each other battle the drugs, crime and poor education that have kept too many blacks in the ghetto.

''I am one black woman, but I've been around for a long time,'' Winfrey said. ''The drums of Africa still beat in my heart. They will not let me rest until every black boy and every black girl has their chance to prove their worth.''

With readings from black poet Maya Angelou, novelist Alice Walker, playwright Langston Hughes and the Bible, Winfrey recalled the struggle of blacks during the last two centuries and told the audience their ancestors ''deserve better.''

''Our ancestors are crying out'' at the sight of children joining gangs and carrying Uzi assault guns and smoking crack,'' she said.

Hooks, meanwhile, called for an end to what he termed a campaign of ''harassment'' and selective prosecution of prominent black politicians, including Washington, D.C., Mayor Marion Barry and Los Angeles Mayor Tom Bradley.

''At no time since Reconstruction has there been a comparable period of incessant harassment of black elected officials,'' Hooks said.

''Something is wrong with the system,'' Hooks said, ''when millions of dollars are spent and over 70 FBI agents assigned to trail and monitor'' Barry, while Justice Department officials complain there are insufficient resources to throroughly investigate the savings and loan scandal.

The NAACP last held a convention in Los Angeles in 1966, less than a year after the August 1965 Watts riots, which left 34 people dead, 1,032 injured and $40 million in property damage.

The world has ''experienced cataclysmic changes'' since then and thousands of black politicians including Bradley, New York Mayor David Dinkins and Virginia Gov. Douglas Wilder - who will receive the NAACP's 1990 Spingarn Award Thursday - have risen to prominence, Hooks said.

But despite the victories, ''the struggle continues,'' he said, repeating the theme of both the 1989 and 1990 conventions.

''While significant changes have been made for many of our people, there remains a significant segment of black America that is inextricably mired in a socioeconomic morass,'' Hooks said.

Even with segments of the black community rising into the upper and middle class, too many others suffer from drug abuse, high teen-pregnancy rates, crime, decaying families, inadequate education and few job opportunities, he said.

To fail to help less fortunate blacks, he said, would be like ''spitting on the graves'' of the black leaders who carried on the civil rights struggle in the past.

If the blacks who have fled to suburbia allow their counterparts in the inner city to languish, he said, ''history will record us as the first generation that left black America worse off than we found it.''

#90190u0318 07/09/1990 ~United Press International

HOUSTON (JULY 9) UPI - Environmentalists from the seven nations gathered at the Houston economic summit issued a report card that gave the United States a ''poor'' rating and criticized other attending countries for failing to protect the environment.

''The world's seven richest nations, the greatest consumers of the earth's resources, have as a group failed to protect the environment,'' George Frampton, president of The Wilderness Society told a news conference Sunday.

''As Nero fiddled while Rome burned, these nations watch the planet go up in the smoke of environmental degradation,'' Frampton said.

West Germany was ranked the most environmentally responsible with high scores for aiding Eastern Europe - a region suffering from terrible pollution - followed by France, which was judged ''fair.'' Britain, Canada the United States and Japan were were all graded ''poor.''

Italy was rated as having the worst environmental performance. No country was ranked excellent.

More than 150 environmental groups from the seven industrialized nations at a so-called Envirosummit 1990 - seeking to make the environment a high priority issue at the summit - released the environmental scorecard on the eve of the three-day gathering in Houston.

President Bush could come under pressure from his allies in Houston to respond more actively to such environmental problems as global warming. Bush had given environmental issues a high profile at the 1989 Economic Summit in Paris.

But the scorecard evaluating the summit countries' efforts to preserve the environment since last year's gathering gave the Bush administration particularly low marks for its position on population growth and efforts to halt global warming.

The ratings on the environment were based on six ecological issues: global warming, ocean pollution, population, aid to Eastern Europe, protecting the diversity of plants and animals, and encouraging ecologically responsible development, including energy conservations and preservation efforts in developing countries.

Jay Hair, president of the National Wildlife Federation, told the news conference that the lack of leadership in taking steps to improve the environment by the summit nations was ''appalling.''

Hair also criticized an agreement earlier Sunday between Bush and Canadian Prime Minister Brian Mulroney to open negotiations on a bilateral accord

to cut acid rain as ''something that we've known and needed to do for at least a decade.''

''They get low marks for leadership. What the world needs now in terms of environmental protection is leaders, not followers,'' Hair said.

LIVERMORE, CA (JULY 9) UPI - A 4-year-old boy was found suffocated inside a camp cooler that locked shut when its lid dropped.

The body of Jacob Green was found inside the locked cooler stored under a work bench in his family home, police said.

The boy had been reported missing Friday and about 150 searchers aided by a helicopter and police dogs searched the neighborhood before the discovery was made, police said.

Investigators said the cooler locked automatically when the lid dropped.

The boy was declared dead on arrival at Valley Memorial Hospital.

#90190u0335 07/09/1990 ~United Press International

(JULY 9) UPI - Darryl Hamilton and Jack Daugherty are no All-Stars. They are not even every-day players. But on Sunday the two provided stellar performances bright enough to lift sagging ballclubs.

Hamilton drove in a career-high six runs and highlighted a 13-run fifth inning with his first grand slam to help Milwaukee overcome a seven-run deficit and post a 20-7 victory over the California Angels.

Daugherty scored the winning run with two out in the bottom of the 11th inning and had four hits, including two homers, to help Texas defeat Boston 4-3 for a sweep of the three-game series.

In Milwaukee, with the score tied 7-7 and the bases loaded in the fifth, Hamilton stroked an RBI single, scoring Greg Brock with the go-ahead run.

Later in the inning, with the Brewers ahead 14-7 and the bases again loaded,Hamilton smashed his grand slam, his first homer of the season.

''I thought it had a good chance,'' said Hamilton, who entered the game with five RBI. ''I thought it was going to curve on me though, because when I hit it, I thought it was going to curve foul. I was out there trying to get it over a little bit.''

In Texas, Daugherty banged his first homers of the year too, blasting them off two of Boston's best pitchers - starting ace and All-Star Roger Clemens and stopper Jeff Reardon.

His first homer, a two-run shot in the eighth, cut the Red Sox lead to 3-2. The second, only the third of his career, tied the score in the ninth.

''I haven't hit these guys my entire career and it certainly surprises me that I got two home runs tonight,'' Daugherty said. ''I'm not a home run hitter. All I do is try to put the ball in play.

The 30-year-old had played in just 63 major-league contests before this year but is now sharing time in left-field and at first base.

''Hopefully, this puts everything on a positive side before the All-Star break and the team can continue playing well,'' said Daugherty.

Hamilton, who has spent most of the past two seasons with the Brewers'affiliate in Denver of the American Association (AAA), also sees the positive side.

''I've been getting in here and there, but never on a regular basis,'' said Hamilton. ''I understand the situation. I know the organization is going with Greg Vaughn and he's done a great job. I'm just trying to stay ready, swing the bat and do the best I can.''

On the eve of the All-Star break, these two unknown lights were the very best.

Elsewhere in the American League, Seattle dumped Toronto 6-3, Minnesota tripped New York 6-3, Detroit clipped Kansas City 10-4, Baltimore bounced Chicago 8-6 in 11 innings, and Oakland clobbered Cleveland 8-3.

In the National League it was: Philadelphia 4, Cincinnati 3; Houston 5, Montreal 3; New York 2, Atlanta 1; St. Louis 4, San Diego 1; Pittsburgh 7, Los Angeles 2; San Francisco 5, Chicago 3, 1st game; and San Francisco 10, Chicago 4, 2nd game

-- AROUND THE AL --

Mariners 6, Blue Jays 3

At Toronto, Matt Young, 3-9, fired a three-hitter and Henry Cotto added a two run homer to lead Seattle. Todd Stottlemyre, 9-8, lasted just three innings. The Blue Jays had a five-game winning streak snapped.

Twins 6, Yankees 3

At New York, Greg Gagne homered and doubled and Tim Drummond hurled three innings of three-hit relief to lead Minnesota. David West, 4-6, pitched the first six innings for the win and Drummond notched his first save of the season. Tim Leary, 3-12, suffered his eighth straight loss.

Tigers 10, Royals 4

At Detroit, Rookie Travis Fryman made his first major league hit a three-run homer during a five-run seventh inning and Cecil Fielder increased his major league leading RBI total to 75. Dan Petry squared his record at 6-6. Mark Davis, 1-6, making his first start since 1987, took the loss.

Orioles 8, White Sox 6, 11 innings

At Chicago, Mike Devereaux lined a two-run two-out double in the 11th inning to lift Baltimore. Bobby Thigpen, 4-3, suffered the loss while Mark Williamson, 5-1, pitched three innings of one-hit relief for the win. Gregg Olson worked the final inning for his 17th save.

Athletics 8, Indians 3

At Cleveland, Jose Canseco homered, drove in three runs and scored twice and Dave Stewart pitched seven strong innings to lead Oakland. The Athletics were by 12 walks from six Cleveland pitchers. Stewart, 11-7, won for only the second time in his last six decisions. Al Nipper, 2-2, was relieved in the third after giving up five walks.

#90190u0338 07/09/1990 ~United Press International

CHICAGO (JULY 9) UPI - Cook County Public Guardian Patrick Murphy said he will file a negligence suit against Commonwealth Edison for failing to restore electricity to a 14-room mansion where an elderly woman died of exposure.

Constance Pisha Black, 88, was found dead Dec. 1 in the kitchen of her home, lying in front of the oven. Her sister, Ethel, 82, who is now living in a nursing home, was found huddled in a corner trying to keep warm. Both women were dressed in numerous layers of clothing.

Electricity to the sisters' home was cut off last July 17 because of an overdue $133 bill. The sisters sent in a check in partial payment in September and later sent in two more checks, overpaying the bill by $245.99. ComEd refunded the difference but service never was restored.

Murphy, whose office is now handling Pisha's affairs, said during the

weekend a negligence suit will be filed in the next couple of weeks against the utility.

''They got paid to do something and they didn't do it,'' Murphy said.

Murphy said no dollar amount will be specified in the suit because ''the amount is irrelevant.''

Murphy said the sisters, who had grown up in that house and who had a $1 million estate, were both senile but ''they were making it.''

''They were able to go out and get their food,'' Murphy said. ''They lived on milk and canned food. They paid their bills when they came. The house was a mess. They lived in a 14-room mansion with all this antique furniture. They lived in one room. There were papers and junk and clutter over the rest of the house.''

Murphy said though the women had no known living relatives, neighbors did try to keep an eye on them and knew they were still in the house.

''Edison has this gatekeeper program they're always advertising. Where was it in this case?'' Murphy asked.

''They didn't go to a neighbor's house to see if anyone lived there. They didn't go to the post office. They should have done these things.''

''The gatekeeper program is an observation type of program,'' said Ivan Brownstein, a division commercial manager for Commonwealth Edison. ''They imply we should have known. It's not an investigation program. We can't go into people's homes. There was nobody obviously around there.''

Brownstein said the utility thought the sisters' home and been deserted and therefore never turned the electricity back on.

''Normally you hear from somebody when electricity is turned off,'' Brownstein said. ''We heard from nobody. Nobody contacted us at all in this whole scenario.''

Brownstein said the sisters were sent several letters telling them their bill was overdue and a shutoff notice was sent prior to the July 17 power cutoff. A subsequent letter was sent in August, telling the women their account had been ''finaled'' and would be turned over to a collection agency unless payment was made, he said.

Brownstein said a check for $106.15 was received by ComEd in September but the utility assumed the payment was made in response to the collection agency threat. He said there was no note requesting service be restored.

''After service was cut off July 17, our meter reader was out there Aug. 10,'' Brownstein said. ''There appeared there was no change in circumstances.''

Brownstein said the house was partially boarded up and since no one had illegally reconnected the meter and no one had asked for service to be restored, ComEd assumed the sisters had moved out.

''It appeared nobody was there,'' he said.

''They got something better than (a request to restore service); they got a check for the amount owed,'' Murphy said.

#90190u0340 07/09/1990 ~United Press International

(JULY 9) UPI - Wet streets and soggy lawns greeted much of the nation Monday as thunderstorms hit the Southwest and northwestern New York state and rain dampened northern New England.

Fast-moving thunderstorms left flooded roads and wet campgrounds in Utah, Nevada and Arizona as more than an inch of rain fell in 90 minutes in western Utah and 55 mph winds were reported near Salt Lake City.

Flash flood warnings went up throughout the region and campers and travelers were told to take precautions, the National Weather Service said.

The storms were expected to continue through Tuesday in Nevada, where raging thunderheads produced a record for Las Vegas, the lowest high temperature ever for the day Sunday, 91 degrees.

Flood warnings were issued near Phoenix and drivers on highways east of the city were told to be extra careful.

To the east, in the area of the upstate New York city of Buffalo, severe thunderstorms with lightning and heavy rains passed across several counties near Lake Erie while showers covered much of the northern half of western New York state.

Light rain fell over much of northern New England early Monday, while clouds prevailed over Massachusetts, Connecticut and Rhode Island.

Temperatures ranged from a high of 70 in rainy Manchester, N.H., to a low of 61 reported in Worcester, Mass., and Houlton aiport in northeastern Maine.

Fire swept through about 100 acres of the Douglas State Forest in Massachusetts, where a dry spell had lasted for several days. But a fire

department spokesman said he could not speculate as to whether dry brush fueled the flames.

Scattered thundershowers across the South gave slight respite to sizzling temperatures. The Alabama Department of Public Health issued a critical heat alert for much of central and south Alabama through Monday.

Montgomery recorded a 102 reading Sunday, Huntsville had 101 and Auburn 100. Millington, Tenn. also had a 102 temperature with Jackson, Miss. sweltering in 100-degree weather and Atlanta had 99.

A cool front passed across southern Wisconsin taking lingering thunderstorms with it early Monday and leaving behind drier air.

#90190u0369 07/09/1990 ~United Press International

SEOUL, South Korea (JULY 9) UPI - A Chinese man reportedly wanted for involvement in last year's democracy uprising in Beijing crossed into South Korea from the North, Seoul newspapers said Monday.

The defector was identified as Zi Zheng, 27, who the reports said crossed the border north of Chorwon, 45 miles northeast of Seoul, and surrendered to a South Korean army outpost about 1 a.m. Sunday.

The Dong-A Ilbo, a nationally circulated daily, said quoting unidentified officials that Zi crossed the Yalu River into North Korea May 24 and walked down to near the South-North Korea border.

The paper said Zi was known to be one of those wanted by Beijing authorities in connection with the Tiananmen Square pro-democracy demonstrations. He pretended to be a mute while traveling through North Korea, it said.

No confirmation was available on the reports. Dong-A Ilbo quoted military authorities as saying there will be no official announcement about the defection because it could cause possible diplomatic complications.

#90190u0371 07/09/1990 ~United Press International

TOKYO (JULY 9) UPI - Japan said Monday it would lift a freeze on its $5.36 billion aid commitment to Beijing after this week's Houston summit of seven Western industrialized nations, believing Beijing will ''come closer to our way of thinking'' about democracy.

''How much will be released and the exact timing are yet to be decided, but I believe the yen loans will be made available (after the summit),''

official government spokesman Misoji Sakamoto told reporters Monday.

''I don't think China is perfectly democratized, but it is making efforts, and if China becomes isolated it will not have a good effect on the Asian-Pacific region,'' Sakamoto added.

Reports from Houston said President Bush gave tacit support to a Japanese plan to resume aid to China during his meeting Saturday with Japanese Prime Minister Toshiki Kaifu.

This week's summit is being attended by the leaders of the United States, Britain, Canada, France, Italy, West Germany and Japan.

Japan joined Western nations in imposing economic sanctions against China to protest the massacre of pro-democracy demonstrators at Beijing's Tiananmen Square in June 1989, freezing its $5.36 billion aid package pledged to China over the 1990-95 period.

Sakamoto said, ''The world is moving toward democratization. China is watching these changes and we expect it to come closer to our way of thinking.''

He added: ''Both Japan and the United States have the same view on this point.''

#90190u0377 07/09/1990 ~United Press International

CHICAGO (JULY 9) UPI - A United Airlines jet headed to Spokane, Wash., was forced to land in Montana when its cabin lost air pressure, sending 16 people to hospitals with earaches and nausea, officials said.

United spokeswoman Eileen Younglove said the Boeing 737 jet began losing air pressure and was forced to land Sunday afternoon at Billings Airport. The jet left Chicago at 12:28 p.m. and was scheduled to arrive in Spokane at 2:24 p.m.

Younglove said the plane carried 73 passengers and a crew of five. There were no serious injuries but 16 people, including two children, were treated for earaches and nausea at area hospitals.

''The plane lost some compression so the captain diverted the plane to land in Billings,'' Younglove said.

She said the loss of cabin air pressure was not great enough to cause the release of oxygen masks for passengers.

-30- 1057
#90190u0386 07/09/1990 ~United Press International
(JULY 9) UPI - Around the world... around the clock, U-P-I has the latest news.

On the eve of the Economic Summit in Houston, President Bush treated his guests to a down-home barbecue featuring a Wild West theme, a rodeo and plenty of country music. Later today the leaders of the seven major industrialized democracies will hold their first such meeting in the post-Cold War era.

The Louisiana legislature approved a slightly less restrictive abortion bill than the measure vetoed by Governor Buddy Roemer . The new legislation now goes to the governor, but it's NOT clear if he'll sign it. The new bill includes exceptions only in the case of rape or incest, or if the mother's life is in jeopardy.

Fire officials in Alaska say wildfires have burned more than 424-thousand acres across the central part of the state. Rain is helping to dampen some of the 202 fires, all of which were sparked by lightning. The biggest blaze is raging on 69-thousand acres of the Yukon Flats National Wildlife Refuge.

N-double-A-C-P director Benjamin Hooks opened the organization's 81st national convention in Los Angeles yesterday. Hooks called for an end to what he termed a campaign of harassment of prominent black politicians. Guest speaker Oprah Winfrey drew the loudest applause and was hailed as the ''queen of daytime television.''

Albanian police in Tirana sealed off the main streets leading to the capital city's embassy district yesterday. Authorities are trying to prevent any more people from seeking refuge in foreign embassies. Several diplomatic missions already are jammed with about six-thousand refugees trying to flee the hard-line Stalinist nation.

-30- 1849
#90190u0394 07/09/1990 ~United Press International
(JULY 9) UPI - Colombian authorities say six more police officers have been killed in the city of Medellin. The officers died Saturday, bringing to more than 165 the total number of police officers killed in the Medellin area this year. The Medellin cocaine cartels offer a reward of about four-thousand dollars for the killing of an officer.

Witnesses and South African authorities say at least 230 people were injured near Pretoria yesterday during a meeting to discuss rent protests. Authorities say police fired tear gas and unleashed attack dogs on the crowd of about one-thousand blacks because the meeting was NOT

authorized and the people would NOT leave.

Polish Solidarity leader Lech Walesa say the country's current political forces are NOT prepared to rule a post-communist Poland. Speaking to a group of lawmakers yesterday in Gdansk, Walesa said there has been NO study of how Poland should address its problems and move forward.

The Philippine military says communist rebels killed one policeman and his cousin, and kidnapped four other people during a raid on a village in the central island of Negros. Yesterday's rebel attack occurred after officials suspended military operations against New People's Army rebels.

-30- 1405
#90190u0455 07/09/1990 ~United Press International
(JULY 9) UPI - The 16th Economic Summit of Industrialized Nations opens today in Houston... anti-abortion forces score a turn-around in Louisiana... and the N-double-A-C-P opens its national convention in Los Angeles. Those and other top stories, next, from U-P-I.

President Bush convenes the 16th Economic Summit of Industrialized Nations today... under circumstances NEVER seen before.

Bush is presiding in Houston over the first such meeting of the seven democracies in the post-Cold War era. For the next three days, the leaders will tackle problems and opportunities related to Eastern Europe and the Soviet Union.

The leaders of the United States, Britain, Canada, France, Italy, Japan and West Germany have gathered annually since 1975 to review their economic and political relations and forge global leadership.

The collapse of communism in Eastern Europe has prompted cries for economic help for the new democracies... as well as economic support for the reform measures of Soviet President Gorbachev.

Each head of government brings opinions on whether Moscow merits assistance such as food and direct aid to prop up the Soviet economy while Gorbachev tries to implement reforms.

At last week's NATO conference in London, many of the same leaders joined in an effort to bolster Gorbachev at home by saying NATO NO longer views Eastern Europe and the Soviet Union as adversaries.

-30- 1573
#90190u0472 07/09/1990 ~United Press International
(JULY 9) UPI - The Lousiana legislature responded to Governor Buddy

Roemer's veto of a restrictive abortion bill by passing a new one that's slightly less stringent.

Roemer vetoed the earlier measure because it made NO provisions for rape and incest. The new bill approved yesterday allows abortions in those cases... as well as when the mother's life is threatened. Roemer's staff is reviewing the new measure... but there's NO word on whether he would sign it.

There are also questions about whether the new bill's penalties for offenders are too strict for anything short of a felony. The penalties call for up to 10 years in prison and fines of up to 10-thousand dollars.

In order to pass the abortion measure, Democratic state Senator John Saunders asked the Senate to amend it to an unrelated bill aimed at reducing the penalty for beating people who desecrate the American flag.

Senators immediately challenged the legality of the Saunders compromise. The Legislature is NOT allowed to graft amendments onto bills unless they apply to the same section of law as the original bill.

#90190u0484 07/09/1990 ~United Press International

(JULY 9) UPI - N-double-A-C-P Director Benjamin Hooks opened the group's 81st national convention in Los Angeles yesterday. During his key-note speech, he urged the nation's blacks to free themselves from the chains of crime, drugs and despair.

Hooks brought the audience of about five-thousand people to their feet several times as he said blacks must take responsibility for their own lives. In his words- ''We are NOT going to wallow in self-pity and blame someone else because we are drunk on the opium of apathy and indifference.''

Hooks also pressed for a nationwide campaign to convince Congress and President Bush to pass the proposed Civil Rights bill.

The crowd also gave a warm reception to guest speaker Oprah Winfrey, who called on black people to help each other battle drugs, crime and poor education. Said the talk-show host- quoting now- ''The drums of Africa still beat in my heart. They will NOT let me rest until every black has a chance to prove worth.''

Witnesses say South African police fired tear gas and unleashed attack dogs on a crowd of about one-thousand black protesters yesterday. At least 230 people were injured. The crowd had gathered in a stadium near Pretoria to discuss rent protests.

Police confirm the incident but say the crowd was holding an illegal meeting and started throwing stones after authorities asked them to leave. A spokesman for the United Democratic Front anti-apartheid group says he believes the meeting was authorized.

Also yesterday, the minister for law and order announced the arrest of nine white extremists suspected in a series of right-wing bombings. The attacks have targeted black civilians and liberal whites.

Just hours after the minister's statement, a previously unknown group claimed responsibility for the latest blast. The group threatened to attack the minister himself if the nine suspects are NOT released.

(JULY 9) UPI - The controversial rap duo 2 Live Crew last night drew a relatively small audience at a ''clean'' performance in Austin, Texas.

But a second show in Austin featuring so-called ''dirty'' lyrics was sold out... and the concert's promoter says the night was a success.

The concerts come one day after a pay dispute and canceled concert sparked a chair-smashing melee by fans in Dallas.

The first of two Austin shows at the nightclub X-S got under way about an hour late... but fans did NOT protest the delay. Although the club's capacity is 800 people... less than 300 attended the first show.

But an 11 p-m show using ''dirty'' lyrics sold out. Promoter Jerry LaTouf says 860 patrons paid to see the ''dirty'' version... and there wasN'T a single problem among the well-behaved audience.

About 25 to 30 protesters from the American Family Association picketed outside the club to protest the band's violent and sexist lyrics.

#90190u0613 07/09/1990 ~United Press International

(JULY 9) UPI - President Bush opens the 16th Economic Summit of Industrialized Nations in Houston this afternoon. Before the official opening, Bush first meets privately with West German Chancellor Kohl and French President Mitterrand. The leaders face an agenda UNlike any they've seen before. They'll consider the prospect of sending economic aid to their former Cold War adversary, the Soviet Union.

In Moscow, Soviet President Gorbachev opened the second week of the 28th

Communist Party Congress. The congress quickly voted to broadcast the remainder of the conclave on national television. And Gorbachev attacked plans by coal miners for a one-day strike this week to demand his government's resignation. He said he hoped miners would display ''common sense.''

The New York Times reports that the Pentagon is moving forward with a plan to purchase a four-BILLION-dollar electronic radar-jamming device. But the report says the so-called Airborne Self-Protection Jammer has failed critical flight tests. Any Pentagon decision will test Defense Secretary Cheney's leadership. He has promised NOT to buy weapons that HAVEN'T been perfected technologically.

A disciplinary panel of the Lutheran Church is considering possible expulsion of two congregations for defying unwritten church rules by ordaining three homosexual members as ministers. In one case, Bishop Lyle Miller says he had to follow church procedure in refusing to allow Jeff Johnson to serve a Lutheran congregation in 1988. Miller said Johnson would NOT agree to restrict himself from homosexual relationships.

#90190u0627 07/09/1990 ~United Press International

(JULY 9) UPI - Top NASA managers will discuss the results of fuel-line tests on the space agency's shuttle fleet at a news conference today in Washington. Weekend tests in California found signs of leaks in fuel line fittings taken from the shuttle Columbia. The fuel leaks have stymied NASA's shuttle launch schedule for 1990. Two flights already have been cancelled.

Possibly in response to the shuttle fleet woes, Secretary of State Baker said yesterday that the Bush administration will permit the launch of U-S commercial satellites on Soviet-built rockets. The agreement allows a U-S company to run a launch base in northern Australia from which Soviet-built rockets will carry satellites into space for customers worldwide.

West Germany yesterday won what is arguably the world's most pretigious sporting trophy, soccer's World Cup. The West German team defeated defending champion Argentina 1-0 in Rome. In the resulting celebrations in Germany, two people died, and hundreds in East Berlin and Hamburg rioted. In Hamburg, police made 50 arrests after rowdies threw beer bottles. There's NO word on injuries.

The television industry was unanimous in its praise of T-V game show host Bill Cullen, who died Saturday at the age of 70 of complications from lung cancer. Said Monty Hall, who hosted ''Let's Make A Deal''... ''He was my hero. Of all the emcees, Bill had great intelligence and great class.'' Pat Sajak of ''Wheel of Fortune'' described Cullen as ''a broadcaster's

broadcaster.''

#90190u0672 07/09/1990 ~United Press International
NEW YORK (JULY 9) UPI - The Federal Aviation Administration is keeping an eye on Donald Trump's helicopter service following reports of firings of pilots and allegations of financial improprieties, a published report said Monday.

The FAA began surveillance over Trump Air following abrupt firings of several pilots and top managers, allegations of financial improprieties and a takeover of Trump Air by the Taj Mahal casino's security force, the New York Post said.

The helicopter service, which shuttles gamblers to and from Atlantic City, is struggling to remain in operation in the face of finacial difficulties throughout the Trump organization.

The Post reported that five pilots were fired last month, along with the chief operating officer and director of flight operations and several maintenance workers have resigned.

The upheavals warranted close examination of the service, the FAA told the Post. An FAA spokesman told the newspaper it would continue watching the service to make sure there were enough employees to carry on a safe service.

Along with the layoffs, chopper service to and from Atlantic City has been cut back and the run between Wall Street and LaGuardia Airport was dropped.

Last month security representatives from the Taj Mahal casino in Atlantic City demanded to inspect Trump Air's books.

#90190u0715 07/09/1990 ~United Press International
(JULY 9) UPI - An Economic Summit gets under way in Houston today when the leaders of the seven top industrialized democracies sit down for their first session. This morning, President Bush meets separately with West German Chancellor Kohl and French President Mitterrand.

The Soviet news agency Tass says a bus ignored a barrier at a railway crossing near a city in the Russian republic and collided with a passenger train, killing 27 people and injuring at least 24. Tass says the bus was in a hurry to get home before the World Cup Championship soccer game began.

The 28th Soviet Communist Party Congress entered into its second week of

debate today. President Gorbachev pitched his economic reforms to hostile worker delegates and said those who work well have nothing to fear from change.

The Louisiana legislature approved an abortion bill similar to the one vetoed by Governor Buddy Roemer, but this one is less restrictive. The new bill, which needs Roemer's signature, allows abortion in case of rape, incest or when the mother's life is in danger.

United Airlines officials say a Boeing 737 jet en route from Chicago to Spokane, Washington, was forced to make an emergency landing in Billings, Montana, yesterday after its cabin lost air pressure. 16 people were treated for earaches and nausea.

A plane that vanished six years ago has been found. Civil Air Patrol officials say the plane was spotted by a hiker in a remote mountain area in New York state, about 80 miles north of Albany. The body of the Canadian pilot has been recovered.

#90190u0724 07/09/1990 ~United Press International

DETROIT (JULY 9) UPI - Two men cleaning the exterior of the Detroit Public Schools Center building with acid plunged 11 stories to their death when their suspended platform gave way, authorities said. Paul Kinder, 30, and David Clash, 31, both of Detroit, died on impact, police and fire officials said after the accident Sunday.

Dale Adams, a third member of the building cleaning crew, was on the ground having lunch when Clash and Kinder fell. Adams said he believed the hooks clamping the platform to the roof of the 14-story building somehow slipped.

Kinder, a job supervisor who normally worked on the ground, had climbed on the platform and, with Clash, pulled the apparatus up to the 11th floor, Adams said.

Kinder "got bored on the ground, so he asked me if I wouldn't mind getting off for a while," Adams said. "They had just taken the stage back up" when the accident happened.

Adams said he heard a scraping sound, like wind knocking the stage against the building, looked up and saw it coming down. "It could have been me up there," he said. The cause of the accident was still under investigation, authorities said.

#90190u0738 07/09/1990 ~United Press International
(JULY 9) UPI - For the second time in 24 hours, Israeli jets blasted Lebanese positions held by the Iranian-backed Hezbollah. Moslem security sources say today's attacks occurred east of the port city of Sidon. It's NOT clear if there were any casualties.

A Saudi Arabian newspaper says the Palestine Liberation Organization plans a meeting of its Central Council to discuss how to react to the decision by President Bush to suspend U-S P-L-O talks. The meeting probably will take place this month.

Lawyers for Washington, D-C, Mayor Marion Barry say they're searching the Virgin Islands for a man who could hurt the credibility of a prosecution witness who testified that he used crack cocaine with Barry.

The N-double-A-C-P kicked off its national convention yesterday in Los Angeles. Director Benjamin Hooks urged blacks to take responsibility for their own lives and break free from the scourge of drugs and crime.

Police in Livermore, California, say a four-year-old boy was found suffocated yesterday inside a camp cooler that locked shut when the lid closed. The body of Jacob Green was found inside the locked cooler under a work bench in the family home. The boy was reported missing Friday.

(JULY 9) UPI - The issue of Western economic aid to the Soviet Union will be high on the agenda of the Economic Summit of Industrialized Nations, which opens this afternoon in Houston. President Bush says he's NOT willing to join France and West Germany in a proposed 15-BILLION-dollar aid program for the Kremlin.

Defense Secretary Cheney's stated policy of NOT buying weapons for the Pentagon that have NOT been perfected technologically is at stake. A report says the Pentagon is leaning toward purchasing a fuor-BILLION-dollar electronic radar-jamming device that's failed critical flight tests.

The N-double-A-C-P opened its annual convention yesterday in Los Angeles... the first in L-A since 1966, which followed the 1965 Watts County riots. Director Benjamin Hooks called for a nationwide campaign by blacks to urge Congress and President Bush to approve the proposed civil rights bill.

Moslem security sources in Lebanon say Israeli jets today attacked positions of the Iranian-backed Hezbollah near the port city of Sidon. NO casualties were immediately reported in the second such air attack in 24 hours. In Jerusalem, an Israeli army spokesman confirmed the raid.

Soviet President Gorbachev faces a possible one-day coal miners' strike as the second week of the 28th Communist Party Congress begins in Moscow. Tass reports that Gorbachev dos NOT believe the idea of the strike came from the miners... but from someone who is ''stirring up the workers.''

#90190u0806 07/09/1990 ~United Press International

(JULY 9) UPI - The United States and Greece have signed an eight-year defense cooperation agreement that permits two major U-S military bases to remain in operation on Greek soil. The bases are major air and naval installations on the island of Crete. Defense Secretary Cheney was in Athens for the signing ceremony.

A poll says a quarter of all Americans have experienced workplace discrimination. The poll also shows that more than three-quarters of respondents believe most or all employers practice some form of discrimination in hiring or promoting workers.

Albania's Communist Party has announced a major shakeup in the ruling Politburo, which observers feel points to divisions in the party's leadership over the growing refugee crisis. Reports say fleeing Albanians are braving automatic weapons fire and electrified barbed wire to flee their country.

The Soviet news agency Tass says 27 people were killed and at least 24 injured when a bus ignored a barrier at a railway crossing and collided with a passenger train. The accident occurred last night outside the city of Petrozavodsk. Tass reports that nobody on the train was hurt.

The French Defense Minister says French troops will stay in West Germany as long as the Soviet army remains in the eastern section of a united Germany. France maintains about 50-thousand soldiers in West Germany as part of the Allied occupation that followed World War Two, including 28-hundred based in Berlin.

-30- 1641

#90190u0807 07/09/1990 ~United Press International

CHARLOTTE, NC (JULY 9) UPI - Tammy Faye Bakker, in a letter from Florida to the folks back home, denies tabloid reports that she is planning to divorce her imprisoned evangelist husband.

Jim Bakker, 50, is serving a 45-year sentence for fraud and conspiracy stemming from the way he raised and spent money at PTL, the television ministry and Christian resort he founded in Fort Mill, S.C.

Tammy Faye, who now lives in Florida, visited him last week at the Federal Medical Center in Rochester, Minn. In the letter, Tammy Faye rambles on for 3 1/2 pages on the subject of fear, before getting around to what inquiring minds really want to know.

"There is absolutely no truth to the latest tabloid story which says Tammy is divorcing Jim," she writes. "It saddens my heart to see the number of Christians who buy and read and believe the lies of these destructive publications."

A tabloid recently reported Tammy Faye was seeking a $50 million divorce settlement from Bakker who, according to the report, had squirreled away that amount in a Swiss bank. If that is true, his lawyers haven't found the account yet.

"No, absolutely not. There is no Swiss bank account," said lawyer Jim Toms, who has represented Bakker in a long list of civil cases. "When we went through the bankruptcy action, examining what they were paid and where it went, there is nothing obscure at all about it. They spent it."

-30- 1625

#90190u0832 07/09/1990 ~United Press International

TAMPA, FL (JULY 9) UPI - Closing arguments in the marathon drug money-laundering trial of a Colombian businsssman and five international bankers were postponed Monday because of a prosecutor's illness.

U.S. District Judge William Terrell Hodges said federal prosecutor Mark Jackowski was unable to appear in court as scheduled Monday because of bronchitis. He tentatively rescheduled the closing arguments for Tuesday morning.

All six defendants, including the former personal banker of deposed Panamanian leader Manuel Noriega, were charged after a two-year U.S. Customs Service sting operation in which federal agents posed as drug dealers looking to launder drug profits for Colombian cocaine barons. Federal agents testified during the six-month trial that the bankers laundered $32 million in alleged drug money.

The defense won a significant victory last month after the prosecution completed its 22 weeks of testimony when Hodges dropped charges of drug importation conspiracy against each of the defendants. Hodges said prosecutors failed to show any direct connection between the defendants and any drug smuggling scheme.

The defendants could have received life sentences if convicted of the drug conspiracy charges. The remaining money-laundering charges carry a maximum sentence of five years in prison.

The defendants, who include Noriega banker Amjad Awan, claim they never intentionally violated any U.S. laws and did not know the cash they were handling came from drug sales.

Two BCCI subsidiaries pleaded guilty to money laundering in January, on the first of the trial. As part of the unprecedented move, the bank agreed to fire the five officers and was fined $15 million.

The Luxembourg-based bank also was placed on five years probation, to be monitored by the Board of Governors of the Federal Reserve System. It marked the first time an international financial institution was convicted of violating U.S. currency laws. BCCI is reported to be the seventh-largest privately owned bank in the world, with operations in more than 70 countries and assets of $20 billion.

The defendants are Awan, Syed Aftab Hussain, Akbar A. Bilgrami, and Sibte Hassan, all of Pakistan; Ian Howard of India, and Rudolf Armbrect of Colombia. The men were arrested Oct. 8, 1988, by U.S. customs agents during a bogus bachelor party in Tampa.

Awan has said he served as Noriega's personal banker for ten years, and court records indicate that the former dictator and accused drug trafficker, who faces drug charges in Miami and Tampa, kept up to $23 million in personal and government accounts at various BCCI branches.

-30- 2874

#90190u0886 07/09/1990 ~United Press International

(JULY 9) UPI - The collapse of communism in Eastern Europe and the resulting changes in the world are certain be high on the agenda at the Economic Summit in Houston. The leaders of the seven major industrialized democracies hold their first meeting this afternoon. President Bush said yesterday he thinks all the participants are ''working for the same thing- peace and harmony.''

Louisiana Goveror Buddy Roemer might announce his decision on a controversial abortion bill later this morning at a news conference in Baton Rouge. The Louisiana legislature yesterday approved the measure, which is slightly less restrictive than a bill Roemer vetoed on Friday. The legislation would ban abortion in all cases except rape or incest, or when the mother's life is in danger.

Soviet President Gorbachev scored a victory at the Communist Party Congress today. Delegates approved a moderate resolution on defense policy in support of Gorbachev's ''new thinking'' on detente with the West. Gorbachev also spoke to delegates representing workers at the Congress. The Soviet leader said those who work hard have nothing to fear from

economic reform.

West Germans reveled last night following their soccer team's championship victory over Argentina, but the celebrations were tainted by chaos and death. Police say three people died while taking part in street celebrations... and an 18-year-old man was killed in Cologne when he leaned out a broken window of a moving streetcar and smashed his head into a lamp-post. Authorities say 88 people were arrested in clashes with police and foreigners.

#90190u0888 07/09/1990 ~United Press International

(JULY 9) UPI - Stock prices closed higher Monday on the Tokyo Stock Exchange, boosted by arbitrage buying.

The 225-share Nikkei gained 93.16 points to end the day at 32,538.28, after gaining 93.45 points Friday.

The Tokyo Stock Price Index of all major shares, which had gained 2.16 points Friday, dropped 1.79 points to close at 2,362.41.

Trading, estimated at 400 million shares, was light. On Friday, 462.09 million shares changed hands.

Elsewhere in Asia, stock prices closed higher on the Hong Kong Stock Exchange, reaching a record high since the October 1987 market crash.

The Hang Seng Index gained 27.54 points to close at 3385.15. The rise followed an increase of 1.17 points on Friday.

Volume was relatively light at 1.846 billion units, up slightly from Friday's turnover of 1.818 billion units.

Prices dipped in light trading on the Singapore Stock Exchange in another featureless session.

The Straits Times Industrial Index, which gained 2.50 points Friday, fell 3.48 to 1,532.50.

The All Singapore Index, which lost 0.55 points Friday, fell 0.77 to 433.70.

Turnover was a low 41.32 million units, compared with 48.36 million units Friday.

The Sydney Sharemarket closed higher, in a show of continued strength following last week's 3.6 percent rally.

The All Ordinaries Index gained 32.6 points to close at 1,586.9, after losing 3.2 points Friday on profit taking at the end of a winning week.

Volume was 112.3 million shares, compared with 96.6 million shares Friday.

(JULY 9) UPI - Moslem security sources say Israeli jets blasted positions in Lebanon held by the fundamentalist group Hezbollah today. Israeli army officials confirm the raid, saying the targets bombed were used as training bases for Hezbollah. It's the second air raid against the pro-Iranian group in less than 24 hours. The sources say NO casualties have been reported.

Many of the country's black leaders are attending the N-double-A-C-P national convention this week in Los Angeles. Director Benjamin Hooks delivered the key-note address yesterday and called on Congress and President Bush to approve the proposed civil rights bill. And guest speaker Oprah Winfrey urged black people, rich and poor, to help each other battle drugs, crime and poor education.

A new poll finds that many younger Americans do NOT want to climb the corporate ladder of success. They prefer instead to live simpler and less competitive lives. The survey also indicates 58 percent of those polled between the ages of 18 and 29 are NOT willing to stay with a steady job unless they are ''completely satisfied'' with it.

#90190u0978 07/09/1990 ~United Press International
PRAGUE, CZECHOSLOVAKIA (JULY 9) UPI - A former Prague Communist Party boss, the first high-level party leader brought to trial since the communist regime was ousted last fall, was convicted and sentenced Monday to four years in prison for using police against demonstrators.

The conviction of Miroslav Stepan in Prague district court came as the new government put into effect the biggest food price hikes since 1953, boosting costs an average 25 percent.

The price hikes, announced earlier, are a result of the government's decision to move to a free market economy and cancel subsidies for farm and food products and processed goods, which amounted to $1.69 billion annually.

Prices of individual food products went up by 10 to 65 percent, the biggest jump since the monetary reform of 1953 and twice as big as the price hikes of 1982. The state will pay each citizen $8.75 per month as compensation for the higher cost of living.

Stepan, one of the most hated men in the country, was the first high-ranking party official to be brought to trial since the November ''Velvet Revolution'' toppled the communist regime that had ruled for four decades.

The former Prague Communist Party chief was sentenced under the mildest category of infractions in the law for misuse of public authority and instigating others to misuse authority. The law is part of the nation's communist-drafted penal code.

The offenses were in connection with a demonstration on Oct. 28, 1988, the 70th anniversary of the founding of the modern Czechoslovak state in 1918, when Stepan ordered police to use tear gas and water cannon on demonstrators in Wenceslas Square.

He was also convicted in connection with a series of protests in January 1989 to commemorate the 20th anniversary of the death of Jan Palach, a student who set himself on fire to protest the 1968 Warsaw Pact invasion.

At that time, Stepan ordered police to round up nearly 200 demonstrators, put them on buses and dump them in the middle of the night 20 to 30 miles outside of Prague without money or their identity papers.

After an attack by police on demonstrators in central Prague on Nov. 17, 1989,which triggered the revolution, public pressure forced an investigation of Stepan's activities. He was arrested on Dec. 23, 1989, and on May 22 charged with the criminal offense of abuse of office.

Stepan, 44, began his public career as chairman of the International Union of Students from 1977 to 1986. He became chairman of the Communist Party's Prague organization in December 1986, and was thought at the time to be a reform communist.

He became the most hated representative of the former regime after the January 1989 demonstrations, and his resignation was one of the demands of the hundreds of thousands of demonstrators who filled Wenceslas Square in November, finally bringing down the old regime.

Stepan, who resigned in November along with other officials, had been faced with the possibility of as much as 10 years in prison.

(JULY 9) UPI - President Bush will convene the 16th Economic Summit of

Industrialized Nations this afternoon in Houston. The leaders will tackle problems and opportunities unforeseen only a year ago. The collapse of communism in Eastern Europe has triggered cries for economic help from the fledgling democracies... and calls for assistance to solidify reforms in the Soviet Union. Says Bush- quote- ''I think we're all working for the same thing... for peace, for harmony in this exciting world.''

Reports from Czechoslovakia's news agency say Albania granted permission for 51 refuggees in the Czech embassy to fly to Prague today. There was NO immediate confirmation from Albania's government. But if the report is true, the refugees would be the first of six-thousand asylum seekers in diplomatic missions in Albania's capital to get an O-K to leave. News reports say the 51 refugees ''have already got passports'' and ''should arrive in Czechoslovakia by a special plane''.

The swirling abortion issue in Louisiana's legislature is taking a new twist. The legislature passed the measure yesterday in a stunning revival for anti-abortion forces who needed a near-miracle to override Governor Buddy Roemer's veto. Roemer had said he'd veto the measure because it did NOT provide for rape and incest... but the new bill would allow abortions in those cases. But now, whether Roemer signs the bill is being overshadowed by new doubts about the constitutionality of the measure.

#90190u1117 07/09/1990 ~United Press International

ADDIS ABABA, ETHIOPIA (JULY 9) UPI - Ethiopian President Mengistu Haile Mariam made an unprecedented appeal Monday to the leaders of five other east African countries to work together to settle the region's civil wars.

"So far the efforts of individual countries to resolve their problems have failed to bear the desired results," Mengistu said at a special meeting before the scheduled start Monday of the Organization of African Unity summit in Addis Ababa.

The summit drew the leaders of 18 African nations, black nationalist Nelson Mandela, and former President Carter, who planned to discuss economic and political problems on the continent.

The OAU Council of Ministers - comprised of foreign ministers from 51 countries - ended a weeklong session Sunday in which they called for continued sanctions against South Africa and expressed fear Africa would lose foreign aid to Eastern Europe.

The ministers also appealed to the United States to resume its dialogue with the Palestinian Liberation Organization and supported efforts to convene an international conference on peace in the Middle East.

The ministers' resolutions set the agenda for the summit meeting of the pan-African cooperative organization, founded in 1963 to promote unity and solidarity on the continent.

After a marathon overnight session that ended at dawn on Sunday, the ministers voiced their "deep concern that the institutionalized political pillars of apartheid have not been abolished ... (and) strongly urged the international community to maintain and intensify sanctions and other forms of international pressure" against South Africa.

The special session for east African nations held Monday prior to the start of the summit was attended by Kenyan President Daniel arap Moi, Ugandan President Yoweri Museveni, Sudanese military ruler Gen. Omar al-Bashir, President Hassan Gouled of Djibouti and Somali Prime Minister Mohamed Ali Samater.

Of the six nations represented, only Kenya and Djibouti are not embroiled in civil wars, although police and democracy demonstrators clashed in Kenya for the third straight day Monday.

Ethiopia's Mengistu, whose own country has been fighting internal conflicts for close to three decades, described the Horn of Africa as an area of solution-defying problems and told the leaders there was no collective effort to solve conflicts in the region.

Most of the east African nations have tense relations with their neighbors swapping accusations that they are supporting each others' rebels. Repeated attempts at peace talks, some of them mediated by Carter, have failed.

Mengistu proposed no immediate practical solutions to the region's conflicts, in which millions have died in the past decade, killed in fighting or victims of starvation and disease brought on by the wars.

#90190u1143 07/09/1990 ~United Press International

HOUSTON (JULY 9) UPI - European offshore rig utilization is at its highest level since July 1985, according to Offshore Data Services' weekly mobile offshore rig count.

Today, 127 of the 135 offshore rigs in European waters are working and the area's rig utilization rate stands at a near-record 94.1 percent. Not since July 1985 has offshore rig utlization in Europe topped 94 percent. At that time, 136 of the 145 offshore rigs in the area were working, and European rig utlization was 94.4 percent.

Gulf of Mexico drilling activity remains unchanged since last week, with 144 rigs under contract. However, a rig mobilizing to the area from South America for modifications caused a slight drop in the Gulf's offshore rig utlization rate, which today is 67.6 percent.

The one-rig increase in working units in Europe accounted for a slight increase in worldwide offshore rig utilization. Today, with 545 of the worlds 669 mobile offshore drilling units under contract, worldwide offshore rig utilization is 81.5 percent.

#90190u1186 07/09/1990 ~United Press International

SRINAGAR, INDIA (JULY 9) UPI - Moslem rebels freed the 23-year-old son of a state district magistrate Monday, ending a three-day kidnapping drama in which militants threatened to kill their captive unless the government released two imprisoned separatists.

The Press Trust of India news agency quoted Gov. Girish Saxena as saying that no militants had been freed in exchange for the release of Farooq Ahmad Shah. The man's father told PTI: ''I do not know what happened. My son is with me and safe.''

The young man's release came amid reports that paramilitary troops from the Central Reserve Police Force had burned down two small villages - nearly 200 houses - on Sunday night in retaliation for a militant attack on a security patrol.

Also Monday, a government spokesman said 13 Kasmiri militants had been killed during a clash with government troops in the security belt along the northern border between Pakistan and India.

Two masked rebels released Shah shortly before 3 p.m. in the presence of several reporters who had been summoned to a site near the shrine of Khanqai Mulla, a 14th Century Moslem saint, in a congested district of the old city of Srinagar.

''We were not serious about our demands, but we wanted to show the people of Kashmir and the entire world as to how the government of India and the state government care no more for the children of Moslem (government) officers,'' one of the rebels told newsmen.

The militants put Shah and his aunt, who also was present, in a three-wheeled auto-rickshaw and sent them home. Then the militants disappeared along the winding alleyways of the old city.

The reporters said Shah later told them he was treated well during more than 70 hours of captivity, but said, ''I had mental tensions throughout.''

Shah is the son of Ghulam Abbas Shah, a state district magistrate and the chief legal officer for Srinagar, the summer capital of northern Jammu and Kashmir state. The young man was abducted Friday from the family home on the outskirts of the city.

A caller claiming to represent the Kashmir Students Liberation Front accepted responsibility for the abduction. He demanded the release of two KSLF militants who are being held by police.

The KSLF is the student wing of the Jammu and Kashmir Liberation Front, one of the major Moslem rebel groups fighting for independence from India. The secessionist movement gained wide popular support in mid-January when troops fired on a crowd of demonstrators.

Kashmiri Moslems say they need a separate state because the Hindu-dominated central government in New Delhi has for years denied them equal access to

public sector jobs, educational opportunities and development aid.

Shah's release came amid reports that angry paramilitary police had burned nearly 200 houses in two separate villages Sunday night after rebels attacked a Central Reserve Police Force patrol and killed at least one trooper.

Residents from the village of Adeena, 12 miles west of Srinagar, said the incident occurred about 8 p.m. Sunday shortly after the militants attacked the paramilitary patrol in the adjacent town of Magam.

The residents said the soldiers retaliated by setting fire to two houses with thatched roofs. They said the soldiers refused to let them extinguish the flames and the blaze eventually spread over the entire village, destroying 135 dwellings.

The residents said the paramilitary troops initially told them to remain in their houses. They quoted one soldier as saying, ''We'll teach you a lesson and burn you alive.'' Eventually, the troopers relented and let them leave their homes.

One villager, Ghulam Mustafa, was burned to death when a paramilitary police officer threw a torch into a pile of dry grass in which he was hiding, the witnesses said. They said the authorities shot and killed four other villagers.

A highly placed official source, speaking on condition of anonymity, confirmed the security forces had burned the village out of anger over the slaying of the paramilitary police officer.

The village of Watgam not far from Adeena also was set ablaze Sunday night destroying 47 houses, the local mosque and 34 storage sheds where food and farm produce was kept.

The cause of the fire was not immediately established, but some state government officials on duty in the village said troopers from the Central Reserve Police Force had set the blaze.

#90190u1219 07/09/1990 ~United Press International

GENEVA (JULY 9) UPI - Economies continued to weaken in eastern Europe and the Soviet Union in the 1990 first quarter, the U.N. Economic Commission for Europe reported Monday.

The Commission indicated preliminary statistics show collective industrial production in the east European was down 13.4 percent compared to the 1989 period. Exports were 14.2 percent lower and imports dropped 5.8 percent, the report said.

Overall, the U.N. agency said, the eastern region in the first quarter this year "merely struggled to keep their economies running." "The only certain element appears to be that the recession in eastern Europe and the Soviet Union is far from having run its course," it added.

In the Soviet Union, there were first-quarter declines of two percent in net material product, 1.2 percent in industrial output, 5.4 percent in gross investment, and seven percent in exports. Imports rose six percent, the Commission said. The Soviets also had a $3.8 billion deficit in first-quarter trade with the West, the Commission added.

Poland registered a $576 million surplus in trade with the West in the first three months, the report said, citing that country's exports rose ten percent while imports fell 19 percent.

Surpluses were also recorded by Czechoslovakia ($52 million) and Hungary ($79 million). However, Bulgaria had an east-west trade deficit of $415 million and Romania a deficit of $138 million, the report said. East Germany had a deficit of $70 million.

-30- 1697
#90190u1230 07/09/1990 ~United Press International
STORRS, Conn. (JULY 9) UPI - University of Maryland Athletic Director Lew Perkins was named the University of Connecticut's new athletic director Monday, trading NCAA sanctions for Big East basketball success.

Perkins, 45, is a native of Chelsea, Mass., and a close friend of UConn basketball coach Jim Calhoun, who guided the Huskies' basketball team through a Cinderella season that ended in the Final Eight of the NCAA Tournament.

Perkins, dubbed the ''Mr. Fix-it'' of sports programs, also has served as athletic director at Wichita State, South Carolina-Aiken and Pennsylvania. He will replace Todd Turner at UConn, whose resignation was effective July 1.

Perkins has been athletic director at Maryland for three difficult years.

The Terps of the Atlantic Coast Conference are on three years probation and two years of sanctions for NCAA infractions that occurred primarily during the men's basketball regime of Bob Wade.

The Maryland athletic department also is in debt for millions of dollars.

UConn, still riding the high of last season's stunning basketball success, has opened a new domed arena and routinely sells out games at both the Storrs facility and the Hartford Civic Center.

Picked to finish last in the Big East Conference last season, the Huskies shared the conference title, won the Big East Tournament and lost in the closing seconds of the Final Eight in the NCAA Tournament.

Calhoun has been lauded for turning around UConn's stalled basketball program and will now work with his friend Perkins to continue building the program.

Perkins had a base salary of $121,000 at Maryland after a $16,000 raise in December. He also received $30,000 annual compensation for promotional work and $7,000 to the annuity of his choice.

-30- 1968
#90190u1245 07/09/1990 ~United Press International
WASHINGTON (JULY 9) UPI - Animal rights activists set up an exhibit Monday outside the Department of Health and Human Services showing a lifelike bloodied monkey connected to machinery similar to that used by researchers.

The department agreed to allow People for the Ethical Treatment of Animals

to display the graphic statue while government lawyers review the group's request for a two-week permit.

Last week, three monkeys used in National Institutes of Health experiments at Tulane University in Louisiana were euthanized after experiments were conducted. Four monkeys remain there.

The seven monkeys were retrieved from the NIH-funded Institute of Behavioral Research in Silver Spring, Md., which was closed in 1981 after a raid discovered cruel and abusive treatment of monkeys.

''If they let the four monkeys go, we'll take (the statue) down right away '' said Ingrid Newkirk, national director of People for the Ethical Treatment of Animals. ''Our primary purpose is to draw attention to the fact that four monkeys are left and are fighting for their survival.''

She said she wants NIH to take the monkeys to a sanctuary and allow them to ''live in peace.''

Alex Pacheco, who exposed the abuse at the Institute of Behavioral Research and is now chairman of the animal rights group, said the experiment depicted in the statue shows a ''lifelike'' monkey suffering a stroke.

''They physically immobilize the head or body. Then they take off the top of the monkey's skull, insert electrodes into the brain and then overdose the monkey,'' Pacheco said.

He claims NIH ''repeatedly promised'' never to perform invasive experiments on the so-called Silver Spring monkeys. But Robert Schmermund, a Health and Human Services spokesman, said, ''We agreed to meet to talk, but no, we never agreed to that.''

Kay James, assistant health secretary for public affairs, said the department agreed to let the statue stand outside the building at the base of Capitol Hill. But the group was asked, and agreed, to move the statue to the side of the building so it would not interfere with the front driveway or public safety.

''We're interested in protecting their First Amendment rights ... but there's another side to this story,'' James said. ''In this department, we worry every day about fighting disease ... and we recognize the value of (animal) research as well as the need to provide humane treatment of animals.''

She indicated the group's views run counter to Health Secretary Louis Sullivan's opinion that animal experimentation is crucial to NIH's mission of finding treatments and cures for diseases. But she said they have a

constitutional right to express their views.

''My own feeling is that I wish Secretary Sullivan was afforded the same First Amendment rights and privileges when he was in San Francisco,'' James said.

Sullivan's speech to the AIDS international conference a few weeks ago was virtually drowned out by the group ACT-UP, which was protesting what it feels is an inadequate government response to the acquired immune deficiency syndrome crisis.

#90190u1246 07/09/1990 ~United Press International

MOSCOW (JULY 9) UPI - The Kremlin Monday appointed a top-level delegation headed by Soviet Prime Minister Nikolai Ryzhkov for negotiations with Lithuania on the Baltic republic's secession drive.

President Mikhail Gorbachev named the 22-member negotiating committee as the Lithuanian government and Parliament leaders were meeting in Vilnius to discuss preparations for the talks.

The republic has not yet named its own negotiators, but Prime Minister Kazimiera Prunskiene said Sunday draft agreements by both sides should be prepared for discussion by Wednesday.

Lithuania declared independence from the Soviet Union on March 11, but agreed June 29 to allow a 100-day moratorium on the proclamation to meet Moscow's conditions for negotiations and an end to a 10-week economic blockade.

In addition to Ryzhkov, the Soviet delegation for the talks includes Deputy Prime Minister Yuri Maslyukov, who also heads the Soviet state planning committee, Interior Minister Vadim Bakatin and Russian republic Prime Minister Ivan Silaev.

The delegation also includes a deputy foreign minister, the deputy chief of the KGB, the chairman of the Soviet state bank, and representatives of the armed forces, trade unions and other Soviet republics.

#90190u1335 07/09/1990 ~United Press International

JERUSALEM (JULY 9) UPI - Judges ruled that an Israeli man accused of murdering seven Arab laborers pleaded innocent Monday when he stared at a wall and refused to answer charges during the first day of his trial, Army Radio reported.

The trial of Ami Popper, 21, was later postponed when his court-appointed attorney attempted to withdraw from the case, saying his client refused to speak to him.

Popper is accused of lining up Arab day laborers along a roadside near the occupied Gaza Strip on May 20 and shooting them. The incident sparked a week of rioting and breathed new life into the 3-year-old intifada, or Palestinian uprising.

Attorney David Ofek told the three-judge District Court in Tel Aviv he wanted to withdraw from the case because Popper had not spoken to him for three days. The judges denied the request but postponed the trial until September to give Ofek time to communicate with his client, the radio said.

Ofek said Popper had stopped speaking to him three days earlier when he

showed him pictures of the slain Arabs. The lawyer said Popper identified one of the Arabs, saying the dead man had sexually assaulted him when he was teenager.

Popper stared silently at a wall as the charges were read in court and refused to plead guilty or innocent. The judges ruled that Popper's silence was tantamount to a plea of innocence.

Popper, who was arrested several hours after the Arabs were shot in the Israeli town of Rishon Le Zion, allegedly used his brother's army-issued M-16 automatic rifle and was dressed in an Israeli uniform.

In the riots that followed the killings, 12 Arabs were killed by army gunfire and hundreds wounded in one of the bloodiest weeks of the uprising. The high number of casualties drew sharp international criticism of the Israeli army.

Israeli officials strongly denounced the murders and said they were the work of a disturbed individual.

But the judges said that based on the findings of five court-appointed psychiatrists, Popper was competent to stand trial. Ofek said he could not find a psychiatrist willing to examine Popper in order to challenge the finding.

Ofek said he would appeal to the Supreme Court the judges's refusal to dismiss him.

Prosecutors said they planned to call 46 witnesses.

Last month, the military's Civil Administration, which governs the occupied West Bank and Gaza Strip, gave one-time grants of $20,000 to each victim's family. Those Arabs wounded were not given compensation, but their medical bills have been paid by the Israeli government.

WASHINGTON (JULY 9) UPI - The Pentagon announced Monday it has offered to sell Spain 200 AIM-120 Advanced Medium-Range Air-to-Air Missiles, 55 launchers and other support equipment at an estimated cost of $132 million.

''Spain needs these missiles to enhance the air-to-air capability of its F-18 aircraft and will have no difficulty absorbing these missiles into its armed forces,'' the Pentagon said in a statement.

Spain is a member of the 16-nation NATO alliance.

The Pentagon said the prime contractors for the proposed sale would be the Hughes Aircraft International Service Co., Tucson, Ariz., and the Raytheon Co., Bedford, Mass.

#90190u1344 07/09/1990 ~United Press International

JERUSALEM (JULY 9) UPI - New Israeli Foreign Minister David Levy said Monday he hopes to hold talks with Secretary of State James Baker that could lead to a breakthrough in the stalled Middle East peace process.

Meeting with American Jewish leaders on his first working day since suffering a heart attack last month, Levy said Israel needs to state its policies clearly and create an atmosphere of good will with the United States to advance the peace process, a Foreign Ministry spokesman said.

A government official said the only thing holding up a meeting between Levy and Baker was the state of Levy's health. By the end of the week, doctors should know if Levy can meet with his American counterpart.

Baker has invited Levy to meet him July 18-19 in Paris during talks on German unification.

The Hebrew-language daily Yediot Ahronot reported Monday that Levy was considering allowing Palestinians deported from the Israeli-occupied territories to participate in future autonomy negotiations with Israel.

The newspaper said Levy continues to oppose the participation of East Jerusalem residents in any Israeli-Palestinian talks, however. Israel fears including Palestinians from an area, like Jerusalem, already annexed into Israel itself might be interpreted as a sign that the status of Jerusalem is negotiable.

A government official would not confirm or deny the newspaper report.

''There are many ideas in the air,'' the official said. ''The intention is to start the peace process at the same point where it ended when the previous government collapsed (in March), and then the problem was the composition of a Palestinian negotiating team.''

The Israeli official said the composition of a Palestinian delegation would likely dominate any meeting between Levy and Baker, who have never talked face to face.

Baker's peace initiative would include at least one deported Palestinian and one East Jerusalem resident in any Palestinian negotiating team. Prime Minister Yitzhak Shamir's refusal to accept the so-called Baker plan led to the collapse in March of the Likud-Labor coalition government.

Since the fall of the former government and the formation last month of a right-wing coaliton led by Shamir and excluding the Labor Party, direct high-level contacts between the United States and Israel have been suspended.

Seymour Reich, chairman of the Conference of Presidents of Major American Jewish Organizations, who met with Levy Monday, told Israel Radio that it would be difficult for Israel to agree to Baker's conditions, but that he hopes progress can be made.

''It would be difficult for this government to say yes to those two points but a review of (Palestinian) names without any categorization as to where they fit into that scheme of things might be a way of approaching this that would satisfy all the parties,'' he said.

Reich, who spoke last week with Baker and other senior U.S. officials, also told Levy that the United States would not press Israel to negotiate with the Palestine Liberation Organization, Army Radio reported Monday.

Levy said Israel remains opposed to the creation of a Palestinian state because ''we consider it to be a mortal danger to our existence.''

Levy has agreed in principle to meet in Rome with ministers of the European Community, perhaps by the end of the month.

''Israel believes the European Community can and should play a positive role in the peace process,'' one government official said. ''So far, positions of the EC have been much more favorable to the (Arab) side than Israel. This has prevented the EC from playing a major role in the peace process.''

#90190u1347 07/09/1990 ~United Press International

BATON ROUGE, LA (JULY 9) UPI - Gov. Buddy Roemer said Monday he would not make an immediate decision on whether to sign or veto a compromise abortion bill hastily approved in the Legislature.

The Legislature passed the measure, which proponents said would ban 98 percent of the abortions performed in the state, Sunday night in a stunning reversal for anti-abortion forces who entered the day needing a near-miracle to override Roemer's veto of a previous bill that made no exceptions for victims of rape and incest.

The new bill included the exceptions that Roemer had demanded and he now has 20 days to sign or veto the bill. If he takes no action, it would become law in September without his signature.

He gave no timetable for signing or vetoing the new bill, which has some lawmakers questioning its constitutionality. The measure would become the nation's toughest state anti-abortion law.

"Being told by the bulk of those (anti-abortion) representatives they could not tolerate my position, to have them flip-flop as the did yesterday, was quite a shock," Roemer said at a news conference Monday.

The new abortion bill, which passed as an amendment to a misdemeanor bill concerning flag burning and included long prison sentences and stiff fines, imposed penalties that were too strict for anything short of a felony.

"There are several questions," Roemer said. "Representatives of the attorney general's office called ... to say they'd like us not to act quickly either way until they had a chance to examine the constitutional question."

He also said he was uncomfortable with the way the rape and incest exceptions were written. Under the bill, a woman would have seven days to report either crime and receive an abortion. Roemer had wanted a 90-day period for those exceptions.

"Their (anti-abortion lawmakers) first pitch was 72 hours," he said. "I thought that was just patently nonsense. I thought a more reasonable period of time would accomodate common sense and justice."

The latest action on the bill began Sunday when the Senate tabled work on overriding Roemer's veto of the earlier measure that banned all abortions except where a mother's life were threatened by the pregnancy.

The House, just hours after Roemer's veto on Friday, had voted to override that action. But the more liberal Senate on Saturday could not find the two-thirds majority needed to take the same action.

But moments after the Senate tabled that measure, Sen. John Saunders, a Democrat, stunned colleagues by asking them to amend an unrelated bill to reduce to $25 the penalty for beating people who desecrate the American flag with abortion language that included the rape and incest exceptions. Saunders's amendment stripped out all the flag language and substituted the compromise abortion language.

In explaining why he was accepting a less restrictive abortion law, Saunders said it was better to ban 98 percent of abortions in Louisiana than to fail in an effort to ban them all.

During floor debate Sunday night in the Senate, Sen. Sydney Nelson, a Democrat, said, "The amendment you have before you has numerous flaws in

it. I don't know whether it's going to get past the first district court (that hears appeals). I don't know if it will get to the Court of Appeals. I predict to you that this bill will never be a vehicle to be a test case before the United States Supreme Court."

Other senators immediately challenged the legality of the Saunders compromise. The Legislature is not allowed to graft amendments onto bills unless they apply to the same section of law as the original bill.

The original bill on the beating of flag desecrators had been titled "The Crime of Simple Battery"; its new title is "The Crime of Simple Battery of Abortion."

But simple battery is a misdemeanor, and many senators said the penalties under the abortion measure - up to ten years in prison and fines of up to $10,000 for the abortionist - might be too severe for a misdemeanor under the state constitution.

"The only constitutional question, in terms of procedure, is the question of germainess in terms of an amendment on a bill that was in a field far away from the (abortion laws)," Roemer said.

The Senate approved the measure 32-7, sending it to the House for concurrence on the radically new bill. Within an hour the House, using procedural shortcuts, gave it final legislative approval with a vote of 83-22 and sent the bill to Roemer.

(JULY 9) UPI - President Bush rolled out the welcome mat today for French President Mitterand and West German Chancellor Kohl at the economic summit in Houston. In advance of the formal summit opening this afternoon, Bush held one-on-one meetings with the two late arrivals. The leaders of the seven most powerful democracies will use the summit to assess their place

in the post-Cold war era.

Soviet President Gorbachev offered a proposal that would further separate the Communist Party Politburo from the government. Gorbachev told the 28th Communist Party Congress in Moscow he wants the Politburo revamped to include party leaders from each of the Soviet Union's 15 republics and a undetermined number of other officials. The plan would meet demands of party leaders in the republics who seek more power.

West German police report four people were killed and dozens of others hurt during the tumultuous revelry that erupted in West Germany last night after the country's victory over Argentina at the World Cup. Authorities say rioting soccer fans battled with police amid the celebrations. Police officials say officers were forced to use clubs and water cannon to disperse what they called ''extremely burtal hooligans.'' 88 people were arrested.

A published report says the Pentagon will go ahead with plans to buy a four-BILLION-dollar electronic radar-jamming device that has failed crucial tests. The report says whether Defense Secretary Cheney proceeds with buying the technology is expected to test his determination to reverse the Pentagon history of buying weapons that have NOT been perfected.

#90190u1381 07/09/1990 ~United Press International

PITTSBURGH (JULY 9) UPI - Organ transplant pioneer Dr. Thomas Starzl was on the verge of a heart attack but underwent surgery to clear a ''severe'' narrowing of a coronary artery, a heart specialist said Monday.

Dr. Bruce Wilson said he performed an angioplasty, inserting a balloon-tipped catheter in the artery, shortly after the 64-year-old Starzl admitted himself Sunday to Presbyterian-University Hospital in Pittsburgh.

''There was a severe narrowing of a coronary artery,'' Wilson said. ''The chest pain he had at home (while climbing stairs) was quite severe, but it was OK when he rested.''

Wilson said the angioplasty reduced from 99 percent to at least 30 percent the blockage of one of three main arteries leading to Starzl's heart. The blockage likely stemmed from Starzl's chloresterol level and past tobacco smoking, Wilson said, adding he will recommend a change in diet.

''He's doing just fine,'' the heart specialist said. ''He's perfectly stable and we expect him to be released in the next couple days.''

Starzl performed the first successful liver transplant in 1967. He also headed the medical team that developed the anti-rejection drug FK-506, derived from soil fungus.

Starzl also has performed a series of groundbreaking liver transplants, overseeing the world's first combined heart-liver transplant in 1984.

The patient, Stormie Jones of White Settlement, Texas, is now 13 and was released Saturday from Children's Hospital in Pittsburgh after two days of testing to monitor her recovery from hepatitis.

Wilson described Starzl as a ''good patient'' who was reluctant to enter the hospital after calling him Sunday to discuss the chest pain. Only a few days earlier, Starzl was hiking in the mountains of the Hawaiian island of Kauai, Wilson said.

#90190u1431 07/09/1990 ~United Press International

RENO, Nev. (JULY 9) UPI - Old Spot was a highly respected dog, the kind of dog that could draw some 160 people to his memorial service.

Spot, an Australian shepherd that became a legend in Washoe County, was killed last week when hit by a car and was buried at the place where he made his home at the side of the highway.

The memorial service was held Sunday on the Pyramid Lake Highway north of Reno where he lived and died.

Spot was a loner but people in the area gave him food and built him a home in the isolated section of the highway. Although he shied away from people he was popular, especially with motorists who drove by every day at the spot where he had lived at least 12 years.

Nobody knows how Spot got there but the most prevalent story is his owner abandoned him on the highway.

Roy Beson of Sparks delivered a 15-minute eulogy saying Spot ''belonged to no one individual in particular but rather to everyone in general.''

Marie Kiley of Spanish Springs Valley said, ''I think a lot of older people who are lonely, Spot gave them a reason to live.''

#90190u1440 07/09/1990 ~United Press International
WASHINGTON (JULY 9) UPI - Vernitron Corp. said Monday that it will take a ''substantial loss'' in the second quarter due to the terms of a settlement agreement concluded with its takeover target, the Kollmorgen Corp. of Simsbury, Conn.

In a filing with the Securities and Exchange Commission, Vernitron said it would take an estimated charge of $12.2 million, net of realizable tax benefits, against its earnings for the second quarter ended June 30.

Vernitron in the first quarter reported a $400,000 loss, due in part to expenses incurred in its bid for Kollmorgen. The company for the first six months of 1989 had net income of about $2 million.

Although Vernitron has yet to release sales and earnings figures for the second quarter of 1990, a Vernitron spokesman confirmed that the $12 million charge will result in a loss for the period.

That loss, the company said in its filing, is due to ''the termination of (its) efforts to acquire Kollmorgen and the termination of all outstanding litigation and mutual release of claims ... on the terms set forth in the settlement agreement.''

Under a July 2 standstill agreement, Vernitron ended its bid for Kollmorgen Corp., which manufactures motors and electro-optical systems, and agreed to drop all legal claims against Kollmorgen. In return, Kollmorgen bought back 424,000 of its shares held by Vernitron - which posted a loss on the sale - and paid the hostile suitor $2 million towards its legal expenses.

These payments, however, were hardly enough to cover the $20 million spent in the takeover battle by Vernitron, a Deer Park, N.Y., motor and electronic components manufacturer.

-30- 1862
#90190u1452 07/09/1990 ~United Press International
JOHANNESBURG, SOUTH AFRICA (JULY 9) UPI - The African National Congress rejected Monday government claims that it is deliberately stalling in responding publicly to racial reform.

Instead, the ANC accused Pretoria of breaking faith in the run-up to negotiations on a post-apartheid constitution.

ANC Internal Leader Walter Sisulu also said he expects the movement and the government to enter into second-round preliminary talks to negotiations ''soon,'' but noted a recent surge of right-wing terror bombings has ''worsened'' the climate for talks.

An ANC statement was emphatic in asserting that blame for a breakdown in communications lies with the government.

''A wrong impression has been created by the government that the ANC is dragging its feet on the question of the removal of the obstacles (to negotiations),'' the statement said.

The government has publicly signalled it is ready to accept in some form a key ANC precondition for substantive talks - the release of an unspecified number of prisoners held for politically motivated offenses - but the movement said Pretoria has broken confidentiality by ignoring the private communications channels the parties have established.

''Unfortunately, the government has decided to make known its position ... through Parliament and mass media, a step which in our view seriously undermines the understood confidentiality on this matter," the statement said.

It was referring to the report on defining the status of about 1,500 political prisoners by a joint government and ANC working group that was born out of the parties' talks over obstacles to negotiations May 2-4.

The report was submitted to the Cabinet and ANC executive May 20, and the ANC confirmed Monday it issued a response ''through the established channels'' June 14.

President Frederik de Klerk and Cabinet ministers have since said they accept the substance of the report.

Sisulu declined to say precisely what the movement's response to the report was, but told reporters, ''It is up to the government to reply directly to us, and not publicly.''

The statement, meanwhile, said: ''Our silence in this matter does not in any way suggest lack of concern on our part. We had thought that the government would realize the lack of wisdom and desist from continuing to create this wrong impression.''

A spokesman for the office of Constitutional Affairs Minister Gerrit Viljoen, hands-on manager of the de Klerk reforms launched last February, said, ''There is possibly some confusion here... I'm not sure that we're aware of any breach of protocol.''

Among ANC demands before negotiations can begin are that some 20,000 exiles be allowed the unconditional right of return. The organization also wants a state of emergency lifted in strife-torn Natal province.

President de Klerk scrapped the measure, in effect for four years, in three other provinces on June 8 to entice the ANC to talks.

Other ANC demands include the repeal of security legislation restricting civil rights and the withdrawal of troops from patrol duty in black townships.

ANC Deputy President and de facto leader Nelson Mandela, now abroad on a tour of three continents, has said the talks will begin July 18, the day he returns. But Sisulu said, ''I don't know about this question of a date.''

The climate for talks ''has merely worsened'' because of right-wing terror he said - a reference to a spate of urban bombings which began in late June.

On Friday, a blast at a Johannesburg transport terminus used mainly by black commuters, injuring 27 people.

Police Monday arrested a 10th known right-winger in a swoop which began Friday in connection with the blasts. A police spokesman said, ''We will continue to pursue anyone responsible for deeds of violence.''

Sisulu said the ANC's ongoing armed struggle against white-minority rule, which it began waging nearly 30 years ago, can not be equated with right-wing violence, "as all whites here have a vote, and black people don't."

De Klerk in February legalized the ANC, outlawed since 1960, and other black opposition groups as part of his apartheid reform program. The program has also included allowing public protest, releasing Mandela and other political prisoners from jail and promising to scrap discriminatory laws.

#90190u1495 07/09/1990 ~United Press International

WASHINGTON (JULY 9) UPI - Congress comes back from the traditional July Fourth recess Tuesday facing an ambitious agenda, but some major decisions will be made by Senate-House negotiators away from the confines of the two chambers.

What happens in the next four weeks could well determine whether the 101st Congress posts a record of consequence or will be dismissed as one of little accomplishment.

Congressional leaders, pelted with criticism at the end of last year, said the groundwork laid in 1989 would lead to landmark legislation in 1990 and

the time for producing is running short.

When Congress returns from its long August vacation, pre-election pressures will color every move and the demand to quit and go home for final campaign swings will mount.

To deal with the press of time, Senate Democratic leader George Mitchell may lop a week off the August recess and no one has written off the possibility of a lameduck session after the elections.

The key to virtually everything Congress hopes to accomplish rests now with President Bush and his top economic advisers and 21 members of Congress who are negotiating a budget agreement.

A major obstacle was eliminated when Bush agreed that new taxes could be part of a five-year agreement that Democrats hope will save $500 billion to $600 billion and the administration somewhere around $425-$450 billion. The target for fiscal 1991 is to cut the deficit by $60 billion.

Budget plans are now being put on the table that could lead to a framework for an agreement before the August recess. But the negotiators not only have to decide on cuts, including entitlement programs, but also make tricky choices on what taxes to impose.

In addition, Democrats insist that if an agreement is reached it must get the support of a majority of Republicans in the House and Senate - and not leave Democrats saddled with odious blame.

A five-year budget agreement, if implemented, might by itself lend stature to the 101st Congress. But there are also major bills plodding their way through Congress that could add luster to the two-year session:

Several of the bills are in Senate-House conference, the next-to-last step before congressional passage.

These include three major goals of the session: an ambitious program to clean up the air by cutting acid rain in half, reducing toxic air pollution from factories, and addressing auto and industrial emmissions causing the smog that is choking 101 U.S. cities at levels above federl helth standards; a plan to help working parents obtain and pay for child care; legislation to create a $1 billion fund to assure quick cleanup and victim compensation in the event of an oil spill.

Agreed to by Senate-House negotiators is legislation outlawing discrimination against America's 43 million disabled. It could clear Congress this week.

Moving more slowly through Congress are:

-An anti-crime bill, which expands the federal death penalty to 31 crimes and bans nine assault weapons, which the Senate will pass Wednesday. The House does not appear near action.

-A major revision of federal housing laws, adopted by the Senate with the concurrence of administration, which the House plans to take up this week.

-A civil rights bill, which would override several Supreme Court decisions seen an narrowing anti-discrimination in employment. The Senate plans to start on the bill Tuesday after attempts to reach an agreement with the White House failed.

In addition, Congress must deal - before the August recess - with a military authorization bill, a new farm program, an extension of the debt ceiling and Bush's veto of legislation granting parental and sick leave.

One of the Democrats' major goals for Congress, reform of campaign finance reform, appears to be growing more and more elusive and could be squeezed out before adjournment.

#90190u1502 07/09/1990 ~United Press International

PHILADELPHIA (JULY 9) UPI - The Philadelphia Stock Exchange said Monday it will extend its trading day in foreign currency options to coincide with afternoon trading in the Far East and Pacific Rim countries.

The resulting 20 1/2-hour day will be the longest trading period of any exchange in the world, stock exchange officials said.

The 6 1/2-hour extension will begin Sept. 16. The new hours will run from 7 p.m. to 3:30 p.m. EDT.

In September 1987, the Philadelphia exchange was the first U.S. securities exchange to introduce an evening trading session for foreign currency options.In January 1989, it added an early-morning trading session to facilitate the European market.

The Philadelphia Stock Exchange is celebrating its 200th anniversary this year, exchange officials said.

#90190u1509 07/09/1990 ~United Press International

COLOMBO, SRI LANKA (JULY 9) UPI - Heavy fighting in eastern Sri Lanka left at least 53 Tamil guerrillas dead, including 27 killed in the government's ''Operation Strike Hard'' near the strategic town of Trincomalee, a senior

military official said Monday.

The operation, which began July 4 and ended Sunday night, was part of a government drive to crush a violent separatist movement by the Liberation Tigers of Tamil Eelam.

A senior military official said ''Operation Strike Hard'' soldiers clashed with rebels in Kannathivu and Sampur, near the port town of Trincomalee, 155 miles northeast of Colombo. He said 27 Tigers were killed in the encounter.

At the conclusion of the operation, government officials began distribution of food and medicine to some 15,000 Moslem refugees who had taken refuge in area mosques and schools, the official said.

Also on Sunday, the military shot dead 22 rebels during an encounter in Amparai district, about 130 miles east of the capital, the official said.

During a separate encounter Sunday, security forces killed four rebels during a clash in Batticaloa, about 30 miles to the north, he said.

Fighting between security forces and the Tigers erupted about a month ago when rebels staged four simultaneous attacks on four military camps in the eastern part of the country.

Since than, more than 1,000 combatants and civilians have been killed in the fighting and thousands more have fled the area with their families.

The Tigers are fighting to establish in the north and east of Sri Lanka an independent homeland for the country's mostly Hindu Tamil minority.

The rebels believe a separate state is necessary because of years of alleged discrimination by Sri Lanka's majority Sinhalese, who are mostly Buddhist and control the Colombo government.

President Ranasinghe Premadasa said Sunday the international community must be involved in any negotiations to end the government's monthlong war with Tamil rebels.

''The destruction of lives and public property in the north and east can be prevented only if the LTTE stops its military activities,'' Premadasa said in a speech at Puttalam, 80 miles north of the capital.

''It is only with the involvement of the international community, in a manner acceptable to us, that the dialogue (with the Tiger rebels) can recommence.''

#90190u1523 07/09/1990 ~United Press International
SEOUL, South Korea (JULY 9) UPI - The ruling Democratic Liberal Party moved Monday to oust an opposition lawmaker for assaulting a government legislator on the floor of Parliament during a debate over bills to restructure the nation's broadcasting system.

Ruling party lawmakers met and adopted a resolution demanding that ''the heaviest disciplinary action'' be taken against Kim Young-jin, a member of Kim Dae Jung's Party for Peace and Democracy, for causing injuries to a fellow legislator.

Under law, the most serious disciplinary action possible against a lawmaker is explusion from parliament. The government party controls more than two-thirds of the 299 National Assembly seats.

The clash took place last Saturday when opposition politicians blocked the government-proposed bills from being considered in the National Assembly's Culture-Information Committee.

Kim Young-jin threw a name plate at government lawmaker Choi Jae-wook, who was hit in the face and suffered a cut on a lip and in the mouth. Choi has been hospitalized for treatment.

Ruling party legislators in their resolution termed Kim's assault an ''unprecedented act of barbarism and violence against parliamentary democracy.'' They also demanded criminal proceedings against Kim Young-jin.

Kim Dae Jung, as the party leader, apologized for the incident.

''I am sorry for what happened,'' Kim said at a news conference. ''I pray for Mr. Choi's early recovery.''

#90190u1528 07/09/1990 ~United Press International
MOSCOW (JULY 9) UPI - The 28th Communist Party Congress voted Monday to change the party's ruling Politburo into a body dominated by communist leaders from each of the 15 republics rather than central government officials.

Delegates also voted to elect their general secretary directly, a move likely to strengthen President Mikhail Gorbachev's position at the top of the party by eliminating the smaller Central Committee's traditional king-making power.

The new Politburo will include the general secretary, a newly created post of deputy general secretary, the Communist Party first secretaries in the 15 Soviet republics and an undetermined number of officials chosen by Central Committee.

While it was left up to the Central Committee to determine the Politburo's total size and to add at-large members, Gorbachev suggested there should be 19 to 23 members, which would leave the republican party leaders clearly dominant.

The change in the makeup of the party's top body, proposed by Gorbachev and approved by a 3,548-570 vote, serves a dual purpose by meeting republican communist leaders' demands for more power and further separating party and government functions.

During the first week of the pivotal communist conclave, several of Gorbachev's top advisers, including Foreign Minister Eduard Shevardnadze, indicated they would leave the Politburo in order to concentrate on government posts.

Gorbachev suggested that the Central Committee should add its top officials on ideology and economic affairs to the Politburo, but he made no mention of specific membership for government officials.

If, as expected, Gorbachev is re-elected as general secretary, he would continue in his dual role as party head and Soviet President.

Just before the vote on the revamped Politburo, a motion from the floor for the Congress to select all Politburo members was narrowly defeated in a 1,959-2,046 vote.

The delegates earlier approved a clause in the party's draft rules, providing for direct elections of the general secretary at such large gatherings of Communist activists and creating a new post of deputy

general secretary.

Delegates also voted to require personal evaluations of the general secretary and his or her deputy at each Congress.

Previous Communist Party congresses, held every five years, elected only a Central Committee of several hundred members, which in turn chose the party leader and the Politburo.

The Politburo previously was filled according to unwritten guidelines that set membership for such officials as the Soviet premeir, defense minister and foreign minister and a mixture of government and party chiefs from the larger republics - especially the dominant Russian Federation.

During most of the 70 years of communist rule in the Soviet Union, the Politburo was considered the ruling body in the country.

In March, however, the party gave up its constitutional right to a leading role in the Soviet Union. Since then, Gorbachev has sought to distance the party from government decisions by such means as setting up a Presidential Council to help determine policy.

Earlier Monday, delegates at the Congress approved a moderate resolution on defense policy, a victory for Gorbachev's ''new thinking'' on detente with the West.

Conservatives at the Congress have criticized the leadership for giving away too much in arms negotiations, but the resolution stressed the Communist Party supports the recent moves toward a ''defensive Soviet military doctrine.''

The resolution also said, however, that military danger still exists and called defense ''one of the most important tasks of the entire people, party and state.''

Also Monday, the Congress's ongoing battle between conservatives and radicals flared again as Politburo intellectual Alexander Yakovlev denied charges he used a meeting with radical delegates to accuse Gorbachev of suppressing his ideas.

Yakovlev said the charges, contained in what he said was an inaccurate transcript of the meeting distributed to delegates, showed ''the political battle at the Congress on certain issues is taking on loathsome forms.''

(JULY 9) UPI - Israel's new Foreign Minister, David Levy, says he wants

to meet with Secretary of State Baker for talks that could lead to a breakthrough in the stalled Middle East peace process. Levy reportedly told American Jewish leaders in Jerusalem today that Israel needs to create an atmosphere of good will with the United States to advance the peace process. Baker has invited Levy to meet with him next week in Paris during German unification talks.

Israeli Army Radio says judges ruled an Israeli man accused of killing seven Arab workers pleaded innocent when he stared at a wall and refused to answer questions. Officials say the trial of 21-year-old Ami Popper was postponed later when his lawyer asked to be taken off the case because his client refused to speak. Popper is accused in the fatal shootings last May of Arab day laborers on a roadside in the Israeli-occupied Gaza Strip.

#90190u1562 07/09/1990 ~United Press International

WASHINGTON (JULY 9) UPI - Three industry groups charged Monday that Senate legislation to protect the financial health of a popular government mortgage program will penalize low- and moderate-income families.

The Mortgage Bankers Association, the National Association of Realtors, and the National Association of Home Builders said the plan would limit Federal Housing Administration mortgage financing to one-third of closing costs. They said the legislation would also increase the premium on mortgage insurance by about $28 a month on a $75,000 loan.

"The Senate wants to dramatically increase the upfront cash cost of buying a home and charge a higher mortgage insurance premium to those who make low downpayments," said Ronnie Wynn, president of the banking group.

A survey distributed by the associations said the proposed increases could prohibit as many as 250,000 low- and moderate-income families, mainly first-time homebuyers, from qualifying for FHA loans each year.

The government contends the increases are needed to protect the program from widespread defaults. But instead of penalizing low- and moderate-income families, the groups argue the costs should be spread across the board.

"This proposal hits hardest on those who can least afford it and ... could end up disqualifying as many as one-third of those who seek FHA financing " Wynn said.

"By increasing the premium for all borrowers by a smaller amount than the Senate proposal, FHA can attain the Senate established goal of financial soundness for FHA," he said.

Added Martin Perlman, president of the National Association of Home Builders: "In essence, we want to see the continued broad availability of FHA-insured financing for prospective home buyers while at the same time achieving renewed financial strength for FHA."

#90190u1566 07/09/1990 ~United Press International

BEIRUT, LEBANON (JULY 9) UPI - Israeli jets Monday blasted positions of the pro-Iranian Hezbollah organization in southern Lebanon, the second such air attack in 24 hours, Moslem security sources said.

The sources said at least two Hezbollah gunmen were killed and five wounded in the 10-minute raid that targeted Hezbollah positions in the village of Louwaizeh, near Sidon, about 24 miles south of Beirut.

The strikes on Louwaizeh coincided with heavy shelling of the nearby village of Mleit by the Israeli-backed South Lebanon Army militia of Gen. Antoine Lahd.

In Jerusalem, an Israeli army spokesman confirmed the Louwaizeh raid, saying, ''Israeli air force planes attacked terrorist strongholds near Louwaizeh, just north of (Israel's self-declared) security zone.''

The spokesman said the targets bombed were used as ''training bases and platforms for attacks of Hezbollah.''

''All targets were hit and all planes returned home safely,'' he added.

This was the second air raid against Hezbollah positions in less than 24 hours and the 14th into Lebanon this year.

On Sunday, at least two planes dropped large bombs on Hezbollah positions in the villages of Jbaa and Ain Beswar in the same district of Iklim Al Toffah.

Clouds of smoke billowed into the sky as bombs directly hit a three-story building used by Hezbollah Moslem extremists for military purposes, witnesses said.

A Hezbollah spokesman said two gunmen were killed and three others were wounded in the attack, which lasted for several minutes.

Rescuers, who requested anonymity, said an unknown number of gunmen were buried in the rubble.

Witnesses said extremist gunmen barred Western news photographers from approaching the targeted area.

In Israel, an Israeli army spokesman said air force planes on Sunday attacked a base of the Hezbollah terrorist organization near the village of Jarjou, 11 miles southeast of Sidon, destroying the target.

All aircraft involved returned safely to base, the spokesman said.

Hezbollah's radio station, broadcasting from southern Beirut, said four Israeli warplanes carried out the raid.

Hezbollah gunners fired on the jets with automatic anti-aircraft guns as the planes unleashed hot-air balloons to confuse any heat-seeking missiles fired from the ground, the radio report said.

Hezbollah radio also charged that gunmen of the pro-Syrian Shiite Amal militia, Hezbollah's staunch local foe, bombarded Hezbollah positions in the area while the Israeli planes were attacking.

''Amal artillerymen also targeted ambulances carrying victims from the targeted area,'' the report said.

There was no reaction from Amal on the accusation.

''We call on all our fighters at advance positions to be on full alert in anticipation of renewed attacks by the Israeli enemy,'' the report said in a broadcast later in the day.

Fierce fighting between Hezbollah and Amal has occurred in the mountainous region east of Sidon since December. The two groups have been competing for supremacy over Lebanon's estimated 1.5 million Shiite Moslems.

The region also is overlooked by gunners of the Israeli-backed South Lebanon Army, who are dug in at strategic locations around the Christian town of Jezzine, 23 miles south of Beirut.

#90190u1576 07/09/1990 ~United Press International

LONDON (JULY 9) UPI - Share prices closed lower on the London International stock exchange Monday as markets grew cautious about the effects of a prolonged period of high interest rates.

The blue-chip Financial Times 100-stock index lost 2.5 points to close at 2,337.5, compared with 2,340.00 points Friday. The narrower top 30 industrial average lost 5.7 points to close at 1,859.30 points. Volume was 353.5 million shares.

Dealers said a stronger British pound and Britain's sustained high

interest rates prompted brokers to lower their predictions for corporate profits. The trading mood was also gloomy ahead of inflation figures expected Friday, which analysts said could move above ten percent. Gilt-edged securities gained about 0.25 point.

Post-World Cup fever lifted shares in soccer team Tottenham Hotspurs. Shares gained 18 cents to reach $2.12 on speculation that midfielder Paul Gascoigne, whose performance for the England team in the World Cup semifinals attracted international attention, could pull in a hefty commission if traded.

In the pharmaceutical sector, Glaxo shares climbed 36 cents to $15 with a bout of U.S. buying.

The stronger pound sterling depressed foreign currency earners including Grand Metropolitan PLC, down 11 cents to $11.68, and RMC shares, down 14 cents to $12.06.

#90190u1577 07/09/1990 ~United Press International

CHICAGO (JULY 9) UPI - Five New York banks have agreed to take the lead in providing financing for a $4.4 billion United Airlines employee buyout of parent UAL Corp., an employee group source said Monday.

The source said Bankers Trust Co., Manufacturers Hanover Corp., Chase Manhattan Corp., Chemical Bank and Citicorp are willing to provide $500 million each - subject to negotiation of loan rates and fees - and help put together a syndicate to provide the remaining $1.9 billion.

Citicorp and Chase Manhattan were the lead banks in the attempt to syndicate financing for a $6.75 billion, $300-a-share employee lead buyout of UAL that collapsed last October when Japanese banks turned a cold shoulder to the proposal.

One United union source, asked about the new financing deal Monday, said he also had heard a "major bank in Japan" had expressed interest in joining the financing syndicate. But the buyout group source could not confirm that report.

"There have been discussions - in fact there are discussions, and there will be further discussions - with a number of banks in this country and other countries, but I can't say anything about the results at this time," the source at United Employee Acquisition Corp. said.

United Employee Acquisition Corp. Chairman Gerald Greenwald hopes to raise $500 million to $1 billion of the needed financing from from UAL suppliers - specifically airline and engine builders and aircraft leasing companies

- and is using a pending multi-billion dollar order for widebody jets as bait.

The UAL board, at the request of Greenwald, put off a decision on the widebody order. Greenwald reportedly plans to use the order - expected to be worth $15 billion - as leverage to get suppliers to invest in convertible bonds that would be subordinate to bank financing.

United's three employee unions - the Airline Pilots Association, the Association of Flight Attendants and the International Association of Machinists - reached agreement April 4 on the $4.4 billion, $201-a-share, employee buyout. If completed, it would make the airline the world's largest employee-owned company.

UAL stock climbed Monday on news of the financing breakthrough, and was trading at $156.875 - up $4.125 - on the New York Stock Exchange at 1:30 p.m. EDT.

Under the agreement with the UAL board, United Employee Acquisition has until Aug. 9 to obtain commitments or resonable assurances of financing for the deal. It will then have until Dec. 9 to complete the acquisition.

The buyout plan would provide stockholders $155 a share in cash plus $35 a share in senior subordinated notes bearing 16 percent interest and a proportional stake in a new security of Covia Corp., the UAL subsidiary that holds a 50 percent stake in the Apollo computer reservations system. United's financial advisers have calculated the value of the Covia interest to be worth about $11 a share.

The buyout group also made further progress last week in putting together the 15-member panel of directors that will oversee the company when the acquisition is completed.

Greenwald advised the UAL board that Owen-Illinois Inc. Chairman Robert Lannigan, former Time Warner Inc. Vice Chairman J. Richard Munro and former Jewel Food Cos. Chairman Donald Perkins agreed to serve on the new UAL board.

The board will consist of four labor representatives, three senior managers - including Greenwald and Chief Financial Officer John Edwardson - and eight outside directors, five of whom are yet to be named. Edwardson former chief financial offficer at Northwest Airlines, left IMCERA Corp. last week to join Greenwald at United Employee Acquisition.

#90190u1583 07/09/1990 ~United Press International

LAKE BUENA VISTA, Fla. (JULY 9) UPI - Thirty-one ultra-high-tech cars,

powered only by the sun, took off Monday on a 1,600-mile, 11-day endurance run in the first solar car race in the United States.

The cars, a bizarre array that ranged in appearance from an oversized guppy to a pontoon boat, were designed and built by 29 universities in the United States, plus two Canadian schools and the University of Puerto Rico.

The top three finishers win spots in the World Solar Challenge, a 2,000-mile international solar car race in Australia in November.

The cars, with tiny engines that sound like sewing machines, took off at 30-second intervals Monday morning under partly cloudy skies with temperatures in the upper 80s.

''The weather - one little cloud like that can drop down your power,'' said Rodney Braun of Mankato State University in Minnesota.

The first car off the line Monday was ''The Pride of Maryland'' from the University of Maryland, the top qualifier at 52 mph and one of the race favorites.

''These cars are in an experimental and developmental stage,'' said Bill Raynor, a University of Maryland crew member. ''The best prepared team, if they aren't lucky, and if they break down, they're out. This race is a definite crap shoot. Anyone can win.''

The race covers 1,600 miles of secondary highways through eight states from just south of Orlando, Fla., to Warren, Mich., the home of General Motors' Technical Center. GM is the race's primary sponsor.

The race's first day covers just 75 miles, from EPCOT Center at Walt Disney World to Floral City, Fla.

''The Sunrunner,'' built by the University of Michigan, was No. 2 in qualifying, at 45 mph, and second off the line. It is one of the most expensive cars in the race, costing $800,000, and one of the heaviest, weighing nearly 800 pounds. It involved 200 student-team members, compared to the average team size of about 12.

Each of the cars is covered with black solar wafers that soak up power from the sun, the only allowed source of power, but the design of the cars varies widely. Some have missile-shaped cockpits with flat, horizontal solar arrays slapped on top. The Colorado State University car is similar but has a washboard-shaped solar array that pivots 70 degrees to maximize solar exposure.

The cockroach-shaped ''Sunshine Special'' by the Florida Institute of Technology has solar wafers on its undercarriage to absorb light reflected

by the road, said Gwendolyn Mraz, a team spokeswoman.

The most unusual-looking car was built by the Western Washington University. It has two pontoons joined by an angled solar array. Two drivers sit back-to-back in one pontoon. The car goes forward in the morning, then the crew flips it around and drives in reverse in the afternoon to maximize solar power.

''We have tested to 57 mph,'' said Stan Miller, one of the WWU drivers.

#90190u1591 07/09/1990 ~United Press International

CLEVELAND (JULY 9) UPI - An Ohio Board of Pharmacy member whom the Rite Aid Corp. allegedly tried to bribe into resigning testified Monday he knew for years of some violations at stores he was supervising for the Lane Drug Co.

Melvin Wilczynski, under cross-examination, admitted that while both on the state board and supervising pharmacies for Lane Drug he told the state board corrections of violations would be made at Lane Drug stores. He has been on the board since 1983. In fact, however, one violation was repeated at the same store four years later and others were not corrected for extended periods of time.

In question for the violations noted during Wilczynski's testimony was whether access to pharmacies was limited to licenced pharmacists. In January 1989, Rite Aid paid a $50,000 fine for the same violations. The attorney representing Rite Aid implied during opening statements Thursday that Rite Aid had been unfairly treated by the board.

Wilczynski began testifying Friday in the bribery case against the Shiremanstown, Pa.-based company - the nation's largest drugstore chain - and its president, Martin Grass.

Wilczynski said Friday Grass offered him a $33,000 contract buyout and four years of health insurance worth another $34,000 to resign from the board of pharmacy. Grass and Rite Aid, however, have maintained the payment represented only a buyout of Wilczynski's consulting contract.

Wilczynski was hired as a consultant by Lane Drug in March 1989, when Rite Aid bought Lane Drug. Three months earlier, Wilczynski had retired after several years as a vice president of Lane Drug.

Wilczynski testified that in trying to get a seat on the state board, he joined the Governor's Club, made donations to Gov. Richard Celeste in excess of $1,000 and asked people to write letters on his behalf. Wilczynski is now in the middle of his second four-year term.

The bribery charge carries a maximum penalty of two years in prison and a $5,000 fine. There is also a charge of possession of criminal tools, which allegedly was the use of a corporate jet to fly to Cleveland to make the payment. That charge carries a maximum penalty of 18 months in prison and a fine of $2,500.

Rite Aid was founded by Grass's father with a single Pennsylvania store. It now has 2,360 stores in 22 states, including 355 stores in Ohio.

#90190u1643 07/09/1990 ~United Press International

NEW YORK (JULY 9) UPI - Threatening "we'll see you in court," Philip Morris U.S.A. announced Monday an advertising campaign to warn manufacturers that use of the company's logos on products for children would lead to trademark infringement litigation.

The Philip Morris Cos. subsidiary has among its cigarette brands Marlboro, the largest selling cigarette in the United States and the world, as well as Benson & Hedges 100s, Merit, and Virginia Slims.

The campaign comes as the domestic cigarette industry has been stung by criticism over advertising and marketing campaigns aimed at minorities and young women and over the industry's greater reliance on sales of cigarettes overseas at a time when the federal government is attempting to discourage smoking in the U.S.

Philip Morris said it has had a long-standing policy of taking legal action in defending its trademarks when the company turns up instances of misuse. For example, Sega Enterprises Inc. stopped using unauthorized Philip Morris logos in a grand prix racing video game found in arcades. The game displayed a banner with the Marlboro motif on which the name was intentionally misspelled as "Marlbobo."

Other examples of logo misuse include bubble gum sold in boxes that look like cigarette packs of Virginia Slims or Marlboro. The new campaign, estimated to cost $500,000 over five years, is designed to prevent trademark misuse in the first place, Philip Morris said.

"If you use our trademarks on products for kids, we'll see you in court," said John R. Nelson, vice president of corporate affairs for Philip Morris. "Philip Morris U.S.A. wants to make it absolutely clear that we do object to such activity and that we do pursue legal action against trademark infringement."

Advertisements will begin appearing next month in 16 publications, primarily trade magazines covering the toy, games, video, candy, and

apparel industries. If they were to run in general consumer publications, Philip Morris said, the ads would cost as much as $4 million.

Nelson said that trade publications, with lower ad rates, were selected for the campaign because "that's who we are trying to reach with our message. "Philip Morris has always held that smoking is an adult choice and consequently does not market cigarettes to children."

MENLO PARK, Calif. (JULY 9) UPI - A strong earthquake hit southern Sudan Monday, causing some damage to buildings in Juba and Moyo, Uganda, the U.S. Geological Survey reported.

There were no immediate reports of injuries.

Scientists said the quake measured 6.5 on the Richter scale and was an aftershock to the 7.2-magnitude temblor that hit the region May 20.

The quake hit about 11:11 a.m. EDT, or 5:11 p.m. local time, the agency said. It was centered about 700 miles south of the nation's capital, Khartoum.

#90190u1671 07/09/1990 ~United Press International

SAN SALVADOR, EL SALVADOR (JULY 9) UPI - El Salvador's immigration director has been released from his duties and is under investigation in connection with the trafficking of illegal aliens from China, officials said Monday.

''As a result of the investigations, the director of immigration (Col. Maximiliano Leiva) has already been removed from his post,'' a press release from the president's office said.

The investigation followed the arrest last week of 50 Chinese nationals and two men from Taiwan, all with false documentation, is credited with uncovering an international ring of traffickers of illegal aliens.

Judicial and military sources said the Chinese nationals had paid $20,000 each to be smuggled into the United States and that they arrived in El Salvador after a long journey that took them through Thailand, the Soviet Union, Cuba and Nicaragua.

Unconfirmed reports published in several San Salvador newpapers said several other immigration officials and employees of an air transport service were being investigated in the case. News reports also said that

Leiva had been taken into custody for further investigation.

The U.S. Embassy in San Salvador said through a spokesman that it ''applauds this move by the Salvadoran government to act against immigration fraud.''

''The trafficking of Asians through Latin American countries is a huge business,'' said embassy spokesman Jefferson Brown. ''Every Latin American country has this type of thing happening to some extent.''

#90190u1672 07/09/1990 ~United Press International

ANKARA, TURKEY (JULY 9) UPI - A Turkish Cabinet minister who returned from Saudi Arabia Monday said 525 of the Moslem pilgrims killed in last week's tunnel disaster near Mecca were still unidentified.

Minister of State Cemil Cecik flew to Saudi Arabia last week after 1,426 people making the Hajj, or pilgrimage, to Mecca had died in a stampede in a pedestrian tunnel there.

Cecik, speaking at a news conference, said all 331 Turks who died had been identified but ''there are still 525 dead whose nationalities are not known.''

Pilgrims generally wear simple white robes during the Hajj and rarely carry identification because the robes have no pockets.

Turkey's semi-official Anatolia News Agency said 350 of the bodies were identified as Turks from emblems on their robes.

Reports from Jakarta, Indonesia, said 541 of the pilgrims were identified as Indonesians, and Kuala Lumpur said 19 were Malaysians. A Beirut report said four were identified as Lebanese.

Several of the victims were said to be Indians and Pakistanis, but there was no word from Islamabad or New Delhi on how many people from the subcontinent were killed.

Turkish newspapers and opposition politicians have joined other countries in condemning Saudi Arabia for the accident and have accused the authorities in Mecca of negligence.

The papers claim some Turks are still missing in Mecca, amid unsubstantiated reports the Saudis shot some of the pilgrims and then quickly buried their bodies to hide evidence of the violence.

Turkish pilgrims who returned home from Mecca, however, said they did not

hear shots.

Cecik, who met several Saudi officials, including Prince Majid ibn Abdul Aziz, the emir of Mecca, said Saudi Arabia needed to seriously reform the way it handles the millions of pilgrims who descend on Mecca each year.

''I told the Saudi officials that the authorities were at fault and the measures (they took) were not adequate,'' Cecik said. ''They said it was God's will. I told them I am not satisfied with their response.''

Mecca is the birthplace of the Prophet Mohammed and holiest city in Islam.

Saudi officials have said the stampede started when several pilgrims fell off a crowded overpass onto people below in a tunnel. Thousands of panicked people rushed in one end of the air conditioned underpass, colliding with thousands more who entered from the other end.

Opposition leaders in Turkey have called on the Ankara government to demand compensation from Saudi Arabia for the victims, but Cecik did not confirm whether Ankara would officially seek such payments.

Turkish pilgrims back from Mecca said Saudi officials reacted nonchalantly when the stampede occurred. They said some just stood by and watched, while others withdrew from the scene without aiding the victims.

Ahmet Akcam, a Turkish survivor, said the disaster occurred because of a power failure.

''Just as we entered the tunnel the electricity was cut off, leaving everything dark,'' he said. ''Then people started shouting and wailing that the other end of the tunnel had collapsed. Then they ran toward us. We were lucky because we had just entered the tunnel and turned back.''

In Tehran, the newspaper Kayhan International charged the stampede began when Saudi police attacked a group of pilgrims who were chanting a pro-Iranian slogan.

The newspaper said that after the pilgrims took up the chant, the power supply to the tunnel was cut and its exit. Kayhan quoted Lebanese, Turkish and Malaysian survivors as saying the Saudi police used teargas against the crowd.

The official Islamic Republic News Agency of Iran, monitored in Athens, quoted Kayhan as saying the bodies of pilgrims shot by police were immediately removed from the tunnel and buried secretly.

Turkey and other countries have charged that some nationals making the Hajj are unaccounted for and have accused Saudi officials of not aiding

them in finding the missing.

#90190u1685 07/09/1990 ~United Press International

ST. LOUIS (JULY 9) UPI - Lions Clubs International, launching the most ambitious program in its 73-year history, announced Monday it will spend $100 million to try preventing millions of people around the world from becoming blind.

At a news conference in St. Louis that included satellite hookups with blindness experts and reporters in London and Washington, D.C., the world's largest service organization announced it is starting a program called SightFirst. Lions International President William Woolard called the effort "the greatest challenge" in its 73 years.

About 40 million people around the world are blind, but 80 percent of all blindness can be prevented or cured, said Dr. Carl Kupfer, director of the National Eye Institute and president of the International Agency for the Prevention of Blindness.

"If nothing is done, that number (40 million) will double in the next 25

years," Kupfer said, adding that 90 percent of the world's blind live in undeveloped nations.

The Lions committed themselves to the SightFirst program for a minimum of six years. They will help build clinics, educate the public, and provide medical equipment and supplies around the world, club leaders said.

SightFirst funds will support ophthalmic training for doctors, nurses, and clinicians. A report by the World Health Organization shows some countries have fewer than one ophthalmologist for every one million people. "All the new clinics in the world won't prevent blindness without properly trained professionals to run them," Woolard said.

The world's leading cause of blindness is cataracts, which affect 16 million to 20 million people worldwide, even though surgery to correct the problem is 90 percent effective, the group said.

The other leading causes of blindness include trachoma, an infectious eye disease associated with unsanitary living conditions; glaucoma, often associated with diabetes; xerophthalmia, caused by a deficiency of Vitamin A and the most common cause of blindness among children; and onchocerciasis or "river blindness," caused by the bite of a species of fly found in Africa, Central America, and South America.

Trachoma accounts for 25 percent of blindness worldwide, while about three million people suffer from glaucoma, Kupfer said. He noted that xerophthalmia blinds between 250,000 and 500,000 children annually, with 60 percent of the victims dying in the first year. Onchocerciasis affects 18 million people, he said.

SightFirst becomes the most ambitious program ever undertaken by the Lions club officials said. They said SightFirst activities would begin in India Latin America, and Africa, where statistics compiled by WHO show as much as two percent of the population might be blind.

The program will be funded by Lions clubs worldwide, which also will participate in the effort through community programs such as public education, patient care, and transportation.

The most important difference between SightFirst and existing programs to prevent blindness is that each of SightFirst's individual programs will rely on the support of medical experts, club members said.

"The technical advisers are essential to SightFirst's success," Woolard said. "As ophthalmic specialists, these advisers will assess the need for care in their area, propose projects and monitor them as they develop."

Lions Club International is the world's largest service organization with

nearly 1.4 million members in 171 countries. Club members raise hundreds of millions of dollars annually to help the blind and visually impaired, to sponsor the world's largest drug abuse prevention curriculum, and to support diabetes education research.

Lions have been fighting blindness since 1925, when Helen Keller, a noted writer and lecturer blind and deaf from infancy, challenged them to be "knights of the blind."

#90190u1695 07/09/1990 ~United Press International

CHICAGO (JULY 9) UPI - Soybeans made session lows during the noon hour Monday, then recovered most of the losses before the close on the Chicago Board of Trade.

Soybeans were lower at the final bell and grain futures were mostly lower.

Professionals dominated the selling as soybeans fell to their lowest levels in about two weeks. Predictions of favorable growing conditions most of the week contributed to the losses, but soybeans rallied during the closing minutes on short-covering.

November beans had a low of $6.33 per bushel during the morning and closed at $6.40.

Soybean meal traded lower on spillover weakness from the bean pit and the lack of export business, while soybean oil futures were virtually unchanged from Friday.

Corn was moderately higher on commercial activity, but also was pressured by the weather.

Wheat futures gave up their early gains and turned lower in relatively quiet trading. Traders said harvest pressure was a minor factor as the harvest nears completion.

Country movement generally was light.

At the close, corn was up 1/4 to 6 3/4, soybeans down 2 1/2 to 4, wheat off 1 1/2 to 5 and oats down 2 3/4 to 3 1/2.

#90190u1734 07/09/1990 ~United Press International

NEW YORK (JULY 9) UPI - Paris-based Galeries Lafayette, brushing aside concerns over Donald Trump's financial problems, said Monday it will move into the Trump Tower by late 1991 and turn the Fifth Avenue prime retail space into a showcase for French fashion.

"America is the place to be," said Georges Meyer, chairman of theplush publicly traded French retailing group. "Galeries Lafayette will open its store in the fall of 1991 and it will be a French fashion store, not a full-line merchandise store."

Trump, describing Galeries Lafayette as "one of the great stores of the world," congratulated himself over picking up a challenge in time of looming financial difficulties, and buying for $5 million the 12-year lease on the prime space left empty by now defunct retailer Bonwit Teller.

Terms of the new lease were not disclosed but retailing sources said Trump would make a solid profit on selling the long-term lease for the 80,000-square-foot store to the French retailer. Meyer declined to disclose whether Galeries Lafayette would pay any rent until the store opens in 15 months from now.

The new rental contract adds value to the Trump Tower and brings increased security for lending banks which, two weeks ago, put together a new loan package to rescue Trump, with the Tower as collateral.

"We are tenants in the Trump Tower and if someday Mr. Trump decides to sell the Tower, we'll still be tenants," said Meyer, waving aside questions about the developer's financially vulnerable empire.

Galeries Lafayette, France's No. 1 retailing group with revenues of $4 billion a year, had been actively seeking the prime space at the corner of Fifth Avenue and 57th street, one of the world's hottest retailing spots.

"Basically, we wanted that store because of its location," said Meyer, whose group expanded around its Paris flagship store located in a landmark building in the busy Opera district. "Also, there will be very little starting costs involved compared with building a new space from scratches." Meyer also dismissed concerns about the U.S. retail environment.

The store chain, whose original motto was "You'll find everything at Galeries Lafayette," will only sell selected items aimed at wealthy customers. "It will be a very Parisian store, with fashion shows, designers boutiques, top-of-the-line accessories and cosmetics," Meyer added. "U.S. stores are doing well, it is their debt-burdened parent companies which have problems."

The French retailer placed an unsuccessful bid for Bonwit Teller's flagship store when the 16-store group's highly-leveraged parent company, L.J. Hooker of Australia, filed for bankruptcy.

Trump declined to answer questions about his other business plans. The developer is expected to travel this month and seek foreign business partners who could help rebuild his empire or buy some of his properties.

In an unrelated development, the Trump Organization issued a statement denying published reports saying that the Federal Aviation Administration was investigating safety at Trump Air, the developer's helicopter service linking New York and John F. Kennedy airport.

The reports said safety standards had decreased since several Trump Air pilots had been laid off last month, also leading to the termination of flights between La Guardia and New York.

"We have rescheduled flights at Trump Air thereby allowing us to reduce our work force," the organization said in a statement. "All of the replacements and changes were done with total compliance with the FAA."

#90190u1738 07/09/1990 ~United Press International

NAIROBI, KENYA (JULY 9) UPI - Security forces struggled to restore a measure of calm to the country as a third day of rioting and violence

spread from the capital to provincial towns, but several people were killed and some foreign journalists were beaten and arrested.

President Daniel arap Moi hurried back from a summit meeting in Ethiopia of the Organization of African Unity as the riots, which started Saturday as demonstration in support of multi-party democracy, appeared to fly out of control. Witnesses said the crowds of youths Monday seemed bent on violence for violence sake.

Nervous police and paramilitary troops reportedly shot and killed two people Monday, arrested and beat international journalists, and blocked off whole areas of Nairobi and the towns of Naivasha and Nakuru. Three others reportedly were killed in Nakuru in a youth rampage.

By nightfall, Nairobi had calmed, at least temporarily, as a heavy tropical rainstorm damped fires and discouraged residents from venturing onto the streets. Western diplomats in touch with Nakuru said the lakeside town also was quiet.

A government statement broadcast on official Voice of Kenya radio noted the president's return and said the situation was under control. It stated that ''the government has authorized the commissioner of police to use the force at his disposal to protect life and property.''

It was not clear, Western diplomats said, whether Moi originally had intended to return from Ethiopia Monday or had cut short his stay because of the Kenya violence.

Among Monday's dead was a schoolboy, whom witnesses called ''Njoroge,'' apparently the boy's surname. He reportedly was killed by police who fired into a Nairobi crowd. Police and hospitals released no official casualty figures, but witnesses and local journalists put the overall death toll in the riots at high as 12.

In Naivasha, 50 miles northwest of Nairobi, two people were reportedly shot dead Monday by police as crowds of demonstrators and gangs of youth ran amok. Local journalists said three people died in the major town of Nakuru another 35 miles up the Naivasha road, when youths went on the rampage.

A police statement described the rioting as ''acts of hooliganism perpetrated particularly in the city by criminal elements.''

Some demonstrators shouted slogans Monday calling for the government to resign or made the ''two fingers'' gesture that denotes support for a multi-party system. One man was killed by a mob over the weekend for failing to make the gesture, local newspapers reported.

Meanwhile, however, there were unconfirmed reports of rapes, shops were

looted in Nairobi and Nakuru, and at least five vehicles, including two petroleum tankers, were set on fire as fighting raged through the capital's northern slum districts.

Most banks, shops and offices in the capital were closed early in the afternoon.

Paramilitary troops detained five journalists, including the British Broadcasting Corp.'s East Africa correspondent, who were attempting to enter a trouble zone. They struck one British journalist on the head with batons, cutting him badly. The journalists were released after three hours.

There were unconfirmed reports that four Western tourists had been injured in the fighting.

The West German Embassy in Nairobi issued a warning to German nationals to avoid the city center after office hours and to keep the gas tanks of their cars full in case they needed to leave in a hurry.

Apart from residents, West Germans make up about 18 percent of all tourists visiting Kenya. The embassy was understood to be trying to contact Germans in Kenya.

Other embassies, including the British and American missions, warned citizens who telephoned to exercise caution.

Trouble began Saturday when thousands turned up for a banned pro-democracy meeting at Kamukunji sports ground in the east of the city.

They demanded release of two ex-politicians, Kenneth Matiba and Charles Rubia, who campaigned for a change in Kenya's one-party system of government.

Matiba and Rubia were arrested last week on charges of endangering public security after their application to hold a meeting at Kamukunji was turned down.

Ten more people, including prominent lawyers, were also held in connection with challenging the government. Twenty-nine others were detained for distributing what were described as ''subversive'' music cassettes.

#90190u1744 07/09/1990 ~United Press International

(JULY 9) UPI - President Bush has characterized the economic summit that's getting under way today in Houston, Texas, as a joint effort for ''peace and harmony.'' White House Chief of Staff Sununu says harmony is the key word, adding that Bush is willing to accept a diversity of

positions among allies to get along.

Louisiana Governor Buddy Roemer says he hasn't yet decided on whether he'll sign a watered-down version of a bill that bans most abortions. Roemer vetoed the original bill on Friday on grounds that it did NOT make exceptions in the cases of rape or incest. The legislature passed a bill yesterday that makes those changes.

There are more indications that one or more of the Western hostages being held in Lebanon may soon be free. Iran's state radio today gave the second hint of possible movement in the situation. And sources in Beirut say negotiators are hashing out the practical details of the release.

Israeli jets launched another bomb attack against pro-Iranian strongholds in southern Lebanon today, the second attack in 24 hours. Moslem security sources say at least two Hezbollah gunmen were killed and five were wounded in the raid. An Israeli spokesman says the bases were used to train terrorists.

Soviet President Gorbachev won support today from the 28th Communist Party Congress in Moscow. His proposal will change the party's ruling Politburo into a body dominated by representatives from each of the 15 republics rather than by the central government. The move further separates party and government functions.

#90190u1763 07/09/1990 ~United Press International

(JULY 9) UPI - Police in North Miami, Florida, say a woman who claimed to have a gun and a bomb was holding several people hostage at an N-C-N-B bank today. Police say the woman handed a teller a note saying she had a bomb strapped to her body and also had a gun. The woman then told bank employees to evacuate the bank. Police at the scene say between 30 and 40 people left the bank ... but that as many as eight people could still be inside.

NASA officials say they're performing additional tests on parts from the grounded shuttle Columbia to pinpoint the exact location of leaks in the spaceplane's fuel line fittings. Weekend tests in Cornia found signs of leaking in the huge 17-inch wide fittings. A similar leak also grounded the shuttle Atlantis.

The first group of Albanian refugees holed up in foreign embassies in the capital of Tirana are said to be set for their evacuation from the country. Czechoslovakia says 51 people who sought asylum in its embassy have their passports and are expected to be flown to Prague tonight.

A former communist party boss in Czechoslovakia faces four years in

prison. Miroslav Stepan... said to be the most hated man in the country... was convicted today for using police against demonstrators. His was the first trial of a high-level party member since Czechoslovakia's communist regime was ousted last fall.

The Organization of African Unity opened a summit today in Addis Ababa, Ethiopia, with an urgent cry for east African countries to work together to settle the region's civil wars. Ethiopia's president made the unprecedented plea this morning at a special meeting before the start of the summit.

Organ transplant pioneer Dr. Thomas Starzl is reported to be doing fine in stable condition today after undergoing surgery at a Pittsburgh hospital to clear a ''severe'' narrowing of a coronary artery. Doctors say Starzl, who was on the verge of having a heart attack, is expected to be released within the next few days.

#90190u1795 07/09/1990 ~United Press International

TEHRAN, IRAN (JULY 9) UPI - Iran's state radio hinted again Monday that one or more Western hostages in Lebanon might be released shortly, and sources in the Lebanese capital said the parties involved were ''finalizing the practical details of the release.''

The Iran radio report was the second hint from Iran that a hostage held by pro-Iranian Shiite radicals in Lebanon might be released soon. The official Islamic Republic News Agency Saturday quoted sources in Beirut as saying a Western hostage, probably a European, would be released soon.

Informed Iranian sources in the Syrian capital, Damascus, told United Press International that Irishman Brian Keenan, an English teacher at the University of Beirut, was the hostage selected for release. They said they expected he would be released in a couple of days. Western analysts in Tehran also said they believe Keenan was the hostage to be freed.

A pro-Syrian Moslem militia source said Monday that the parties involved in the release were ''finalizing the practical details of the release.''

Sources in Syria said they expected Anglican Church Envoy Terry Waite would be next in line to gain freedom after Keenan.

The Iran Radio report Monday also criticized Israel for trying to ''enter the equation'' to prevent the hostage release.

''Whenever the issue of the possible release of one or more Western hostages in Lebanon is raised, the Zionist regime, with its attacks on bases of Moslem groups, tries to enter the equation'' to prevent it, a Tehran Radio commentary said.

A high-ranking of Hezbollah, the pro-Iranian group under which fundamentalist hostage-takers are believed to operate, said Monday in Beirut that those holding the hostages will foil any Israeli plans to obstruct a hostage release.

''If Israel's air attacks are aimed at creating a tense atmosphere to obstruct the release of a Western hostage, the captors will insist on carrying out the release to foil the Israeli plan,'' the Hezbollah official said.

No group claimed responsibility for the captures of either Keenan or Waite and Hezbollah has denied involvement in hostage-taking. But Walid Jumblatt, the Druze militia leader who had provided security for Waite, charged publicly that the church envoy was being held by Hezbollah.

Keenan, 39, a Belfast native who holds dual Irish and British citizenship, was an English teacher at the American University of Beirut when abducted April 11, 1986, in Moslem west Beirut on his way to work.

Waite was abducted in west Beirut on Jan. 20, 1987, while attempting to negotiate the release of other hostages.

Captors usually notify the press in advance of a hostage release through statements to the press, sometimes accompanied by a photograph of the hostage expected to be released.

Over the past two days, Iranian officials in Tehran have remained tight lipped, on and off the record, on the possibility of a Western hostage being released in Lebanon.

Last week, Iranian President Akbar Hashemi Rafsanjani said Iran would respond favorably toward the West for the kindness shown by Western countries toward victims of the June 21 earthquake. ''When kindness is shown, naturally it is effective,'' he said.

Iran said it played a role in securing the release of two U.S. hostages in April, but Tehran's efforts appeared to wane after its call for a reciprocal show of good will from Washington produced no tangible results.

According to British press reports, Ireland was the first country to fly relief supplies into Iran after the earthquake. And three Irish parliamentarians who visited Tehran recently demanded the release of 300 Lebanese Shiite prisoners held by the South Lebanon Army, Israel's ally in southern Lebanon.

Release of 300 Arabs imprisoned by the SLA in southern Lebanon is one of the hostage holders' major conditions for release of detainees. The Hezbollah official in Beirut said one-third of the detainees held by the SLA at Khiam Prison in southern Lebanon are members of Hezbollah.

In Dublin, a Foreign Ministry spokesman said preparations were under way for Keenan's possible release but emphasized his freedom was not guaranteed.

''We have no confirmation that it is to be Keenan, but we are working in the hope that it will be. We have no firm foundation on which to say 'go ''' spokesman Michael Forbes said.

Keenan's sisters, Brenda Gillham and Elaine Spence of Belfast, said Sunday they had been advised by the Irish Foreign Office to be ready to fly out of Ireland on a moment's notice. They said the government told them a plane is on standby waiting to take them to Damascus.

WASHINGTON (JULY 9) UPI - Yields increased on 13-week and 26-week T-bills Monday at the government's weekly auction.

The Treasury Department auctioned $9 billion of 13-week bills at an

average discount of 7.81 percent, up from 7.73 percent last week and the highest since April 30, when the auction yielded 7.91 percent.

The government also sold $9 billion of 26-week bills at an average discount of 7.75 percent, up from 7.60 percent last week and the highest since May 21, when the rate stood at 7.79 percent.

The investment rate was 8.08 percent on the 13-week bills at an average price of $9,802.60 per $10,000 face value. The rate on the 26-week bill was 8.18 percent at an average of $9,608.20 per $10,000.

#90190u1836 07/09/1990 ~United Press International
AUSTIN, TEXAS (JULY 9) UPI - Anti-censorship groups claimed victory Monday over religious fundamentalists who had sought to dilute the coverage of the theory of evolution in science textbooks.

''This is a national turning point,'' said Michael Hudson, vice president of People for the American Way. ''The national publishing industry has been freed from two decades of tyranny by the fundamentalist creationist

movement.''

Hudson said nine biology textbooks being considered for use in Texas's public schools for the next six years are vastly improved over books adopted in 1985.

''We've witnessed a remarkable transformation,'' he said. ''Evolution is back in biology books in an unabashed and uncompromising way.''

The state Textbook Committee will open public hearings on the books Tuesday and make recommendations later to the full state Board of Education.

The proposed new books were reviewed for People for the American Way by the Berkeley, Calif.-based National Center for Science Education Review.

Eugenie Scott, executive director of the center, said the books are ''light years ahead of where the last generation was.''

Because of the economic power of Texas as the nation's single largest purchaser of textbooks, Scott said books purchased by Texas are often used in school systems across the nation.

''This is exceedingly important in terms of America as a whole,'' she said. ''Texas is extremely important in the whole picture of textbook improvement in this country.

''What you people decide to use in Texas is what children in my state are going to read and children in Iowa and children in Kansas and children in Massachusetts. Texas is a very major player in the national textbook scene.''

California, which begins its selection of science books in 1991, and Texas together account for 20 percent of the total textbook market in the United States.

National textbook critic Mel Gabler of Longview, a religious fundamentalist, said textbook lobbyists such as Hudson and Scott are afraid of having evolution and creationism compared side-by-side in texts.

''If the evolutionists were not afraid of counter-evidence, they'd want it put in the books so it could be slapped down,'' said Gabler. ''But they want government force to require that only the one side be given.''

Gabler said he will ask the school board to delay adoption of any biology textbooks for one year to give publishers time to revise their books.

Hudson said textbook publishers in the past have bowed to pressure from

the ''religious right'' and creationists in the way that biology is presented.

Proponents of ''creation science'' or the Biblical story of the creation of Earth believe that man was created spontaneously rather than evolving from lesser forms of life.

''In our view to compete in today's world, we can ill-afford another generation that does not know Earth revolved around the sun, think that dinosaurs and humans coexisted or believes the reason for the extinction of some species is because they missed Noah's ark,'' said Hudson.

The improved textbooks are the result of a six-year campaign in which publishers were lobbied to ''reverse the deterioration of evolution in science and biology texts,'' Hudson said.

#90190u1843 07/09/1990 ~United Press International

ROME (JULY 9) UPI - Pop singer Madonna lashed out at Roman Catholic attempts to halt her show in Italy Monday when she arrived to start a tour in the land of her ancestors.

''If you are sure I am a sinner, let whoever is without sin throw the first stone,'' the singer told scores of reporters and television cameramen who mobbed her when she arrived from Paris at Rome's Ciampino military airport.

Several Catholic organizations in Rome and Turin have demanded that Madonna's performances in Italy be banned on grounds that her show ''is overflowing with vulgarity and blasphemy.'' So far the mayors of Rome and Turin have taken no action to ban the performances.

The American singer, whose grandparents emigrated from Italy and who was raised a Catholic, is scheduled to perform twice in the Rome area and once in Turin.

The main cause of the Catholic protest is that Madonna uses crucifixes and sacred symbols in her concerts and videos. Last year Catholic protestors succeeded in stopping the performance of Madonna's video ''Like a Prayer'' on Italy's state-run television network.

''I am aware that the Vatican and some Catholic communities are accusing my show of being sinful and blasphemous,'' the Madonna said in a handwritten arrival statement. ''But I ask you, fair-minded men and women of the Catholic Church: Come and see my show and judge it for yourselves. My show is not a conventional rock concert but a theatrical presentation of my music and, like the theater, it poses questions, provokes thought

and takes you on an emotional journey.

''This is what I call freedom of speech, freedom of expression and thought '' she said. ''By preventing me from doing the show, you would be saying you do not believe in these freedoms.''

Madonna, dressed in black and sporting a string of pearls, said she was proud of her Italian ancestry and also proud to be an American, because the United States ''gave me the opportunity to become what I am today and believes in freedom of speech and artistic expression.

''My blood boils when I am misunderstood and judged in a disloyal way for my convictions,'' she said.

YELLOWSTONE NATIONAL PARK, WYO (JULY 9) UPI - Firefighters aided Monday by cool, wet weather have nearly contained a 220-acre blaze in northeast Yellowstone National Park.

Complete containment of the fire on the lower east slopes of Mount Washburn was expected by Monday evening, and the National Park Service has already begun to demobilize part of the fire crew, said Marsha Karle, park spokeswoman.

Temperatures dropped over the weekend, winds were calmer than the previous two days and rain fell Sunday night, allowing firefighters to gain the upper hand, she said.

Three crews, totaling about 50 firefighters from Yellowstone and Grand Teton national parks, will return to their routine jobs, she said, while 275 firefighters from Montana Indian reservations would continue to fight the fire.

The lightning-caused fire, which started Thursday, burned down the slope of Mount Washburn to the rim of the Yellowstone River Canyon on Saturday. Burning trees were knocked over the canyon's edge, igniting vegetation on slopes too steep for firefighters to reach.

Helicopters dumped water on the fire throughout the weekend, she said.

The Upper Loop Road over Dunraven Pass remained open near Mount Washburn in the park's northeast corner, Karle said, but backcountry trails leading to the area are closed indefinitely.

#90190u1880 07/09/1990 ~United Press International
WASHINGTON (JULY 9) UPI - A Washington restaurateur testified Monday he saw Mayor Marion Barry snort cocaine as early as February 1985 at the restaurant he managed and that Barry also used powder cocaine at his home.

Hassan Mohammadi testified that after using cocaine with another man, Barry gave a ten-minute speech at the opening of the Georgetown restaurant Pardi's in February 1985. "Everybody had a good time," said Mohammadi. Mohammadi became the fourth witness to testify that he saw Barry use cocaine and the first to say Barry used cocaine before 1986.

Barry's trial on three felony counts of perjury, ten misdemeanor counts of cocaine possession and a single misdemeanor charge of conspiracy to possess cocaine entered its sixth week Monday.

Mohammadi said he saw Barry snort cocaine into his nose with another man, Samad Arshadi, at a room above Pardi's. Arshadi also is expected to testify at the trial.

Arshadi once owned two city nightclubs, including a former 14th Street go-go club called "This is It," the place where Barry was first publicly linked to drugs.

After Barry attended a Christmas party at the seedy "This is It" club, which featured nude dancers, in 1981, District of Columbia police investigated reports Barry was seen snorting cocaine. No charges were ever filed.

In the spring of 1987, Barry again used cocaine - which had been wrapped in a dollar bill - at a bathroom in Mohammadi's home, he testified.

"I gave the bill to Mr. Mayor. ... He opened it up and asked me if I had a credit card," said Mohammadi. "He took it from the edge of the credit card."

Barry also "made a straw" out of the dollar and snorted the drug, Mohammadi testified.

Barry then wrapped the rest of the powder cocaine with another dollar bill and put it in his pocket. "He said he wanted to take some with him," Mohammadi testified.

Mohammadi pleaded guilty to conspiring to possess drugs between the spring of 1987 and November of 1989, and testified as part of a plea agreement. "Who was it you conspired with to possess cocaine?" asked assistant U.S. Attorney Richard Roberts. "Mr. Mayor," said Mohammadi.

Mohammadi, born in Iran, moved to the United States in 1973. A graduate of George Washington University, he worked in the Iranian Embassy until the Iranian revolution in 1980.

He pleaded guilty in 1982 to trying to defraud the U.S. government by seeking to obtain immigration papers illegally for someone else. As part of his plea agreement on the drug conspiracy charge, the government will ask that he be granted leniency in sentencing, that he not be deported and that his assets not be frozen, said Mohammadi.

Mohammadi, who met Barry at the 1984 Democratic national convention in San Francisco, also admitted he lied to police in January 1989 when the told them he had no history of drug involvement with Barry. "I was trying to save myself and save Mr. Mayor," he said.

Lydia Pearson, a self-described former drug dealer and recovering cocaine addict, testified Friday Barry bought crack from her 25 times between July and September of 1988.

Under cross-examination Monday, Pearson said she used cocaine as frequently as June 8, sold drugs more than 300 times to more than a dozen clients and often brought clients to her boyfriend, who was her supplier.

Asked if she was testifying against the mayor as part of a deal with the government, Pearson said: "No one has ever promised me anything. ... I just gave them a true story."

But she also said the government agreed not to prosecute her for anything she said under oath. And Pearson said she was hopeful her testimony would help convince the government not to prosecute her boyfriend.

Barry was videotaped smoking crack the night of his Jan. 18 arrest at the Vista International Hotel. He faces up to 26 years in prison and $1.85 million in fines if convicted of all counts.

NEW YORK (JULY 9) UPI - Motorola Inc. and International Business Machines Corp. are negotiating a technology licensing agreement that would enable Motorola to produce sophisticated computer memory chips, The New York Times said Monday.

A spokesman for Motorola, in Schaumburg, Ill., declined comment on the report. IBM also refused to comment.

IBM and Motorola last year agreed to join in an effort to develop X-ray technology for making advanced chips - a major improvement on the optical technology currently used in chip production.

But The Times quoted government and industry sources saying Motorola was seeking a license to use IBM's most sophisticated optical technology.

The technology under discussion is necessary to fashion dynamic random acess memory chips - semiconductors capable of storing 4 million bits of information, which is equal to about 300 pages of text. The D-RAMs - the highest capacity memory chips in production - are used in advanced mainframe computers and work stations.

IBM already has licensed the high-tech memory-chip technology to Micron Technology Inc. as part of its effort to bolster the competetive position of U.S. chip producers.

Japan has overwhelmed U.S. companies in the production of memory chips, but Motorola and Intel Corp. dominate the world market for microprocessors - which integrate all computer processing components on a single chip.

#90190u1896 07/09/1990 ~United Press International

BRUSSELS, BELGIUM (JULY 9) UPI - Parliamentarians from the 35 nations of the Conference on Security and Cooperation in Europe will meet in September, the Council of Europe said Monday.

The final communique of last week's NATO summit in London called for a new CSCE parliamentary body, the Assembly of Europe, based on the existing Parliamentary Assembly of the Council of Europe, which is based in Strasbourg, France.

The president of the current Parliamentary Assembly, Anders Bjorck of Sweden, said the meeting of CSCE members would be held in September, but no precise date was given.

The CSCE includes all of Europe, except Albania, plus the United States and Canada.

Bjorck urged Albanian authorities to allow some 6,000 asylum-seekers in foreign embassies in Albania's capital, Tirana, to leave the country.

''Albania should respect the principles of the Helsinki Final Act if it wishes to join the CSCE process,'' he said.

#90190u1911 07/09/1990 ~United Press International

MANAGUA, NICARAGUA (JULY 9) UPI - Government supporters chanting ''We want to work'' clashed Monday with striking Sandinista laborers who erected barricades throughout the capital on the eighth day of a nationwide walkout.

There were reports that some people were injured at several locations in Managua.

At the Labor Ministry Monday morning, about 200 supporters of President Violeta Chamorro's National Opposition Union (UNO) rushed about 100 Sandinista strikers who had set up a barricade at the front gate of the

ministry to prevent anyone from entering.

The UNO supporters, chanting ''We want to work,'' pelted the strikers with rocks. Fighting with rocks and clubs erupted and at least six people were slightly injured before police arrived and broke it up.

''They attacked us with stones and pipes,'' said Augusto Jose Larios, a Sandinista supporter who was bleeding from a head wound.

''If the police aren't going to remove the strikers, we will,'' yelled one UNO supporter. ''We can't even pass through the streets to go to work.''

The government increased police presence throughout the capital Monday, but many of the police were unarmed. Most were caught between their allegiance to the Sandinista Front and their pledge to the UNO government to maintain order.

Local radio stations also reported clashes in the northern city of Jinotega and elsewhere throughout the country.

The strike expanded Monday to bus drivers and employees of the Construction and Transportation Ministry, who joined the thousands of bank workers, telephone operators, secretaries, cotton farmers and other employees of government ministries and state-run companies who have been on strike since last week.

The streets of Managua were filled with people walking to work because public transportation was paralyzed. Even those who own cars found it difficult to pass through the numerous barricades of burning tires and stone blocks that strikers and Sandinista students erected.

At many locations, people were tearing up the streets, which are made of stone blocks, and using the blocks to build more barricades.

Union chief Lucio Jimenez said more than 85,000 people were on strike, though the government maintained that the number was much less.

The government, in an apparent concession to the strikers, boosted salaries of some 40,000 state employees by 40 percent over the weekend, but union chiefs continued to press Monday for demands of a negotiating session over Chamorro's economic policies.

The union wants a halt to privatization of government-run industries, which Chamorro has been seeking since she took office April 25. Union leaders are also asking for more rights for workers, job security and a $200 per month minimum wage.

''On Feb. 25 (when Chamorro was elected over Sandinista President Daniel

Ortega), the people voted for two things - one was to assure peace, and the second was for the hope that, economically, things would be a little bit better,'' Sandinista spokesman Dionisio Marenco said Monday.

He charged Chamorro had so far failed to produce any economic improvements and was instead, ''dismantling the rights of workers and violating the property of the people.''

''The government now has the option to begin improving the lives of the people little by little, or to return the country to the difficulties and pains of war,'' Marenco said.

WASHINGTON (JULY 9) UPI - Consumer installment credit advanced $3.9 billion in May at an annual growth rate of 6.5 percent on an increase in revolving credit, the Federal Reserve Board said Monday.

The modest April increase in consumer credit was revised down to $390 million from $584 million, and followed an increase of nearly $2.6 billion in March, the Fed said in its monthly report. "The increase in May was concentrated in revolving credit" and mobile home loans, the Fed said. "Auto credit was virtually unchanged from April."

The additional $3.9 billion in credit was much higher than predicted by private economists, and the 6.5 percent annual growth rate follows a revised estimate of 0.6 percent in April and 4.3 percent in March, the Fed said.

According to the Fed's estimates, the May increase in revolving credit totaled $3.1 billion, while the increase in mobile home loans totaled $325 million for the month.

The category of "other" loans also increased in May, by $533 million, while the change in auto loan activity was pegged at a decrease of $87 million, the Fed report said.

The increase in revolving credit was across the board - at commercial banks, at retail stores and at gasoline service stations. The weak activity in auto loans was blamed mostly on a decline in activity at auto finance companies.

The Fed also said that during May commercial banks charged 11.82 percent interest on a 48-month new car loan, 15.41 percent interest on a 24-month personal loan, and 14.09 percent interest on a 120-month mobile loan home.

The interest rate of credit card loans at commercial banks stood at 18.14 percent for the month, the Fed said. Auto finance companies, meanwhile, charged an interest rate of 12.23 in May on a new car loan and an interest rate of 16.03 percent on a loan for a used car during the month, the Fed said.

#90190u1920 07/09/1990 ~United Press International

WASHINGTON (JULY 9) UPI - In yet another blow to the nation's beleaguered space agency, a study has found the proposed space station may require too many risky spacewalks for routine maintenance, a published report said Monday.

The proposed $30 billion space station Freedom would require six spacewalks each week for routine repairs, raising questions about the station's practicality, according to the weekly newspaper Space News.

The estimate is in a draft copy of a report prepared for the National Aeronautics and Space Administration by astronaut William Fisher and robotics expert Charles Price at the Johnson Space Center in Houston, Space News said.

Neither Fisher nor Price could be reached for comment. NASA spokesman Jim Cast said officials would not comment on the report until a final version had been reviewed, which is expected to begin next week. But Cast added that ''drafts tend to change from draft to finals.''

NASA is already under fire because of a serious defect in the $1.5 billion Hubble Space Telescope and a fuel leak that has grounded the space shuttle fleet.

Congress is considering a request for $2.6 billion for the space station in fiscal year 1991. NASA hopes to begin building the space station in 1996 or 1997 as an orbiting outpost where astronauts can conduct scientific experiments and stage exploration into the solar system.

Fisher and Price raised questions about the station's design in March when they released a preliminary estimate that the station would require 2,284 hours of spacewalks each year for routine maintenance.

That translated into the equivalent of more than three spacewalks each week, which would mean that astronauts would have to spend an inordinate amount of time outside the station replacing batteries, valves and pumps and doing other maintenance.

NASA officials asked Fisher and Price to continue their analysis and predicted the final report would produce a lower, more realistic estimate of the number of spacewalks needed.

But Space News said ''several NASA officials'' told the newspaper a draft copy of the final report concluded the station would require an estimated 3,800 hours of spacewalks each year, or about six each week.

''Each spacewalk requires six hours to complete. There will be eight crew members at the station, and two would have to spend most of their working hours on space walks doing maintenance chores,'' the newspaper stated.

The newspaper also reported NASA planned to issue a set of recommendations with the report on how to reduce the number of hours needed for spacewalks to 400, which would be considered practical.

''NASA managers said the recommendations will reduce drastically the amount of spacewalks needed and deflect criticisms that the station design will require too much maintenance,'' the newspaper reported.

A team led by William Simon of the Johnson Space Center will propose increasing the amount of robots used to maintain the station, building simpler and more reliable components and combining maintenance tasks, the newspaper said.

''Some pieces of hardware also could be placed inside the modules to make them more accessible to the crew. These measures would reduce the requirement for spacewalks to less than one per week by two crew members '' Space News said.

EAST BERLIN (JULY 9) UPI - Disgruntled East Germans rushed to their banks Monday, taking out large sums of money as prices continued to rise in the aftermath of German economic union.

"The outrage is strong," East Berlin's Junge Welt newspaper said Monday. "Despite the deutsche mark, we still have empty shelves and sky-rocketing prices." An Economics Ministry spokesman largely blamed the situation on what he said was an old East German habit of waiting for superiors to make decisions.

In the first week of economic union, East Germans were only allowed to convert 2,000 marks - about $1,250 - into deutsche marks, the West German currency that has now replaced eastern money.

Economic experts said East Germans had spent their first hard currency cautiously, comparing prices and realizing the same item will often cost them more in East Germany than in West Germany. On Monday, they rushed to the bank, many withdrawing between $3,030 to $9,090.

Shopkeepers reported a steady flow of East German customers buying durable goods including automobiles, refrigerators, washing machines, and other household appliances.

West Germans pay about 36 cents for a can of Coca-Cola, while East Germans have to shell out 60 cents. Even prices of domestic East German goods shot up after the lifting of government subsidies. A loaf of bread went up 31 cents to about $1.80. Potatoes were five times as high as they were when the economic union took place July 1.

An official survey showed that retailers set widely varying prices for consumer goods throughout East Germany. "Most sales people have shown no initiative in setting prices at market levels," said Manfred Ortlieb of the East German Ministry of Economics. "Instead they follow old habits and wait for price levels to be set by those above them in the hierarchy."

He said that if the East German business community didn't act more responsibly when setting prices people would shop in West Germany, causing

unemployment to rise.

West German Chancellor Helmut Kohl also called on the East Germans to actively take up the new chances offered by the free market economy. In a prepared statement for the opening of an East German fair in Dresden, Kohl said that the deutsche mark and the free market are "the solid foundation for a new economic and social start ... benefiting the people."

Many East Germans cross into West Berlin and West German border towns to buy cheaper goods. Even prices of domestic East German goods shot up after the economic union because government subsidies were abolished.

East Germans realized last week that, unlike hard currency, prices were not exchanged at a one-to-one ratio, a high school teacher in Dresden said. He said he cannot afford to buy expensive goods on his salary, which remained the same after the monetary union. "They want to adjust our salaries to prices," he said. "I hope they will do it soon."

In East Berlin, taxi drivers went on strike Monday to protest increased cab fares they have had to charge since monetary union, saying East Germans can no longer afford their services.

#90190u1950 07/09/1990 ~United Press International

WASHINGTON (JULY 9) UPI - The U.S. Postal Service said Monday it had made a preliminary decision to have private contractors operate a new automated technology designed to speed the processing of the mail.

Postal Service officials said the decision to go outside the service's unionized workforce to implement the Remote Bar Coding System will save $10-$12 an hour in labor costs and as much as $4.3 billion over 10 years when the system is fully operational in 1995.

The decision is to be formally announced Tuesday by Postmaster General Anthony Frank at a meeting of the Board of Governors of the service.

''This announcement may trigger all sorts of fears, misstatements and rumors,'' Frank said in a statement released Monday at a briefing for

reporters to introduce the new technology.

But Frank and other postal service officials stressed that the decision to contract out implementing and running the new system will not cost any career postal service employees their jobs.

''No career postal worker will lose employment as a result of contracting out,'' said Pete Jacobson, assistant postmaster general for the engineering and technical support department. He said, however, that some employees will be ''shifted to other operations'' while stressing that the introduction of the new technology ''is in the long term interest of our employees as well as our customers.''

Under contract provisions between the postal unions and the service, the unions will be consulted on the preliminary decision. Frank, in his statement, said the preliminary decision will not be made final ''until the views of the (unions) are fully consideredd, consistent with our labor agreement.''

Jacobson said operational testing of the Remote Bar Coding System will begin later this month in Western Nassau, N.Y., using equipment manufactured by Bell & Howell, and in Louisville, Ky., later in the fall, with equipment made by TRW.

National deployment of the equipment will begin late next year and by the end of 1995, when the system is fully operational, there will be 295 systems with 19,000 computer terminals in 220 locations across the country.

The new system is designed to read and process mail the postal service's current technology considers ''unreadable,'' such as letters bearing hand-written addresses, addresses printed faintly or letters with interference in the addressing area.

Under the system, video imaging technology ''lifts'' addressee infromation from the envelope and transmits it electronically to a computer. The information is displayed on video terminals and data entry operators key a portion of the address into a computer.

The computer then determines the appropriate nine-digit ZIP Code and transmits the information back to the post office's mail processing operations area, where a bar code is applied.

All subsequent processing is accomplished by high-speed bar code sorters that postal officials said will eliminate several steps in traditional manual mail handling.

Frank also denied that the decision to contract out the new system was a step toward ''privatizing'' the postal service, saying, ''I continue to

believe that privatizing the Postal Service would be a national disaster.''

#90190u1961 07/09/1990 ~United Press International

NEW YORK (JULY 9) UPI - Police Monday were protecting a witness who spoke to a man believed to be the Zodiac killer, as the day when detectives believe the gunman will strike again drew nearer.

The witness has only been identified as a woman in her 20s. She told police she spoke to a man who had approached her in a subway station near Central Park and asked her birthday, just two days before a gunman shot a homeless person in the park.

Police have come up with a third sketch of the man believed to be the Zodiac killer, based on the woman's description, said Suzanne Trazoff, the deputy commissioner for public information.

Trazoff said police have placed the woman under protection because she inadvertantly made herself a possible target by lying about her birthdate.

The gunman, who has vowed to kill one person for each of the 12 astrological signs, has shot four men, one of them fatally, since early March.

The victims' birthdates have corresponded to the astrological signs Scorpio, Gemini, Taurus and Cancer. The woman, a Taurus, gave her birthdate as Aug. 8, making her a Leo - the sign expected to be hit next.

The woman told police she was approached on June 19 by a man matching the description police have put together from accounts by victims, the New York Post said.

The suspected hit man is believed to be a medium-built black, in his mid-30s, with a mustache and short beard.

Police have said only the last victim recalled being asked his birthday by the gunman.

An intensive manhunt is underway in efforts to head off a fifth shooting. The last three attacks have occurred 21 days apart, leading police to believe another attack may come Thursday morning.

#90190u1995 07/09/1990 ~United Press International

ATLANTA (JULY 9) UPI - Workmen were putting finishing touches Monday on the World of Coca-Cola, a three-story, $15 million entertainment pavillion located within walking distance of a pharmacy where the famous soft-drink was first served. Marc Grauer, manager of World of Coca-Cola, said the pavilion will be unveiled in an opening ceremony Aug. 3.

The beverage that would later become known as Coca-Cola was first served May 8, 1886, at Jacobs' Pharmacy in downtown Atlanta from syrup produced by Dr. John S. Pemberton, a pharmacist.

Just before his death in 1888, Pemberton sold his remaining interest in the syrup to Atlanta businessman Asa G. Candler, who acquired additional rights and started Coca-Cola on its way.

The centerpiece of World of Coca-Cola is a recreation of the famous red Coca-Cola sign in downtown Atlanta. The original sign was torn down in 1981 to make way for construction of the Georgia-Pacific building. The new Coca-Cola sign was unveiled in a special lighting ceremony May 7. The pavilion has 45,000 square feet of display space containing exhibits of milestones in the history of Coca-Cola.

"For several generations, consumers and collectors worldwide have encouraged the Coca-Cola Co. to develop an attraction that brings to life the special feelings that people have for Coca-Cola," said Carlton Curtis, Coca-Cola's vice president of corporate communications. "The World of Coca-Cola is our way of capturing the spirit of the ongoing love affair between our product and consumers and sharing our rich heritage."

The pavilion will feature a replica of a 1930s soda fountain, complete with soda bar, stools, authentic decorations, and a real soda jerk. Another exhibit will feature a recreation of an early bottling plant and offer a look at modern bottling equipment.

"More than 1,000 artifacts and memorabilia on exhibit at 'The World of Coca-Cola' chronicle the evolution of the Coca-Cola, with the history of the world as its backdrop," said Phil Mooney, Coca-Cola archivist. The exhibit is expected to attract up to 50,000 visitors a year, Grauer said.

(JULY 9) UPI - President Bush opens the first post-Cold War Economic Summit in Houston... Louisiana's governor still undecided on a tough anti-abortion bill... And NASA orders more tests to pinpoint pesky shuttle fuel leak... U-P-I has these top stories and more, next.

Leaders of the world's most powerful democracies are meeting today in the hot air of Houston to discuss post-Cold War politics.

President Bush and his wife, Barbara, gave leaders from Britain, Canada, France, Italy, Japan and West Germany a red-carpet greeting as they arrived at Lovett Hall on the Rice University campus.

There they are expected to tackle a wide-range of issues, many of which stem for changes in Europe that were unforeseen one year ago.

Among the top issues... whether to bail out the Soviet economy in order to help solidify the reforms of Soviet President Gorbachev .

While Bush has said he opposes aid to the Soviet Union, he told reporters this morning that the meeting is a joint effort for what he called ''peace and harmony.''

His chief of staff, John Sununu, later underscored the importance of ''harmony''... saying Bush was willing to accept different opinions in order to go along and get along.

The talks also are expected to focus on the environment and trade reform.

Bush says he hopes much can be achieved.

#90190u2007 07/09/1990 ~United Press International
CAPE CANAVERAL, FL (JULY 9) UPI - Two veteran shuttle commanders in training for 1991 missions were removed from their crews and grounded Monday for violating flight safety rules, the latest in a series of

embarrassing setbacks for NASA.

The unprecedented disciplinary action came after shuttle skipper Robert "Hoot" Gibson, 43, was involved in a collision during a weekend air race in Texas that left a second pilot dead and raised questions about the enforcement of rules banning such high-risk activity by expensively trained astronauts.

Donald Puddy, director of flight crew operations at the Johnson Space Center, said in a statement Monday that Gibson and veteran shuttle skipper David Walker, 46, had been removed from their upcoming missions.

Gibson also was barred from T-38 jet trainer flights for one year while Walker was grounded for 60 days. Neither pilot will be eligible for reassignment to a shuttle mission until they are back on T-38 flight status.

The weekend air show crash was cited in Gibson's case, but the details of what Walker did to warrant such discipline were not announced. Puddy's action marked the first time NASA astronauts have ever been removed from flights because of safety issues.

Walker will be replaced by veteran shuttle skipper Frederick Gregory for a March 1991 military mission. A replacement was not immediately named for Gibson, who had been scheduled for launch in December 1991.

"These actions are unfortunate but they are in the best interest of us all " said chief astronaut Daniel Brandenstein. "These policies are vitally important and to be taken very seriously."

The action was the latest in a series of embarrassing failures and setbacks that have haunted NASA in recent weeks, including problems with the Hubble Space Telescope and fuel leaks that have grounded the shuttle fleet.

Gibson and Walker violated a rule established June 21, 1988, in a memo written by Puddy that clearly banned astronauts named to shuttle flights from participating in high-risk activities. "Without backup flight crews, NASA's responsibility is to preserve the health and safety of existing, named crews," the memo said.

Astronauts named to shuttle crews were ordered not to participate in high-risk recreational activities that could "expose crew members to major or fatal injuries." Such activities include "automobile, boat, airplane and motorcycle racing, parachute jumping and snow skiing," the memo said.

Gibson's air race was a "clear violation of the policy," the statement said Monday. As for Walker, officials said he was grounded for "infractions of the Johnson Space Center aircraft operating guidelines."

The safety rule came in sharp focus June 17, 1989, when astronaut S. David Griggs, veteran of a 1985 shuttle flight, was killed in Arkansas while practicing acrobatic maneuvers in a World War II-vintage fighter. Griggs had been in training to serve as co-pilot of Discovery for a military mission last November. He was replaced by veteran shuttle flier John Blaha.

Gibson, veteran of three shuttle flights including the second post-Challenger mission, is one of NASA's most popular astronauts. He is married to fellow astronaut Rhea Seddon, also a shuttle flight veteran in training for an upcoming flight.

But during an air show race Saturday in New Braunfels, Texas, Gibson's plane and a Formula-1 single-seat aircraft piloted by Henry "Rocky" Jones of Newport News, Va., were involved in a collision.

Jones and Gibson were racing with five other planes in the "Aerofest '90" air show at the New Braunfels Airport when their planes bumped, police said. Jones was killed instantly after spiraling into a cornfield, but Gibson maintained control of his aircraft and was not injured.

Gibson had been in training as commander of the shuttle Discovery, scheduled for launch in December 1991 to carry two European science satellites into orbit.

Walker, veteran of two shuttle flights, including the May 1989 flight that launched the Magellan probe to Venus, was named May 24 to command the shuttle Atlantis during a secret military mission set for an early March 1991 takeoff.

While the nature of Walker's infraction was not revealed, the shuttle skipper, piloting a T-38 jet, was involved in a near-collision with a commercial jetliner in June 1989 near Washington.

Gibson served as co-pilot of the shuttle Challenger during his first space flight in February 1984 and as commander of Columbia in January 1986, the last mission before the Challenger disaster. Gibson's third flight came in December 1988 when he served as commander of the shuttle Atlantis for a military flight.

Walker's first flight came in November 1984 when he blasted off as co-pilot of the shuttle Discovery for a daring satellite rescue mission. He later served as commander of Atlantis for the Magellan mission.

#90190u2021 07/09/1990 ~United Press International
(JULY 9) UPI - Louisiana Governor Buddy Roemer has 20 days to make up his mind about signing a bill that would be the nation's toughest law against abortion.

The governor vetoed the original bill on Friday on grounds that it did NOT make exceptions for abortion in the cases of rape or incest.

But the measure was back on his desk today after both chambers passed a watered-down version of the measure that contains those allowances.

Roemer told reporters at a morning news conference that he was shocked by the development. He says the attorney general has advised him to hold off on signing or vetoing the bill until constitutional questions can be examined.

The three-month legislative battle over the bill came to a head during the weekend when the senate failed on two attempts to override the gubernatorial veto.

But a last-minute decision to modify it and re-submit it for vote scored a victory that supporters have called a ''miracle.''

The Louisiana House passed the measure this morning, hours before it must... by law... adjourn.

The bill comes head-to-head with the U-S Supreme Court controversial Roe versus Wade decision that forbids states to ban abortions.

But the high court modified its position somewhat last year, saying in some cases states could take anti-abortion measures.

ATHENS, GREECE (JULY 9) UPI - Defense Secretary Dick Cheney met conservative Prime Minister Constantine Mitsotakis Monday and said later he believed a new U.S. military bases agreement laid the foundation for improved U.S.-Greek ties.

Cheney, who was present when Greek Foreign Minister Antonis Samaras and U.S. Ambassador Michael Sotirhos signed the new agreement Sunday, earlier visited the island of Crete in the east Mediterranean where two U.S.

military bases will continue to operate under the deal.

Following his meeting with Mitsotakis, the secretary said: ''Obviously, this is a period when there is fundamental change under way in Europe. ... The continued work of NATO is very important to the United States, and I think also to the Greek government.''

Cheney added that Washington believes renegotiation of the agreement ''lays a good foundation for continued improvement in U.S.-Greek relations.''

The agreement on the bases - major air and naval installations on Crete - was the first major international accord signed by the Greek government since Mitsotakis took power in April.

It was signed after 20 rounds of discussions following the expiry of a previous agreement in December 1988, and permits the U.S. bases to continue operating in Greece for eight years.

The deal is renewable for periods of a year each - after the expiry of the first eight.

Two other bases, which operated in Greece under the previous agreement, were scheduled to be dismantled as part of plans announced in Washington to close several U.S. bases around the globe to cut back on military spending.

Work on dismantling a U.S. naval communications base at Nea Makri, near Athens, began in April and will be followed by the dismantling of an air base at Hellenikon adjacent to the Athens international airport, as of October.

Samaras said under the new agreement, U.S. reconnaissance planes would no longer take off from bases in Greece, but tanker aircraft based in Crete would refuel the reconnaissance planes in midair.

A U.S. draft document attached to the agreement provides for $345 million worth of U.S. military assistance to Greece in the form of non-repayable foreign military sales credits for a 12-month period beginning October 1990.

The U.S. proposes to make available to Greece 28 F-4E fighter bombers, 6 P-3A aircraft, 28 A-7 fighter planes and 4 Charles F. Adams guided-missile destroyers.

In Ankara, Turkey, the government of Prime Minister Yildirim Akbulut expressed dismay at some of the wording in the preamble of the agreement.

Foreign Ministry spokesman Murat Sungar said the ministry summoned U.S. Ambassador Morton Abromowitz to express Turkey's reactions.

''We have noted with regret that the text of the U.S.-Greek (defense cooperation agreement), especially the preamble, is worded in a confused manner which could easily be exploited,'' Sungar said.

The Turkish Foreign Ministry asked for an explanation from the U.S. administration, the spokesman added.

He said the United States had assured Ankara several times that the agreement would not carry U.S. guarantees against Turkey, and would not in fact contain anything that would upset Turkey.

Cheney arrived in Athens Sunday after a two-day visit to Crete.

BOSTON (JULY 9) UPI - Americans are taking longer vacations and most can expect at least four weeks off annually within a decade, according to a survey released Monday.

Also, employers increasingly are offering combination packages of "earned time" that include both vacation and sick leave. This rewards workers who do not take many sick days, while limiting abuses and reducing employers' costs, said John D. Erdlen, a partner in the Erdlen Bograd Group Inc., the employment consulting agency that did the survey.

As for the longer vacations, the consultants said current trends suggest employees who have at least five years of seniority at the end of the decade likely will get four weeks vacation or more each year.

And ten percent of the companies surveyed are already giving five weeks vacation or more after eight to ten years with the company, Erdlen Bograd said. The overwhelming majority, 87 percent, however, require anywhere from 15 to 25 years on the job for that much time off.

The move toward more time off is both a recognition of burnout among employees as a cause of declining productivity, and an effort by employers to attract the best workers, said the group, based in Wellesley, a Boston suburb.

"Burnout is seen by many work experts as a substantial cause of lost or declining productivity," Erdlen said. "In addition, companies are realizing that the life styles of their employees require longer time off .... If vacation policies are not competitive, employers will not attract or retain high caliber workers."

In the survey of 2,000 companies nationwide, to which 582 responded, the consultants found that "nearly every employer offers (at least) two weeks' vacation after one year employment", and 54 percent give three weeks after five to seven years on the job. Workers at 38 percent of the companies polled get three weeks after anywhere from one to four years seniority.

The best vacation deals are at financial, educational, health care, and government employers, according to the survey.

Meanwhile, Erdlen said companies are working to cut their sick leave costs. Under the so-called earned time package, a company may give employees anywhere from 20 to 35 days a year.

Erdlen said an employer that used to give three weeks of vacation and ten holidays, and allow up to three weeks of sick leave, thus had a total exposure of 40 days off by each employee.

The same company might now give 33 days to be used any way the employee needed it. This would be an increase in the 25 days off that someone who took no sick leave would get. However, it would reduce the number taken by employees who normally use all their sick time.

(JULY 9) UPI - More changes are in store for the Soviet Union.

The 28th Communist Party Congress today voted to change the party's ruling Politburo from a body dominated by central government officials to one dominated by communist representatives from the 15 republics.

The move further wedges apart the party and the government and improves the hand of the republican party.

Delegates also voted to elect their general secretary directly... a move that observers say will strengthen the position of Mikhail Gorbachev.

The new Politburo's heirarchy will include Gorbachev as general secretary, a newly created post of deputy general secretary, Communist Party secretaries from the 15 republics and an undetermined number of Central Committee officials.

Gorbachev had lobbied hard for the concessions during congressional battles with party conservatives.

Last week, several of his top advisers threatened to quit their party

posts in favor of their government positions.

Violence in Kenya escalated today as protesters continued calls for multi-party elections in the African nation.

Security forces struggled to restore calm as a third day of rioting spread from the capital of Nairobi to provincial towns.

Authorities released NO official casualty figures. But witnesses say as many as a dozen people were killed.... many when police fired into crowds of demonstrators. There are also reports of some foreign journalists being beaten and arrested.

Police and paramilitary troops blocked off entire areas of Nairobi and two outlying towns. Kenyan President Daniel Arap Moi hurried back from an Organization of African Unity summit meeting that opened today in Ethiopia.

A heavy tropical rainstorm later dampened fires set during the rampage and helped authorities restore calm by discouraging residents from coming outside.

A police statement released today describes the rioting as ''acts of hooliganism'' by the country's criminal element.

HOUSTON (JULY 9) UPI - The following is President Bush's opening remarks to the leaders attending the 16th Economic Summit of Industrialized Nations:

''We think this city is a very appropriate place to hold this Economic Summit, not of the post-war era, but of the post post-war era and over the past decade and a half the leaders of the largest industrialized democracies have held these summits to address common problems and challenges.

''These economic summits have become a framework for frank and constructive dialogue, a dialogue for progress that I believe will be advanced greatly in these next three days, and together, we're called upon as allies and as friends to work toward decisions here in Houston that will bring a new stability and prosperity to the world by tapping the power and energy of free wills and free markets.

''A new world of freedom lays before us, hopeful, confident, a world where peace endures, where commerce has conscience and where all this possible, is possible.

''So let us begin in good faith to set the stage for the new millenium and thank you for coming to Houston and thank all who have made us feel so at home here.

''Thank you very much.''

(JULY 9) UPI - C O R R E C T I O N:

In 1st take, Summit item, please read 3rd graf xxx of which stem from changes in Europe etc.,

President Bush opens the first post-Cold War Economic Summit in Houston... Louisiana's governor still undecided on a tough anti-abortion bill... And NASA orders more tests to pinpoint pesky shuttle fuel leak... U-P-I has these top stories and more, next.

Leaders of the world's most powerful democracies are meeting today in the hot air of Houston to discuss post-Cold War politics.

President Bush and his wife, Barbara, gave leaders from Britain, Canada, France, Italy, Japan and West Germany a red-carpet greeting as they arrived at Lovett Hall on the Rice University campus.

There they are expected to tackle a wide-range of issues, many of which stem from changes in Europe that were unforeseen one year ago.

Among the top issues... whether to bail out the Soviet economy in order to help solidify the reforms of Soviet President Gorbachev .

While Bush has said he opposes aid to the Soviet Union, he told reporters this morning that the meeting is a joint effort for what he called ''peace and harmony.''

His chief of staff, John Sununu, later underscored the importance of ''harmony''... saying Bush was willing to accept different opinions in order to go along and get along.

The talks also are expected to focus on the environment and trade reform.

Bush says he hopes much can be achieved.

#90190u2136 07/09/1990 ~United Press International
PORTLAND, Ore. (JULY 9) UPI - Oregon, Washington and Northern California could lose more than 100,000 jobs by the year 2000 if spotted-owl protection is extended over public and private forestlands, a study done for the timber industry claimed Monday.

However, the report commissioned by the American Forest Resource Alliance also noted that 44,500 of those jobs would be lost anyway due to timber harvest reductions not related to the proposed owl-management plan, drawn up by a team of federal biologists.

The industry group called its study the first comprehensive examination of the economic and social impacts of proposed timber harvest restrictions in the region. Earlier estimates by federal agencies and other researchers have pegged the top potential job losses this decade at 12,000 to 50,000.

The northern spotted owl was listed as a threatened species June 23 due to logging of the old-growth forests where it lives, triggering a process that will limit federal timber harvests.

The federal scientists' report, known as the Thomas report for its main author Jack Ward Thomas, will play a major role in the process, although the Forest Service and Bureau of Land Management are holding off on long-range plans pending a report due from a new panel by Sept. 1.

The timber industry's study team was headed by Dr. John Beuter, a forest economics consultant with Mason, Bruce & Girard Inc. of Portland. It included economists, social scientists and foresters from the universities of Washington, California, Montana and Minnesota, plus private consultants.

Dr. Con Schallau, chief economist of the alliance, said the study ''shows that proposed federal plans to save the spotted owl are going to inflict more widespread damage and suffering in the region than anyone had expected.''

The report said 44,500 job losses would occur in the Northwest timber industry by the year 2000, even without the Thomas owl-protection strategy due to previously expected harvest reductions. Job losses from the Thomas plan's impact on public lands only would idle another 40,321 workers, it said.

The study said a total of 102,757 jobs would be lost by the year 2000 if the Thomas owl-recovery plan were implemented on both public and private lands. The associated loss of annual income would total $2.6 billion, said team members Dr. Wilbur Maki and Douglas Gibson of the University of Minnesota.

Thomas repeatedly has said his group's owl-management plan deals only with public lands, not private, and has discounted job-loss estimates that tie his recommendations to private timberlands.

David Klinger of the U.S. Fish & Wildlife Service said Monday the agency's listing of the owl as a threatened species could affect logging of private lands, but only if direct harm to the owls were documented.

''The listing can affect private lands in that if someone is taking an action on private land that harms the owls, we can become involved and take legal action if necessary,'' Klinger said, calling it ''a very gray area.''

''How can I respond to job loss numbers when there have been so many that range all over the board?'' he added. ''We think the process needs to operate as the law allows before we can really tell. It's very difficult to read the future - a lot of these projections may or may not come true.''

The timber group study also looked into the economic impact on secondary manufacturing in the region. Paul Polzin, professor of economics at the University of Montana, said replacing lost timber jobs with ones in value-added wood products manufacturing is ''not going to be easy, if even possible.''

Polzin noted much of the secondary manufacturing in the Northwest is related to the use of old-growth timber, which would be restricted. He said proximity to urban markets is more important to secondary wood processing than closeness of raw materials.

Dr. Robert Lee, a natural resource sociologist at the University of Washington, said the disruption of peoples' lives from the potentially sudden and severe harvest reductions could lead to increased family violence, drug use, alcoholism and suicides.

#90190u2224 07/09/1990 ~United Press International
(JULY 9) UPI - A booming cannon and military bands playing the national anthem of each nation greeted leaders of the world's seven most powerful democracies in Houston today. The welcome came at Rice University as they arrived for the opening of the 16th annual Economic Summit.

The final witnesses testified today in the Lutheran Church's trial-like hearing to consider expelling two San Francisco congregations for ordaining three homosexuals as ministers. One minister said the church can survive the hasty action.

El Salvador's immigration director has been fired and is under investigation in connection with an illegal alien smuggling ring. The director allegedly was involved in a plot to smuggle some 50 Chinese to the United States for 20-thousand dollars each.

In Ankara, a Turkish official just back from Saudi Arabia says 525 of the more than 14-hundred Moslem pilgrims killed in last week's pedestrian

tunnel disaster near Mecca are still unidentified. He says all 331 Turks who died in the stampede have been identified.

The U-S Geological Survey says a strong earthquake measuring six-point-five on the Richter scale hit the southern Sudan this morning, an aftershock to a major temblor that hit the area six weeks ago. There are NO immediate reports of injuries, but some buildings were damaged.

A quake registering a three-point-seven magnitude rattled the northern Baja California desert in Mexico this morning. U-S geologists say the temblor was centered near the U-S-Mexican border. NO injuries are reported.

Cool and wet weekend weather helped firefighters get the upper hand against a a 220-acre blaze burning since Thursday in northeast Yellowstone National Park. Officials in Wyoming say they expect the fire to be out tonight.

A Florida teen-ager has been charged with murdering a taxi driver in Melbourne. Police say the 14-year-old boy and two of his friends were shooting birds with a 22-caliber rifle when they decided to try to shoot passing motorists.

Lions Club International says it will spend about 100-Million dollars to fund an international program aimed at preventing blindness. The club's president says the money will fund ophthalmology efforts during the next six years.

WASHINGTON (JULY 9) UPI - A Gallup Poll released Monday shows most Americans prefer reducing the federal budget deficit by raising taxes on alcohol, tobacco, gasoline, polluters and the rich rather than cutting Medicare benefits.

The poll of 1,014 randomly selected Americans over 18 years old was commissioned by the Federation of American Health Systems, which represents investor-owned hospitals and other health care providers and insurers.

It comes as congressional and White House budget negotiators open a new round of deficit reduction talks that have entitlement programs such as Medicare - the government's health insurance program for those over 65 - on the discussion table.

''If this poll shows anything,'' said Michael Bromberg, the federation's executive director, ''it's that you can't define kinder and gentler without health care. In the public's opinion, health care ranks as a high

priority.''

Gallup methodologist Jack Ludwig said, ''The poll shows people are willing to pay higher taxes before having a Medicare cut.''

The poll was conducted in early June, before President Bush reversed his campaign pledge and said he would consider tax increases to offset the spiraling deficit.

Asked if they support ''substantial cuts'' in Medicare to help reduce the federal budget deficit, 88 percent of the respondents said no, while 8 percent said yes.

Asked if they support increases in Medicare funding, 78 percent said yes and 19 percent said no. Interestingly, 67 percent of respondents older than 65 said they supported such increases - the smallest percentage of any of the other age groups - while 82 percent of those between 35 and 44 said they supported such increases.

To reduce the deficit, respondents were asked if revenue should be increased by raising tax rates on the rich, businesses that pollute the air and water, alcohol, tobacco or gasoline. Forty-one percent said it was an excellent idea; 29 percent, good idea; 15 percent, fair idea; and 13 percent, poor idea.

As for defense reductions to cut the deficit, the reaction was even across the board: 25 percent thought it was an excellent idea; 25 percent, good idea; 24 percent, fair idea and 21 percent, poor idea.

Asked if Medicare should be cut to reduce the deficit, 1 percent said excellent; 4 percent, good; 11 percent fair and 81 percent, poor.

Told that 11 percent of the federal budget is spent on health care, respondents were asked what percentage of the federal budget should be spent on health care. Thirty-three percent gave percentages in the 11 percent to 15 percent range, with the most of the rest giving percentages exceeding that range.

And told that the average American family now spends 6 percent of its budget on health care, respondents were asked what the budget should be. Fifty-one percent gave percentages in the 6 percent to 10 percent range, while 26 percent offered percentages in the 1 percent to 5 percent range.

And in a question that Ludwig admitted was ''loaded,'' 85 percent of the respondents said it would be a ''poor'' idea to cut Medicare spending if it might cause a local hospital to close.

The poll has a margin of error of plus or minus 3.1 percent.

#90190u2259 07/09/1990 ~United Press International
NEW YORK (JULY 9) UPI - Oakland outfielder Rickey Henderson was named American League Player of the Week Monday and Cincinnati's Hal Morris earned the National League honor for last week.

Henderson went 10 for 29 (.345) with four homers and seven RBI while scoring seven runs for the Athletics last week. Also nominated from the AL were Jack Daugherty of Texas, Bo Jackson of Kansas City and Johnny Ray of California.

Morris batted .625, going 10 for 16, with three homers, seven RBI and eight runs scored last week for the Reds.

#90190u2266 07/09/1990 ~United Press International
NEW YORK (JULY 9) UPI - Mobil Oil Corp. will mount a massive cleanup of 14.5 million gallons of petroleum products that have seeped from underground storage tanks in Brooklyn in one of the largest oil spills in the nation's history, officials said Monday.

Mobil signed a consent order late last week under which it agreed to recover the petroleum products, which are sitting in an underground pool beneath its oil terminals and residential houses in the Greenpoint neighborhood.

The order requires Mobil to speed up the efforts to cleanup the fuel oil, gasoline and naphtha - a distilled petroleum product - which it began in 1981. That operation, conducted with the Amoco Oil Co., the city and the Coast Guard, has recovered about 2.5 million gallons of petroleum products, said Benjamin Marvin, a spokesman for the state Department of Environmental Conservation.

The underground pool, known as a "plume," stems from petroleum leaks dating back to at least World War II. First discovered by accident in 1950 the pool was estimated in 1978 at 17 million gallons, making it one of the largest petroleum leaks in the nation's history, Marvin said.

"The citizens of Greenpoint are entitled to a removal of this underground pool, and have been for decades," DEC Commissioner Thomas Jorling said in a statement. "We are encouraged that Mobil has finally accepted its responsiblity to expedite the full cleanup."

For years, Greenpoint residents have complained to state officials about the pool of oil, which sits above an underground acquifer that is not used

for drinking water.

"So long as it's there, it presents a threat to the environment," Marvin said, adding that officials have received numerous letters from neighborhood residents worried about "sitting on top of a time bomb." Leakage from the pool has knocked out a nearby sewage treatment plant three times in the past few years.

Mark Cohen, a Mobil spokesman, said it was unclear how much the cleanup would cost or how long it would take. He said the company would undertake an extensive study, involving the installation of new monitoring wells, to determine the extent of the spill and the best way to recover the petroleum products.

"Mobil looks forward to working together with the DEC and the local communities to effectively implement the remediation plan which will result from this agreement," Cohen said.

"We recognize, and are sensitive to, the concerns of the area residents," he said. "We are hopeful that the steps we are taking under this agreement will have a significant impact on this situation."

Mobil will assume responsiblity over the cleanup operation, but may seek participation or contributions by Amoco or other potentially responsible parties, Marvin said.

In February, Mobil signed a consent order with the DEC and subsequently paid a $500,00 civil penalty for failing to report immediately a 50,000-gallon underground spill from a reconditioned kerosene tank in Greenpoint.

#90190u2268 07/09/1990 ~United Press International

SANTA BARBARA, CA (JULY 9) UPI - Howard Duff, whose acting career was ignited by his role as radio's original hard-boiled detective Sam Spade, died early Monday of a heart attack. He was 72.

Duff was pronounced dead at 1:13 a.m. in the emergency room at St. Francis Hospital of Santa Barbara. His wife, Judy, was at the hospital. Jean Mangus, a spokeswoman at St. Francis, said the actor was stricken at home and arrived by ambulance at the hospital about 1 a.m.

Born in Bremerton, Washington, on Nov. 24, 1917, Duff was first taken with acting while still in high school in Seattle and financed acting lessons by working at a local radio station.

After serving in World War II as a correspondent for Armed Forces Radio,

Duff landed the role in 1946 that launched his career - Dashiell Hammett's crusty detective Sam Spade.

During his three years on radio as Spade, he began his successful movie career. His first film role came in 1947 in the prison feature "Brute Force." In 1951 he married actress Ida Lupino.

His film career included many supporting roles in major features as well as leads in "B" movies. In the 1950s he began appearing on the small screen, most frequently on television drama anthologies, among them "Ford Theatre," "Rheingold Theatre" and "Science Fiction Theater."

In the 1960s and 1970s, Duff was seen frequently as the veteran cop on "Felony Squad" and in guest roles on many other series, particularly crime shows. One of his last feature films was "Kramer vs. Kramer" with Dustin Hoffman and Meryl Streep.

In recent years Duff worked in miniseries and television movies, as well as roles as ruthless wheeler-dealers on prime-time soap operas such as "Knots Landing" and "Flamingo Road." He also had a guest spot in the miniseries "War and Remembrance."

Duff's other movie credits included "Naked City," "All My Sons," "Calamity Jane and Sam Bass," "Sierra Stranger," "Panic in the City," "Oh God! Book II," and "No Way Out." No funeral service was planned and a memorial was pending.

#90190u2301 07/09/1990 ~United Press International

NEW YORK (JULY 9) UPI - The dollar, trading a tight range, closed mostly lower Monday after a government report on consumer credit boosted speculation the Federal Reserve is unlikely to ease short-term monetary policy.

In late New York trading, the dollar was quoted at 1.65275 against the West German mark, up from 1.6525. But the dollar eased against the Japanese yen, closing at 151.15 compared with 151.60.

The dollar ended New York trading at 1.3965 Swiss francs, off from 1.3990; 5.5455 French francs, off from 5.5475; and 1,211.25 Italian lire, off from 1,212. The British pound rose to $1.8080 from $1.7860.

The Federal Reserve Board reported consumer installment credit advanced $3.9 billion in May at an annual growth rate of 6.5 percent on an increase in revolving credit.

The additional $3.9 billion in credit was much higher than predicted by

private economists.

"That affirmed and confirmed that the Fed is not looking at a sinkhole in the economy," said Francoise Soares-Kemp, treasury vice president at Credit Suisse. "The Fed is going to keep the reins on, which is, manifestly, a supportive element for the dollar.

"Consumers out there are sizzling up their credit cards, and that gives the Fed some pause," she said. "If they have any inkling they want to ease that'll cure them."

The summit of seven western industrialized nations in Houston produced little news of any impact on the currency markets, analysts said.

In Europe, the dollar closed lower in sluggish trading against the major currencies Monday, depressed by rumors of lower interest rates and battered by a stronger pound sterling. Gold was also down.

Dealers said the dollar was weakened by market rumors circulating in London and Tokyo that U.S. interest rates would be lowered.

The pound rose to its highest point in 18 months against the dollar on continued hopes Britain would soon take the pound fully into the exchange rate mechanism of the European Monetary System, analysts said.

In London, the pound closed two cents higher against the dollar, at $1.8065 from $1.7865 Friday.

The pound was likely to stay high against most currencies until the Friday release of Britain's inflation figures.

The dollar inched lower against the deutsche mark in Frankfurt, closing at 1.6455 marks against Friday's close of 1.6535, and also was down in Zurich at 1.3930 Swiss francs against 1.3995.

The dollar also moved lower in Paris, Brussels and Milan, at, respectively 5.5275 French francs against 5.5475, 33.86 Belgian francs vs. 33.94 and 1,207.75 lire against 1,212.65.

Earlier, the dollar slipped against the Japanese yen in Tokyo in featureless trading ahead of the Houston summit, closing at 150.70 yen, down 0.25 yen from Friday's close of 150.95.

Dealers in Tokyo said there was speculation that the United States will eventually ease on its monetary stance and that lower interest rates could undermine the attractiveness of dollar-based investments and weaken the dollar.

Gold closed $2.50 lower in Zurich at $359 an ounce against $361.50 and also was down in London at $358.25 an ounce against $361.25.

Republic National Bank in New York closed cash gold at $357 an ounce, down from $360 Friday. The New York Commodity Exchange settled gold at $358.20 an ounce, down from $361.10.

Silver closed higher in Zurich at $4.90 an ounce from $4.85 Friday but was lower in London at $4.87 an ounce against $4.89.

Republic closed cash silver at $4.83 an ounce, off from $4.88 Friday. Comex silver settled at $4.80 an ounce, off from $4.866.

KUWAIT (JULY 9) UPI - Kuwait took a step toward democracy Monday when its emir opened a newly elected National Council that has been charged with studying the benefits and pitfalls of a parliamentary system.

The Arab country, considered one of the most progressive in the Gulf, agreed to the formation of the new council this spring when pro-democracy demonstrations became widespread and turned violent.

Members of Kuwait's opposition boycotted the council elections, saying the body was unconsitutional. But a strong turnout of voters in the oil-rich Gulf state elected 50 members to the transititonal legislature. The other 25 members were appointed by the emir, Sheikh Jaber Alahmad Al-Sabah.

Kuwait's old Parliament was disbanded in 1986 during the height of the Iran-Iraq war by Al-Sabah, who said it was too disruptive.

''The council has been a result of intensified dialogue with various factions of people and with it (the council) we open a new era of legislative and executive cooperation in the 1990s, paving the way for the desired parliamentary life,'' the emir said in opening the council's first session Monday.

Also Monday, Kuwait moved to strengthen its ties with Iran with the visit

to Kuwait by Iranian Foreign Minister Ali Akbar Velyati. It was the first time an Iranian minister has visited the Gulf state in 8 years.

Relations between Kuwait and Iran soured during the war because Kuwait backed Iraq. Kuwait had been a frequent target of Iranian missles and its oil tankers had been attacked in the Gulf, prompting Kuwait to re-flag its tankers under the Stars and Sripes in order to be protected by the U.S. Navy.

Since the cease-fire two years ago, Al Sabah has moved to restore relations with Iran.

BASKING RIDGE, N.J. (JULY 9) UPI - AT&T is offering low Bastille Day rates on calls to France from a dozen U.S. cities for the fourth year in a row, the company said Monday.

From July 13 to July 15, a 10-minute direct-dial call to France will cost $7, a savings of about 33 percent over standard rates. Area codes in the promotion are: New York (201, 212, 718, 914, and 516); Los Angeles (213, 818, 714); San Francisco (415, 408); Washington (202, 301, 703); Philadelphia (609, 215); Miami (305, 407); Boston (508, 617, 413); San Diego (619), Hartford (203), Atlanta (404), and Minneapolis (612).

Bastille Day commemorates the destruction of the Bastille, a prison in Paris, at the beginning of the French revolution on July 14, 1789. The holiday is similar to July 4 in the United States.

France is the sixth-most-frequently-called country from the United States, according to The World's Telephones, a statistical annual published by AT&T.

In the past year, AT&T has also offered similar discounts on calls to the United Kingdom on Remembrance Day, to Canada on Canada Day and Canadian Thanksgiving, to the Philippines on Philippines Independence Day, to Japan on Respect for Elders Day, to Australia on Australia Day, to Ireland on St. Patrick's Day and to all 167 direct-dial countries on Valentine's Day.

#90190u2319 07/09/1990 ~United Press International

BOSTON (JULY 9) UPI - Massachusetts' top bank regulator said Monday he has referred "at least a dozen" cases of high-level suspected bank fraud to state prosecutors over the past four years without seeing any results.

"I'm talking about alleged improprieties on the part of management," not

lower-level crimes such as embezzlement by a teller, Commissioner of Banks Andrew J. Calamare told United Press International.

Calamare, who has closed two insolvent state-chartered banks in the past two weeks, made the disclosure as pressure builds nationally for prosecution of those responsible for the enormous losses to taxpayers from the scandals in the nation's savings and loan industry.

"There have been referrals of criminal activity during my tenure but you'd have to talk to the criminal authorities about" the status of the cases, Calamare said.

"You need to talk to the Attorney General and the U.S. Attorney's office and the district attorneys. But I'd start with the Attorney General," Calamare said."

A spokesman for state Attorney General James G. Shannon declined comment on the banking commissioner's remarks. The spokesman, Thomas McNaught, said Shannon never confirms whether investigations of any kind are underway. U.S. Attorney Wayne Budd's office did not return telephone calls.

Calamare said he "couldn't give you a (precise) number," of how many referrals he has made. "But I'd say, ballpark, at least a dozen that I'm aware of. I have done it a number of times."

Calamare said the crimes he has seen in the Bay State are not as widespread or as flagrant as those elsewhere in the country. "They're not the kind of insider abuse that we've seen in the southwest ... We don't have that kind of abuse in Massachusetts." However, he said he cannot legally make public details of alleged violations.

The banking commissioner said he has not been kept abreast of any investigations that may have been started after he turned over information to the various county district attorneys and to Shannon. And he declined to disclose his discussions with Shannon.

Asked whether he is satisfied with the results of his criminal referrals, Calamare said: "I haven't seen any results." However, he added, "some people tell me it takes close to two years to put together an indictment" in complex financial cases.

Calamare said such referrals to authorities were "up dramatically" in the past two years from the first two years of his tenure as regulator of about 300 state-chartered banks in Massachusetts.

The commissioner declined to name the banks involved but said each of the complaints he has sent to law enforcement agencies involved different institutions.

The banking commissioner said he does not know how the complaints were investigated. Nor, he said, does he know whether any secret grand jury indictments have been handed up or whether indictments may be forthcoming. "I am not privy to whether there are grand juries," he said.

Norfolk County District Attorney William D. Delahunt said he was unaware of any referrals to his office of allegations of bank fraud that might have played a role in the failure of any bank in his area. Norfolk County includes much of the South Shore and western suburbs of Boston.

SAN BERNARDINO, CALIF (JULY 9) UPI - Lockheed Corp. said Monday it has agreed to sign a 10-year lease to begin an aircraft-modification operation at Norton Air Force Base, one of 86 bases nationwide scheduled to be closed by 1994.

Lockheed said Norton, about 50 miles east of Los Angeles, is the first base scheduled for closure that has started the process of converting to a commercial-industrial facility.

Lockheed officials will sign the lease, which has extension options, in a ceremony Tuesday at the base with the Inland Valley Development Agency, which has been exploring ways to use Norton since last year's announcement of the planned closure.

The price of the lease was not disclosed.

Lockheed plans to use a hangar complex at the base to perform maintenance and modification of aircraft, mostly Boeing 747s. Spokesman Al Dubiel said the company plans to upgrade the facilities and start work there by the end of the year.

''We think that the increasing age of the commercial aircraft fleet will create a lot of business for us,'' Dubiel said.

Lockheed already operates a military aircraft service subsidiary, Lockheed Aeromod Center Inc., at a former Air Force base in Greenville, S.C. ''Because of our experience with Lockheed Aeromod, we know the basic business,'' Dubiel said.

Lockheed plans to employ about 600 workers at the facility by the end of 1991 and will add another 400 employees by the end of 1992. The operation will be operted as a new Lockheed subsidiary, Dubiel said.

Analyst Lawrence Harris of Bateman Eichler, Hill Richards said Lockheed's move to Norton makes sense because of the growing numbers of aging commercial aircraft. He noted that Rockwell International has announced plans to set up a similar aircraft modication operation at its facility in Palmdale, Calif.

''I would not expect a significant new revenue contribution overnight to to Lockheed to offset the declines in defense spending,'' Harris said. Currently, the company's aircraft modification operations produce about $100 million a year, and those revenues could triple by the middle 1990s, Harris said.

Lockheed has projected 1990 total revenues of about $10 billion.

#90190u2348 07/09/1990 ~United Press International

(JULY 9) UPI - Oil prices rebounded on world markets Monday in a late buying spree amid signs OPEC is trying to forge a compromise on oil production and pricing levels prior to the cartel's July 25 ministerial meeting.

Analysts said early selling dominated the international market following the end of the Norwegian oil workers' strike over the weekend. Statoil, the Norwegian state oil company, was forced to shut down production on four of its seven platforms in the North Sea Friday because of the weeklong wildcat strikes.

But prices were buoyed later in the day by a Middle East Economic Survey report that OPEC's powerful Arab Gulf members were working on a trade-off to restrain production and bolster sagging prices in preparation for the

ministerial summit that opens July 25 in Geneva. The authoritative oil journal, published in Nicosia, Cyprus, has close ties to Saudi Arabia, the Organization of Petroleum Exporting Countries' most influential member.

''Traders started buying on the feeling OPEC might do something at the July 25 meeting,'' said Peter Beutel, financial consultant at Merrill Lynch Futures.

On the New York Mercantile Exchange, West Texas Intermediate - the key U.S. crude for immediate delivery - rose 11 cents to $16.58 a barrel after trading as low as $16.06 during the session.

On the U.S. Gulf Coast spot market, where oil is sold to the highest bidder, West Texas Intermediate added 15 cents to $16.60 a barrel.

Unleaded gasoline for August delivery jumped 1.44 cents to 56.85 cents a gallon on the Merc and home-heating oil gained 0.60 cent to 48.90 a gallon.

Beutel pointed out that prices came under early pressure on the Merc because MEES estimated current OPEC production at 23.24 million barrels a day - well above the cartel's official 22 million barrel-a-day ceiling.

''People were looking for something closer to 23 million or 22.9 million barrels a day,'' Beutel said. ''The MEES report indicated OPEC is producing 1.24 million barrels a day more than it had agreed to.''

In early May OPEC reached an accord to reduce production by 1.5 million barrels a day to 22 million barrels, but the 13-nation cartel has failed to enforce the pact.

Nevertheless, prices rallied on reports in MEES and the leading Saudi newspaper Asharq al-Awasat that Kuwait and other Gulf producers may be prepared to stick to new output quotas and stabilize prices if they are given higher output limits.

Asharq al-Awsat quoted a ''highly placed OPEC official'' as saying Saudi Arabia has invited the oil ministers of the Arab states in the Gulf to a meeting this week in the Saudi city of Jeddah. The newspaper said the ministers would ''discuss a strategy to salvage prices of crude oil in the market'' in preparation for the July 25 OPEC meeting.

On the European spot market, the United Arab Emirates' Dubai light - the principal OPEC crude from the Middle East - climbed 25 cents to $13.55 a barrel. Britain's North Sea Brent crude rose 20 cents to $15.83 a barrel.

Oil prices have dropped about 20 percent on the international market since early April.

Despite Monday's rally, a number of oil companies cut the price they are willing to pay for West Texas Intermediate by between 75 cents and $1 to $15.25 a barrel. Official U.S. oil prices are determined by how much the buyer will pay as the oil comes out of the ground.

Among the companies lowering their so-called posted price for WTI to the $15.25-a-barrel mark were Unocal, Chevron Corp., Diamond Shamrock, Phillips Petroleum and British Petroleum Oil Supply.

#90190u2365 07/09/1990 ~United Press International

NEW YORK (JULY 9) UPI - A Japanese railway and real estate developer has earned the ranking of the world's richest businessman for the fourth straight year, according to Forbes' annual list of the world's billionaires released Monday.

With an estimated net worth of $16 billion, Yoshiaki Tsutsumi ranked first among 271 individuals and families worldwide whose personal net assets are worth more than $1 billion, Forbes said in its July 23 issue.

The United States led the list with 62 individual billionaires and 37 billionaire families, for a total of 99, the magazine said. Japan followed with 40 billionaire fortunes, and West Germany ranked a close third with 38, Forbes said.

Ranking second after Tsutsumi was another Japanese businessman, Taikichiro Mori, a former economics professor turned real estate developer, the magazine reported.

The highest-ranking American on the list was Wal-Mart Stores founder Sam Moore Walton and his family who, with a combined net worth of $13.3 billion, placed third. Coming in fourth was the du Pont family, with a combined net worth of $10 billion.

Ranking fifth were two Swedish brothers, Hans and Gad Rausing, who control a packaging empire worth $9.6 billion, the magazine said.

John Werner Kluge, founder of Metromedia, continues to be the richest individual American billionaire, with an estimated net worth of $5.2 billion, Forbes said.

Other Americans earning a spot on the list were financier Warren Edward Buffett, publishers S.I. and Donald Newhouse and H. Ross Perot, founder of Electronic Data Systems. Other Americans on the list included real estate mogul Harry Helmsley, cable television maverick Ted Turner, Laurence and Preston Tisch of Loews Corp., takeover artist and head of Trans World Airlines Carl Icahn, publisher Rupert Murdoch and David Rockefeller.

Also earning positions on the list were Pablo Escobar Gaviria, head of Colombia's Medellin drug cartel with an estimated $3 billion net worth, and Jorge, Juan and Fabio Ochoa, also involved with the Colombian drug trade and with an estimated net worth of some $2 billion.

Conspicuously absent from the list was real estate developer Donald Trump, who held a spot last year but lost it thanks to the shakiness of his financial empire.

#90190u2405 07/09/1990 ~United Press International

(JULY 9) UPI - President Bush and other heads of governments from the world's seven most powerful industrialized nations are taking the bull by the horns at the start of their 16th annual summit. The talks got under way at Rice University in Houston after elaborate opening ceremonies. The first subject discussed was the contentious trade issue... in which Bush is pushing to open barriers to European and Japanese markets.

NASA has grounded two veteran shuttle commanders for violating air flight safety rules. The unprecedented disciplinary action comes after skipper Robert ''Hoot'' Gibson was involved in a collision during a weekend air race in Texas that left a second pilot dead. It is NOT clear why officials grounded the other astronaut, David Walker.

NASA may be up against a new wall. A study conducted for the agency says the crew of the proposed space station Freedom would be required to take six spacewalks each week for routine repairs. A published report says that many walks pose too high of a risk and raise questions about the practicality of the proposed 30-BILLION-dollar station.

Yet another person has stepped forward to testify they saw Washington, D-C Mayor Marion Barry use cocaine. Washington restauranteur Hassan Mohammadi told the court today that he saw Barry snort cocaine as early as February 1985 at his restaurant. Mohammadi is the fourth person to link the mayor with cocaine use and the first to say Barry used the drug before 1986.

East Germans followed up a run on banks today with a shopping spree. An East German economics ministry spokesman largely blamed the panic buying on a sluggish response by retail stores to lower prices to market level. Shopkeepers reported a steady flow of purchases of cars, refrigerators and washing machines.

#90190u2440 07/09/1990 ~United Press International

WASHINGTON (JULY 9) UPI - Investor Robert Rossi has agreed to surrender

$1.4 million allegedly obtained through insider trading of securities issued by Rorer Group Inc., a pharmaceutical maker in Fort Washington, Pa. the Securities and Exchange Commission announced Monday.

A final judgement entered in the U.S. District Court for the Southern District of New York also enjoined Rossi from committing further violations of federal securities laws.

The SEC charged that Rossi and others purchased Rorer stock and options based on insider information they had gained on Rorer's negotiations with Rhone-Poulenc, S.A., a French company that was preparing to buy about 70 percent of Rorer's outstanding common stock.

Although Rossi did not admit or deny the charges in settling with the SEC, he did confirm that he had purchased Rorer securities through two Swiss financial institutions - Discount Bank Ltd. and Cambio Valorenbank A.G. - as well as under his own name.

The SEC had also alleged that other foreign investors, whose identities were not known, had also used the confidential information to buy Rorer stock through overseas financial institutions.

The SEC declined to comment on Rossi's background, other than to say that he had an address in Switzerland.

The funds disgorged by Rossi - his profits on Rorer stock and accumulated interest - will be placed under the control of the New York district court until the SEC draws up a distribution plan, which SEC officials said would likely return money to investors who sold Rorer stock.

#90190u2495 07/09/1990 ~United Press International

VIENNA (JULY 9) UPI - A Czechoslovak plane left the Albanian capital for Prague late Monday carrying the first of about 6,000 Albanian refugees seeking to escape the last stronghold of orthodox communism in Europe.

The special TU-154 plane with 51 refugees on board left Tirana's international airport at 11:26 p.m. after a delay of more than five hours, air traffic controllers at Prague's Ryzyne Airport said. It was due to land around 1:15 a.m. Tuesday.

There was no immediate explanation for the delay.

All 51 passengers were Albanians who applied for asylum last week at the Czechoslovak Embassy in Tirana, one of more than a dozen foreign embassies to be inundated by refugees in the past eight days.

There were indications Monday that refugees at the French and Hungarian missions would also soon be allowed to leave the country.

The apparent break in the weeklong impasse over the fate of about 6,000 refugees holed up in foreign embassies in Tirana came amid reports of further reshuffling in the communist government, believed divided over how to handle the crisis.

In Paris, Foreign Ministry spokesman Daniel Bernard said 550 refugees in the French Embassy were filling in applications for exit visas amid hopes that the formalities would be completed by Monday evening.

France was setting up special welcoming centers to receive the refugees, most of whom are young, poor and unemployed, Bernard said.

There was no immediate comment from the Albanian government, which on Saturday promised amnesty and exit visas for the refugees, some of whom have been holed up in foreign embassies in Tirana for more than a week.

About 3,000 refugees in the West German Embassy also were completing forms for passports, but a Foreign Ministry spokesman in Bonn said it was a ''slow process'' because many are unable to read or write.

Physical conditions in the embassy were ''catastrophic,'' said spokesman Hans Schumacher.

In another indication of the effect of the crisis on the government, the official Albanian Telegraphic Agency announced a further reshuffle in communist-controlled Council of Ministers.

The presidium of the People's Assembly named new ministers to head the departments of Light Industry, Food-stuff Industry, Public Services and Home Trade, ATA said, in a move observers said signaled a shift in the government's economic policies.

The changes came two days after the government announced the retirement of Defense Minister Prokop Murra and demoted Interior Simon Stefani to a relatively minor cabinet post. The reshuffle was believed to have strengthened the hand of moderates in communist leader Ramiz Alia's government.

ATA also confirmed that a special U.N. envoy, Swedish diplomat Steffan de Mistura, was meeting with Albanian authorities in hopes of ending the weeklong impasse over the fate of the refugees.

De Mistura, who flew to Tirana as U.N. Secretary-General Javier Perez de Cuellar's personal representative, was expected to voice concerns over worsening physical conditions in the embassies, where food, water,

medicine and sanitary facilities were in short supply.

''There is progress, and the secretary-general is optimistic that the situation will be resolved,'' said U.N. spokesman Nadia Yones, who said Perez de Cuellar spoke with De Mistura by telephone Monday.

With the hard-line government still refusing to allow foreign aircraft with emergency aid into the country, embassy officials said the best solution was to evacuate the refugees and find new homes for them outside Albania as quickly as possible.

''I hope all the countries in which these people want to find new homes and take refuge will be prepared to accept them,'' West German Foreign Minister Hans-Dietrich Genscher said in a television interview.

#90190u2498 07/09/1990 ~United Press International

WASHINGTON (JULY 9) UPI - The Federal Reserve Board said Monday it approved the application of Capital InterAmerica Bancorp to become a bank holding company by acquiring 100 percent of the voting shares in New York Capital Bank.

The Fed said that New York Capital Bank was formed to purchase certain assets and assume deposits of the failed Capital National Bank, which has been declared insolvent by the Office of the Comproller of the Currency.

Although the institution is one of the smallest commercial banks in New York, with deposits of $145.8 million, the Fed said it saw the ''need for immediate action to prevent the disruption of service to CNB's depositors.''

#90190u2502 07/09/1990 ~United Press International

NEW YORK (JULY 9) UPI - A detective testified Monday that one of the teenagers on trial in the rape and beating of a woman jogger in Central Park wept on his mother's shoulder as he was brought in for police questioning.

Testifying as the trial entered its third week in state Supreme Court in Manhattan, detective Jose Rosario was questioned by the defense and the prosecution on the behavior of Antron McCray, 16, the day after the attack.

The 29-year-old Wall Street investment banker, whose name has not been revealed because of the nature of the crime, was found lying in a mud puddle, bound, gagged, and naked following the ''wilding'' rampage by a gang of about 30 youths in the park April 19, 1989.

McCray and two other youths are being tried in the vicious attack.

The victim had been gang-raped and was so severely beaten that doctors did not give her much chance to survive.

Rosario, a prosecution witness, said he went to McCray's home and asked that the youth come to the station house and answer questions.

Cross-examined by defense lawyer Michael Joseph, Rosario was asked if McCray was ''laughing and joking'' on his way to the station house.

''No,'' he replied.

Under questioning by prosecutor attorney Elizabeth Lederer, Rosario said that as he drove them to the Central Park Precinct, he told McCray's parents ''to tell Antron to tell the truth no matter how bad it was ... to tell them how much he loved them, and that they will still love him no matter how bad the truth is.''

''I observed tears in his eyes,'' Rosario said. ''He put his head on his mother's shoulder and was crying.''

Rosario testified Friday that after McCray was questioned and released, he returned to the youth's home and asked him to put on the clothes he had been wearing the night before. He said the clothes were caked with mud.

On trial with McCray is Yusef Salaam, 16, and Raymond Santana, 15. All three are charged with 13 criminal counts, including attempted murder, rape and sodomy, and have claimed their confessions to police were coerced.

If convicted, each faces a maximum sentence of five to 10 years imprisonment. All three were juveniles at the time of the attack. Other youths face similar charges and are awaiting trial.

In other testimony Monday, detective Robert Honeyman identified the woman's bloody shirt and discussed two-dozen colored photographs he took of the crime scene.

The photographs depicted bloodstains on the 102nd Street Transverse and a 15-inch-by-18-inch-wide mark apparently left after the jogger was dragged for about 40 feet over the grass.

#90190u2548 07/09/1990 ~United Press International

ST. LOUIS (JULY 9) UPI - The Beer Institute, following closely on the heels of Anheuser-Busch Inc., introduced Monday a campaign to fight the

prospect of a tax increase on the sale of beer.

The institute ran advertisements, in 65 newspapers in nine states, aimed America's 80 million beer drinkers.

Anheuser-Busch Inc. also launched radio and television advertisements last weekend, urging Congressional participants in budget summit negotiations to avoid raising federal beer taxes. The Anheuser-Busch advertisement campaign, called ''Can the Beer Tax,'' started last weekend.

The institute's newspaper advertisements appeared in California, Georgia, Illinois, Massachusetts, New Mexico, Oregon, Tennessee, Texas, and Washington.

''It's ironic that Congress long ago did away with the excise tax on country club dues, but we continue to stick it to the guy in the corner tavern every time he orders a beer,'' said Stephen Lambright, vice president and group executive of Anheuser-Busch Cos. Inc.

''As our commercials point out, beer drinkers have billions in special taxes built into the price of their beer already,'' he said. ''What's more like almost any excise tax, the beer tax is highly regressive, taking a lot more income from the lower- and middle-income taxpayer than from wealthier individuals.''

Lambright said the breweries became alarmed when President Bush relinquished his ''No New Taxes'' pledge. Lawmakers might consider raising the beer tax in order to reduce the federal budget deficit, he said.

Congress might not move to raise the tax until next year, if they do at all, but Lambright said, ''The bottom line is that we have to operate on the premise that it will happen quick, that we will be considered as a revenue source.''

The radio and television ads started showing last weekend in the home states of several of the congressional participants in the budget summit negotiations, brewery spokesmen said.

The ads will be broadcast in Washington in the next 10 days. They also will appear on ESPN, CNN and several radio stations across the country.

The television ads, which were put together in the last few weeks, are called ''Americana'' and ''Ingredients.'' They point out that beer drinkers already pay more than $3 billion in beer taxes. Both the radio and television spots urge the public to call a toll-free number to send a message to lawmakers.

Anheuser-Busch also urged its wholesalers, suppliers and employees to make

their opinions known, Lambright said.

-30- 2739
#90190u2595 07/09/1990 ~United Press International
(JULY 9) UPI - The contentious issue of trade was the first to be laid on the table at today's opening of the 16th annual summit of industrialized nations in Houston. Trade is expected to be a major point of conflict as President Bush aims to pry open markets in Europe and Japan for American farmers. European and Japanese leaders contend that what Bush sees as barriers are actually essential protections for their farmers.

NASA suffered another setback today as officials grounded two veteran shuttle commanders, in training for 1991 flights, for violating flight safety rules. Robert ''Hoot'' Gibson and David Walker were barred from taking part in T-38 jet trainer flights. Gibson was suspended for one year after being involved in a collision during a weekend airplane race in Texas. There was NO word on why Walker received his 60-day suspension.

NASA held a news conference in Washington, D-C, today to announce that workers are focusing on a Teflon seal as the cause of an elusive hydrogen leak that has grounded the shuttle Columbia. There's a possiblity the seal is crimped. But one official points out that weekend tests in California failed to pinpoint the exact location of the leak and says nothing has been ruled out.

A standoff at a North Miami bank is over. Authorities say they distracted a woman holding seven hostages long enough to rush in and subdue her. Earlier, the woman entered a bank and declared she was ''ready to die.'' She used the threat of an UNseen gun and hand grenades to take nine people hostage... later freeing two of them. Metro-Dade County Police Department Detective William Kinnebrew says NO weapons or explosives were found when the UNidentified woman was arrested. NO injuries are reported.

CHICAGO (JULY 9) UPI - A federal jury Monday, after 11 days of deliberations, found two Chicago Mercantile Exchange Swiss franc traders guilty of defrauding customers, but found a third defendant innocent on two of 14 counts against him.

The jury was unable to reach verdicts on 87 of the 116 counts in the indictment. U.S. District Judge Ann Williams declared a mistrial on those 87 counts.

Prosecutors said they would consult with their superiors before deciding whether to retry the defendants on the undecided counts, but that the preliminary decision was that a retrial would be sought.

The jury of nine women and three men found broker Robert D. Mosky, 34, of Chicago, guilty of seven counts of commodities trading fraud and violating commodities laws, but found him innocent on 19 other counts. The conviction could bring a maximum sentence of 35 years in jail - five years on each count. Mosky could be retried on the 56 undecided counts, including racketeering conspiracy, fraud and violating commodities laws.

Trader Danny Scheck, 28, of Skokie, was found guilty of a single count of commodities trading fraud, which could bring a maximum sentence of five

years. He could face a retrial on 19 undecided counts of fraud and violating commodities trading laws.

Trader David Zatz, 43, also of Chicago, was found innocent of two fraud counts and could be retried on the remaining 12.

''I just feel so sorry for the others,'' Zatz said, sobbing, before phoning his terminally ill father to advise him of the verdict.

Attorneys for Mosky and Scheck said they would appeal the convictions.

The two defendants remained free on their own recognizance pending appeal. No sentencing date was set.

Jurors spent nearly seven weeks hearing evidence in the case, which included some 130 audio tapes secretly recorded by an FBI undercover agent.

Mosky, Scheck and Zatz were the first defendants to face trial on charges resulting from a two-year FBI undercover fraud investigation at the CME and the Chicago Board of Trade.

Forty-eight people were indicted as a result of the probes. Sixteen have pleaded guilty. The trials of the remaining 29 - 16 traders from the CME Japanese yen pit and 13 from the CBOT soybean pit - are scheduled to begin in September.

Lawyers for the three Swiss franc traders surprised the court by calling just one witness at the trial - solely to lay the foundation for the introduction of a 20-minute videotape on trading in the CME's Swiss franc pit.

The tape showed chaotic activity in the pits, with traders screaming and gesturing in frantic efforts to buy and sell contracts. Defense lawyers Elliot Samuels, Harvey Silets and Alan Blumenthal said the tape proved it was impossible for any organized fraud scheme to operate in the pit.

The three defense lawyers said they had planned to call more witnesses but decided their blistering cross-examinations of the government's three key witnesses - FBI agent Randall Jannett and traders Mark Fuhrman and William Walsh - provided a more than adequate defense.

Fuhrman, 40, of Wheeling, and Walsh, 24, of Monee, pleaded guilty in the case and agreed to cooperate with prosecutors. They will be sentenced by Williams.

The government said Mosky and Walsh were members of a broker group that pressured local traders - those like Fuhrman, Scheck and Zatz who trade mostly for their own accounts - to absorb losses resulting from mistakes

the brokers made trading on behalf of customers. Brokers must compensate customers for such losses.

Prosecutors said brokers repaid the locals by giving them profitable prearranged trades at off-market prices, at the expense of clients.

(JULY 10) UPI - SPORTS DIGEST

AUTO RACING

Al Unser Jr. and four of his crewmen, who were burned in a pit fire during the Cleveland Grand Prix, are expected to compete in Sunday's Meadowlands Grand Prix, a team spokesman said. Unser suffered superficial burns to his face when the fire broke out on a pit stop at the end of lap 62 of the 85-lap race, which Unser dominated until the fire ended his day.

BASKETBALL

Chicago Bulls guard Craig Hodges underwent minor ankle surgery but the team said Michael Jordan's partner in the starting backcourt will not miss any time next season. ... Brigham Young, Maryland, Rutgers and South Carolina will comprise the field at the 39th Eastern Collegiate Athletic Conference Holiday Festival tournament, Dec. 27 and 29 at Madison Square Garden.

BOXING

Mark Breland, who lost his WBA welterweight title on a ninth-round knockout by Aaron ''Superman'' Davis Sunday in Reno, Nev., says he will continue fighting and would like to meet Davis again. Davis, however, said he wants to fight World Boxing Council champion Marlon Starling next. ... Former junior welterweight champion and current leading welterweight contender Buddy McGirt will fight Jose Bermudez July 22 at Atlantic City, N.J. ... Former heavyweight chapions Trevor Berbick and Mike Weaver headline a double-header July 18 in Toronto. Berbick takes on Jeff Sims, and Weaver battles Jack Johnson in 10-round bouts.

FOOTBALL

Syracuse's Rob Moore, who would have been the highest rated wide reciever in the April draft, will be available in Tuesday's supplemental draft and is expected to be selected in the first round. The supplemental draft is weighted to give teams with the poorest records the first pick. Either Dallas, Atlanta, New England, Tampa Bay, Phoenix, San Diego, Chicago, or the New York Jets will have the first pick. Any team that selects a player

in Tuesday's draft forfeits their pick in that round of the 1991 regular draft. Moore has another year of college eligibility remaining but graduated early and applied for the supplemental draft. ... Tennessee tailback Chuck Webb, a Heisman Trophy hopeful who was kicked out of school for cheating on an exam, was cleared Monday by the university to play this season. The 5-10, 197-pound Webb rushed for 1,236 yards and 12 touchdowns last season in leading Tennessee to an 11-1 record, including a Cotton Bowl victory over Arkansas in which he was the MVP. ... Army and Navy have signed an agreement to play out their annual football rivalry in Philadelphia into the next century. The agreement, signed by Mayor Wilson Goode and the atheletic directors of the U.S. Naval Academy and the U.S. Military Academy, brings the Army-Navy game to the city's Veterans Stadium every year through 2002.

GOLF

The policy board of the PGA and PGA Senior Tours has given approval for each circuit to award a Player of the Year and a Rookie of the Year. The winners will be announced Jan. 1, 1991 at the Tour's annual awards dinner, prior to the Tournament of Champions. Only players who have competed in at least 15 events will be eligible.

HOCKEY

Pittsburgh Penguins center Mario Lemieux, two-time NHL scoring champion, will undergo back surgery Wednesday but team officials said he is expected to be healthy for the season opener Oct. 5. Lemieux, 6-foot-5, is to undergo a 90-minute procedure called a micro lumbar discectomy designed to alleviate chronic pain caused by a herniated disc. ... The New York Rangers, bulking up at right wing, traded center Carey Wilson back to the Hartford Whalers for former first-round draft pick Jody Hull and purchased Ray Sheppard from the Buffalo Sabres. ...

The Albany Choppers of the International Hockey League Monday named former New York Islanders defenseman Ken Morrow general manager and former minor leaguer Dave Allison head coach. The franchise, transferred from Indianapolis, enters its first season at the city's new Knickerbocker Arena. ... The Washington Capitals named Ferris State head coach John Perpich an assistant. Perpich, 38, a cousin of Minnesota governor Rudy Perpich, also previously was head coach at St. Cloud State in Minnesota after serving as an assistant to Herb Brooks at University of Minnesota.

RUNNING

Energetic Poles set a Guinness world record Sunday by clocking a best time of 60 hours 7 minutes 27 seconds in a 10 x 100 kilometers relay around the Polish capital of Warsaw. The former record of 62 hours 31 minutes 50 seconds was set by the Soviet Union Ruraz club June 26, 1988.

TENNIS

Six of the world's top 10 players, including top-ranked Ivan Lendl of Czecholovakia, and Sweden's newly crowned Wimbledon champion Stefan Edberg will play in the $1 million men's Seiko Super Tennis Tournament in Tokyo Oct. 8-14. Organizers Monday said the field also includes Boris Becker of West Germany and Americans Andre Agassi, defending champion Aaron Krickstein and John McEnroe. ... The 20th Austrian Tennis Open beginning July 30 will include famous names of the past in a special doubles series, including past greats Ilie Nastase and Ion Tiriac.

#90190u2696 07/09/1990 ~United Press International

HOUSTON (JULY 9) UPI - President Bush convened the first post-Cold War summit of America's closest economic allies Monday, seeking to tackle trade disputes and forge closer ties with the Soviet Union to move the world toward ''a new stability and prosperity.''

To pomp and ceremony, leaders of the seven most powerful democracies came together on the grounds of Rice University for three days of talks dominated by the challenges and opportunities of a new political and economic order.

''A new world of freedom lays before us, hopeful, confident - a world where peace endures, where commerce has conscience, and where all that seems possible is possible,'' Bush declared. ''So let us begin in good faith to set the stage for the new millenium.''

The 16th annual Economic Summit of Industrialized Nations opened with the seven summit partners confronting perhaps the most fractious political issue before them: the U.S. call for a global trade system free of the interference of government farm subsidies.

Posing afterward for a group picture, Bush told reporters the first formal summit session had yielded ''very good discussion'' on the trade issue, despite traditional European resistance to the elimination of agricultural subsidies.

White House chief of staff John Sununu said Bush hoped to secure a commitment that the U.S. course ''is the right direction to go.'' Given European sensitivities, however, he said Bush might have to settle for ''sufficient give and take.''

The focus shifted from economic to political issues at a working dinner at the Bayou Bend Collection of American Art, where over tortilla soup and grilled red snapper Bush sought a unified position on aid to the Soviet

Union.

U.S. officials laid out a proposed three-point statement for the joint communique that will conclude the summit Wednesday, which in essence would paper over clear differences between the United States and European allies.

The U.S. language would offer a vote of confidence for Mikhail Gorbachev's economic reforms, recommend guidelines for future Western aid, and propose sending economic experts, under the auspices of the seven summit nations or even the World Bank, on a fact-finding mission to the Soviet Union to aid its transition to a market economy.

That formulation, offered as a compromise, would brush over differences with European allies who see Western assistance as essential to Gorbachev's success and survival and leave each country free to pursue its own lending and aid policies.

For his part, Bush was prepared to announce certain steps the United States would consider, including loan guarantees, in the event the Soviets met certain conditions, including resolution of its default on $1 billion in loans dating back to the Russian Revolution.

''I would think the Europeans would be happy with this, because it provides an umbrella under which everyone would be free to do what they want to,'' one U.S. official said. ''No one's fooling anyone.''

West Germany, France and, to a lesser degree, Italy have led the charge to help Gorbachev with food aid, credits, loans and other assistance he needs to stock store shelves with consumer goods and cope with a painful transition away from a state-controlled economy.

Among the Europeans, Britain has been less enthusiastic about a concerted program of Western aid. Canada and Japan have generally supported the U.S. position that Western aid could be wasted without fundamental reforms in place, including a redirection of funds the Soviets now on spent on its military forces and aid to totalitarian regimes.

With those positions staked out, a senior British official said aid to Moscow, which loomed as a key source of contention before the summit, would not be ''a great issue of this conference.''

#90190u2723 07/09/1990 ~United Press International

WASHINGTON (JULY 9) UPI - Gen. Maxwell Thurman, the officer who commanded United States troops during the invasion of Panama last December, was hospitalized Monday to confirm a diagnosis of leukemia, the Pentagon said.

Thurman, 59, commander-in-chief of the United States Southern Command, underwent tests Friday and Monday before being admitted to Walter Reed Army Medical Center to confirm an ''initial diagnosis of leukemia,'' according to a Defense Department statement.

''Additional tests and consultation will be conducted during his stay to determine what treatment may be appropriate,'' the statement said. Pentagon officials did not say how long Thurman would be hospitalized.

Thurman, a four-star general and North Carolina native, was on the verge of retirment when President Bush sent him to direct the southern command last October.

The Dec. 20 invasion ousted Panamanian strongman Gen. Manuel Noriega, who is in U.S. custody facing drug charges.

#90190u2805 07/09/1990 ~United Press International

(JULY 9) UPI - President Bush opened the industrialized nations summit in Houston today with a renewed push for the elimination of farm subsidies. White House chief of staff John Sununu says although Bush made trade the opening issue, there still may be NO major movement toward resolving the dispute. The current round of world trade talks is snagged on the issue of European and Japanese subsidies for their agricultural products.

Mobil Oil has agreed to move faster in cleaning up what has been called one of the worst cases of oil pollution in U-S history. A spokesman for the Department of Environmental Conservation says the company signed a consent order late last week, pledging to recover an estimated 14-point-five Million gallons of oil that has accumulated in a vast pool beneath its oil terminals in Greenpoint, New York. Oil seepage dating as far back as World War Two created the reservoir.

A spokesman for the Alaskan Land Management department says there's NO controlling a 200-thousand-acre fire that has eaten its way through the Yukon Flats National Wildlife Refuge. Pete Buist says firefighters have been UNable to contain the blaze, which is- quote- ''going where it wants.'' The fire has tripled in size since Saturday, but has stayed clear of the Indian village of Beaver.

Soviet President Gorbachev won significant changes today at the 28th Communist Party Congress in Moscow. Delegates voted to radically change the party's ruling Politburo... shifting power from officials of the central government to communist leaders from each of the 15 republics. Delegates also voted to elect their general secretary directly... instead of leaving the decision to the Central Committee.

#90190u2822 07/09/1990 ~United Press International
(JULY 9) UPI - A poll says most Americans would rather pay higher taxes than have their Medicare benefits slashed. The poll of about one-thousand randomly selected Americans over the age of 18 finds 88 percent of them would NOT support cutbacks in health care to reduce the escalating national deficit. A Gallup spokesman says the study shows health care ranks as a high priority among Americans.

The prosecution continues to build its case against Washington, D-C, Mayor Marion Barry. A restaurant owner testified today that he supplied Barry with cocaine about 30 times since 1985 and once even delivered it to Barry at his city hall office. The man said he first saw Barry use cocaine five years ago, immediately before the mayor gave a ten-minute speech.

The Arab country of Kuwait is experimenting with democracy. Kuwait's emir today opened a newly elected National Council that will take on the task of studying the pros and cons of a parliamentary system. The nation agreed to form the council this spring as the result of widespread violent pro-democracy demonstrations. The emir disbanded Kuwait's old Parliament in 1986 saying it was too disruptive.

A Japanese railway and real estate developer once again went to the top of the list as the world's richest BILLIONAIRE. Yoshiaki Tsutsumi won the distinction by having an estimated net worth of 16-BILLION dollars. His fortune places him ahead of 271 individuals and families in Forbe's annual list of the world's BILLIONAIRES. The highest ranking American is Wal-Mart Stores founder Sam Walton. He and his family are third with 13-point-three-BILLION dollars.

#90190u2851 07/09/1990 ~United Press International
RIO DE JANEIRO, BRAZIL (JULY 9) UPI - The government is considering imposing emergency measures on Rio de Janeiro to deal with the kidnappings of 39 businessmen in recent months, Justice Minister Bernardo Cabral said Monday.

Cabral said the government was considering imposing a state of defense, a constitutional measure which would suspend some civilian rights, including the right to assemble, and allow police to detain suspects without charges for up to 10 days.

The Constitution states that a state of emergency can be declared when a ''serious threat to stability'' exists in a given region.

In the past six months, 29 businessmen have been kidnapped in Rio de

Janeiro and later paid large ransoms for their release.

Cabral said there ''are some difficulties'' in adopting the measure, principally the opposition of Rio de Janeiro Governor Wellington Moreira Franco, who he said ''regards the measure as a possible federal intervention.

''It is a very strong measure,'' Cabral said.

''The president will not adopt the state of defense without the agreement of the governor,'' Cabral said, but he added ''the government will do more than just contemplating (the measure) if the action of criminal groups continue.''

Police and press attribute the wave of kidnappings to the reportedly well-organized criminal group ''Red Command,'' which police say is made up of drug traffickers and bank robbers better armed than official security forces.

Rio de Janeiro Police Chief Elson Campelo said the drug traffickers had run out of cash following President Fernando Collor de Mello's decision to limit withdrawals from bank accounts to the equivalent of $700.

Campelo said that without money to pay cocaine suppliers, the traffickers turned to kidnapping businessmen, a surer way of making money than assaulting banks.

#90190u3006 07/09/1990 ~United Press International

(JULY 9) UPI - The first formal session of the 16th annual Economic Summit of Industrialized Nations has ended. The leaders of the seven most powerful democracies have now ajourned to a working dinner at a Houston museum.

Earlier... in a ceremony at Rice University marked by pomp and circumstance... President Bush welcomed the leaders of America's closest economic allies to the first economic summit of the post-Cold War era. The president said the summit would be dominated by the challenges and opportunities of a new political and economic order.

The three days of talks opened later with the seven summit partners confronting perhaps the most fractious political issue before them- the U-S call for a global trade system free of the interference of government farm subsidies.

Posing afterward for a group picture, Bush told reporters the session had yielded- quote- ''very good discussion'' on the trade issue, despite

traditional European resistance to the elimination of agricultural subsidies.

The focus shifted from economic to political issues at a dinner discussion where over tortilla soup and grilled red snapper Bush sought a unified position on aid to the Soviet Union.

U-S officials say there are plans to unveil a three-point plan to help the stumbling Soviet giant. They say the plan includes issuing a joint communique on Wednesday that offers a strong vote of confidence for Soviet President Gorbachev's reforms and recommending guidelines for future Western aid.

#90190u3020 07/09/1990 ~United Press International

(JULY 9) UPI - The first of some six-thousand Albanian refugees are on their way out of one of Eastern Europe's last stronghold of communism.

Air traffic controllers in Czechoslovakia say a plane carrying 51 Albanians finally took off for Prague this evening after encountering a five-hour delay at Tirana's international airport.

All of the passengers were Albanians who had applied for asylum last week at the Czechoslovak Embassy... one of more than a dozen foreign missions flooded with requests for visas.

Military officials in Prague had said the refugees were tentatively scheduled to arrive at a Prague airport earlier today. But moments before the plane was due to land, they discovered it had NOT even left the ground yet in Tirana.

The reason for the delay was NOT clear.

Sources at Western missions housing the balance of the refugees say they hope the plane is the first of many allowed out.

Police in Florida say they suspect a domestic disturbance may have triggered a distraught woman into taking nine hostages at a North Miami bank today.

Two of the captives were later freed, and the rest were released UNharmed after police ended the four-hour stand-off by talking her into surrendering.

Authorities say 38-year-old Vicki Molina entered the bank this morning, saying she had guns and grenades and was- in her words- ''NOT afraid to die.''

She then told bank officers she wanted all of the customers evacuated.

Witnesses say the woman kept one hand on her purse during the seige, as if she were carrying a gun. But after police subdued Molina, they say NO weapons of any kind were found.

A spokesman for Metro-Dade County says Melina had told them she was upset because she- QUOTE- ''gave away her dog and had a bad haircut.''

-30- 1959
#90190u3033 07/09/1990 ~United Press International
(JULY 9) UPI - A fourth person today testified to drug use by Washington, D-C, Mayor Marion Barry.

Washington restaurant owner Hassan Mohammadi told the federal court he saw Barry snort cocaine as early as February 1985. Mohammadi also said he later supplied the mayor with the drug 30 times... including a delivery of two grams to Barry's City Hall office.

Mohammadi says Barry had the drugs delivered to his office the day before a three-day trip they made to the Bahamas in 1987. He says Barry warned him NOT to carry the drugs because, as an Iranian, Mohammadi might be searched... but as mayor, he would have NO problems.

Mohammadi, a former Iranian embassy worker, pleaded guilty to conspiring to possess drugs between 1987 and 1989. When asked who he conspired with to possess cocaine, Mohammadi answered- ''Mr. Mayor.''

Mohammadi is testifying as part of a plea agreement.

Barry's trial on cocaine and perjury charges is now in its sixth week.

Alaskan officials are learning the hard way how wildfires got their name.

A spokesman from the federal Bureau of Land Management fire headquarters says there's NO controlling a fire that has consumed some 200-thousand acres in the Yukon Flats National Wildlife Refuge.

Pete Buist says despite all efforts to fight it, the fire is- in his words- ''going wherever it wants.''

The fire has tripled in size since Saturday, but officials say it has stayed clear of a nearby Indian village.

The blaze is only one of about 200 fires that are threatening the state. A spokesman for the Alaska Fire Service says an army of some 21-hundred

firefighters includes what he called a ''huge air force'' to combat fires in the countryside.

The force utilizes 37 helicopters and 55 other fixed-wing planes that swoop down to spray fire retardant over blazing fields.

In Yellowstone National Park, firefighters say cool and wet weather is helping them get the upper hand in containing a 220-acre fire in the park's northeast territory.

A Wyoming fire official says she expects the last flames of a four-day-old blaze will be extinguished some time tonight.

-30- 2315

#90190u3042 07/09/1990 ~United Press International

(JULY 9) UPI - Two lesbian ministers whose ordinations are under fire today appealed for the Lutheran Church to bless their ordinations.

Ruth Frost and Phyllis Zillhart testified before a Lutheran Church disciplinary hearing in San Francisco that their lifelong dreams were fulfilled when they became pastors.

The 12-member panel could expel the two Lutheran congregations that defied UNwritten church rules by ordaining Frost, Zillhart and homosexual Jeff Johnson.

The church says homosexuals may be pastors only if they do NOT practice their sexuality.

Frost told the committee the church itself was on trial in the gay community- NOT just the two congregations.

One former bishop expressed support for their ordinations... although he considered them to be ''hasty.'' He says the three should have worked in the ministry and then shown the church that they ''warranted ordination.''

#90190u3095 07/09/1990 ~United Press International

(JULY 9) UPI - Witnesses in the Nicaraguan capital say at least 15 people were injured as pro-government workers squared off against striking Sandinistas. The violence came more than one week into a labor action by Sandinistas dissatisfied with the new government.

The Kenyan capital city was rocked by further UNrest today, as government forces struggled to exert control amid calls for greater democratization of the African nation. Two people were reported killed and foreign newspeople were beaten and arrested by troops.

The Pentagon says General Maxwell Thurman was admitted to Walter Reed

Medical Center near Washington, D-C, today to confirm a leukemia diagnosis. Thurman, who led the U-S assault of Panama last December, will undergo tests to determine a course of treatment.

Alaska fire officials today declared the town of Tok was NO longer threatened by a raging wildfire on its outskirts. The town of 12-hundred had been evacuated once and it was feared the temperamental blaze would enter the city limits.

Defense Secretary Cheney says a foundation has been laid for stronger U-S relations with Greece. Cheney's comments came after a meeting with the Greek prime minister and one day after a new agreement was reached concerning American military bases in Greece.

#90190u3176 07/09/1990 ~United Press International

(JULY 9) UPI - Pro-Sandinista workers and students took over Nicaragua's national radio and television stations today as violence erupted between the Sandinistas and supporters of President Violeta Chamorro . One person was killed and at least one-dozen were injured as a Sandinista labor action entered its second week. The radio takeover prevented Chamorro from delivering an appeal for calm.

The first day of the 16th annual Economic Summit of Industrialized Nations in Houston saw the UNveiling of a U-S proposal regarding future economic aid to the Soviet Union. One U-S official termed the proposed communique- quote- ''an umbrella under which everyone would be free to do what they want to'' with respect to granting aid to Moscow. Meanwhile, the Bush administration was prepared to announce guidelines under which it would extend aid to the Soviets.

A federal court jury in Chicago today handed out the first convictions resulting from the F-B-I's two-year undercover probe at the Chicago Mercantile Exchange and Chicago Board of Trade. Two of the first three defendants were convicted of defrauding customers in the C-M-E's Swiss franc trading pit. The third trader was acquitted. A judge declared a mistrial on 87 counts on which the jury could NOT reach verdicts... possibly leading to a retrial.

It appears the U-S Postal Service will have private contractors handle some of its mail flow. The Postal Service says it has made a preliminary decision to have the contractors operate the new automated Remote Bar Coding System... designed to speed the processing of mail. Officials say the move will save more than four-BILLION dollars in labor costs over 10 years.

#90190u3178 07/09/1990 ~United Press International
(JULY 9) UPI - Ugandan President Yoweri Museveni was elected just today to head the 51-nation Organization of African Unity... but he has already issued a challenge to his fellow African leaders. He suggested African nations immediately establish an economic community to better their hand in the world trade. The suggestion came amid fears that the developing democracies of Eastern Europe would swallow up international aid to Africa.

A Chattanooga, Tennessee, man says he hopes there's a public outcry against a judge's decision to find him in contempt of court for defying an order to allow his son and daughter to visit their grandparents. Robert Hawk claims his father abused him as a child and now poses a threat to his grandchildren. Hawk sent the children into hiding with his wife. A Tennessee judge is fining Hawk 25 dollars a day until he brings the children to court.

Defense Secretary Cheney says he believes a new U-S military bases agreement with Greece has laid the foundation for improved U-S-Greek ties. Cheney made his statement today following a meeting in Athens, Greece, with conservative Prime Minister Constantine Mitsotakis. Cheney was present yesterday when U-S and Greek officials signed the agreement.

A government report says there is promise in a privately-funded program guaranteeing college tuition to poor students. A General Accounting Office study says 39 guaranteed-tuition programs raised more than 22-Million dollars from private sources and helped out some 43-thousand students in the last school year. The report says the programs may inspire leaders to re-think educational funding.

#90191b0009 07/10/1990 ~Business Wire
SAN JOSE, CA (JULY 10) BUSINESS WIRE - Former Maxtor Vice President of Engineering Michael W. Warner, former PRIAM Division General Manager Richard Reiser and former Televideo Chief Financial Officer Won-Gil Choe Tuesday announced the formation of Orca Technology, a new disk drive

company that will supply high-end, high-capacity disk drives to the OEM marketplace.

In June, Orca Technology purchased advanced product technology from PRIAM Corp., which it will begin manufacturing and is planning to ship during the fourth quarter of this year. Terms of the sale were not disclosed.

Orca Technology acquired the designs, international patents, tools, fixtures, manufacturing pilot lines, inventory and all documentation to PRIAM's 5.25'' 760 MB Falcon program and 3.5'' 400 MB Shrike

program. Orca also acquired extensive material assets such as furniture, general laboratory and testing equipment.

''Orca Technology is a start-up company,'' said Warner, chairman and president of Orca. ''But because we acquired technology that PRIAM invested more than $16 million in developing, we fully expect to have products shipping before the end of the year. You might say we're a 'jump' start-up.''

With the market for high capacity 3.5'' drives just beginning to emerge, according to Warner, the timing of the 400MB 3.5'' drive is ideal. Orca will market its 3.5'' drives to major OEMs.

The company's strategy for the 5.25'' market is to sell to value-added resellers and dealers and direct to OEMs as a second source. The company's chief competitors are Maxtor, Micropolis and Seagate. Its ability to respond quickly to resellers and integrators and its leading-edge disk drive technology will give Orca an edge over the big disk drive companies.

Orca Technology is also planning to announce a greater than 1 gigabyte drive in 1991.

''With the disk drive industry shakeout over the past 18 months, there are fewer, but bigger, companies left,'' Warner said. ''We believe a smaller company that possesses a strong, high quality product line and is quick to respond to customer needs can effectively compete in this marketplace.''

Orca Technology management is currently evaluating offshore manufacturing companies as potential partners for high volume production, and is recruiting technical people to assist the start of pilot production and to perform R&D work for future products in San Jose.

Orca Technology moved last week into a 17,000-square-foot headquarters facility located at 1751 Fox Drive, San Jose, 95131.

SAN DIEGO (JULY 10) BUSINESS WIRE - Direct Opinions Inc., a national customer follow-up service, Tuesday announced it has established an office in San Diego to service Southern California.

Christopher J. Reinhard, president of Direct Opinions, said: ''The company has licensee operations throughout the United States including Atlanta, Cincinnati, Cleveland, Columbus, Los Angeles, Pittsburgh and San Francisco providing fast, reliable and low-cost customer follow-up and market research services to automotive dealers, repair and service centers and other service-oriented businesses, and we are pleased to now be in a position to provide this service in San Diego and Orange County.''

Continuing, Reinhard said: ''Direct Opinions' other licensee operations are presently providing customer follow-up services to many auto dealers nationwide including Acura, BMW, Buick, Cadillac, Chevrolet, Chrysler, Ford, Honda, Mazda, Mercedes-Benz, Nissan, Oldsmobile, Pontiac, Toyota and Volvo along with many other businesses, and we will be working closely with San Diego and Orange County businesses to provide the same high level of service which we have been recognized for nationally.''

Explaining how the service works, Reinhard noted: ''Each time a customer purchases a company's product or service, Direct Opinions calls the customer to thank them for their patronage, solicit opinions about the product or service and seek improvement or performance recommendations.''

Continuing, he noted: ''The service provides the tools needed to help a company enhance customer loyalty, generate repeat business, create and maintain a personalized two-way communication link with custmers and identify satisfied and dissatisfied customers.''

In addition, it was reported that Direct Opinions will develop other services including market research, opinion polling and follow-up on inactive accounts, qualifying customer leads, and will provide specialized shareholder and consulting services for public companies.

Reinhard also noted: ''Direct Opinions has developed a special homeowners' association survey service for Southern California.''

Recognizing the large number of condominium and home developments in the area, Reinhard noted: ''For a small annual fee, homeowners will be

surveyed by telephone on a wide array of subjects and important issues to more accurately gauge homeowners' opinions and overall satisfaction levels which will help these homeowner associations to make informed decisions rather than making decisions based on a vocal minority.''

Direct Opinions Inc. is an operating unit of the San Diego-based Colony Group, which specializes in the acquisition, development and operation of franchise businesses in Southern California.

Businesses interested in finding out more about the services of Direct Opinions can contact Andrea C. Shekoski, vice president of sales, at 619/457-8180.

NEW YORK (JULY 10) BUSINESS WIRE - S&P CreditWire 7/10/90 -- Midway Airlines Inc.'s single-'B'-minus preferred stock rating is placed on S&P CreditWatch with negative implications, affecting about $54 million of securities.

The action reflects heavy costs associated with the start up of a second hub at Philadelphia, competitive pressure from USAir, Inc. (the dominant carrier at that city), and price competition on routes to Florida initiated by Eastern Air Lines, Inc.

In October of 1989, the company paid about $213 million to acquire certain ground facilities, aircraft and international route rights from bankrupt Eastern to establish a second hub at Philadelphia International Airport; however, the acquisition has resulted in substantial losses due to intense competitive pressure from USAir and heavy price discounting at Philadelphia.

In addition, Midway's primary hub, Midway Airport in Chicago, has also been negatively impacted by added capacity on routes to Florida by American Airlines Inc. and United Air Lines Inc., both of which fly out of O'Hare Airport.

After reporting a $20.7 million loss in 1989, Midway lost another $22.9 million in the first quarter, and prospects for a significant earnings turnaround in 1990, appear remote, S&P said.

#90191b0031 07/10/1990 ~Business Wire

WELLESLEY, MA (JULY 10) BUSINESS WIRE - Silicon Valley Bancshares (NASDAQ:SIVB) parent company of Silicon Valley Bank, announced net income of $2,475,000 for the quarter ended June 30, 1990, compared with $1,650,000 for the second quarter of 1989, an increase of 50 percent.

Net income per share was 43 cents in the second quarter of 1990, compared to 30 cents for the same period in 1989.

Net income for the six-month period ended June 30, 1990, was $4,773,000, compared with $3,155,000 for the same period in 1989, an increase of 51 percent. Earnings per share increased to 82 cents for the six-month period ended June 30, 1990, compared with 57 cents for the same period in 1989.

The per-share amounts reflect a 2-for-1 stock split in May 1990 and a 5 percent stock dividend in August 1989.

Total assets increased to $573 million at June 30, 1990, compared with $322 million at June 30, 1989, a 78 percent increase. Total loans were $371 million at June 30, 1990, compared with $233 million at June 30, 1989 a 59 percent increase.

Total deposits were $531 million at June 30, 1990, compared with $296 million at June 30, 1989, a 79 percent increase.

Book value per share was $6.33 at June 30, 1990, compared with $4.79 at June 30, 1989, a 32 percent increase.

Roger Smith, president and chief executive officer, said: ''The addition in the second quarter of senior officers in all three of our lending divisions from Bank of New England, Plaza Bank of Commerce and Bank of America has fueled our substantial growth. We continue to remain focused in our three market areas.''

The bank finances emerging and middle-market technology companies, commercial businesses and residential construction projects.

Allyn C. Woodward Jr., executive vice president in the company's Wellesley/Route 128 office, said: ''The Route 128 marketplace, which includes numerous emerging and middle-market technology companies, has responded very well to our newly opened office. The synergy between the East Coast and West Coast venture capital community has also contributed to our progress.''

Silicon Valley Bank is the only independent bank operating offices in the

major financial centers of Santa Clara County: Santa Clara, Palo Alto, San Jose and downtown San Jose.

The office at 3000 Sand Hill Road, Menlo Park, is the bank's first office in San Mateo County. A loan production office was recently opened in the Boston area, in Wellesley.

MILAN, ITALY (JULY 10) BUSINESS WIRE - Bank of America Chief Executive Officer Richard M. Rosenberg dedicated the bank's first new full service commercial branch in Europe since 1984 here in Milan today. The branch will provide treasury and capital markets, corporate finance and electronic banking services to international companies active in Italy and to major Italian companies with important international business. Vice President Pier Giorgio Rota Baldini was named to manage the new unit.

''We've been in Italy since 1919 and are delighted to invest our capital strength in expanding our services to this dynamic economy,'' said Rosenberg. ''The new Milan Branch underscores our commitment to be a major player in European wholesale banking and to provide quality service to our customers globally.''

Bank of America has maintained ties with the Italian market almost from its inception. Originally called Bank of Italy when it opened in San Francisco in 1904, its founder, A.P. Giannini, was the son of Italian emigres. Until 1986, Bank of America had a controlling interest in Banca d'America e d'Italia. It has maintained a representative office in Italy since 1977.

The new Milan Branch will be linked directly to the bank's automated central processing centre in Bromley, England, which handles transaction processing for virtually all of the bank's European units. Bank of America was the first bank to centralize and automate its European network transaction processing.

Rosenberg said the Milan Branch gives Bank of America a full presence in each of its key European markets, providing the bank with an extensive presence in the European Community countries well in advance of EC market unification in 1992.

#90191b0049 07/10/1990 ~Business Wire

TEMPE, AZ (JULY 10) BUSINESS WIRE - UDC-Universal Development L.P. (NYSE: UDC) Tuesday reported second quarter closings, sales and backog. New home closings for the quarter ended June 30 were $87 million, a decrease of three percent compared with the record $89 million posted a year ago.

Sales were $82 million compared with last year's record $120 million, and the June 30 backlog of homes ordered but not closed, was $160 million compared with the year earlier record backlog of $202 million. Second quarter 1990 closings and backlog were the second highest in UDC history.

Richard C. Kraemer, president and chief operating officer, said "The decrease in second quarter sales was the result of both fewer projects open for sale and lower demand in our California markets. We anticipate increases in California sales as new subdivisions open during the second half of the year. Sales in Arizona were a second quarter record, and recent market activity indicates that overall demand for housing in Arizona has improved from a year ago."

Gary A. Rosenberg, chairman and chief executive officer of the Tempe-based homebuilder, said, "Total second quarter closings decreased a few percent in the weakest national housing market since 1982. However, lower overall margins as well as a change in location mix, combined with the effects of last year's partial recapitalization, will result in significantly greater percentage decreases for second quarter net income and net income per common share.

"UDC's operations are very competitive in each of its geographic markets, and we continue to be confident about our business plan of building upscale housing for move-up family and retirement homebuyers in selected states in the Sun Belt."

UDC will announce second quarter and first half revenues and earnings in early August.

UDC builds quality upscale family and adult residential communities in six Sun Belt states, with operations in Arizona, California, Florida, Georgia, North Carolina, and South Carolina. Its common and preferred shares are traded on the New York Stock Exchange.

OAKLAND, CA (JULY 10) BUSINESS WIRE - Bruce Seaton, chairman and chief executive officer of American President Cos., announced following the meeting Tuesday of the APC board of directors that John M. Lillie, 53, has been named to the newly created position of president and chief operating officer, effective Aug. 6.

Lillie will report to Seaton. Reporting to Lillie will be the heads of APC's two principal operating units.

They are J. (George) Hayashi, president and chief executive officer of American President Lines, APC's Pacific Basin, shipping company, and Timothy J. Rhein, president and chief executive officer of American President Domestic, which provides transportation services within North America for domestic and international freight.

Also reporting to Lillie will be Robert K. Dahl, APC's senior vice president and chief financial officer, James S. Marston, senior vice president and chief information officer; Richard L. Tavrow, senior vice president, secretary and general counsel; and Arthur J. Reimers, senior vice president-human resources.

Lillie served from 1986 to 1989 as chairman and chief executive officer of Lucky Stores, which he joined in 1979. From 1989 to the present, he has been a general partner of Sequoia Associates, a private investment firm located in Menlo Park, Calif. He served as president and chief executive officer of Leslie Salt Co. from 1972 to 1979.

In 1989, he was the recipient of the Ernest C. Arbuckle Award for management excellence from Stanford University's Graduate School of Business. He holds B.S. and M.S. degrees in Industrial Engineering and M.B.A., all from Stanford University. Lillie will continue as a limited partner in Sequoia Associates.

''The company will benefit from the management skills of John Lillie, who has headed two major corporations and brings a customer-focused perspective to the freight transportation business,'' said Seaton. Since joining the APC board of directors in January, LIllie has met with APC's employees throughout Asia and North America to familiarize himself with the company and its business.

American President Cos. provides container distribution and transportation services within and between Asia and North America through an intermodal system combining ocean, rail and truck transportation.

NEW YORK (JULY 10) BUSINESS WIRE - Andrea Ganis has been promoted to the the position of senior vice president of Atlantic Records, based at the company's New York headquarters.

The announcement was made this week by Atlantic President and Chief Operating Officer Doug Morris. Ganis, who has been with Atlantic Records since 1980, was most recently vice president of National Promotion for the company. With this new appointment, she joins Atlantic's senior executive staff.

In making the announcement, Morris commented: ''Over the past decade, Andrea has grown into one of the most knowledgeable and valued members of our executive team. A truly well-rounded music person, she has had a crucial role in developing what I feel to be the preeminent promotion department in the music business today.

''Our remarkable track record is due in no small part to Andrea's extraordinary talent and dedication, which has earned her industry-wide recognition and respect. It is with particular pleasure that I announce her elevation to senior vice president.''

Ganis joined Atlantic Records in 1980 as director of Secondary Pop Promotion and was named associate director of National Singles Promotion later that year.

In January 1986, she was promoted to director of National Singles Promotion and in November of the same year, she became senior director of National Singles Promotion. In July 1988, Ganis was named vice president of National Promotion, holding that post until her new appointment.

Prior to joining Atlantic, she served in national promotion posts at Polydor Records and Infinity Records.

OAKLAND, CA (JULY 10) BUSINESS WIRE - American President Companies Ltd. (NYSE:APS) announced Tuesday that its board has elected Timothy J. Rhein a director.

Rhein is president and chief executive officer of American President Domestic, APC's domestic transportation subsidiary.

Rhein, formerly president and chief operating officer of American President Lines, (APL), the company's Pacific Basin container shipping subsidiary, joined the company in 1967.

During his career at APL, Rhein held a number of key positions including

senior vice president, marketing and logistics and vice president, North America.

Chairman W.B. Seaton said with Rhein's extensive knowledge of APC's operations and markets, his election to the board will benefit the company's stockholders.

In other business, the board declared a regular quarterly dividend on the company's common stock of 15 cents per share. The dividend is payable Aug. 1 to stockholders of record Aug. 15.

The board also declared a regular quarterly dividend on the company's Series C Cumulative Convertible Preferred Stock of $1.125 per share, payable Sept. 15.

American President Companies Ltd. provides container distribution and transportation services within and between Asia and North America through an intermodal system combining ocean, rail and truck transportation.

PALO ALTO, CA (JULY 10) BUSINESS WIRE - Legato Systems Inc., a leading-edge supplier of network administration products designed to enhance and simplify network computing, Tuesday signed an agreement to license the company's Prestoserve file system accelerator technology.

The license will allow Digital to provide enhanced disk I/O speed and throughput for its RISC/UNIX DECsystems used as file and database servers.

According to Dom LaCava, vice president of Digital's Low End Systems group ''File system performance is just as important as processor performance in the total system design of Digital's servers. That's why Legato's Prestoserve will be an integral part of our new RISC/UNIX DECsystem products.''

Prestoserve is a software/hardware product that improves file system performance in servers, allowing them to both give clients faster response and handle more clients. Prestoserve accelerates performance by caching writes in non-volatile memory, eliminating a major file system bottleneck.

Prestoserve maintains full UNIX file system semantics and compatibility with existing disk, controllers, and software drivers on Digital's systems.

''Digital's license agreement with Legato recognizes the defacto standard Prestoserve has established for improving file system performance of servers based on the UNIX operating system,'' said Legato President and Chief Executive Officer Lou Cole.

''With the combined technology of Digital's RISC/UNIX DECsystems and Prestoserve, system managers in heterogeneous networking environments will be able to support more client workstations and terminals while simultaneously giving users faster response. With more workstations on servers and faster response, MIS organizations can both lower costs and give better service.''

Digital Equipment Corp., headquartered in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

Legato Systems Inc. is a leading-edge supplier of network administration products designed to enhance and simplify network computing. The company's mission is to make administration and sharing of multiple, heterogeneous network resources simple, reliable, consistent, cost-effective and efficient.

Legato delivers quality network administration applications to Fortune 1000 customers in industries including defense, aerospace, manufacturing, petroleum, publishing, education and high technology. Prestoserve is the first in a series of Legato product offerings designed to allow organizations to utilize to maximum advantage their significant investment in existing technology, resources and personnel.

PALO ALTO, CA (JULY 10) BUSINESS WIRE - Legato Systems Inc., a leading-edge supplier of network administration products designed to enhance and simplify network computing, announced Tuesday that Sun Microsystems has signed an agreement to license the company's Prestoserve NFS accelerator/product.

The license will allow Sun to provide this as an option to their high-end server line and to incorporate the technology within future server products.

''We see Sun Prestoserve as an exciting complement to our high-end SPARCserver product line,'' said Doug Kaewert, director of Sun's General Systems Group.

''It reinforces Sun's commitment to both industry standards as well as balanced system performance. Sun Prestoserve accelerates Network File System, the industry standard for distributed file sharing on heterogeneous networks, by improving NFS write performance.

''With Sun Prestoserve, heavily loaded file servers can support many additional clients and offer better response times to existing clients.''

Prestoserve is a software/hardware product that improves file system performance in servers, allowing them to both give clients faster response and handle more clients. Prestoserve accelerates performance by caching writes in non-volatile memory, eliminating a major file system bottleneck.

Prestoserve maintains full NFS and UNIX file system semantics and compatibility with existing disk, controllers, and software drivers on Sun's systems.

''Prestoserve is rapidly gaining popularity as a cost-effective way to improve file system performance of UNIX-based servers,'' said Legato president and chief executive officer Lou Cole. ''The combined technology of Sun's SPARCserver 470 and 490 and Prestoserve set a new standard for performance and throughput in the NFS environment.

Sun Microsystems Inc., headquartered in Mountain View, Calif., is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating system and productivity software.

Legato Systems Inc. is a leading-edge supplier of network administration products designed to enhance and simplify network computing. The company's mission is to make administration and sharing of multiple, heterogeneous network resources simple, reliable, consistent, cost-effective and efficient.

Legato delivers quality network administration applications to Fortune 1000 customers in industries including defense, aerospace, manufacturing, petroleum, publishing, education and high technology.

SEATTLE (JULY 10) BUSINESS WIRE - Horizon Air began nonstop flights between Portland, Ore., and Vancouver, British Columbia, Friday, July 6, after receiving final Canadian government approval the day before.

Horizon is offering two nonstops between Portland and Vancouver, plus an additional three direct flights that stop in Seattle. All are operated with 37-passenger Boeing-de Havilland Dash 8s. The new service is scheduled for convenient local travel as well as to accommodate connections to and from Horizon's sister company, Alaska Airlines. Horizon has been serving Vancouver, B.C., since May 1989 when it began nonstop service to Seattle.

Horizon Air serves 34 cities throughout five Northwest states and British Columbia. Horizon Air and Alaska Airlines are wholly owned subsidiaries of Alaska Air Group Inc.

SAN FRANCISCO (JULY 10) BUSINESS WIRE - Merus Capital Management Tuesday announced that Luke C. Mazur, 48, has joined Merus as managing director and senior equities strategist.

In this senior position, Mazur will provide guidance to Merus' equity strategy teams and security analysts. Mazur will also be active in institutional client relations and business development.

Mazur formerly was managing director of equities for Northern Investment Management Co., a subsidiary of Northern Trust Corp., in Chicago, with $6.5 billion under management. In this post, Mazur served as director of equity products and policy, and chief portfolio strategist, achieving equity returns significantly above the S&P 500. He also served as Treasurer and a member of the board of directors.

Prior to this position, Mazur was vice president and manager of Northern Trust Co.'s strategic investment service division where he developed and implemented structured and indexed investment programs, including domestic

and international equity and fixed income index funds.

Earlier in his career at Northern Trust Co., he held the title of vice president as manager of the performance analysis services division and as manager of employee benefit product development.

President and Chief Investment Officer Harold C. ''Tim'' Warner said, ''We are very pleased that Luke Mazur is joining Merus. His breadth and depth of experience strengthens the Merus team, and his record of achievement indicates the substantial contribution he will make to the continuing success of Merus.''

Mazur received a bachelor's degree from De Paul University, where he also attended graduate school. He is a member of the Financial Analysts Federation, the Investment Analysts Society, and the Institute for Quantitative Research in Finance.

Merus Capital Management, a division of The Bank of California, manages investment portfolios totaling approximately $5 billion for public and private institutions and high net-worth individuals.

MESA, AZ (JULY 10) BUSINESS WIRE - McDonnell Douglas Helicopter Co. Tuesday announced a major step forward in preparing itself to be competitive in the world helicopter market place by reorganizing several major elements of its management structure.

''The company's financial performance in the past year makes it clear that a change in the way we do business is necessary,'' said company president Tom Gunn.

''In conjunction with this, I have accepted the resignation or early retirement of several company executives. I wish to thank them for their valued service to McDonnell Douglas and wish them every success in the future,'' Gunn said.

''The need to restructure is particularly acute in light of the dramatic changes in the world political picture and the resultant reduced spending for defense,'' he said.

Other actions being taken include significant cost and budget cutting

measures, details of which will be announced later.

''Our plan is to continue building the world's finest military helicopters and ordnance products while at the same time expanding our position in the commercial market with our revolutionary NOTAR(TM) system technology,'' Gunn said.

The major step of the reorganization establishes separate divisions for the company's four major business product lines (MDX, AH-64, MD 500 and LH). These business units will be served by six divisional support organizations.

To strengthen support functions, two new divisions have been formed, Business Development and General Services. Elizabeth Karabatsos has been named general manager of the General Services Division. She had been director of Government and Civic Affairs.

The following management assignments have been made to business and support unit management:

Dean Borgman becomes general manager of the MDX Program. He previously was vice president of the Advanced Product Development and Technology Division.

Frank Palminteri becomes general manager of the MD 500 Program. He previously was director of the same group.

Al Haggerty becomes vice president/general manager of the LH Program.

Erv Hunter becomes vice president of the AH-64 Program. He was recently appointed deputy director of the program.

Mike Cleary, formerly director of ordnance product definition, becomes director of ordnance.

Other organizational changes, including reassignment of various working groups into new divisional structures and the renaming of several divisions, will be announced at a later date.

COVINA, CA (JULY 10) BUSINESS WIRE - California State Bank (NASDAQ:CSTB) released its unaudited consolidated financial statement for the six months ended June 30, 1990.

The bank continued its strong performance, with net earnings for the second quarter totaling $1,053,000, a 15 percent increase over second-quarter earnings of $916,000 a year ago. Earnings per share for the quarter were 46 cents, compared to 52 cents in the second quarter last year.

Earnings per share were based on the weighted average number of shares outstanding during the quarter, which increased 29 percent over a year ago primarily as a result of a successful stock offering in October 1989.

Earnings for the six months ended June 30, 1990, totaled $2,013,000, or 89 cents per share, compared to $1,734,000, or 99 cents per share, during the comparable period a year ago.

Total assets reached $252.4 million at June 30, 1990, compared to $229 million a year ago, an increase of 10 percent. Deposits totaled $215 million and net loans grew to $151.7 million, up 3 percent and 7 percent, respectively, from last year.

California State Bank President Eugene D. Bishop stated, ''We are pleased with the bank's strong performance and look forward to continued growth and profitability in 1990.''

California State Bank is based in Covina and has additional branches in Alhambra, Arcadia, Beaumont, City of Industry and West Covina.

SAN DIEGO (JULY 10) BUSINESS WIRE - Gensia Pharmaceuticals Inc.

(NASDAQ:GNSA) today announced that Steven C. Mendell, chairman and chief executive officer of XOMA Corp., has joined Gensia's board of directors.

Mendell accepted the board position in April 1990, according to David F. Hale, Gensia president and chief executive officer.

XOMA, based in Berkeley, Calif., is a biotechnology company devoted to developing monoclonal antibody-based pharmaceutical products. Since Mendell joined XOMA in 1984 the company has emerged as one of the major firms in the biotechnology industry and is currently awaiting FDA approval to market two therapeutic products.

Prior to joining XOMA, Mendell was president of the BBL Microbiology Systems Division of Becton Dickinson & Co. from 1978 to 1984. During his tenure, BBL developed into the world's largest fully integrated manufacturer and marketer of products for the clinical and industrial microbiology laboratory. Before 1978, Mendell held a number of other international and domestic management posotions with Becton Dickinson.

Gensia has two cardiovascular drugs in multicenter Phase 2 clinical trials in western Europe and the United States and is conducting preclinical research to develop other pharmaceutical products for the treatment of certain cardiovascular, cerebrovascular and neurological diseases. The company's basic research is focused on two core technologies which are based on Gensia's extensive expertise in purine/pyrimidine metabolism and catecholamine analogs.

Gensia is a San Diego-based biopharmaceutical company formed to discover, develop, manufacture and market novel drugs for the diagnosis and treatment of human diseases.

CINCINNATI (JULY 10) BUSINESS WIRE - Heekin Can Inc. Tuesday reported increased sales and profits for the second quarter ended June 17, 1990.

For the quarter, food and aerosol can net sales increased 6 percent to $78.8 million; compared with $74.3 million reported a year ago. Total net sales increased 1 percent. Total net sales for the second quarter 1989 included $3.5 million from the Reynolds Metals aluminum beverage can tolling agreement which ended in July 1989.

Net income increased 22 percent to $2.9 million; compared with $2.4 million for the second quarter 1989. Earnings per share increased to 89

cents from 73 cents. Second quarter 1989 net income included a $0.5 million charge for shutdown costs associated with the termination of the tolling agreement.

For the first half, food and aerosol can net sales increased 8 percent to $148.0 million compared with $137.3 million reported for the same period in 1989. Total net sales (which included $6.5 million from the tolling agreement) increased 3 percent from the $143.8 million in 1989. Net income increased 14 percent to $4.8 million. Earnings per share increased from $1.29 to $1.46.

''We are beginning to see the positive effects of our plant restructuring that was substantially completed in 1989,'' said John A. Haas, chairman, president and chief executive officer of Heekin. ''By moving can lines and upgrading equipment, we have been able to increase our production capacity, and enhance our efficiencies. Our interest expense was $0.8 million higher than the first half last year as a result of prior capital spending and higher average working capital.

''Our second quarter could have been even better except for the widely-reported, record-breaking, torrential rains in the south,'' Haas continued. ''The effect of these storms is to push activity to later in the year.''

Heekin Can Inc., is a Cincinnati-based manufacturer of a diverse line of metal containers for the food, pet food, and personal care markets. The company has 12 plants and sells to customers in 33 states. Its stock is traded on the NASDAQ National Market System under the symbol HEKN.

SPOKANE, WA (JULY 10) BUSINESS WIRE - Key Tronic Corp., a leading manufacturer of keyboards and other computer products, has announced its new One-Time Data Collection System.

The One-Time system, originally designed and developed as a cost-effective solution for use within Key Tronic's own manufacturing facilities, is a sophisticated, low cost, hardware and software data collection system.

The system runs on a local area network of microcomputers. One serves as a polling PC for connection of up to 127 One-Station terminals through an RS422 multidrop network. Another PC runs the software application package for data analysis and reporting.

One-Station terminals have bar code and keypress capability allowing fast, accurate and efficient data input for many systems: MRP, scheduling, SPC, point-of-sale and lot tracking.

The software system can function as a stand-alone data collection and information management reporting system, or data can be accessed by a host computer system for integration into payroll, MRPII, and other existing systems. A powerful processing language allows customized applications to meet clients' specific needs.

''We couldn't find a powerful, integrated data management and reporting system at a cost effective price, so we built our own,'' said Bob Horecka, One-Time product manager. ''It has worked out so well for us that we have decided to offer it to other firms,'' he added.

The One-Time Data Collection System is being manufactured in Key Tronic's manufacturing facilities in Spokane and Cheney, Wash. Key Tronic is a publicly held corporation traded over the counter under the NASDAQ symbol KTCC.

ANAHEIM, CA (JULY 10) BUSINESS WIRE - Kaiser International Inc., master franchiser for American Speedy Printing Centers, has announced plans to establish 1,500 quick printing centers throughout Europe, according to William Culp, president of Anaheim-based Kaiser International Inc.

The company's announcement comes 10 months after Kaiser International signed a 50-year agreement with Canon Sales and Maruzen Company Ltd., to establish quick printing centers in Japan.

''The opening of Europe completes the third link in our worldwide business information network,'' commented Culp. ''In addition to providing commercial printing services to businesses throughout North America, Asia and Europe, our centers will link these three major financial markets electronically.''

There are currently 18 American Speedy Printing Centers operating in the United Kingdom as part of a highly successful 24-month test of the European market.

Initially, 70 percent of the centers in Europe will be located in the West with that ratio expected to decrease as Eastern bloc countries industrialize.

''Our first order of business in Europe will be to locate a joint venture partner in Germany,'' says Culp. ''The management team will move to Europe in January 1991, and by 1993, we expect to have centers operating in four European countries.

''We will open an additional 500 printing centers in eight other Pacific Rim countries within the next 10 years.''

Kaiser Printing, a subsidiary of Kaiser International, also owns master franchise rights for Michigan-based American Speedy Printing Centers in California, where it has established more than 100 printing centers in the last two years.

The company's annual revenue has grown to more than $30 million since it opened its corporate offices in Anaheim in 1987.

American Speedy Printing Centers is the fastest growing quick print franchiser in the United States due in large part to its growth in California.

SPOKANE, WA (JULY 10) BUSINESS WIRE - Key Tronic Corp., a leading manufacturer of keyboards and other computer products, has signed Customs Systems and Support (CS&S) as the first Key Tronic Systems Integrator for its new One-Time Data Collection System.

The One-Time system, originally designed and developed as a cost-effective solution for use within Key Tronic's own manufacturing facilities, is a sophisticated, low cost, hardware and software data collection system.

Based in Marietta, Ga., CS&S offers a proven track record providing custom manufacturing software systems to Fortune 500 companies. In addition to selling the One-Time system, CS&S will design, install, and test user application software as well as train end-users.

''Key Tronic's high standing in the computer industry, and vertical integration, which allows control over the mnaufacturing process, both contributed to CS&S's entering into the agreement,'' said Wayne Wittke, CS&S vice-president.

''This will be a partnership based on experience in each of our respective

industries. They are aggressive and knowledgeable in the software systems industry. Their experience will enhance our product to suit the needs of the user,'' added Bob Horecka, Product Development Manager for Key Tronic's Value Added Products.

Key Tronic is a publicly held corporation traded over the counter under the NASDAQ symbol KTCC.

SPOKANE, WA (JULY 10) BUSINESS WIRE - Key Tronic Corp., a leading manufacturer of keyboards and other computer products, has signed three new Master Value Added Resellers which will distribute Key Tronic's Value Added Products.

The Value Added Products feature a modular design based on the VA 101 keyboard which permits the addition of one or more Automatic Identification technology options such as bar code scanning and magnetic stripe reading.

Alpha Data Systems of Marietta, Ga.; Indiana Cash Drawer Co. of Shelbyville, Ind.; and MicroTalk of San Rafael, Calif., were all recently signed as resellers.

Alpha Data Systems has the most comprehensive catalog of PC-based Point-Of-Sale (POS) hardware products of any reseller in the country. ''They are very knowledgeable in all facets of the POS industry and have a strong presence in the marketplace,'' said Jerry Weinstock, Value Added Products Sales Manager.

Indiana Cash Drawer Co., in business for over 50 years, is the premier manufacturer of cash drawers, and one of the most respected names in the POS industry. The addition of Key Tronic's Value Added Products represents the first time Indiana Cash Drawer will sell products other than their own.

MicroTalk is the largest POS products distributor in the western United States. MicroTalk handles all facets of POS products, including retail POS software, and offers a very high level of service to their customers.

Key Tronic is a publicly held corporation traded over the counter under the NASDAQ symbol KTCC.

DALLAS (JULY 10) BUSINESS WIRE - In a hearing before the Texas Railroad Commission Tuesday, Oryx Energy Co. compared the production history of seven horizontal wells in the Austin Chalk with typical vertical wells from the same South Texas formation, indicating the sustained, increased production supports its position that temporary field rules on horizontal drilling in the Pearsall Field provide a reasonable framework for development and should be made permanent.

The typical proved reserves from these wells have been estimated at approximately 450,000 gross barrels per well.

Cumulative production from the seven horitzontal wells is nearly 800,000 barrels over the past one to three years. The J.B. Baggett No. 13, as an example, has produced 206,000 cumulative barrels since May 1988, compared with a nine-year production of 126,359 barrels from the J.B. Baggett No. 7 a vertical well on the same lease and one of the better wells in the field. The seven wells currently produce about 3,000 barrels of oil per day.

Since January 1989, Oryx Energy's Pearsall Field production has increased from 160 BOPD to more than 16,000 BOPD while the cost per horizontal well has been reduced from $2.7 million to $1.2 million. Lateral displacement has increased from less than 1,000 feet to an average of more than 3,000

feet, with some wells topping the 4,000-foot mark.

The Dallas-based independent also cited the increase in average number of rigs operating in District 1, which includes the Pearsall Field, since the TRC issued the temporary field rules on horizontal drilling last fall. In June, 92 rigs -- 10 percent of the U.S. total -- were in the Austin Chalk. This compares with 12 rigs in November 1989, when the temporary rules went into effect, and eight in August 1989, when the TRC heard the petition. Oryx Energy has completed 46 wells since the August hearing, 21 in the first quarter of 1990.

The temporary rules provide for a fourfold increase for horizontal allowables, to 1,312 BOPD from 328 BOPD, based on a horizontal displacement of 2,431 feet on 320-acre spacing. In April, the TRC applied a similar reasoning for a statewide horizontal drilling rule.

''Credit should be given to the TRC for prompt, innovative and effective regulation of horizontal drilling in the Pearsall Field,'' said James E. McCormick, president and chief operating officer. ''We plan to be in the Chalk for a long time and will continue to acquire acreage and drill wells as long as the play is attractive.''

McCormick said the technology appears applicable elsewhere, citing a horizontal well used for steam injection in California's Midway-Sunset Field and the company's activities in the Ellenburger formation in Nolan County, Texas, the Bakken Shale formation in North Dakota and the Niobrara formation in Colorado.

''These are just some of the domestic provinces conducive to horizontal drilling. We have successfully completed a horizontal well in the North Sea and see an application for this technology elsewhere overseas,'' added McCormick.

Dallas-based Oryx Energy Co. is the largest independent oil and gas company in the world, with assets in excess of $5 billion and proved reserves of more than one billion equivalent barrels. Oryx Energy conducts its domestic operations through Sun Energy Partners L.P., of which it is the managing general partner and 98-percent owner. Oryx Energy trades on the New York Stock Exchange with the symbol ''ORX'' and the partnership with the symbol ''SLP.''

BELMONT, CA (JULY 10) BUSINESS WIRE - Oracle Corporation (NASDAQ:ORCL), developer and marketer of the ORACLE (R) relational database management system, today announced record revenues and earnings for the period ending May 31, 1990, the fourth quarter of its 1990 fiscal year. The Company also announced record results for its 1990 fiscal year.

The fourth quarter of fiscal 1990 ended May 31, 1990, with revenues increasing 55 percent to $334 million, up from $216 million in the same period last year. Net income increased by 58 percent to $53 million, compared to $33.5 million in the fourth quarter of fiscal 1989. Earnings per share increased to $0.39, compared to $0.25 in the fourth quarter of fiscal 1989. Cash collections for the quarter were stronger than expected generating approximately $18 million in positive cash flow and reducing accounts receivable days outstanding at the end of the quarter to approximately 126 days from 146 days at the end of the third quarter.

Fiscal year 1990 revenues increased by 66 percent to $971 million, compared to $584 million in fiscal year 1989. Fiscal year earnings per share increased to $0.86, compared to $0.61 in fiscal 1989. About Oracle

Oracle develops and markets an integrated line of software products for database management, applications development, decision support and office automation, as well as a complete suite of financial applications packages. All Oracle products are available on PCs, minicomputers, mainframes and supercomputers.

For further information about Oracle, call Oracle Corporate Headquarters at 800-345-DBMS (345-3267), or write to Oracle Corporation at 500 Oracle Parkway, Redwood City, CA 94065.

Oracle is a publicly-held corporation whose shares are traded on NASDAQ/NMS with ticker symbol ORCL. ORACLE is a registered trademark of Oracle Corporation, Redwood City, CA.

SEATTLE (JULY 11) BUSINESS WIRE - Pacific Theatres of Los Angeles and Celerex Corp. have announced the installation of the Celerex Payment System, which allows movie-goers to now instantaneously pay for tickets and snack bar purchases with their MasterCard and VISA credit cards.

The Celerex System is operated by simply passing a credit card through the terminal reader and entering the amount. The credit card is verified, the

sale processed, a receipt printed and the transaction stored....without a carbon draft or customer signature required.

According to Milton I. Moritz, Pacific Theatre's vice president of advertising and public relations: ''This new system is definately a convenience for our customers. Instead of people having to stop for cash at a bank or ATM, they can go directly to the theatre.'' Moritz added: ''We are very pleased with the speed of the Celerex System. Unlike other systems, our patrons experience no delay in using their credit cards at the box office.''

The Celerex System was put into operation the same week that ''Back to the Future - Part III'' opened. In the first week, credit card usage amounted to 5-7 percent of total sales. Pacific expects this usage to increase over time as patrons become more aware of these payment choices being offered.

Pacific Theatres operates approximately 300 theatres in northern and southern California. In July, the theatre chain plans to install the Celerex System at Lakewood Center and Lakewood Center South theatres. The company believes this new system best lends itself to Pacific's type of operation and service. Pacific strives to remain on the cutting edge of technology and has chosen the Celerex System because of the speed of operation and the overall ease of use for its customers and employees.

Designed for high volume, low dollar ticket locations such as fast food, parking facilities, and theatres, the Celerex System allows these traditionally ''cash only'' businesses to accept credit cards very quickly providing convenience to the consumer.

For more information on the Celerex System, contact Celerex Corp., 1370 Stewart Street, Seattle, Washington, 98109, telephone 206/623-0225, or toll free 800/543-1615.

SANTA CLARA, CALIF (JULY 10) BUSINESS WIRE - Schlage Electronics announced Tuesday that it signed an agreement with Basic Applications Inc., a Hawthorne, N.Y.-based developer of sophisticated computer software, to incorporate the company's Unix software into Schlage's proximity access control systems.

Designed specifically for the integrated security systems, the Unix software will expand the capabilities of the Schlage products to perform

other security and financial management functions, according to Stu Knott, president of Schlage Electronics.

These functions include closed circuit television control, cardholder photograph capture, storage and retrieval, time and attendance, parking revenue control, elevator control, guard tour monitoring, etc.

''Integrating the adaptability of the Unix software with the Schlage access control hardware will allow us to offer our customers security management networks with extensive capabilities,'' Knott said.

Schlage will market the Unix software on a Hewlett-Packard computer platform through a select number of worldwide system integrators.

Commenting on the agreement, Dave Swartz, president of Basic Applications Inc. said, ''This new relationship allows us to concentrate our resources on the development of future system enhancements and to continue setting the standards for centrally controlled, distributed processing security management systems.''

Founded in 1974, Schlage Electronics is a leading manufacturer of innovative proximity access control products and security systems. In addition to its headquarters in Santa Clara, the company operates offices in the Netherlands, Hong Kong and Japan and has over 300 dealers in 43 countries.

Schlage is a wholly owned subsidiary of Ingersoll-Rand, a Woodcliff Lake, N.J.-based manufacturer of industrial machinery, construction equipment, pumps, mining machinery, bearings, door hardware and security systems.

LOS ANGELES (JULY 10) BUSINESS WIRE - J.P. Morgan & Co. has announced the expansion of its California Private Banking Group through the addition of three key staff in its California offices.

These additions signal the company's commitment to the California market with a strong local presence throughout the state. With offices in Los Angeles and San Francisco, the company provides a full range of financial resources to meet the sophisticated investment and banking needs of a targeted group of individuals, family groups, closely held corporations and philanthropic organizations throughout California.

''Our California operation is a key corporate focus in the 1990s,'' noted George Rowe, managing director of the firm's California Private Banking

Group. ''Our added staff in both Los Angeles and San Francisco will enable us to offer our clients increasingly sophisticated services from our domestic and international network.''

Staff additions are as follows:

Richard Jones has joined the Los Angeles office as vice president and will direct private banking services in Southern California. Jones was previously with the Morgan Guaranty Trust Co. in New York, J.P. Morgan's principal banking subsidiary, which he joined in 1983 and was appointed vice president in 1984.

During the past seven years, he has worked extensively with the firm's privately held business clients and high net worth individuals. Most recently, he has concentrated on private banking clients with significant investment banking, investment management and traditional banking needs.

Prior to joining Morgan, Jones worked for Bank of America where he started with an assignment in international banking. He was subsequently responsible domestically for mid-sized and Fortune 500 companies.

Jones received an undergraduate degree from Boston University and holds a graduate degree in international finance from Columbia University. He and his wife Randi reside in Agoura Hills with their two young children, Rebecca and Samuel.

Nancy London has joined the J.P. Morgan office in Los Angeles as vice president with a specialty in real estate. London comes to Los Angeles from the Morgan Guaranty Trust Co, Tokyo branch, which she joined in 1987. In Japan, she assisted in establishing the real estate group in Tokyo as well as developing real estate capabilities throughout the Asian region.

J.P. Morgan & Company Inc. provides banking and other financial services to corporations, governments, institutions and individuals throughout the world. Its activities include providing corporate finance advice and arranging financing for clients, underwriting and trading securities and managing pension and other investment funds.

In the United States, private banking offices are located in New York, Los Angeles, San Francisco, Palm Beach, Fla., and Wilmington, Del.

#90191b0259 07/10/1990 ~Business Wire

SAN JOSE, CALIF (JULY 10) BUSINESS WIRE - Corvus Systems Inc. announced a new version of its popular ReadyNet local area network that can be completely loaded into Upper Memory -- thus eliminating network software overhead.

ReadyNet 1.2, which also fully supports DOS 3.x to 4.x and volume sizes larger than 32 Mb, is immediately available for customer shipment.

Corvus has redesigned the ReadyNet executable network software to allow it to be loaded in the memory area between 640K and 1Mb, thus freeing conventional lower RAM for applications. The software has been tested with and supports the major Upper Memory access products on the market, including RYBS' Hi Card, the All-Charge Card, Quarterdeck's QEMM, and Corvus' ReadyRAM memory enhancement products.

When loaded into Upper Memory, ReadyNet's network software and hardware drivers take no lower DOS memory. ReadyNet loadable modules (e.g.; print spooler, and Virtual Console) still reside in lower memory and will take from 40K to 50K if loaded by the user.

ReadyNet was originally released in July 1989, and has received a popular reception as the first ''do-it-yourself'' local area network designed for over-the-counter consumer sales. ReadyNet's unique preconfiguration scheme automatically sets up the first users and logical connections upon installation, thus freeing the end-user from the task of setting up the network.

ReadyNet is available in two versions: a 1 Mbps version and a 4 Mbps version. Both versions feature ''snap-together'' hardware that requires no tools for installation and run over unshielded twisted-pair wiring.

The 1 Mbps ReadyNet Start-Up Kit, with complete hardware and software for two network nodes, retails for $499. The 1 Mbps Add-On Kit, with complete hardware and software for one additional network node, retails for $249.

Pricing for the 4 Mbps version is $850 for the Start-Up and $425 for the Add-On. Software for upgrading existing ReadyNet 1.0 network nodes is included in the new version and is also available from Corvus for a nominal charge.

Corvus Systems manufactures a complete line of local area network hardware and software products for IBM PC, PS/2, Macintosh, Apple II and compatible systems. More than half a million Corvus LAN nodes have been installed worldwide.

For additional information contact Corvus Systems Inc., 160 Great Oaks Blvd., San Jose, Calif. 95119, 408/281-4100.

#90191b0265 07/10/1990 ~Business Wire

LOS ANGELES (JULY 10) BUSINESS WIRE - Pacific Bell, AT&T and Telecom Australia Tuesday demonstrated a new benchmark in practical international videoconferencing by linking the United States and Australia via Integrated Services Digital Network at a switched rate of 336 kilobits per second.

In this latest achievement, a newly introduced Summit Communication Pty. Ltd. System 2000 multiplexing system was used in conjunction with Pacific Bell's recently introduced ISDN offering, CENTREX IS (Integrated Systems), and AT&T's 56-Kbps Switched Digital International Service to link Los Angeles and three sites in Australia.

In March, Pacific Bell, AT&T, Nippon Telegraph and Telephone Corp., and Kokusai Denshin Denwa Company Ltd. linked Los Angeles and Tokyo, using ISDN at 112 Kbps, to demonstrate that ISDN ''islands'' can be practically and economically connected.

In today's demonstration, the network connected a Pacific Bell office in Los Angeles, a new manufacturing facility in Sydney belonging to Summit Communications, and the University of New England campuses at Armidale and Coffs Harbour, Australia.

The compressed video signals traveled within the company's service area from the site of the videoconference in Los Angeles via Pacific Bell's CENTREX IS to AT&T's point of presence. From there, AT&T's Switched Digital International Service carried the video overseas.

The video signals were compressed from the standard bandwidth using Compression Labs Inc.'s Rembrandt II/06 low-bandwidth codec. Pacific Bell and CLI entered into a joint-marketing agreement in March, under which the phone company offers CLI's complete line of Gallery modular videoconferencing systems.

Summit Communications' System 2000 multiplexing system distributed the 336-Kbps outputs from the codecs among the six switched-56-Kbps circuits and then recombined them at the receiving ends. In Australia, the six channels were distributed over six B channels on a Telecom Australia ISDN primary-rate circuit.

To achieve 336 Kbps, six ISDN basic-rate channels were combined. Fifty-six-Kbps channels were used instead of the standard ISDN 64-Kbps clear channels because each channel required eight Kbps for in-band

signaling and synchronization.

''This demonstration is one more successful assault on the myth that ISDN is an 'island' technology,'' said Chuck Smith, Pacific Bell general manager for customer services in Los Angeles.

''Using digital transmission services that are available today, an ISDN network can be configured virtually anywhere -- across the nation or around the world. What's more, it can be done easily and economically.

''Further, this demonstration emphasized the enormous potential for videoconferencing,'' he said. ''For example, international videoconferencing could open classrooms even in isolated locales, such as Australia, to one-on-one exchanges between students and authorities on any subject from virtually anywhere in the world.''

''This international, ISDN connection uses the AT&T 5ESS Switch and Switched Digital International Service to provide customers with pay-as-you-go, high-speed communications at an economical price,'' said Dale Rogers, AT&T ISDN international applications manager.

''AT&T is committed to meeting business needs throughout the world by providing the technology and capabilities to support a full range of services,'' said Jim Jevicky, AT&T sales manager.

''Today's opening of our new factory, assures a ready worldwide availability of our new System 2000 multiplexer,'' said Phil Epthorp, executive director of Summit Communications.

Smith said that increasing the transmission speeds from 56 Kbps to 336 Kbps opens the door to a variety of new applications, including higher-quality video, bulk transfer of voice mail, imaging, graphics and local-area-network interconnection.

CENTREX IS is a basic-rate (2B+D) ISDN enhancement to the company's flagship business communications system. It is available in major metropolitan areas throughout California.

Pacific Bell is a subsidiary of Pacific Telesis Group, a diversified worldwide telecommunications corporation based in San Francisco.

#90191b0279 07/10/1990 ~Business Wire

SAN FRANCISCO (JULY 11) BUSINESS WIRE - The first step has been announced Tuesday to form the largest private medical center in Northern California.

Two of San Francisco's premier health care organizations, Northern California Health Center (NCHC), the parent company of Children's Hospital of San Francisco, and Pacific Presbyterian Medical Center, have agreed to merge.

Both boards unanimously approved the agreement which calls for a single organizational structure to be in place by the beginning of 1991 and a complete consolidation of both medical staffs by the end of 1992.

The new organization will be a member of the California Healthcare System (CHS), a regional health care system that already includes Pacific Presbyterian, Mills-Peninsula Hospitals and Marin General Hospital.

In addition to the hospital units of these institutions, NCHC brings its health maintenance organization, Bridgeway Plan For Health, to the new merger. Bridgeway Plan For Health is the second largest HMO in San Francisco serving 57,000 members in 10 Northern California counties with a network of 1,600 participating physicians and 27 hospitals.

The merger discussions started in the fall of 1989 and since then a joint task force, made up of board members and management leadership, has developed the overall guidelines for the merger process between the two institutions.

The new organization will include a parent company that will be responsible for the overall strategic planning for its three primary operating entities: A hospital corporation with one board will be formed with a single medical staff and management team; a merged, single foundation will serve as the fundraising arm of the new organization; and Bridgeway Plan For Health will continue to operate as a separate entity.

One immediate area of impact of the merger will be both hospitals' respective plans for a major cancer center. A separate task force is already in discussions about combining resources and eliminating duplicate services through the development of a cancer center.

Inital indications are that there will be cost savings as a result of this effort. Further study is required before definitive plans can be announced.

NCHC is currently the parent company for Children's Hopital of San Francisco, a 597-bed facility; Bridgeway Plan For Health; the Children's Hospital of San Francisco Foundation; Northern California Medical Services Inc., a for-profit subsidiary, and Northern California Ambulatory Health Services.

Pacific Presbyterian Medical Center, a 470-bed facility, includes the

341-bed general Pacific Presbyterian Hospital and the 129-bed Garden Sullivan Hospital offering long-term and skilled nursing care.

Also included on the campus are the Health Sciences Library and administrative and medical office buildings as well as the Medical Research Institute of San Francisco, Smith-Kettlewell Eye Research Foundation and the Northern California Transplant Bank.

CHS is a San Francisco Bay Area health care system. It was formed in 1986 as a parent organization with the purpose of enabling its members to jointly provide comprehensive health care services in response to the needs of the Bay Area.

#90191b0610 07/10/1990 ~Business Wire

ALAMEDA, CA (JULY 10) BUSINESS WIRE - Glycomed Inc. announced Tuesday it has signed an agreement with Washington University allowing it to license a new anticoagulant compound which may reduce side effects associated with current treatments for potentially life threatening blood clots.

The compound has the potential for a wide range of applications including deep vein thrombosis, coronary thrombosis, hemodialysis and to reduce blood clots formed following heart attacks.

The new anticoagulant was developed by Douglas M. Tollefsen, M.D., Ph.D., at Washington University in St. Louis, Mo. Tollefsen isolated a fragment from the carbohydrate dermatan sulfate, which is commonly found in body tissue such as blood vessels, to form the base of an anticoagulant.

Dermatan sulfate inhibits thrombin by binding it to the blood protein heparin cofactor II. Thrombin and heparin cofactor II are important proteins that participate in the body's coagulation process.

Synthetic compounds based on the dermatan sulfate fragment may produce the same effects as heparin, the most widely used anticoagulant, with fewer potentially dangerous side effects. Side effects include bleeding, reduced blood platelet counts and thrombosis caused by clumping of the platelets within the blood vessels.

Glycomed will continue investigation and development of the new pharmaceutical to eventually market it.

Glycomed is a privately held company that is developing complex carbohydrates for pharmaceutical applications. The company was formed in

1987 and is headquartered in Alameda.

SAN ANTONIO, TX (JULY 10) BUSINESS WIRE - OFFICE PRODUCTS OF AMERICA INC. (NASDAQ SYMBOL: OPOAA), Tuesday announced it has leased sites for four new Office Stop office supply warehouses in the Northeast.

The additional leases bring to eight the number of new stores the Company will have opened in less than one year since commencing retail operations.

Two of the new locations are in Baltimore, which, when combined with the existing Office Stop there, will total three Baltimore area stores. The additional two leases cover properties in Philadelphia, PA and Warwick, RI. The two new Baltimore area locations and the Warwick location are former Rickels Home- Improvement Center Stores.

Thomas J. Klimback, president and chief executive officer of OFFICE PRODUCTS OF AMERICA, INC. said, ''We are pleased by the signing of these additional leases. As a result, our plan to open eight stores by the end of 1990 is well ahead of the five openings originally forecasted.''

Klimback continued, ''By having three stores in the Baltimore area, the Office Stop stores will develop name recognition and a strong consumer franchise, as well as benefit from economies of scale in advertising and supervision.'' One of these locations represents a variation from Office Stop's ''original'' prototype office supply warehouse. It will include a centralized delivery outlet from which Office Stop will stock large inventories of office furniture for delivery to all three store trade areas within the Baltimore market. The centralized delivery outlet will be part of a 48,000 square-foot retail warehouse located in Towson, MD. Additionally, the company will occupy approximately 30,000 square feet of space in a structure in Glen Burnie, MD. Office Stop's first office supply warehouse opened in Baltimore in January.

The company also noted that Office Stop's third warehouse, a 30,120 square-foot facility located in Westbury, N.Y., opened on July 5.

OFFICE PRODUCTS OF AMERICA, INC. owns and operates ''Office Stop'' warehouses in Baltimore, MD, Paramus, NJ and Westbury, NY. The stores offer general office supplies, office equipment, office furniture and

other business-related products at discounts of 30 percent to 70 percent below manufacturers' suggested retail list prices.

The Company plans to open Office Stop warehouses throughout the New England, Middle Atlantic and South Atlantic states.

#90191b0617 07/10/1990 ~Business Wire
TORRANCE, CA (JULY 10) BUSINESS WIRE - Epson America Inc., Tuesday announced value enhancements to its EPL-6000 laser printer.

The company has reduced the manufacturer's suggested retail price from $1,499 to $1,399, and extended its standard warranty period from one to two years. In addition, from July 1 to Dec. 31, 1990, Epson will provide a 65-font cartridge free with every EPL-6000 purchase.

To supplement the EPL-6000's six resident fonts, 65 Hewlett Packard (HP)-compatible fonts are being offered during a special promotional period.

UDP Data Products' 65-in-One cartridge has a retail value of $249 and is identical to HP's Pro Collection font cartridge. It serves as a complete font solution for most general business applications, providing popular ''typewriter'' and typeset-look fonts ranging from 3.6 to 14 points in size, along with line-drawing capabilities and Optical Character Recognition (OCR-A).

Another key value enhancement is a two-year limited warranty that goes into effect on the date of purchase. This represents a $179 savings to end-users over the cost of an extended warranty to cover the additional one-year period.

The EPL-6000 includes convenience and performance features that make it

ideal for desktop publishing, presentation graphics and business reports.

With a reduced price, two-year warranty and font cartridge promotion, resellers have the opportunity to offer their customers a high-resolution printing solution that provides maximum value. The EPL-6000 is suited for use in large, medium and small businesses, as well as home offices. The EPL-6000 is available at Epson Authorized Resellers nationwide.

Epson America is a leading manufacturer and marketer of personal computer and imaging products serving the North American marketplace.

UDP Data Products, Torrance, manufactures high-quality font cartridges for printers sold by Epson, Hewlett-Packard and other major brands in the rapidly growing laser printer market sector.

#90191b0618 07/10/1990 ~Business Wire

SUNNYVALE, CA (JULY 10) BUSINESS WIRE - DAVID Systems and Four Corners Technology Tuesday announced an agreement with Arizona State University in Tempe, Ariz., to provide 10BASE-T Ethernet connectivity via unshielded twisted-pair wiring using the DAVID LAN family of DAVID ExpressNet (Hubs and Intelligent Concentrators) which support SNMP (Simple Network Management Protocol).

The initial installation on the Tempe campus of 82 Hubs and 55 Intelligent Concentrators involves 30 buildings containing 400 nodes with anticipated growth to 70 building with approximately 3,000 nodes.

The project encompasses both academic and administrative offices of the campus (e.g. library, Computer Science Center, Language and Literature building and the President's Office). This will allow access to all of the campus computing resources (e.g. IBM, DEC, CRAY, Tandem and departmental LANS) and to the Internet via Westnet.

The DAVID LAN product family includes the DAVID ExpressNet 10BASE-T Hub, Intelligent Concentrators (48 and 132 port), the DAVID ExpressView network management system, the recently announced VolksNet 10BASE-T Ethernet LAN for small network configurations, and the DAVID Ether-T Adapters for IBM personal computers and compatibles. DAVID Systems is currently shipping over 10,000 ports of 10BASE-T per month.

Formed to enhance the role of integrated digital communication, DAVID Systems supplied its first Ethernet LAN products in 1985. As a technical leader in its field, DAVID holds six communications patents and is an

active participant in the IEEE802.3 10BASE-T Consortium at the University of New Hampshire. DAVID Systems products emphasize integrated solutions for LANs, voice and data which are easy to expand and adapt to changing customer needs.

#90191b0620 07/10/1990 ~Business Wire

NEW YORK (JULY 10) BUSINESS WIRE - Information Management Technologies Corp. (''IMTECH'') (NASDAQ:IMTKA (common), IMTKU (units), IMTKW (warrants)) Tuesday announced that it has signed a mailroom, messenger and transport management services contract with the prestigious law firm, Mudge Rose Guthrie Alexander & Ferdon and an internal and external messenger service contract with Knight-Ridder.

IMTECH's management expects revenues from these new contracts to be approximately $2 million over the next three years. The contracts should begin to contribute to revenues during the second quarter which ends September 30, 1990.

Pierce Lowrey, President of IMTECH commented, ''We will coordinate all of the details associated with Mudge Rose's transport management services including parcel transportation, taxi services, and internal and external messenger operation providing a 'one vendor-one invoice' system. IMTECH will also be responsible for all facets of the reporting structure which will include a computerized cost allocation and tracking system. At Knight-Ridder, we will provide internal and external messenger services.

''IMTECH has the resources to maintain an outstanding level of service, and with centralized purchasing, invoice verification, and trend analysis. We also have the ability to reduce our clients operating costs,'' concluded Mr. Lowrey.

IMTECH provides on-site and off-site ''outsourcing'' of a wide range of back office services which includes Computer Output INformation System (COINS), electronic publishing, fulfillment, printing, reproduction and general mail room operations.

IMTECH's information facilities management (IFM) provides companies with

the ability to contract out ancillary services to reduce operating costs and improve productivity, thereby allowing management to focus on primary corporate objectives.
